10. gr. hljóðar svo:

Aðgangur og umferð um varnarsvæði.

Íslenskum starfsmönnum og öðrum sem eru ekki á ábyrgð varnarliðsins er heimill aðgangur að varnarsvæðunum ef þeir eiga þangað lögmæt erindi og hafa gilda aðgangsheimild, útgefna af sýslumanninum á Keflavíkurflugvelli, í samræmi við ákvæði laga þessara og ákvæði loftferðalaga. Heimilt er að takmarka eða synja um aðgangsheimild af öryggisástæðum eða ef allsherjarregla krefst þess.

Utanríkisráðherra skal í reglugerð kveða nánar á um för manna inn og út af varnarsvæðunum og um dvöl manna á þeim. Brot á reglunum varða tímabundinni sviptingu aðgangsheimildar samkvæmt ákvörðun sýslumanns eða varanlegri við ítrekuð brot. Sérlega alvarleg brot varða sektum eða fangelsi allt að tveimur árum.

5. Starfsreglur lífsýnasafnsins liggi fyrir, þar með taldar reglur safnsins um fyrirkomulag erlends samstarfs.
6. Tilnefnd sé safnstjórn, sbr. 6. gr., og einn einstaklingur sem sé ábyrgur fyrir lífsýnasafninu.
7. Ábyrgðarmaður lífsýnasafns skal vera læknir og hafa stundað sjálfstæð rannsókna- og þróunarstörf á sviði heilbrigðisvísinda. Sé um að ræða lífsýnasafn þar sem eingöngu eru lífsýni sem safnað er til notkunar í vísindarannsóknum er þó ekki gerð krafa um að ábyrgðarmaður sé læknir.
8. Að öryggismat og öryggisráðstafanir við söfnun og meðferð lífsýna séu í samræmi við reglur sem Persónuvernd setur um öryggi persónuupplýsinga í lífsýnasöfnum.

Ráðherra getur bundið leyfi frekari skilyrðum.

6. gr.

Stjórn lífsýnasafns.

Leyfishafi skipar a.m.k. þriggja manna stjórn yfir hverju lífsýnasafni sem skal hafa eftirlit með starfsemi þess. Stjórnin hefur upplýsingaskyldu gagnvart landlækni, Persónuvernd og vísindasiðanefnd um lífsýni og starfsemi lífsýnasafnsins.

III. KAFLI
Söfnun, meðferð og aðgangur að lífsýnum.

7. gr.

Samþykki lífsýnisgjafa og afturköllun þess.

Við öflun lífsýnis til vörslu í lífsýnasafni skal leitað eftir upplýstu, óþvinguðu samþykki þess sem lífsýnið gefur. Það skal veitt skriflega og af fúsum og frjálsum vilja eftir að lífsýnisgjafi hefur verið upplýstur um markmið með töku sýnisins, gagnsemi þess, áhættu samfara tökunni og að lífsýnið verði varðveitt til frambúðar í lífsýnasafni til notkunar skv. 9. gr. Auk þess skal gætt ákvæða 20. gr. laga um persónuvernd og meðferð persónuupplýsinga þar sem það á við.

Lífsýnisgjafi getur hvenær sem er afturkallað samþykki sitt skv. 1. mgr. og skal lífsýninu þá eytt. Efni sem unnið hefur verið úr lífsýni við framkvæmd rannsóknar eða niðurstöðum rannsóknar sem þegar hefur verið framkvæmd skal þó ekki eytt.

Hafi lífsýnum verið safnað vegna þjónusturannsókna eða meðferðar má ganga út frá ætluðu samþykki sjúklings fyrir því að lífsýnið verði vistað í lífsýnasafni til notkunar skv. 9. gr., enda sé þess getið í almennum upplýsingum frá heilbrigðisstarfsmanni eða heilbrigðisstofnun.

Lífsýnisgjafi getur hvenær sem er afturkallað ætlað samþykki sitt fyrir að sýni hans verði vistað í lífsýnasafni til notkunar skv. 9. gr. og skal það þá einungis notað í þágu lífsýnisgjafa eða með sérstakri heimild hans, sbr. þó 4. mgr. 9. gr. Beiðni lífsýnisgjafa getur varðað öll lífsýni sem þegar hafa verið tekin eða kunna að verða tekin úr honum. Skylt er að verða við slíkri beiðni. Lífsýnisgjafi skal tilkynna landlækni um ósk sína. Landlæknir skal annast gerð eyðublaða fyrir slíkar tilkynningar og sjá til þess að þau liggi frammi á heilbrigðisstofnunum og hjá sjálfstætt starfandi heilbrigðisstarfsmönnum. Landlæknir skal sjá til þess að dulkóðuð úrsagnaskrá yfir viðkomandi sjúklinga sé ávallt aðgengileg stjórnum lífsýnasafna. Þeir starfsmenn landlæknis sem starfa við framangreint eru bundnir þagnarskyldu um atriði sem þeir

komast að við störf sín og leynt skulu fara samkvæmt lögum eða eðli máls. Skulu þeir undirrita þagnarheit áður en þeir taka til starfa. Þagnarskylda helst þótt látið sé af starfi.

8. gr.

Varðveisla lífsýna.

Lífsýni skulu tryggilega geymd og merkt, en varðveitt án persónuauðkenna. Tengsl lífsýna við persónuauðkenni skulu vera í samræmi við staðla sem Persónuvernd ákveður.

Varsla lífsýna skal vera þannig að þau glatist hvorki né skemmist og að óviðkomandi hafi ekki aðgang að þeim.

Ákveði leyfishafi að hætta rekstri lífsýnasafns, eða sé hann sviptur leyfi skv. 14. gr., skal ráðherra, að fengnu áliti landlæknis, Persónuverndar og vísindasiðanefndar, taka ákvörðun um ráðstöfun lífsýnasafnsins en taka skal tillit til óska og tillagna leyfishafa.

9. gr.

Aðgangur að lífsýnasafni og notkun lífsýna.

Lífsýni skulu fengin í skýrt tilgreindum og lögmætum tilgangi og ekki notuð í öðrum tilgangi, sbr. þó 2., 3. og 4. mgr.

Ábyrgðarmaður safns veitir aðgang að lífsýnum til frekari greiningar sjúkdóma. Honum er einnig heimilt að veita aðgang að lífsýnum til notkunar við gæðaeftirlit, aðferðaþróun og kennslu, enda séu þau ekki með persónuauðkennum.

Safnstjórn gerir samninga við vísindamenn um aðgang að lífsýnum. Ekki er þó heimilt að veita aðgang að lífsýnum til vísindarannsókna fyrr en aflað hefur verið leyfis Persónuverndar samkvæmt lögum um persónuvernd og meðferð persónuupplýsinga og fyrir liggur rannsóknaáætlun samþykkt af vísindasiðanefnd eða siðanefnd viðkomandi heilbrigðisstofnunar sem skipuð er samkvæmt ákvæðum laga um réttindi sjúklinga og reglugerða samkvæmt þeim.

Safnstjórn getur, að fengnu leyfi Persónuverndar og vísindasiðanefndar, heimilað notkun lífsýna í öðrum tilgangi en ætlað var þegar þau voru tekin, enda mæli brýnir hagsmunir með því og ávinningurinn vegi þyngra en hugsanlegt óhagræði fyrir lífsýnisgjafann eða aðra aðila.

Ráðherra skal, að fengnum tillögum landlæknis, vísindasiðanefndar og Persónuverndar, setja reglugerð með frekari ákvæði um notkun lífsýna.

10. gr.

Umráðaréttur og gjaldtaka.

Leyfishafi telst ekki eigandi lífsýnanna en hefur umráðarétt yfir þeim með þeim takmörkunum sem lög kveða á um og ber ábyrgð á að meðferð þeirra sé í samræmi við ákvæði laga þessara og stjórnvaldsfyrirmæla sem sett eru á grundvelli þeirra. Leyfishafa er því óheimilt að framselja lífsýnin eða setja þau að veði til tryggingar fjárskuldbindingum og þau eru ekki aðfararhæf.

Leyfishafa er heimilt að taka gjald fyrir lífsýni, eða aðgang að lífsýni, sem nemur kostnaði við öflun, vörslu og aðgang að sýnunum. Gjaldtaka umfram það er óheimil.

Heimilt er að senda lífsýni úr landi í þágu lífsýnisgjafa, vegna sjúkdómsgreininga eða gæðaeftirlits. Annar flutningur lífsýna úr landi er háður samþykki vísindasiðanefndar og Persónuverndar og með þeim skilyrðum sem þær setja.

11. gr.

Þagnarskylda.

Allir starfsmenn lífsýnasafna og þeir sem fá aðgang að þeim eru bundnir þagnarskyldu um atriði sem þeir komast að við störf sín og leynt skulu fara samkvæmt lögum eða eðli máls. Þagnarskyldan helst eftir að starfi, rannsókn eða kennslu lýkur.

IV. KAFLI
Eftirlit og upplýsingaskylda.

12. gr.

Eftirlit.

Ábyrgðarmaður lífsýnasafns ber ábyrgð á því að viðhaft sé innra eftirlit og að öryggismat sé framkvæmt reglulega í samræmi við ákvæði 11. og 12. gr. laga um persónuvernd og meðferð persónuupplýsinga.

Persónuvernd hefur eftirlit með öryggi persónuupplýsinga í lífsýnasöfnum. Um eftirlit Persónuverndar með lífsýnasöfnum gilda ákvæði 4. mgr. 35. gr., 2. og 3. mgr. 37. gr. og 38.–43. gr. laga um persónuvernd og meðferð persónuupplýsinga.

Landlæknir annast eftirlit með lífsýnasöfnum að svo miklu leyti sem slíkt eftirlit er ekki í höndum Persónuverndar eða vísindasiðanefndar.

13. gr.

Upplýsingaskylda stjórnvalda og stjórna lífsýnasafna.

Landlækni er skylt að kynna ítarlega fyrir almenningi ákvæði laga þessara um lífsýnasöfn, sérstaklega ákvæðið um ætlað samþykki lífsýnisgjafa vegna þjónusturannsóknar, svo og rétt einstaklinga skv. 7. gr. og 3. mgr. þessarar greinar.

Landlæknir skal árlega gefa út skrá um lífsýnasöfn, tilgang þeirra, starfsemi og starfsreglur. Í skránni skal m.a. koma fram hverjir skipi stjórn hvers safns og hver sé ábyrgðarmaður. Skrá þessi skal kynnt og vera aðgengileg almenningi.

Safnstjórn eða landlækni er skylt að veita einstaklingi upplýsingar um hvort lífsýni úr honum eru geymd í lífsýnasafni og hvers konar lífsýni það eru.

V. KAFLI
Refsingar og önnur viðurlög.

14. gr.

Ráðherra getur afturkallað leyfi samkvæmt lögum þessum ef leyfishafi eða starfsmenn hans brjóta gegn ákvæðum laganna eða stjórnvaldsfyrirmælum sem sett eru á grundvelli þeirra, skilyrðum leyfis er ekki fullnægt eða leyfishafi verður ófær um að reka safnið. Brjóti leyfishafi gegn ákvæðum laga þessara eða hlíti ekki skilyrðum þeim sem sett eru í leyfinu skal ráðherra veita honum skriflega viðvörun og hæfilegan frest til úrbóta. Sinni leyfishafi ekki slíkri viðvörun skal afturkalla leyfi. Sé um ásetning að ræða eða stórfellt gáleysi getur ráðherra afturkallað starfsleyfi án undanfarandi viðvörunar eða frests til úrbóta.

15. gr.

Brot gegn ákvæðum laga þessara og stjórnvaldsfyrirmæla sem sett eru á grundvelli þeirra varða sektum eða fangelsi allt að þremur árum nema þyngri refsing liggi við samkvæmt öðrum lögum.

Dæma má lögaðila jafnt sem einstaklinga til greiðslu sekta vegna brota á lögunum. Lögaðila má ákvarða sekt án tillits til þess hvort sök verður sönnuð á starfsmann hans. Hafi

starfsmaður lögaðila framið brot á lögum þessum eða stjórnvaldsfyrirmælum settum samkvæmt þeim má einnig gera lögaðilanum sekt. Lögaðili ber ábyrgð á greiðslu sektar sem starfsmaður hans er dæmdur til að greiða vegna brota á lögum þessum, enda séu brot tengd starfi hans hjá lögaðilanum.

Ráðherra er heimilt að setja reglugerðir um frekari framkvæmd laga þessara.

Ráðherra skal setja reglugerð um hvernig veita skuli upplýsingar um ætlað samþykki skv. 3. mgr. 7. gr., hvernig tryggja skuli að afturköllun á ætluðu samþykki lífsýnisgjafa skv. 4. mgr. 7. gr. verði virt, um úrsagnaskrá og fyrirkomulag hennar, sbr. 4. mgr. 7. gr., og hvernig tryggja skuli jafnræði þeirra sem óska eftir aðgangi að lífsýnasöfnum vegna vísindarannsókna skv. 3. mgr. 9. gr.

Skal áætla gjaldstofn svo ríflega að eigi sé hætt við að fjárhæðir séu áætlaðar lægri en þær eru í raun og veru og ákvarða lyfjaeftirlitsgjald í samræmi við þá áætlun. Heimilt er að endurákvarða álagningu ef álagningarstofn breytist.

(Eftir 2. umr., 12. maí.)

Sjúklingar sem lögin taka til.

1. gr.

Rétt til bóta samkvæmt lögum þessum eiga sjúklingar, sbr. 2. gr. laga um réttindi sjúklinga, sem verða fyrir líkamlegu eða geðrænu tjóni hér á landi í tengslum við rannsókn eða sjúkdómsmeðferð á sjúkrahúsi, heilsugæslustöð eða annarri heilbrigðisstofnun, í sjúkraflutningum eða hjá heilbrigðisstarfsmanni sem starfar sjálfstætt og hlotið hefur löggildingu heil-

brigðis- og tryggingamálaráðherra til starfans. Sama á við um þá sem missa framfæranda við andlát slíkra sjúklinga.

Sjúklingar sem brýn nauðsyn er að vista á erlendu sjúkrahúsi eða á annarri heilbrigðisstofnun erlendis, sbr. 35. gr. almannatryggingalaga, og verða fyrir líkamlegu eða geðrænu tjóni í tengslum við rannsókn eða sjúkdómsmeðferð á viðkomandi stofnun eiga rétt á bótum samkvæmt lögum þessum, að frádregnum bótum sem þeir kunna að eiga rétt á í hinu erlenda ríki.

Þeir sem gangast undir læknisfræðilega tilraun sem ekki er liður í sjúkdómsgreiningu eða meðferð á sjúkdómi þess er í hlut á eiga sama rétt og sjúklingar samkvæmt lögum þessum nema annars sé getið sérstaklega.

Þeir sem gefa vef, líffæri, blóð eða annan líkamsvökva eiga sama rétt og sjúklingar samkvæmt lögum þessum nema annars sé getið sérstaklega.

Tjónsatvik sem lögin taka til.

2. gr.

Bætur skal greiða án tillits til þess hvort einhver ber skaðabótaábyrgð samkvæmt reglum skaðabótaréttarins, enda megi að öllum líkindum rekja tjónið til einhvers eftirtalinna atvika:

1. Ætla má að komast hefði mátt hjá tjóni ef rannsókn eða meðferð við þær aðstæður sem um ræðir hefði verið hagað eins vel og unnt hefði verið og í samræmi við þekkingu og reynslu á viðkomandi sviði.
2. Tjón hlýst af bilun eða galla í tæki, áhöldum eða öðrum búnaði sem notaður er við rannsókn eða sjúkdómsmeðferð.
3. Mat sem síðar er gert leiðir í ljós að komast hefði mátt hjá tjóni með því að beita annarri meðferðaraðferð eða -tækni sem völ var á og hefði frá læknisfræðilegu sjónarmiði gert sama gagn við meðferð sjúklings.
4. Tjón hlýst af meðferð eða rannsókn, þ.m.t. aðgerð, sem ætlað er að greina sjúkdóm og tjónið er af sýkingu eða öðrum fylgikvilla sem er meiri en svo að sanngjarnt sé að sjúklingur þoli það bótalaust. Annars vegar skal líta til þess hve tjón er mikið og hins vegar til sjúkdóms og heilsufars sjúklings að öðru leyti. Þá skal taka mið af því hvort algengt er að tjón verði af meðferð eins og þeirri sem sjúklingur gekkst undir og hvort eða að hve miklu leyti gera mátti ráð fyrir að hætta væri á slíku tjóni.

3. gr.

Greiða skal bætur fyrir tjón sem hlýst af því að sjúkdómsgreining er ekki rétt í tilvikum sem nefnd eru í 1. eða 2. tölul. 2. gr. Þetta á hins vegar ekki við um atvik sem falla undir 3. og 4. tölul. 2. gr.

Slasist sjúklingur af öðrum orsökum en þeim sem greindar eru í 2. tölul. 2. gr. skal því aðeins greiða bætur að sjúklingur hafi verið í rannsókn eða meðferð hjá stofnun eða öðrum aðila sem lögin taka til og slysið hafi borið að þannig að telja verði að þeir beri bótaábyrgð samkvæmt almennum reglum skaðabótaréttar.

Bætur samkvæmt lögum þessum greiðast ekki ef rekja má tjón til eiginleika lyfs sem notað er við rannsókn eða sjúkdómsmeðferð.

4. gr.

Bætur skal greiða einstaklingum sem nefndir eru í 3. og 4. mgr. 1. gr. ef þeir verða fyrir tjóni sem getur verið afleiðing læknisfræðilegrar tilraunar, brottnáms vefs eða annars þess háttar, nema allt bendi til þess að tjónið verði rakið til annars.

Ákvæði 1. mgr. á ekki við um tjón sem rekja má til eiginleika lyfs sem notað er við rannsókn eða sjúkdómsmeðferð, sbr. 3. mgr. 3. gr.

Ákvörðun bóta.

5. gr.

Um ákvörðun bótafjárhæðar samkvæmt lögum þessum fer eftir skaðabótalögum, sbr. þó 2. mgr. 10. gr.

Bætur skv. 1. mgr. greiðast ef virt tjón nemur 50 þús. kr. eða hærri fjárhæð. Hámark bótafjárhæðar fyrir einstakt tjónsatvik skal þó vera 5.000.000 kr. Fjárhæðir þessar breytast miðað við 1. janúar ár hvert í samræmi við lánskjaravísitölu.

Ákvæði 2. mgr. og reglugerðar sem kann að verða sett með heimild í henni taka ekki til tjóns sem um ræðir í 1. mgr. 4. gr., sbr. 3. og 4. mgr. 1. gr.

Bygging og uppsetning hafstöðvar og vinnsla kolvetnis getur einungis hafist að fengnu samþykki iðnaðarráðherra.

Vilji leyfishafi hefja slíka starfsemi skal hann leggja framkvæmda- og vinnsluáætlun fyrir iðnaðarráðherra til samþykktar.

Iðnaðarráðherra er heimilt að gera breytingar á áður samþykktri framkvæmda- og vinnsluáætlun til þess að tryggja að starfsemin sé örugg og hagkvæm eða ef hagsmunir hins opinbera krefjast þess.

16. gr.

Lokun hafstöðvar.

Lokun hafstöðvar, þ.m.t. stöðvun á viðhaldi, er háð samþykki iðnaðarráðherra. Leyfishafi skal leggja fram áætlun um lokun hafstöðvar fyrir iðnaðarráðherra til samþykktar þar sem m.a. skulu vera upplýsingar um hvernig staðið verður að lokun.

Við lokun hafstöðvarinnar skal hún að jafnaði fjarlægð í heild eða að hluta. Iðnaðarráðherra getur þó samþykkt áframhaldandi notkun hennar til rannsókna og vinnslu kolvetnis eða annars konar notkun.

Ef ástæða er til að ætla að leyfishafi hafi ekki fjárhagslegt bolmagn til að greiða kostnað vegna lokunar hafstöðvar getur iðnaðarráðherra hvenær sem er farið fram á það við leyfishafa að hann sanni greiðslugetu sína eða láti af hendi nauðsynlegar tryggingar.

17. gr.

Leiðslubúnaður.

Bygging og starfræksla leiðslubúnaðar til vinnslu og flutnings kolvetnis er háð leyfi iðnaðarráðherra. Í leyfi skal m.a. setja skilyrði um skipulag búnaðarins, afnot annarra af honum og greiðslur fyrir afnotin.

Ákvæði 1. mgr. gilda ekki um staðbundinn leiðslubúnað sem tilheyrir hafstöð og einungis er notaður til vinnslu úr einni kolvetnisauðlind.

Nái leiðslubúnaður leyfishafa til landsvæðis eða landgrunns annars ríkis og samstarfssamningur um byggingu og starfrækslu leiðslukerfisins hefur verið gerður milli þess ríkis og íslenska ríkisins getur iðnaðarráðherra lagt þá skyldu á leyfishafa íslenska hluta leiðslubúnaðarins að taka þátt í samstarfinu og sett nánari skilyrði um þátttökuna.

18. gr.

Leiðslubúnaður erlends ríkis.

Bygging og starfræksla leiðslubúnaðar á vegum annars ríkis til flutnings á kolvetni milli landa um landgrunn Íslands er háð leyfi iðnaðarráðherra.

19. gr.

Skipting kolvetnisauðlindar.

Nái kolvetnisauðlind inn á svæði þar sem tveir eða fleiri hafa rannsókna- og vinnsluleyfi er leyfishöfum skylt að gera með sér samstarfssamning um framkvæmd rannsókna og vinnslu úr auðlindinni. Samstarfssamningurinn er háður samþykki iðnaðarráðherra. Náist ekki samkomulag milli leyfishafanna innan hæfilegs tíma er iðnaðarráðherra heimilt að kveða á um innihald hans.

Nái kolvetnisauðlind yfir í landgrunn annars ríkis og samstarfssamningur um framkvæmd rannsókna og vinnslu úr kolvetnisauðlindinni hefur verið gerður milli þess ríkis og íslenska ríkisins getur iðnaðarráðherra lagt þá skyldu á leyfishafa á landgrunni Íslands að taka þátt í samstarfinu og sett nánari skilyrði um þátttökuna.

20. gr.

Samnýting kolvetnisauðlinda.

Telji iðnaðarráðherra skynsamlegt að samnýta tvær eða fleiri kolvetnisauðlindir af hagkvæmnisástæðum getur hann, að höfðu samráði við leyfishafa, krafist þess að svo verði gert.

Iðnaðarráðherra er heimilt að skylda leyfishafa gegn endurgjaldi til að veita öðrum leyfishöfum aðgang að búnaði og flutningstækjum með slíka samnýtingu í huga. Nái leyfishafar ekki samkomulagi um endurgjald fyrir afnotin skal það ákveðið af iðnaðarráðherra.

21. gr.

Mat á umhverfisáhrifum.

Við veitingu leyfis eða samþykkis fyrir starfsemi samkvæmt þessum kafla skal gætt ákvæða laga um mat á umhverfisáhrifum.

V. KAFLI
Vinnuumhverfi og öryggisráðstafanir.

22. gr.

Öryggisráðstafanir.

Við kolvetnisstarfsemi skal gæta fyllsta öryggis og þess að starfsemin uppfylli þær kröfur sem almennt eru gerðar til kolvetnisstarfsemi á hverjum tíma, m.a. hvað varðar tæknibúnað og vinnuferli.

Leyfishafi og aðrir sem stunda kolvetnisstarfsemi skulu stuðla að góðum aðbúnaði, hollustuháttum og öryggi á vinnustöð og að virkt eftirlit sé með því að vinnuumhverfi fullnægi gildandi lögum.

Leyfishafi skal sjá til þess að gera nauðsynlegar ráðstafanir til að fyrirbyggja eða draga úr afleiðingum tjóns, þar á meðal ráðstafanir sem miða að því að færa umhverfið í sitt fyrra horf.

Iðnaðarráðherra er heimilt að setja nánari reglur um hafstöðvar.

23. gr.

Sérstök öryggisbelti.

Sérstöku öryggisbelti skal komið á fót umhverfis hafstöðvar. Iðnaðarráðherra setur nánari reglur um öryggisbelti í samræmi við alþjóðlegar venjur, þar á meðal um samgöngur og fiskveiðar á svæðinu, og getur hann lagt bann við umferð óviðkomandi skipa og loftfara um svæðið. Þá getur iðnaðarráðherra sett reglur af öryggisástæðum sem takmarka rétt skipa til að festa akkeri og stunda veiðar í nágrenni við leiðslubúnað.

Skaðabætur.

Leyfishafar samkvæmt lögum þessum eru skaðabótaskyldir fyrir hvers konar tjón sem stafar af kolvetnisstarfsemi, þar á meðal umhverfispjöll, án tillits til þess hvort tjónið verður rakið til sakar.

Skaðabótaskyldan fellur niður ef sannað er að sá sem fyrir tjóni verður hefur valdið tjóninu af ásetningi eða stórfelldu gáleysi.

Bætur fyrir umhverfisspjöll má lækka eða fella niður þegar sannað þykir að tjónið stafaði af náttúruhamförum eða öðrum óviðráðanlegum atvikum sem leyfishafa verður ekki kennt um.

Lög þessi öðlast þegar gildi.

Athugasemdir við lagafrumvarp þetta.

I.
Inngangur.

Aðdragandi þessa frumvarps er sá að 13. maí 1997 samþykkti Alþingi svohljóðandi ályktun um olíuleit við Ísland:

„Alþingi ályktar að fela iðnaðarráðherra að skipa starfshóp með þátttöku vísindamanna er meti hvort rétt sé að hefja markvissar rannsóknir á því hvort olía eða gas finnst á landgrunni Íslands. Hópurinn meti sérstaklega þau svæði á landgrunninu sem fyrirliggjandi rannsóknir benda til að líklegust séu til að geyma olíu eða gas.“

Iðnaðarráðherra skipaði 29. september 1997 starfshóp um olíuleit á landgrunni Íslands. Viðfangsefni starfshópsins var nánar skilgreint svo í bréfi ráðuneytisins:

„Hlutverk hópsins er í fyrsta lagi að yfirfara niðurstöður rannsókna á landgrunninu og meta á grundvelli þeirra hvort og þá hvaða svæði landgrunnsins kunni að geyma olíu og/eða jarðgas og gefa ráðuneytinu skýrslu um það. Ef líklegt er talið að einhver svæði landgrunnsins kunni að geyma olíu og/eða jarðgas er honum enn fremur falið:

1. *Að meta hvort ætla megi að tæknilegar og fjárhagslegar forsendur séu til olíuvinnslu á þessum svæðum.*
2. *Að gera tillögur um með hvaða hætti má efla rannsóknir á svæðum.*
3. *Að gera tillögur um kynningu á þessum svæðum til að efla áhuga innlendra og erlendra aðila á svæðunum.“*

Starfshópurinn skilaði áliti sínu 17. ágúst 1998 og var það birt í skýrslu iðnaðar- og viðskiptaráðuneytisins „Leit að olíu við Ísland og á nálægum hafsbotni“ sem út kom í október 1998. Í álitinu fjallaði starfshópurinn sérstaklega um líkur á að olíu eða gas væri að finna á landgrunni Íslands í setlögum fyrir Norðurlandi, en tók einnig fyrir tvö önnur svæði þar sem Íslendingar kunna að eiga rétt til slíkra auðlinda, Jan Mayen svæðið og Hatton-Rockall svæðið. Meginniðurstöður starfshópsins voru í stuttu máli þessar:

Í fyrsta lagi virðast engir tæknilegir þættir vera til staðar sem komið gætu í veg fyrir olíuvinnslu á landgrunni Íslands ef slíkar lindir fyndust í nægjanlegum mæli. Lauslegt mat bendir til að hagkvæmt yrði að vinna lindir stærri en 100-200 milljónir fata, magn sem rúmast gæti í einum rúmkílómetra af bergi. Gaslindir eru síður líklegar til að vera hagkvæmar.

Í öðru lagi eru nokkrar líkur á að almenn skilyrði fyrir olíu- eða gasmyndun séu fyrir

hendi í setlögum undan ströndum Norðurlands, eða 1 á móti 10 fyrir gas, en 1 á móti 40 fyrir olíu. Þessar líkur eru hins vegar minni en svo að þær freisti olíufyrirtækja að svo stöddu. Frekari rannsóknir gætu þó hugsanlega bætt þetta mat.

Í þriðja lagi er frumrannsóknum á Jan Mayen hrygg lokið, en þær voru framkvæmdar í samvinnu við norsk stjórnvöld. Svæðið er álitlegt til frekari olíuleitar en framhaldið mun ráðast af áhuga olíufyrirtækja. Jarðfræðilegar aðstæður gætu verið svipaðar og á vinnslusvæðum á landgrunni Noregs, en svæðið er afskekkt miðað við þau svæði sem nú eru í vinnslu. Þess vegna er ekki búist við því að olíufyrirtæki muni hefja leit á Jan Mayen hrygg fyrr en í fyrsta lagi eftir rúman áratug.

Í fjórða lagi er Hatton-Rockall svæðið einnig vænlegt til olíuleitar, einkum austurjaðar þess. Bretar og Írar hafa þegar veitt olíufyrirtækjum leyfi á þessu svæði innan 200 sjómílna efnahagslögsögu sinnar. Auk Íslands hafa Danmörk f.h. Færeyja, Bretland og Írland gert kröfu til svæðisins og er réttarstaða á svæðinu því óljós. Nauðsynlegt er að fylgjast vel með framþróun olíuleitar og hafréttarmála á þessu svæði og gæta íslenskra hagsmuna.

Ljóst er af framangreindum niðurstöðum að leynast kunna verðmæt olíuefni undir hafsbotni einhvers staðar á þeim víðáttumiklu hafsvæðum þar sem Ísland á landgrunnsréttindi.

Iðnaðarráðherra skipaði hinn 17. febrúar 1999 samráðsnefnd um landgrunns- og olíuleitarmál með fulltrúum frá Orkustofnun, iðnaðarráðuneyti og utanríkisráðuneyti. Hlutverk nefndarinnar er einkum að gæta að gæta íslenskra hagsmuna á sviði olíu- og landgrunnsmála, m.a. að gera tillögu um stefnu sem skuli fylgt við veitingu rannsókna- og vinnsluleyfa á landgrunninu og taka þátt í mótun reglna um það efni. Auk þess skyldi samráðsnefndin samhæfa vinnubrögð íslenskra stjórnvalda vegna fyrirspurna olíuleitarfyrirtækja og annarra aðila um rannsóknar- og nýtingarleyfi innan efnahagslögsögunnar.

Erlend olíufyrirtæki hafa sýnt áhuga á olíuleit innan íslenskrar lögsögu. Viðræður samráðsnefndarinnar við þessa aðila og aðra tengda olíuleit hafa hins vegar leitt í ljós að forsenda þess að erlend fyrirtæki fáist til að fjármagna leit að olíu og gasi í íslenskri lögsögu er að hér verði sett lög um þessa starfsemi. Slík lög hafa verið sett í öllum nágrannaríkjum okkar.

Í ljósi fyrrgreindra atriða ákvað ráðuneytið að hefja smíði frumvarps til laga um leit og vinnslu á olíu og gasi. Við samningu frumvarpsins hefur verið höfð hliðsjón af norrænni löggjöf sem gildir um hliðstætt efni, þ.e. í Færeyjum, Grænlandi og Noregi. Þá hefur verið nauðsynlegt vegna aðildar Íslands að Evrópska efnahagssvæðinu að samræma ákvæði frumvarps þessa löggjöf Evrópusambandsins, en tilskipanir sem hliðsjón var höfð af eru tilskipun 90/531/EBE frá 17. september 1990 um reglur um innkaup fyrirtækja sem sinna vatnsveitu, orkuveitu, flutningum og fjarskiptum, tilskipun 93/38/EBE frá 14. júní 1993 um samræmingu reglna um innkaup fyrirtækja sem annast vatnsveitu, orkuveitu, flutninga og fjarskipti og loks tilskipun 94/22/EB frá 30. maí 1994 um skilyrði fyrir veitingu og notkun leyfa til að leita að, rannsaka og vinna kolvatnsefni.

II.

Þörfin á löggjöf um leit, rannsóknir og vinnslu kolvetnis.

Ekki er til sérstök löggjöf á Íslandi er tekur til leitar, rannsókna og vinnslu kolvetnis. Þörf á slíkri löggjöf er þó fyrir hendi, enda sýnir reynslan að erlend olíufyrirtæki veigra sér við að hefja leit, rannsóknir og vinnslu á kolvetni nema til sé slík löggjöf. Samkvæmt lögum nr. 73/1990, um eignarrétt íslenska ríkisins að auðlindum hafsbotnsins, hefur iðnaðarráðherra að vísu almenna heimild til að veita leyfi til hagnýtingar á auðlindum hafsbotnsins. Á grundvelli þeirra laga er ráðherra heimilt að veita leyfi til leitar, rannsókna og vinnslu kolvetnis utan netlaga, en að öðru leyti hafa lögin ekki að geyma nein fyrirmæli um veitingu leyfa eða

tímalengd þeirra. Þess vegna verður að telja brýnt að réttarstaða leyfishafa sé skýr áður en þeir leggja í fjárfestingar á þessu sviði. Horfa ákvæði frumvarps þess, sem hér liggur fyrir, mjög í þá átt að skýra réttarstöðu þeirra sem sækja um leyfi til leitar, rannsókna eða vinnslu kolvetnis á landgrunni Íslands.

Meginmarkmið frumvarpsins er að koma til móts við þessa þörf með því að setja rammalöggjöf um leit, rannsóknir og vinnslu kolvetnis. Við samningu frumvarpsins þurfti að taka afstöðu til þess hvernig standa ætti að veitingu leyfa til leitar, rannsóknar og vinnslu kolvetnis. Löggjöf nágrannaríkjanna er að ýmsu leyti heppileg fyrirmynd eins og rakið er nánar hér á eftir. Þó verður að gera þann fyrirvara að aðstæður í þessum ríkjum eru að ýmsu leyti frábrugðnar aðstæðum á Íslandi. Þannig eru líkur á því að á landgrunni Íslands finnist kolvetni í nægjanlegu magni til að vinnsla þess sé efnahagslega hagkvæm, minni en í nágrannaríkjunum. Þess vegna er ekki ástæða til að hafa eins ítarlega löggjöf og þar er að finna. Markmiðið með frumvarpinu er því fyrst og fremst að setja rammalöggjöf um leit, rannsóknir og vinnslu kolvetnis til þess að skýra réttarstöðu þeirra sem hyggjast stunda þessa starfsemi.

III.
Almennt um kolvetnisstarfsemi.

1. Almennt.

Mismunandi er hvernig einstök ríki haga kolvetnisstarfsemi sinni. Ástæður þessa eru margvíslegar. Í fyrsta lagi hafa fyrirmyndir um stjórn olíuvinnslu verið sóttar til vinnslu annarra náttúruauðlinda. Í öðru lagi má nefna að stjórnun olíuvinnslu hefur í tímanna rás orðið fyrir áhrifum nýrrar tækni, ólíkra hagkerfa og breytilegra stjórnarhátta. Í þriðja lagi skal það nefnt að mismunandi er frá einu ríki til annars hvernig landfræðilegri legu, þróunarstigi, stjórnmálahefð og hagkerfi er háttað. Loks má nefna að náttúruauðindir eru ólíkar hvað varðar staðsetningu, stærð o.fl.

Almennt má skipta fyrirkomulagi kolvetnisstarfsemi í tvo flokka. Annars vegar hlutdeildar- eða verktökufyrirkomulag (e. production sharing contract eða service contract) og hins vegar sérleyfisfyrirkomulag (e. concession model eða tax/royalty model). Að auki má nefna að í sumum ríkjum er olíuvinnsla eingöngu í höndum ríkisins, að jafnaði í formi olíufyrirtækis í eigu ríkisins. Á Vesturlöndum er algengast að ríkið veiti sérleyfi til olíuvinnslu, en í nokkrum ríkjum Evrópu er þó einnig um að ræða þátttöku ríkisins í gegnum olíufyrirtæki í ríkiseigu, sbr. t.d. Grænland, Danmörk og Noregur. Hér á eftir verður nánar gerð grein fyrir flokkun kolvetnisstarfsemi, en hafa ber í huga að flokkunin er engan veginn einhlít og mörkin milli einstakra flokka geta verið óljós.

2. Sérleyfi.

Með sérleyfi er átt við það að yfirvöld veita fyrirtæki leyfi til að nýta landsvæði í því augnamiði að leita að, rannsaka eða vinna kolvetni. Sögulega er sérleyfi hið upprunalega fyrirkomulag olíuvinnslu. Þegar um er að ræða sérleyfi eru yfirráð kolvetnisauðlinda í höndum ríkisins sem veitir olíufyrirtækjum leyfi til ákveðins tíma og með ákveðnum skilyrðum til þess að framleiða kolvetni á eigin kostnað og áhættu gegn greiðslu skatta og gjalda. Þegar þetta fyrirkomulag er viðhaft á fyrirtækið kolvetnið sem er framleitt. Á hinn bóginn geta stjórnvöld krafist þess að skattar og gjöld séu greidd að öllu leyti eða hluta í formi kolvetnis. Ríkið, sem eigandi auðlindanna, fær arð aðallega í formi skatta og gjalda, en einnig í vissum tilvikum sem hagnað af starfsemi olíufyrirtækis í ríkiseign. Sérleyfisfyrirkomulag kemur ekki í veg fyrir að rekin séu olíufyrirtæki í ríkiseigu sem geta tekið þátt í olíustarfsemi sem leyfishafar. Í þeim tilvikum þegar olíufyrirtæki í ríkiseigu gegnir verulegu hlutverki í sam-

vinnu við olíufyrirtæki í einkaeigu er um að ræða nokkurs konar sameiginlegt áhættuverkefni ríkisins og olíufyrirtækis.

3. Hlutdeildar- og verktökufyrirkomulag.

Þegar um er að ræða hlutdeildarfyrirkomulag er kolvetnisauðlindin, sem er eign ríkisins, hagnýtt undir eftirliti stjórnvalda en í samvinnu við olíufyrirtækin. Stjórnvöld verða eigendur þess kolvetnis sem unnið er, en olíufyrirtækin fá hluta þess í staðinn fyrir að leggja til áhættufjármagn, sérfræðiþekkingu og vinnu. Það eru svo olíufyrirtækin sem sjá um sölu kolvetnisins. Þetta fyrirkomulag hefur einkum þróast í ríkjum þriðja heimsins. Að baki fyrirkomulaginu liggur sú hugmynd að ríkið hafi sem mesta stjórn á auðlindunum og efnahagslegri þróun. Fyrirkomulagið þykir eðlilegt í þeim ríkjum sem hafa áætlunarbúskap, en þar eru ein helstu rökin fyrir þessu fyrirkomulagi þau að tryggja að kolvetnis sé aflað fyrir heimamarkað, einkum iðnað og e.t.v. á lægra verði en á heimsmarkaði.

Með verktökufyrirkomulagi er alþjóðlegt olíufyrirtæki að öllu leyti verktaki hjá stjórnvöldum. Taki olíufyrirtækið á sig jarðfræðilega eða fjárhagslega áhættu fær það sérstaka þóknun fyrir þá áhættu sem það tekur. Þóknunin er jafnan greidd sem hluti af því kolvetni sem unnið er. Verktökufyrirkomulag er algengt í ríkjum sem leggja áherslu á að stjórnvöld eða olíufyrirtæki í ríkiseigu beri ábyrgð á allri leit, rannsókn og vinnslu. Þegar svo stendur á eru alþjóðleg olíufyrirtæki undirverktakar olíufyrirtækis í ríkiseigu.

4. Ríkisrekstur.

Þegar um er að ræða óskoraðan ríkisrekstur sér ríkið alfarið um það að leita að, rannsaka, vinna og eftir atvikum dreifa kolvetni. Frávik frá ríkisrekstri er sameiginlegt áhættuverkefni ríksins og einkaaðila (e. joint-venture model). Þar gerir ríkisfyrirtæki samning um samvinnu við eitt eða fleiri olíufyrirtæki í einkaeign um leit, rannsóknir og vinnslu kolvetnis.

5. Lokaorð.

Almennt er litið svo á að alþjóðleg olíufyrirtæki kjósi fremur að starfa samkvæmt sérleyfisfyrirkomulagi en hlutdeildarfyrirkomulagi. Á hinn bóginn kjósa sum ríki fremur að hafa framleiðsluna algerlega í eigin höndum, undir stjórn ríkisrekins olíufélags eða í samvinnu við alþjóðleg olíufyrirtæki með hlutdeildar- eða verktökufyrirkomulagi.

Í vissum tilvikum kann olíufyrirtæki fremur að kjósa samvinnu á grundvelli hlutdeildarfyrirkomulags í stað þess að fá sérleyfi. Ástæðan getur t.d. verið sú að olíufyrirtækið ber ekki nægilegt traust til réttarkerfis viðkomandi ríkis. Þegar svo stendur á er algengt að olíufyrirtæki kjósi fremur að semja við yfirvöld um að sérstakur óháður gerðardómur leysi úr ágreiningi sem upp kann að koma.

IV.
Hvaða fyrirkomulag hentar best á Íslandi?

Við mat á því hvaða fyrirkomulag geti hentað best á Íslandi er í fyrsta lagi til þess að líta að öll ríki við Norður-Atlantshaf styðjast á einn eða annan hátt við sérleyfisveitingar. Er því ekki óeðlilegt að miða við að sérleyfi verði veitt nema sérstök rök mæli gegn því.

Í öðru lagi má benda á að á Íslandi skortir sérþekkingu á leit, rannsóknum og vinnslu á kolvetni, bæði hjá einkaaðilum og hinu opinbera. Þá er ólíklegt að stjórnvöld muni hafa sérstakt frumkvæði að leit eða rannsókn kolvetnis nema á allra fyrstu stigum. Olíu- og gasleit er ákaflega kostnaðarsöm og fer kostnaður hraðvaxandi eftir því sem nær dregur vinnslu. Á hverju stigi leitarinnar verður að vega hugsanlegan ávinning á móti þeirri fjárhagslegu áhættu

sem felst í því að vinnanleg olía eða gas reynist ekki vera fyrir hendi. Olíufyrirtæki búa yfir nægjanlegri þekkingu og reynslu til að framkvæma þetta mat og hafa fjárhagslegt bolmagn til að stunda olíu- og gasleit fyrir eigin reikning, enda er það kjarninn í starfsemi þeirra. Séu fyrirtæki í olíuiðnaði reiðubúin að kosta slíka leit er eðlilegt að íslensk stjórnvöld komi til móts við þau með því að búa þeim góð starfsskilyrði og tryggja að starfsemi þeirra samrýmist efnahagslegum markmiðum og nútímakröfum um umhverfisvernd og starfsöryggi. Eins og að framan er rakið er það markmið frumvarpsins að skýra réttarstöðu þeirra sem sækja um leyfi til leitar, rannsókna eða vinnslu kolvetnis á landgrunni Íslands.

Í þriðja lagi er nauðsynlegt að fyrirkomulagið sem valið er tryggi að erlend olíufyrirtæki telji það raunhæfan kost að hefja kolvetnisleit á landgrunni Íslands. Eins og áður er rakið er almennt talið að olíufyrirtæki vilji fremur starfa á grundvelli sérleyfis en annars fyrirkomulags, enda byggist löggjöf nágrannaríkja Íslands á sérleyfisfyrirkomulagi.

Í fjórða lagi felur sérleyfisfyrirkomulag í sér að íslenska ríkið heldur eftir sem áður hefðbundnum eignarráðum yfir kolvetnisauðlindum á landgrunninu og getur því tryggt að greitt verði hæfilegt endurgjald fyrir afnotin.

V.
Erlend löggjöf.

1. Almennt.

Eins og áður er rakið hefur við samningu frumvarpsins verið höfð hliðsjón af norrænni löggjöf um leit, rannsóknir og vinnslu kolvetnis. Einkum hefur verið höfð hliðsjón af færeyskum, grænlenskum og norskum lögum. Í megindráttum er löggjöf þessara ríkja mjög svipuð, en sammerkt með þessum lögum er að lagt er til grundvallar að sérleyfi séu veitt til rannsókna og vinnslu kolvetnis. Hér á eftir fer stutt yfirlit um efni framangreindra laga.

2. Færeyjar.

Um leit, rannsóknir og vinnslu kolvetnis í Færeyjum gilda lög nr. 31 frá 16. mars 1998, um kolvetnisstarfsemi. Efnisskipan laganna er þannig að í 1. kafla eru almenn ákvæði, í 2. kafla eru reglur um kolvetnisleit o.fl. og í 3. kafla eru ítarleg ákvæði um rannsóknir og vinnslu. Þá er fjallað um mat á umhverfisáhrifum í 4. kaflanum og 5. kafli fjallar um starfsumhverfi, öryggi og öryggisráðstafanir o.s.frv. í hafstöðvum. Í 6. kafla er fjallað um stjórnsýslu, eftirlit o.s.frv. af hálfu opinberra aðila og í 7. kafla eru reglur um skaðabætur og sérstakar reglur um bætur til sjómanna. Þá eru ýmis ákvæði í 8. kafla og loks eru í 9. kafla reglur um refsingar, gildistöku o.fl. Í færeysku lögunum kemur fram í 4. gr. að stjórnvöld geti veitt leyfi til leitar að kolvetnum með rannsóknir og vinnslu í huga, en leyfið er veitt til þriggja ára í senn, nema styttri leyfistími sé nefndur í leyfinu. Þá er sú meginregla lögð til grundvallar í 6. gr. laganna að stjórnvöldum er heimilt að veita einkarétt til rannsókna og vinnslu á kolvetni, en það skilyrði er sett að einungis megi veita slíkt leyfi til aðila sem teljast hafa nægilega sérþekkingu, reynslu og fjárhagslegt bolmagn til að stunda slíka starfsemi.

3. Grænland.

Á Grænlandi gilda auðlindalög, nr. 335 frá 6. júní 1991, með síðari breytingum, um leit, rannsóknir og vinnslu kolvetnis. Lögin taka til hvers kyns auðlinda í jörðu en í lögunum eru einnig sérstök ákvæði um rannsóknir og vinnslu kolvetnis. Í 1. kafla laganna eru ýmis almenn ákvæði. Í 2. kafla eru ákvæði um leit, en skv. 6. gr. er heimastjórninni heimilt að veita leyfi til leitar að náttúruauðlindum til allt að fimm ára. Í 3. kafla eru ákvæði um rannsóknir og vinnslu náttúruauðlinda. Í 7. gr. kemur m.a. fram að heimastjórnin geti á tilteknum

svæðum veitt sérleyfi til rannsókna og vinnslu náttúruauðlinda. Í 4. kafla eru sérstök ákvæði um rannsóknir og vinnslu kolvetnis. Þar segir m.a. í 11. gr. að leyfi til rannsókna skuli veitt til allt að tíu ára eða, þegar sérstaklega stendur á, megi veita leyfi til allt að 16 ára. Hafi skilyrði leyfisins verið uppfyllt eigi leyfishafi rétt á framlengingu leyfisins til vinnslu kolvetnis í 30 ár. Leyfið gildir á þeim svæðum þar sem hagkvæmt er að vinna kolvetni og leyfishafi hyggst hefja vinnslu.

4. Noregur.

Lög nr. 72 frá 29. nóvember 1996, um kolvetnisstarfsemi (lov om petroleumsvirksomhet), mynda ramma um leyfisveitingar til kolvetnisstarfsemi í Noregi. Á grundvelli laganna voru settar reglugerðir með konunglegri tilskipun frá 27. júní 1997. Í lögunum er mælt fyrir um leyfi til leitar, rannsókna og vinnslu kolvetnis o.fl. Lögin samrýmast tilskipun 94/22/EB, enda er Noregur aðili að samningnum um Evrópska efnahagssvæðið. Meginatriði þess kerfis sem gildir um leyfisveitingar eru helst þessi:

Í 1. mgr. 1. gr. laga um kolvetnisstarfsemi er kveðið á um eignarrétt norska ríkisins að kolvetnisauðlindum neðan sjávar. Samkvæmt þessu ákvæði stjórnar norska ríkið einnig nýtingu kolvetnisauðlinda.

Samkvæmt 1. mgr. 2. gr. er fyrirtækjum heimilt að sækja um leyfi til leitar að kolvetni. Leyfið veitir hvorki einkarétt til leitar né forgangsrétt til frekari rannsókna eða vinnslu. Á tilteknum svæðum er stjórnvöldum skylt að opna fyrir aðgang að leit með því að veita leitarleyfi áður en til veitingar rannsókna- og vinnsluleyfa getur komið. Áður en leitin hefst þarf að hafa farið fram mat á umhverfisáhrifum auk mats á efnahagslegum og félagslegum áhrifum starfseminnar.

Að jafnaði eru rannsókna- og vinnsluleyfi veitt í kjölfar auglýsingar eftir umsóknum um leyfi. Leyfi skal einungis veita á grundvelli viðmiðana sem hafa verið gerðar opinberar. Þá skal við veitinguna gæta jafnræðis. Í auglýsingunni eru tiltekin skilyrði fyrir veitingu leyfis. Rannsókna- og vinnsluleyfi kveður ítarlega á um réttindi og skyldur olíufyrirtækisins gagnvart ríkinu og skilyrði fyrir leyfinu. Skv. 3. mgr. 3. gr. felur rannsókna- og vinnsluleyfi í sér einkarétt til þess að rannsaka og vinna kolvetni á tilteknu svæði.

Samkvæmt 9. mgr. 3. gr. eru rannsókna- og vinnsluleyfi í upphafi veitt til rannsókna í allt að tíu ár og verður skv. 8. mgr. 3. gr. að uppfylla sérstaka rannsóknarskyldu á þessu tímabili. Uppfylli leyfishafi þessa rannsóknarskyldu er meginreglan sú að honum er heimilt að stunda vinnslu kolvetnis í allt að 30 ár, að jafnaði á helmingi þess svæðis sem leyfið tekur til, en sérstakt svæðisgjald er innheimt fyrir hvern ferkílómetra.

Nái kolvetnisauðlind inn á svæði þar sem tveir eða fleiri hafa rannsókna- og vinnsluleyfi skal leita samkomulags um skynsamlega nýtingu auðlindarinnar og hvernig henni skuli skipt milli leyfishafa, sbr. 7. mgr. 4. gr.

VI.
Samningurinn um Evrópska efnahagssvæðið.

Með aðild Íslands að samningnum um Evrópska efnahagssvæðið (EES) var tekin ákvörðun um að lögleiða í íslenskan rétt hluta af rétti Evrópusambandsins. Hér á eftir er yfirlit um helstu reglur EES sem varða leyfisveitingar í tengslum við leit, rannsóknir og vinnslu kolvetna. Þær tilskipanir sem leiða af aðild Íslands að EES-samningnum og höfð var hliðsjón af við samningu frumvarpsins eru þessar helstar:

1. *Tilskipun 94/22/EB frá 30. maí 1994 um skilyrði fyrir veitingu og notkun leyfa til að leita að, rannsaka og vinna kolvatnsefni.*

Tilskipunin tók gildi 1. júlí 1995 og fjallar um leyfisveitingar, en hún hefur það að markmiði að koma á fót sameiginlegum innri markaði fyrir orku. Í inngangsorðum tilskipunarinnar er að því vikið að ríki Evrópusambandsins treysti að miklu leyti á innflutning til að anna eftirspurn á kolvetni. Er því talið ráðlegt að hvetja til leitar, rannsókna og vinnslu á þeim auðlindum sem til eru innan Evrópusambandsins. Meginefni tilskipunarinnar er í stuttu máli þetta:

Fjallað er um veitingu og notkun leyfa til leitar, rannsókna og vinnslu kolvetnis. Megintilgangur hennar er að tryggja aðgang að þessari starfsemi án mismununar og með gagnsæjum hætti. Þá er reynt að tryggja að ekki séu sett önnur skilyrði fyrir aðgangi að kolvetnisstarfsemi en þau er varða tæknilegt eða fjárhagslegt bolmagn fyrirtækja og hvernig þau hyggjast standa að leit, rannsóknum og/eða vinnslu á því svæði sem um ræðir. Fram kemur í tilskipuninni að aðildarríkin hafi yfirráðarétt yfir kolvetnisauðlindum á sínu yfirráðasvæði, þar á meðal rétt til þess að ákveða hvaða svæði verði gerð aðgengileg til að stunda leit, rannsóknir eða vinnslu kolvetnis.

Tilskipunin hefur að geyma ákvæði um þær aðferðir sem beita skal við veitingu leyfa og kveður á um það hvaða viðmiðanir ríki skuli leggja til grundvallar því að leyfi sé veitt. Markmið með þessu er að tryggja aðgang að kolvetnisstarfsemi við aðstæður sem hvetja til aukinnar samkeppni á þessu sviði. Þetta er talið stuðla að því að leit, rannsóknir á og vinnsla úr kolvetnisauðlindum í aðildarríkjunum fari fram með sem hagkvæmustum hætti og flýta fyrir samruna hins innri orkumarkaðar. Þessi starfsemi á að vera opin öllum þeim sem hafa fullnægjandi tæknilega og fjárhagslega getu til að stunda hana. Þá er byggt á því í tilskipuninni að takmarka skuli það svæði sem leyfi nær til og gildistíma þess í því skyni að koma í veg fyrir að eitt fyrirtæki geti áskilið sér einkarétt á svæði þar sem hægt væri að stunda leit, rannsóknir og vinnslu með hagkvæmari hætti ef mörg fyrirtæki ættu þess kost að stunda kolvetnisstarfsemi á svæðinu.

Í 3. gr. eru ítarleg fyrirmæli um það hvernig veita skal leyfi til leitar, rannsókna og vinnslu kolvetnis. Almennt skal veita leyfi annaðhvort í kjölfar opinberrar auglýsingar eftir umsóknum (e. public invitation) eða án undangenginnar auglýsingar eftir því sem þær berast (e. open door policy). Í sérstökum tilvikum er leyfishöfum á aðlægum svæðum veittur forgangsréttur til kolvetnisstarfsemi (e. neighbouring block). Loks er fyrirvari í ákvæðinu um að aðildarríkin eigi rétt á að hafna öllum umsóknum um leyfi svo fremi þau tryggi að þessi valkostur valdi því ekki að fyrirtækjum sé mismunað.

Í tilskipuninni eru ákvæði um þátttöku ríkisins í kolvetnisstarfsemi, hvort sem það er með beinum hætti eða í gegnum olíufyrirtæki í ríkiseigu. Ef stjórnvöld eða olíufyrirtæki í eigu ríkisins fara í samstarf við einkaaðila verður þátttakan að byggjast á meginreglum sem eru gagnsæjar, hlutlægar og mismuna ekki aðilum.

Loks skal þess getið að sá mikilvægi fyrirvari er gerður í 2. mgr. 6. gr. tilskipunarinnar að aðildarríki má setja skilyrði og gera kröfur um hvernig starfsemin er stunduð ef unnt er að rökstyðja það með tilliti til þjóðaröryggis, almannaöryggis, almannaheilbrigðis, samgönguöryggis, umhverfisverndar, verndar lífrænna auðlinda og þjóðargersema sem hafa listrænt, sögulegt og fornleifafræðilegt gildi, öryggis mannvirkja og starfsmanna, skipulagðrar stjórnunar kolvetnisauðlinda, t.d. hversu hratt kolvetni er nýtt, eða þarfar á að tryggja skattatekjur.

2. *Tilskipun 93/38/EBE um samræmingu reglna um innkaup stofnana sem annast vatnsveitu, orkuveitu, flutninga og fjarskipti.*

Þessi tilskipun hefur sérstaka þýðingu fyrir olíuleit þar sem hún tekur til stjórnvalda jafnt sem opinberra fyrirtækja og fyrirtækja sem hafa sérstök réttindi eða einkarétt á því að rannsaka og vinna olíu og gas á ákveðnum svæðum.

VII.
Yfirlit um efni einstakra kafla frumvarpsins.

Í I. kafla frumvarpsins (1.–2. gr.) eru ákvæði um gildissvið og skilgreiningar, en lögin gilda í landhelgi, efnahagslögsögu og landgrunni Íslands utan netlaga.

Í II. kafla frumvarpsins (3. gr.) er ákvæði um eignarrétt íslenska ríkisins að kolvetni í landhelgi, efnahagslögsögu og landgrunni Íslands. Ákvæði þetta er í samræmi við gildandi rétt og sett til áréttingar þeirri reglu sem fram kemur í lögum nr. 73/1990, um eignarrétt íslenska ríkisins að auðlindum hafsbotnsins.

Í III. kafla (4.–6. gr.) er fjallað um umsókn um leyfi til kolvetnisleitar, leyfið sjálft og tímalengd þess.

Reglur IV. kafla frumvarpsins (7.–21. gr.) geyma ákvæði um rannsóknir og vinnslu kolvetnis. Fjallað er um leyfi og skilyrði leyfisveitingar, auglýsingu, umsókn um leyfi, tímalengd og skilyrði leyfis, efni leyfisins og skyldur leyfishafa að loknum leyfistíma, aðgæsluskyldu, boranir, hafstöðvar, leiðslubúnað, skiptingu og samnýtingu kolvetnisauðlinda. Loks er ákvæði sem áréttar að ávallt sé gætt laga um mat á umhverfisáhrifum áður en leyfi eða samþykki til framkvæmda er veitt.

Í V. kafla (22.–23. gr.) er fjallað um vinnuumhverfi og öryggisráðstafanir við kolvetnisstarfsemi. Í VI. kafla (24.–26. gr.) eru fyrirmæli um eftirlit með leitar-, rannsókna- og vinnslusvæðum, upplýsingagjöf, meðferð upplýsinga o.fl. Þá eru í VII. kafla (27.–29. gr.) eignarnáms- og bótaákvæði. Loks eru í VIII. kafla (30.–33. gr.) ýmis ákvæði, þ.e. meginregla um bann við framsali á leyfi samkvæmt lögunum, reglugerðarheimild til handa iðnaðarráðherra, refsiákvæði og gildistökuákvæði.

Athugasemdir við einstakar greinar frumvarpsins.

Um I. kafla.

Ákveðin tengsl eru milli ákvæða I. kafla frumvarps þessa og ákvæða ýmissa annarra laga í íslenskum rétti. Í 1. gr. er mælt fyrir um landfræðilegt gildissvið laganna, en þar segir að lögin gildi í landhelgi, efnahagslögsögu og landgrunni Íslands. Lögin gilda utan netlaga en innan netlaga gilda lög nr. 57/1998, um rannsóknir og nýtingu á auðlindum í jörðu. Þá skal áréttað að ákvæði frumvarpsins ganga fyrir lögum nr. 73/1990, um eignarrétt íslenska ríkisins að auðlindum hafsbotnsins, sem nú taka til þeirrar starfsemi er frumvarpið varðar.

Það ræðst af ákvæðum annarra laga á hverjum tíma hver sé landhelgi, efnahagslögsaga og landgrunn Íslands, en núgildandi lög um þetta eru lög nr. 41/1979 um landhelgi, efnahagslögsögu og landgrunn. Á grundvelli þeirra laga hefur svo verið sett reglugerð nr. 196/1985 um afmörkun landgrunnsins í vestur, í suður og til austurs. Í 3. gr. frumvarpsins kemur fram að íslenska ríkið sé eigandi kolvetnis og einungis geti komið til leitar, rannsóknar og vinnslu þess með leyfi ráðherra í samræmi við ákvæði laganna. Hér er um að ræða efnislega sambærilega reglu og fram kemur í lögum nr. 73/1990, um eignarrétt íslenska ríkisins að auðlindum hafsbotnsins. Er nauðsynlegt að gera í stuttu máli grein fyrir ákvæðum framangreindra laga en segja má að þessir lagabálkar séu í raun rammalöggjöf á þessu sviði.

Samkvæmt 1. gr. laga nr. 41/1979, um landhelgi, efnahagslögsögu og landgrunn er land-

helgi Íslands, afmörkuð af línu sem alls staðar er 12 sjómílur frá grunnlínu sem dregin er milli nánar tiltekinna staða á ströndinni. Þau réttindi sem íslenska ríkið fer með í 12 sjómílna landhelgi eru fullveldisréttur, en í því felst að ríkið fer með fullan og óskoraðan ríkisyfirráðarétt. Nær fullveldisréttur Íslands til landhelginnar, hafsbotnsins innan hennar og loftrýmisins yfir henni og fer framkvæmd hans eftir íslenskum lögum og ákvæðum alþjóðalaga, sbr. 2. gr. laga nr. 41/1979, um landhelgi, efnahagslögsögu og landgrunn. Fullveldisréttur Íslands nær ekki eingöngu til landhelginnar heldur einnig til hafsbotnsins innan hennar, sbr. lög nr. 73/1990, um eignarrétt íslenska ríkisins að auðlindum hafsbotnsins. Þar er svo fyrir mælt í 1. gr. að íslenska ríkið sé eigandi allra auðlinda á, í eða undir hafsbotninum utan netlaga og svo langt til hafs sem fullveldisréttur Íslands nær samkvæmt lögum, alþjóðasamningum eða samningum við einstök ríki. Þá segir að hugtakið auðlind taki samkvæmt lögunum til allra ólífrænna og lífrænna auðlinda hafsbotnsins annarra en lifandi vera.

Í II. kafla laga nr. 41/1979, um landhelgi, efnahagslögsögu og landgrunn, eru ákvæði um efnahagslögsöguna. Þar segir í 3. gr. að efnahagslögsaga Íslands sé svæði utan landhelgi sem afmarkast af línu sem alls staðar er 200 sjómílur frá grunnlínu landhelginnar, sbr. þó 7. gr. sem varðar afmörkun svæða milli landa. Samkvæmt 4. gr. hefur Ísland innan efnahagslögsögunnar:

a. fullveldisrétt að því er varðar rannsóknir, hagnýtingu, verndun og stjórnun auðlinda, lífrænna og ólífrænna, á hafsbotni og í honum, í hafinu yfir honum svo og aðrar athafnir varðandi efnahagslega nýtingu og rannsóknir innan svæðisins, svo sem framleiðslu orku frá sjávarföllum, straumum og vindi,
b. lögsögu að því er varðar: i) byggingu mannvirkja og afnot af þeim, ii) vísindalegar rannsóknir og iii) verndun hafsins,
c. önnur réttindi og skyldur samkvæmt alþjóðalögum.

Þá segir að framkvæmd réttinda og skyldna innan efnahagslögsögunnar skuli vera samkvæmt sérstökum lögum og í samræmi við milliríkjasamninga sem Ísland er aðili að. Er hér einkum átt við hafréttarsáttmála Sameinuðu þjóðanna frá 1982, en Ísland fullgilti sáttmálann 1985, sbr. augl. nr. 7/1985 í C-deild Stjórnartíðinda. Sáttmálinn öðlaðist gildi 16. nóvember 1994.

Í III. kafla laga nr. 41/1979, um landhelgi, efnahagslögsögu og landgrunn, eru reglur um landgrunnið. Skv. 5. gr. nær landgrunn Íslands til hafsbotnsins og neðansjávarsvæða utan landhelgi sem eru framlenging landsvæðisins, allt að ytri mörkum landgrunnssvæðisins, þó að 200 sjómílna fjarlægð frá grunnlínum landhelginnar þar sem ytri mörk landgrunnssvæðisins ná ekki þeirri fjarlægð, sbr. þó 7. gr. sem áður er getið. Skv. 6. gr. tekur fullveldisréttur Íslands yfir landgrunnið til rannsóknar og hagnýtingar á ólífrænum auðlindum, sem þar eru, svo og á lífverum, sem á nýtingarstigi eru annaðhvort hreyfingarlausar á hafsbotni eða í honum eða geta ekki hreyft sig án snertingar við hafsbotninn. Þá segir að stjórnvöld setji reglur um rannsóknir og hagnýtingu auðlinda landgrunnsins. Á grundvelli þessa ákvæðis hefur verið sett reglugerð nr. 196/1985 um afmörkun landgrunnsins, sem áður er getið. Með henni voru landgrunnsmörkin ákveðin til vesturs, í suður og til austurs langt út fyrir 200 sjómílna línuna en þetta er gert með hliðsjón af 76. gr. hafréttarsáttmálans. Þá eru í IV. kafla laga nr. 41/1979, um landhelgi, efnahagslögsögu og landgrunn, ákvæði um afmörkun svæða milli landa.

V. kafli laga nr. 41/1979, um landhelgi, efnahagslögsögu og landgrunn, hefur að geyma sérstök ákvæði um ráðstafanir gegn mengun. Eins og að framan er rakið segir í b-lið 4. gr. þeirra laga að Ísland fari innan efnahagslögsögunnar með lögsögu að því er varðar verndun hafsins en hér er átt við svokallaða mengunarlögsögu sem nánari ákvæði eru um í V. kafla.

Þar segir í 8. gr. að skylt sé að forðast allt sem mengað getur eða á annan hátt spillt hafinu. Íslensk stjórnvöld skuli samkvæmt sérstökum lögum og í samræmi við milliríkjasamninga sem Ísland er aðili að gera ráðstafanir til að vernda hafið gegn mengun og öðrum spjöllum. Á grundvelli þessa ákvæðis voru sett sérstök lög um varnir gegn mengun sjávar, þ.e. lög nr. 32/1986. Þar er mengunarlögsaga Íslands nánar skilgreind í 7. tölul. 3. gr. sem það hafsvæði sem nær yfir innsævi, landhelgi og efnahagslögsögu Íslands og landgrunn Íslands. Í þessu felst það að mengunarlögsagan getur tekið til landgrunnssvæða sem liggja utan við 200 sjómílna efnahagslögsöguna. Lögin, sem eru meginréttarheimildin á þessu sviði, fjalla um varnir gegn mengun hafsins sem stafar af losun olíu, sorps og annarra skaðlegra efna, úrkast (varp) efna í hafið, ábyrgð á mengun, íhlutun og framkvæmd laganna.

Loks eru í VI. kafla eru mikilvæg ákvæði um vísindalegar rannsóknir, en þess er áður getið að skv. b-lið 4. gr. fer Ísland með lögsögu varðandi vísindalegar rannsóknir. Í 9. og 10. gr. eru ákvæði sem mæla nánar fyrir um það að vísindalegar rannsóknir í landhelgi, efnahagslögsögu og landgrunni Íslands skuli háðar samþykki íslenskra stjórnvalda.

Af lagaákvæðum þeim sem að framan eru rakin er ljóst að íslenska ríkið er eigandi að og hefur fullan og óskoraðan rétt yfir öllum lífrænum og ólífrænum auðlindum á, í eða undir hafsbotninum utan netlaga svo langt sem fullveldisréttur Íslands nær samkvæmt lögum, alþjóðasamningum eða samningum við einstök ríki. Á þeim grundvelli er frumvarp þetta til laga um leit, rannsóknir og vinnslu kolvetnis lagt fram.

Um 1. gr.

Í þessari grein er að finna ákvæði um gildissvið laganna. Annars vegar er mælt fyrir um efnislegt gildissvið laganna, þ.e. til hvaða starfsemi þau taka, en hins vegar er kveðið á um landfræðilegt gildissvið þeirra.

Í 1. málsl. ákvæðisins er mælt fyrir um það til hvaða starfsemi lögin taka. Þar kemur fram að lögin gildi um leit að kolvetni, rannsóknir og vinnslu og flutning þess eftir leiðslukerfi. Jafnframt gilda lögin um svokallaðar hafstöðvar sem skilgreindar eru í 2. mgr. 2. gr. frumvarpsins. Í frumvarpinu er greint á milli leitar, rannsókna og vinnslu kolvetnis eins og fram kemur í greininni.

Nauðsyn leitar að kolvetni er mest á svæðum sem hafa ekki verið könnuð ítarlega og á það sérstaklega við um Ísland. Leit felur í sér það sem kalla mætti forkannanir (e. preliminary surveys), en markmið þeirra er að öðlast skilning á svæðisbundnum jarðfræðilegum aðstæðum, t.d. með jarðeðlisfræðilegum könnunum. Eins og að framan greinir í athugasemdum við I. kafla taka nú lög nr. 41/1979, um landhelgi, efnahagslögsögu og landgrunn, til þess háttar kannana. Ef frumvarp þetta verður að lögum ganga reglur þess framar þeim ákvæðum laga nr. 41/1979 um landhelgi, efnahagslögsögu og landgrunn að því er varðar sérstaklega leit, rannsóknir og vinnslu kolvetna.

Með rannsóknum, eins og það hugtak er notað í III. kafla frumvarpsins, er átt við það þegar rannsakað er hvort olíu og/eða gas er að finna og ef svo er hvort vinna megi nægilegt magn til þess að nýting sé efnahagslega skynsamleg. Almennt eru jarðeðlisfræðilegar rannsóknir sem fram fara á þessu stigi mun ítarlegri, auk þess sem boraðar eru ein eða fleiri djúpar holur. Að jafnaði er rannsóknartímabil u.þ.b. fimm til tíu ár eða jafnvel lengra þegar ekki liggja fyrir miklar jarðfræðilegar upplýsingar.

Í 2. málsl. greinarinnar er kveðið á um landfræðilegt gildissvið laganna, en þau taka til landhelgi, efnahagslögsögu og landgrunns. Eins og áður er rakið í athugasemdum við I. kafla tekur hið landfræðilega gildissvið frumvarpsins ávallt mið af þeim ákvæðum annarra laga sem skilgreina landhelgi, efnahagslögsögu og landgrunn Íslands, sbr. nú lög nr. 41/1979.

Utan gildissviðs frumvarpsins falla leit, rannsóknir og vinnsla á kolvatnsefnum sem finnast í jörðu í landi, í botni vatnsfalla og stöðuvatna og í sjávarbotni innan netlaga, enda taka lög nr. 57/1998, um rannsóknir og nýtingu á auðlindum í jörðu, til þeirrar starfsemi.

Um 2. gr.

Í greininni er að finna skilgreiningu á nokkrum grundvallarhugtökum sem fyrir koma í frumvarpinu.

Í 1. mgr. er skilgreining á hugtakinu kolvetni. Miðað er við að um sé að ræða kolvetni sem finnst í jarðlögum undir hafsbotni, enda taka lögin einungis til leitar, rannsókna og vinnslu kolvetnis á hafsbotni.

Í 2. mgr. er skilgreining á hugtakinu hafstöð. Miða verður við að hér sé m.a. um að ræða flutningstæki, svo sem bora, borpalla, vinnslu- og geymsluskip, íbúðarskip og annars konar skip á meðan þau eru ófæranleg og nýtt til kolvetnisstarfsemi. Þannig fellur utan ákvæðisins flutningur kolvetnis með skipi sem og mælingar rannsóknarskips á siglingu.

Í 3. mgr. er skilgreining á hugtakinu leit (e. prospecting). Rétt er að taka fram að þetta felur einnig í sér frekari úrvinnslu og túlkun gagna sem aflað er við leitina. Þá skal þess getið að leit getur einnig verið hluti af rannsóknum eins og hugtakið er skilgreint í lögunum. Meginmarkmiðið með leit er að afmarka þau svæði þar sem hagstætt getur talist að hefja ítarlegri leit á síðari stigum.

Í 4. mgr. er fjallað um hugtakið rannsóknir (e. exploration). Skv. 1. tölul. felur rannsókn í sér leit að kolvetni en hér er átt við þá ítarlegri leit sem fram fer á þeim svæðum sem afmörkuð hafa verið með leit skv. 3. mgr. þessarar greinar. Skv. 2. tölul. felur rannsókn í sér mat á stærð, legu og vinnslueiginleikum kolvetnisgeymis með borun leitarholna og borholumælingum. Hér er það sjálfur kolvetnisgeymirinn sem er kannaður, en þetta er miklu viðameiri framkvæmd en felst í leitinni.

Í 5. mgr. er ítarleg skilgreining á hugtakinu vinnsla (e. production). Hér er um að ræða vinnslustig sem tekur við af rannsóknum og felur í sér að kolvetni er leitt eða því dælt upp á yfirborðið.

Um II. kafla.

Kaflinn hefur að geyma ákvæði um eignarrétt íslenska ríkisins að kolvetni.

Um 3. gr.

Efni greinarinnar er í samræmi við gildandi rétt. Sjálfstæð þýðing hennar er því takmörkuð, en hún er sett til áréttingar gildandi lögum. Er hér annars vegar mælt fyrir um að íslenska ríkið sé eigandi kolvetnis skv. 1. gr. og hins vegar að einungis geti komið til leitar, rannsókna og vinnslu að fengnu leyfi iðnaðarráðherra. Fyrri málsliður er því í samræmi við 1. gr. laga nr. 73/1990, um eignarrétt íslenska ríkisins að auðlindum hafsbotnsins. Eins og áður er rakið segir þar að íslenska ríkið sé eigandi allra auðlinda á, í eða undir hafsbotninum utan netlaga og svo langt til hafs sem fullveldisréttur Íslands nær samkvæmt lögum, alþjóðasamningum eða samningum við einstök ríki, en hugtakið auðlind samkvæmt lögunum tekur til allra ólífrænna og lífrænna auðlinda hafsbotnsins annarra en lifandi vera. Þau lög taka því við þar sem lögum nr. 57/1998, um rannsóknir og nýtingu á auðlindum í jörðu, sleppir, en samkvæmt þeim lögum eru auðlindir í sjávarbotni innan netlaga háðar einkaeignarrétti landeiganda.

Síðari málsliður greinarinnar er áréttíng á 2. gr. laga nr. 73/1990, um eignarrétt íslenska ríkisins að auðlindum hafsbotnsins, sem mælir fyrir um það að enginn megi leita að efnum til hagnýtingar á, í eða undir hafsbotninum utan netlaga, sbr. 1. gr. laganna, nema að fengnu

skriflegu leyfi iðnaðarráðherra. Þessa meginreglu, sem fram kemur í þessum fyrirmælum frumvarpsins, er einnig að finna í VI. kafla laga nr. 41/1979, um landhelgi, efnahagslögsögu og landgrunn, sem hefur að geyma almenn fyrirmæli um það með hvaða hætti leyfi til vísindalegra rannsókna í landhelgi, efnahagslögsögu og landgrunni Íslands verður veitt. Sérstaka þýðingu hefur ákvæði 2. mgr. 9. gr. þeirra laga sem mælir fyrir um það að hafna megi m.a. beiðni um rannsóknir innan efnahagslögsögunnar eða á landgrunninu ef hún: a) stendur í beinu sambandi við rannsókn eða hagnýtingu á lífrænum eða ólífrænum auðlindum, b) hefur í för með sér boranir á landgrunninu, notkun sprengiefna eða skaðlegra efna fyrir umhverfið eða c) leiðir til byggingar, starfrækslu eða notkunar mannvirkja.

Í III. og IV. kafla frumvarpsins eru nánari ákvæði um leit, rannsóknir og vinnslu kolvetnis. Þetta eru sérákvæði um leit, rannsóknir og nýtingu tiltekinna ólífrænna auðlinda hafsbotnsins, þ.e. kolvetnis, og ganga þau fyrir framangreindum ákvæðum laga nr. 41/1979, um landhelgi, efnahagslögsögu og landgrunn, að svo miklu leyti sem ákvæði þessi kunna að stangast á.

Um III. kafla.

Kaflinn hefur að geyma reglur um kolvetnisleit o.fl.

Um 4. gr.

Samkvæmt 4. gr. veitir ráðherra leyfi til leitar að kolvetni með rannsóknir og vinnslu í huga. Þetta ákvæði er í samræmi við ákvæði laga nr. 41/1979, um landhelgi, efnahagslögsögu og landgrunn, og laga nr. 73/1990, um eignarrétt íslenska ríkisins að auðlindum hafsbotnsins, sem áður er getið, en þar er við það miðað að leyfisveitingar séu í höndum iðnaðarráðherra.

Markmiðið með því að veita leyfi til kolvetnisleitar er það að gefa fyrirtækjum, sem áhuga hafa á kolvetnisstarfsemi, kost á að gera forkannanir til þess að meta hvort grundvöllur sé fyrir því að hefja rannsóknastarfsemi. Auk þess er tilgangur kolvetnisleitar að afla upplýsinga um ástand tiltekinna svæða til þess að geta lagt mat á það hvort kolvetni sé að finna í vinnanlegum mæli.

Kolvetnisleit felur í sér rannsóknarvinnu í formi jarðfræðilegra, jarðeðlisfræðilegra og jarðefnafræðilegra rannsókna. Að jafnaði felur leyfi til leitar einungis í sér heimild til handa leyfishafa að framkvæma grunnar boranir, þ.e. með sýnatöku úr efstu jarðlögum hafsbotnsins, t.d. með grunnum borunum eða töku kjarna, sbr. 3. mgr. 2. gr. Eftir atvikum geta slík leyfi þó einnig falið í sér rétt til dýpri borana í þeim tilgangi að afla upplýsinga um almenn skilyrði til myndunar og varðveislu kolvetnis.

Um 5. gr.

Hér kemur fram sú skylda sem hvílir á umsækjanda um leyfi til kolvetnisleitar að leggja fram upplýsingar um fyrirhugaðar rannsóknir. Eins og að framan er rakið hefur Ísland innan efnahagslögsögunnar lögsögu að því er varðar vísindalegar rannsóknir. Fram kemur í 10. gr. laga nr. 41/1979, um landhelgi, efnahagslögsögu og landgrunn, að umsókn um leyfi til rannsókna í landhelgi, efnahagslögsögu og landgrunni Íslands skuli fylgja nákvæmar upplýsingar um eðli og markmið rannsóknar og tiltekin önnur atriði varðandi rannsóknina. Er þetta áréttting á þeirri skyldu. Þá er rétt að minnast á að sams konar ákvæði er að finna í 16. gr. laga nr. 57/1998, um rannsóknir og nýtingu á auðlindum í jörðu.

Um 6. gr.

Við það er miðað í 1. mgr. að leyfi til kolvetnisleitar verði veitt til allt að þriggja ára í senn. Ráðherra er þó heimilt að kveða á um styttri leyfistíma enda verður að telja að í mörgum tilfellum sé nægilegt fyrir leyfishafa að fá styttri tíma til leitar.

Það er meginregla skv. 2. mgr. að leyfi til kolvetnisleitar felur ekki í sér forgangsrétt til handa leyfishafa til rannsókna eða vinnslu að lokinni leit. Slíkan rétt geta þeir aðilar einir öðlast sem fengið hafa rannsókna- og vinnsluleyfi skv. IV. kafla frumvarpsins. Helstu rökin fyrir þessu ákvæði eru þau að væri forgangsréttur tryggður þeim sem fá leyfi til kolvetnisleitar gæti það dregið úr áhuga olíufyrirtækja á að sækja um rannsókna- og vinnsluleyfi sem íslensk stjórnvöld kynnu síðar að auglýsa til umsóknar. Eins og greinir í athugasemdum við 4. gr. frumvarpsins felur leyfi til leitar að jafnaði einungis í sér heimild til handa leyfishafa til að framkvæma grunnar boranir, þ.e. með sýnatöku úr efstu jarðlögum hafsbotnins, t.d. með grunnum borunum eða töku kjarna. Þó getur hugsast að svo ólíklegt sé að kolvetni finnist á ákveðnum svæðum að stjórnvöld semji svo um við aðila, sem fær leyfi til þess að leita að kolvetni, að hann njóti forgangsréttar þegar kemur að því að rannsaka og vinna kolvetni.

Í 3. mgr. er ráðherra tryggð heimild til þess að setja nánari reglur um veitingu leyfis til leitar að kolvetni. Í reglum þessum er m.a. gert ráð fyrir ákvæðum um greiðslu kostnaðar vegna mats á umsækjendum og veitingar leyfa, upplýsinga- og tilkynningaskyldu um framkvæmd og niðurstöður leitar, afhendingu gagna og þagnarskyldu. Ljóst þykir að nokkuð mikill kostnaður kann að hljótast af því að meta umsækjanda um leyfi. Þykir því rétt að stjórnvöld hafi heimild til þess að endurkrefja umsækjanda um þann kostnað sem hlýst af útgáfu leyfisins.

Um IV. kafla.

Hér er að finna ákvæði um rannsóknir og vinnslu kolvetnis. Fjallað er um leyfi og skilyrði leyfisveitingar, rannsóknir og vinnslu, leiðslukerfi og lokun hafstöðvar að lokinni rannsókn og vinnslu.

Um 7. gr.

Ákvæði 1. mgr. felur í sér heimild ráðherra til að veita einkarétt til rannsókna og vinnslu á tilteknum svæðum. Eins og áður er rakið í almennum athugasemdum felst í þessu að fyrirtæki er veitt sérleyfi til þess að rannsaka og vinna kolvetni á tilteknum svæðum. Þessum einkarétti er svo hægt að skipta á milli fleiri umsækjenda samkvæmt nánara samkomulagi milli fyrirtækjanna og ráðherra. Þó er miðað við það að einn aðili beri ábyrgð á rekstrinum og starfseminni út á við gagnvart íslenska ríkinu. Þá er tekið fram að einungis megi veita slíkt leyfi aðilum sem að mati ráðherra hafa nægilega sérþekkingu og reynslu og fjárhagslegt bolmagn. Í þessu efni skal á það bent að í 5. gr. tilskipunar 94/22/EB er m.a. við það miðað að aðildarríkin geri nauðsynlegar ráðstafanir til að tryggja að leyfi séu einungis veitt á grundvelli viðmiðana sem varða a) tæknilegt og fjárhagslegt bolmagn fyrirtækja og b) hvernig þau hyggjast standa að leit, rannsóknum og/eða vinnslu á svæðinu sem um ræðir.

Greinin gerir ráð fyrir því að rannsókna- og vinnsluleyfi skiptist í tvo hluta. Er annars vegar um að ræða réttinn til að rannsaka hvort kolvetni eru á tilteknum svæðum og hins vegar réttinn til þess að vinna kolvetni að uppfylltum þeim skilyrðum sem sett eru fyrir rannsókn, sbr. 11. gr. frumvarpsins. Helstu rökin fyrir því að veita sameiginlegt leyfi til rannsókna- og vinnslu kolvetna eru þau að ólíklegt má telja að olíufyrirtæki leggi í kostnaðarsamar rann-

sóknir, sem m.a. fela í sér djúpar rannsóknarborholur, nema þeim verði fyrir fram tryggður réttur til þess að framleiða og verða eigendur að því kolvetni sem er framleitt.

Um 8. gr.

Í þessari grein eru reglur um það að auglýsa skuli eftir umsóknum um leyfi til rannsókna- og vinnslu kolvetnis á tilteknum svæðum. Eins og að framan greinir í almennum athugasemdum er í 3. gr. tilskipunar 94/22/EB ákvæði um það hvernig auglýsa beri eftir umsóknum um rannsókna- og vinnsluleyfi.

Í 1. mgr. er við það miðað að tekið sé tillit til skuldbindinga Íslands samkvæmt EES-samningnum eins og að framan greinir. Með orðalaginu „að jafnaði“ er tekið tillit til þess að vera kann að ráðherra veiti leyfi án þess að til sérstakrar auglýsingar komi eins og greinir í 4. mgr. þessarar greinar. Meginreglan er því sú að auglýst er eftir umsækjendum um leyfi til rannsókna- og vinnslu kolvetnis, en hugmyndin að baki þessari aðferð er sú að fá sem flest félög til þess að sækja um rannsókna- og vinnsluleyfi.

Samkvæmt 2. mgr. verður kveðið á um það í auglýsingu til hvaða svæða rannsókna- og vinnsluleyfi tekur. Við það er miðað að í auglýsingu verði gerð grein fyrir helstu skilmálum og skilyrðum fyrir veitingu leyfis. Einungis er unnt að geta skilmála almenns eðlis í auglýsingu. Ekki verður gengið frá endanlegum skilmálum leyfis fyrr en að loknum samningaviðræðum við þann sem fær rannsókna- og vinnsluleyfi á viðkomandi svæði.

Í 3. mgr. er ráðherra veitt heimild til að hafna öllum umsóknum um leyfi sem borist hafa í kjölfar auglýsingar. Sambærilegt ákvæði er í 6. mgr. 3. gr. tilskipunar 94/22/EB. Þar er þó sérstaklega áréttað að slík ákvörðun megi ekki fela í sér að fyrirtækjum sé mismunað.

Samkvæmt 4. mgr. er ráðherra heimilt, þrátt fyrir meginreglu 1. mgr., að veita leyfi án þess að auglýsa það þegar sérstaklega stendur á. Þannig er ráðherra heimilt að birta tilkynningu um að leyfi verði veitt öllum umsækjendum sem uppfylla þau skilyrði sem sett eru fyrir veitingu leyfis án undangenginnar auglýsingar (e. open door policy). Eru þá leyfi veitt eftir því sem þau berast. Þegar svo stendur á þurfa umsækjendur ekki að bíða þess að tilkynnt verði um að leyfi verið veitt. Þetta gæti t.d. verið skynsamlegt þegar um er að ræða svæði þar sem ekki er talið líklegt að kolvetni finnist í vinnanlegu magni. Í þessu sambandi skal þess einnig getið að skv. 3. mgr. 3. gr. tilskipunar 94/22/EB mega aðildarríki veita leyfi án auglýsingar ef svæðið sem leitað er leyfis fyrir: a) er aðgengilegt til langs tíma; eða b) hefur áður sætt málsmeðferð þar sem auglýst hefur verið en hefur ekki leitt til þess að leyfi hafi verið veitt; eða c) hefur verið gefið eftir af fyrirtæki og fellur ekki sjálfkrafa undir a-lið. Þá þarf ekki að auglýsa eftir umsóknum um leyfi ef landfræðilegar ástæður eða framleiðsluástæður réttlæta veitingu leyfis fyrir svæði til leyfishafa aðlægs svæðis, en ákvæðið tryggir að leyfishafar annarra aðlægra svæða geti lagt inn umsóknir í þessum tilvikum innan hæfilegs tíma. Regla þessi er efnislega sambærileg 4. mgr. 3. gr. tilskipunar 94/22/EB (e. neighbouring block policy).

Í 5. mgr. er kveðið á um heimild ráðherra til að krefjast greiðslu kostnaðar vegna mats á umsækjendum og veitingar leyfa. Eins og rakið er í athugasemdum við 6. gr. frumvarpsins þykir ljóst að nokkuð mikill kostnaður kann að hljótast af því að meta umsækjendur. Sömu rök búa að baki heimild þessa ákvæðis um heimild stjórnvalda til þess að endurkrefja umsækjanda um kostnað sem hlýst af útgáfu leyfis til rannsókna og vinnslu kolvetnis.

Um 9. gr.

Þessi grein er sambærileg 5. gr. frumvarpsins. Um skýringar á ákvæðinu vísast til athugasemda sem fram koma í skýringum við þá grein.

Um 10. gr.

Samkvæmt 7. gr. fær leyfishafi einkarétt til að rannsaka og vinna kolvetni á tilteknu svæði. Eins og vikið er að í athugasemdum við þá grein er nauðsynlegt að veita sameiginlegt rannsókna- og vinnsluleyfi til þess að olíufyrirtæki leggi til það fé sem nauðsynlegt er til þess að rannsaka kolvetni á ákveðnum svæðum. Það skal hins vegar áréttað að rétturinn til þess að vinna kolvetni er að sjálfsögðu bundinn því skilyrði að það finnist í vinnanlegu magni á rannsóknartímanum. Við það er miðað að leyfið skiptist í tvo hluta skv. 1. og 2. mgr. Samkvæmt fyrri hluta leyfisins hefur leyfishafi heimild til þess að rannsaka kolvetni, en samkvæmt síðari hluta leyfisins hefur hann heimild til vinnslu kolvetnis. Síðari hluti leyfisins verður einungis virkur ef kolvetni finnst í vinnanlegu magni á því tímabili sem fyrri hluti leyfisins tekur til.

Í 1. mgr. er fjallað um fyrri hluta rannsókna- og vinnsluleyfis, þ.e. rannsóknirnar. Fram kemur að leyfi til rannsókna skuli veitt til allt að 12 ára og er heimilt að framlengja það um tvö ár í senn en þó ekki lengur en til 16 ára. Ætla má að ekki verði algengt að leyfi verði veitt til rannsókna til 12 ára í upphafi, en þó verður að hafa í huga að aðstæður til olíuleitar geta verið erfiðar hér við land vegna veðurfars. Framlenging á leyfi kemur til greina þegar sérstaklega stendur á, t.d. ef leyfishafi sýnir með fullnægjandi hætti fram á að ókleift hafi verið að rannsaka til hlítar hvort kolvetni sé í vinnanlegu magni á því svæði sem leyfið tekur til.

Í 2. mgr. er kveðið á um síðari hluta rannsókna- og vinnsluleyfis, þ.e. vinnslu kolvetnis. Eins og áður er rakið á leyfishafi forgangsrétt til vinnslu kolvetnis að loknu rannsóknartímabilinu. Sá forgangsréttur er þó undir því kominn að leyfishafi hafi uppfyllt þau skilyrði sem sett eru fyrir rannsóknum skv. 1. mgr. þessarar greinar. Eins og fram kemur í greininni er þó ekki heimilt að veita vinnsluleyfi til lengri tíma en 30 ára.

Samkvæmt 3. mgr. verður að miða við það að rétturinn til vinnslu kolvetnis nái a.m.k. til þess svæðis sem leyfishafi hefur rannsakað og hyggst hefja vinnslu á kolvetni. Í nágrannalöndunum hefur þó tíðkast að leyfishafa sé veittur réttur til þess að vinna kolvetni á stærra svæði en rannsóknarleyfið tók til. Þetta fer þó eftir orðalagi rannsókna- og vinnsluleyfisins. Það er þó lagt í vald ráðherra að leggja endanlegt mat á það hvort svæði sem leyfishafi hyggst hefja vinnslu kolvetnis á sé hagkvæmur kostur.

Um 11. gr.

Hér eru tilgreind þau efnisatriði sem ávallt þarf að taka afstöðu til í rannsókna- og vinnsluleyfi. Upptalningin er ekki tæmandi heldur tekur hún mið af helstu almennum atriðum sem ávallt þurfa að vera til staðar í slíku leyfi. Að öðru leyti verður að meta það í hverju tilviki fyrir sig hvað eigi að koma fram í rannsókna- og vinnsluleyfi.

Um 12. gr.

Markmið 1. málsl. ákvæðisins er að tryggja að áður en leyfi lýkur, án tillits til þess hvaða ástæður liggja því til grundvallar, sé endanlega gengið frá fjárhagslegum skuldbindingum leyfishafa, t.d. vegna greiðslu gjalda og skaðabóta vegna tjóns sem leyfishafi kann að vera ábyrgur fyrir.

Í 2. málsl. er svo mælt fyrir að sé starfsskyldum eða annars konar skyldum leyfishafa áfátt sé ráðherra heimilt að krefjast þess af leyfishafa að hann greiði þann kostnað, að hluta eða að fullu, sem þarf til að inna þá skyldu af hendi. Hafi stjórnvöld afturkallað leyfi er ástæðan oft sú að leyfishafi hefur vanrækt þær skyldur sem á hann hafa verið lagðar. Við þessar aðstæður kann því að reynast erfitt að fá leyfishafa til þess að fullnægja þeim skyldum sem

stjórnvöld telja nauðsynlegar. Þykir því hagkvæmast að stjórnvöld geti innt þessar skyldur af hendi og krafið leyfishafa um þann kostnað sem af þessu hefur hlotist.

Um 13. gr.

Í greininni segir að við rannsóknir og vinnslu skuli gæta fyllsta öryggis og þess að framkvæmdir séu í samræmi við góða alþjóðlega venju við svipaðar aðstæður. Rétt þykir að leggja sérstaka áherslu á að gæta skuli fyllsta öryggis við rannsóknir og vinnslu. Þá er miðað við að framkvæmdirnar samrýmist góðum alþjóðlegum venjum. Ástæðan er sú að við mat á því hvað telst fyllsta öryggi verður að miða við þau sjónarmið sem almennt eru lögð til grundvallar í olíuiðnaðinum varðandi öryggismálefni, tæknileg atriði o.fl.

Greinin leggur jafnframt þá skyldu á leyfishafa að hann stofni ekki til ónauðsynlegrar hættu eða leggi tálmanir á flutninga, flug, fiskveiðar eða aðra starfsemi. Meginmarkmiðið með þessu er að koma í veg fyrir að fiskveiðum verði raskað. Leggja verður sjálfstætt mat á það í hverju tilviki hvort líta megi svo á að starfsemi tálmi flutningum, flugi, fiskveiðum eða annarri starfsemi.

Ákvæðið felur í sér meginreglu og er fyrst og fremst beint að leyfishafa og eftir atvikum öðrum samningsaðilum. Ráðherra verður því ávallt að hafa í huga þau sjónarmið sem lögð eru til grundvallar í ákvæðinu þegar leyfi er veitt samkvæmt reglum frumvarpsins. Hér má nefna að þegar ráðherra tekur ákvörðun um hvort samþykkja skuli framkvæmda- og vinnsluáætlun, sbr. 2. mgr. 15. gr., verður hann að líta til fyrirmæla þessarar greinar.

Um 14. gr.

Boranir eru í eðli sínu hættulegar og geta stofnað öryggi manna í hættu og valdið tjóni á búnaði og mengun sjávar. Þykir því rétt að áskilja samþykki ráðherra fyrir hverri einstakri borun sem er framkvæmd.

Um 15. gr.

Einungis kemur til beitingar þessa ákvæðis ef leyfishafi hefur fundið nýtanlegar kolvetnisauðlindir og hyggst hefja vinnslu.

Í 1. mgr. er mælt fyrir um skyldu leyfishafa til þess að leita samþykkis ráðherra áður en bygging hafstöðvar og vinnsla kolvetnis hefst. Þegar metið er hvort samþykkja skuli byggingu hafstöðvar skal taka tillit til þess hvort búnaður og starfshættir hæfi aðstæðum. Þá verður einnig að taka tillit til þeirra atriða sem kveðið er á um í 13. gr. frumvarpsins.

Í 2. mgr. er kveðið á um skyldu leyfishafa til þess að leggja fram framkvæmda- og vinnsluáætlun varðandi þær kolvetnisauðlindir sem leyfishafi hyggst hefja vinnslu á, en áætlunin er háð samþykki ráðherra. Ekki er sérstaklega vikið að því hvað eigi að koma fram í framkvæmda- og vinnsluáætlun heldur ræðst það af aðstæðum hverju sinni.

Í 3. mgr. er að finna ákvæði sem sett er til öryggis þegar ný vitneskja fæst um kolvetnisauðlindir sem leiðir til þess að breyta verður um framkvæmda- og vinnsluáætlun til að koma í veg fyrir varanlegt tjón á kolvetnisauðlindinni.

Um 16. gr.

Hér er kveðið á um lokun hafstöðvar. Með lokun er átt við stöðvun á starfrækslu hafstöðvar, þ.m.t. stöðvun á viðhaldi, brottflutning hennar og niðurrif hennar í heild eða að hluta og hreinsun vinnslusvæðisins að niðurrifi loknu. Lokun getur einnig falið í sér áframhaldandi starfrækslu hafstöðvar samkvæmt nýju leyfi eða að hafin sé annars konar starfsemi í stöðinni. Markmiðið með greininni er að tryggja að leyfishafi hugi að lokun hafstöðvar þegar í upphafi

er hann leggur fram framkvæmda- og vinnsluáætlun. Þessu til stuðnings má nefna að fyrirmæli eru um það í ályktun Alþjóðasiglingamálastofnunar Sameinuðu þjóðanna (IMO) frá 19. október 1989 að hafstöðvar eigi að vera hannaðar og byggðar með hliðsjón af niðurrifi á síðari stigum.

Um 17. gr.

Í greininni er fjallað um leiðslukerfi til vinnslu og flutnings kolvetnis en gera má ráð fyrir að kolvetni verði flutt með þessum hætti af vinnslusvæðum. Almennt er talið að leiðslukerfi séu öruggur kostur í umhverfislegu tilliti miðað við að dæla kolvetni í olíuskip.

Í 1. málsl. 1. mgr. er kveðið á um það að leyfi ráðherra þurfi til byggingar og rekstrar leiðslukerfa til vinnslu og flutnings kolvetnis. Eðlilegt þykir að leyfi ráðherra þurfi fyrir þessum framkvæmdum þar sem þær geta raskað annars konar starfsemi, t.d. togveiðum eða lagningu sæstrengja. Á það skal bent að leiðslukerfi eru hafstöðvar í skilningi 2. mgr. 2. gr. frumvarpsins. Skv. 2. málsl. 1. mgr. skal í leyfinu m.a. setja skilyrði um skipulag leiðslubúnaðarins, þar á meðal legu og stærð lagna, eignarhald á kerfinu, afnot annarra af því, greiðslur fyrir afnotin og greiðslur til ríkisins. Telja verður nauðsynlegt að sett verði skilyrði fyrir skipulagi leiðslubúnaðarins vegna þeirra ástæðna sem að framan eru raktar.

Ákvæði 2. mgr. undanþiggur staðbundinn leiðslubúnað sem er hluti hafstöðvar og notaður er til vinnslu úr einstakri kolvetnisauðlind. Hafstöðvum fylgir leiðslubúnaður sem nauðsynlegur er fyrir starfsemina en er ekki ætlaður til flutnings kolvetna af vinnslusvæðum til lands. Þykir því nauðsynlegt að undanskilja þennan búnað þeirri reglu 1. mgr. að leyfi ráðherra þurfi sérstaklega fyrir þessum leiðslubúnaði, enda verður tekið á þessu atriði í leyfi fyrir hafstöð.

Ákvæði 3. mgr. varðar þá stöðu þegar leiðslubúnaður leyfishafa nær til landsvæðis eða landgrunns annars ríkis og samstarfssamningur um byggingu og starfrækslu leiðslukerfisins er milli þess ríkis og íslenska ríkisins. Hér getur ráðherra lagt þá skyldu á leyfishafa íslenska hluta leiðslubúnaðarins að taka þátt í samstarfinu og sett nánari skilyrði um þátttökuna. Það eru fyrst og fremst hagkvæmnisrök sem búa að baki þessari reglu.

Um 18. gr.

Í greininni kemur fram að bygging og starfræksla leiðslubúnaðar á vegum annars ríkis til flutnings á kolvetni milli landa um landgrunn Íslands sé háð leyfi iðnaðarráðherra. Erfitt er að ímynda sér að til beitingar reglunnar geti komið á næstu árum. Engu að síður þykir rétt að kveða sérstaklega á um þetta atriði, en reglan á sér fyrirmynd í 79. gr. hafréttarsáttmálans. Þar kemur fram í 1. mgr. 79. gr. að öll ríki hafi rétt til þess að leggja rör og leiðslur á landgrunninu. Þessi réttur takmarkast þó af hagsmunum strandríkisins, sbr. einkum 2.–5. mgr. 79. gr. sáttmálans. Þannig hefur strandríkið rétt til þess að gera sanngjarnar ráðstafanir vegna rannsókna á landgrunninu, hagnýtingar náttúruauðlinda þess, eftirlits og varna gegn mengun úr leiðslum. Afmörkun leiðar til að leggja þessar leiðslur á landgrunninu er háð samþykki strandríkisins. Þá hefur strandríki lögsögu yfir leiðslum sem notaðar eru við rannsóknir eða nýtingu auðlinda landgrunns þess og við rekstur mannvirkja sem eru undir lögsögu þess. Loks kemur fram að ríki skuli jafnan taka tilhlýðilegt tillit til leiðslna sem þegar hafa verið lagðar þegar lagðar eru nýjar leiðslur á landgrunni strandríkis.

Um 19. gr.

Ákvæði 1. mgr. er ætlað að tryggja að kolvetnisauðlindir sem ná inn á svæði sem tveir eða fleiri leyfishafar hafa vinnsluleyfi á verði nýttar eins og um eitt svæði væri að ræða. Telja verður að samvinna sem þessi sé til þess fallin að lækka byggingar- og vinnslukostnað.

Almennt má gera ráð fyrir því að samstarfssamningar um rannsóknir og vinnslu séu mjög ítarlegir og hafi að geyma reglur um skiptingu kolvetnis milli aðila. Ákvæðið gerir ráð fyrir því að slíkir samningar hafi hlotið samþykki ráðherra enda verður að telja nauðsynlegt að samningar sem þessir stangist ekki á við opinbera hagsmuni. Þá er ráðherra heimilt að kveða á um innihald samstarfssamnings ef aðilar komast ekki sjálfir að samkomulagi innan hæfilegs tíma. Veita verður aðilum sanngjarnt svigrúm til þess að komast sjálfir að samkomulagi um samstarfssamning. Það fer eftir eðli máls hverju sinni hvað er hæfilegur tími, en hér verður að miða við hagsmuni allra þeirra sem koma að máli, þ.e. hagsmuni aðilanna og hins opinbera. Hér verður að líta til þess að samkomulag verður að nást nægilega fljótt svo að hanna megi framleiðslutæki með tilliti til þess að samhæfa kolvetnisvinnsluna.

Ákvæði 2. mgr. tekur til þess tilviks þegar kolvetnisauðlind nær yfir í landgrunn annars ríkis og samstarfssamningur milli þess ríkis og íslenska ríkisins hefur verið gerður. Þegar svo háttar til krefst þessi staða einnig samhæfingar á rannsóknum og vinnslu kolvetnisauðlindarinnar svo að nýta megi hana með hagkvæmum hætti. Þykir rétt að ráðherra sé hér einnig veitt heimild til þess að samhæfa nýtingu auðlindarinnar og setja leyfishafa nánari skilyrði fyrir þátttöku.

Um 20. gr.

Samkvæmt 1. mgr. er ráðherra veitt heimild til þess að krefjast þess að tvær eða fleiri kolvetnisauðlindir verði samnýttar af hagkvæmnisástæðum eða öðrum ástæðum. Þetta ákvæði er til fyllingar reglu 19. gr. sem kveður á um skiptingu kolvetnisauðlindar af landfræðilegum ástæðum.

Samkvæmt 2. mgr. getur ráðherra skyldað leyfishafa til að veita öðrum leyfishöfum aðgang að búnaði í því skyni að samnýta kolvetnisauðlindir. Verður að sjálfsögðu að miða við að þessi ráðstöfun valdi leyfishafa ekki verulegum óþægindum eða raski.

Um 21. gr.

Frumvarpsgreinin felur fyrst og fremst í sér áréttingu á þeirri lagaskyldu sem felst í lögum um mat á umhverfisáhrifum. Þannig er ljóst að leyfi eða samþykki iðnaðarráðherra fyrir starfsemi samkvæmt lögunum er ávallt háð því að fram hafi farið mat á umhverfisáhrifum samkvæmt lögum þar að lútandi þegar við á.

Um V. kafla.

Í kaflanum eru ákvæði um vinnuumhverfi og öryggisráðstafanir við kolvetnisstarfsemi. Er í 22. gr. kveðið á um að gæta skuli fyllsta öryggis við kolvetnisstarfsemi, öryggis á vinnustað og að gerðar séu nauðsynlegar ráðstafanir til að koma í veg fyrir tjón eða draga úr afleiðingum þess. Þá kveður 23. gr. á um sérstök öryggissvæði umhverfis hafstöðvar.

Um 22. gr.

Í greininni er almennt kveðið á um skyldur leyfishafa í tengslum við vinnuumhverfi og öryggisráðstafanir. Miða verður við að vinnuumhverfi þar sem kolvetnisstarfsemi fer fram taki ávallt mið af gildandi lögum.

Í 1. mgr. segir að við kolvetnisstarfsemi skuli gæta fyllsta öryggis. Þá skuli þess gætt að starfsemin uppfylli þær kröfur sem almennt eru gerðar til kolvetnisstarfsemi á hverjum tíma, m.a. hvað varðar tæknibúnað og vinnuferli.

Samkvæmt 2. mgr. skulu leyfishafi og aðrir þeir sem taka þátt í kolvetnisstarfsemi stuðla að góðum aðbúnaði, hollustuháttum og öryggi á vinnustöð og að virkt eftirlit sé með því að

vinnuumhverfi þar fullnægi gildandi lögum. Þannig er í þessari grein vísað til gildandi laga um efnið á hverjum tíma, sbr. nú lög um hollustuhætti og mengunareftirlit og lög um aðbúnað, hollustuhætti og öryggi á vinnustöðum. Í fyrrgreindu lögunum er m.a. að því vikið í 2. gr. að lögin taki til hvers konar starfsemi og framkvæmda í efnahagslögsögunni.

Í 2. mgr. er gert ráð fyrir því að leyfishafi geri nauðsynlegar ráðstafanir til að fyrirbyggja eða draga úr afleiðingum tjóns, þar á meðal ráðstafanir sem miða að því að færa umhverfið í sitt fyrra horf.

Loks kemur fram í 3. mgr. heimild til handa iðnaðarráðherra til að setja nánari reglur um hafstöðvar. Hér má nefna reglur sem settar eru til þess að tryggja öruggt og heilsusamlegt umhverfi við kolvetnisstarfsemi. Ástæða þykir til að hafa heimild til handa ráðherra til að setja sérreglur um vinnuaðstöðu á hafstöðvum þar sem gerðar eru strangari kröfur en almennt gilda um vinnuaðstöðu samkvæmt gildandi lögum á hverjum tíma.

Um 23. gr.

Í 23. gr. koma fram reglur um sérstök öryggisbelti umhverfis hafstöðvar. Ákvæðið veitir iðnaðarráðherra heimild til þess að setja nánari reglur um þessi svæði í samræmi við alþjóðlegar venjur. Enn fremur getur ráðherra sett nánari reglur um takmarkanir á rétti skipa til að festa akkeri og stunda veiðar í nágrenni við leiðslubúnað.

Almennt er talið nauðsynlegt að setja sérstök öryggisbelti umhverfis mannvirki og útbúnað sem notaður er til kolvetnisvinnslu vegna slysa- og mengunarhættu. Strandríkjum er heimilt að þjóðarétti að koma á fót sérstökum öryggisbeltum umhverfis tilbúnar eyjar, útbúnað og mannvirki. Þannig kemur fram í 4. mgr. 60. gr. hafréttarsáttmálans að í sérefnahagslögsögunni geti strandríki ef nauðsyn krefur ákveðið hæfilega stór öryggisbelti umhverfis þessar tilbúnu eyjar, útbúnað og mannvirki þar sem það getur gert viðeigandi ráðstafanir til að tryggja öryggi siglinga, útbúnaðarins og mannvirkjanna. Þá segir í 80. gr. sáttmálans að 60. gr. gildi um þessi mannvirki og útbúnað að breyttu breytanda á landgrunninu. Ekki er vafa undirorpið að hafstöðvar í skilningi hugtaksins í frumvarpi þessu falla undir tilvitnuð ákvæði hafréttarsáttmálans.

Í 5. mgr. 60. gr. hafréttarsáttmálans segir að strandríki skuli ákveða víðáttu öryggisbeltanna með hliðsjón af viðeigandi alþjóðareglum og skuli þau ekki ná lengra út en 500 metra þar í kring nema annað sé heimilað í almennt viðurkenndum alþjóðareglum eða felist í tillögu þar til bærrar alþjóðastofnunar. Í ljósi þess að víðátta öryggisbeltisins kann að taka breytingum samkvæmt alþjóðalögum er eðlilegt að ráðherra setji á hverjum tíma nánari reglur um beltið.

Í lokamálslið 23. gr. kemur fram sú regla að ráðherra geti sett reglur sem takmarka rétt skipa til að festa akkeri og stunda veiðar í nágrenni við leiðslubúnað. Hér er gengið skemur en í fyrri hluta ákvæðisins þar sem í þjóðaétti er almennt litið svo á að strandríki hafi ekki eins ríkar heimildir til þess að koma á fót öryggisbeltum í nágrenni við leiðslubúnað. Hins vegar verður að líta svo á að heimilt sé að setja reglur af öryggisástæðum.

Um VI. kafla.

Hér eru fyrirmæli um eftirlit með leitar-, rannsókna- og vinnslusvæðum, upplýsingagjöf, meðferð upplýsinga o.fl. Hér er miðað við að Orkustofnun hafi stjórnsýsluverkefnum að gegna við framkvæmd laganna. Ákvæði þessi eiga sér að nokkru fyrirmynd í IX. kafla laga nr. 57/1998, um rannsóknir og nýtingu á auðlindum í jörðu.

Um 24. gr.

Í 1. mgr. þessarar greinar er lagt til að Orkustofnun verði fengið það hlutverk að hafa eftirlit með leitar-, rannsókna- og vinnslusvæðum samkvæmt þeim leyfum sem iðnaðarráðherra veitir.

Í 2. mgr. er heimild til að krefjast greiðslu kostnaðar vegna eftirlits með leitar-, rannsókna- og vinnslusvæðum kolvetnis þar sem leyfi hefur verið veitt. Ljóst má vera að þetta eftirlit Orkustofnunar getur falið í sér verulega útgjaldaaukningu. Til þess að mæta þessum kostnaði er sett heimild til handa ráðherra til að krefja leyfishafa um þann aukna kostnað sem leiðir af eftirliti þessu, sbr. 14. tölul. 11. gr.

Um 25. gr.

Rétt þykir að Orkustofnun viði að sér þekkingu og gögnum sem verða til um landgrunnið við kolvetnisstarfsemi. Telja verður að það sé lykilatriði við skynsamlega stjórnun kolvetnisstarfsemi að stjórnvöld hafi yfirsýn yfir þessa starfsemi.

Um 26. gr.

Í þessari grein er mælt fyrir um upplýsingaskyldu handhafa leitar-, rannsókna- eða vinnsluleyfis. Er gert ráð fyrir almennri upplýsingaskyldu leyfishafa gagnvart Orkustofnun. Telja má eðlilegt að upplýsingar þessar verði sendar stofnuninni eigi sjaldnar en árlega. Þá er kveðið á um heimild Orkustofnunar til þess að óska eftir gögnum og sýnum af efnum. Þessi frumvarpsgrein tengist því hlutverki Orkustofnunar að viða að sér upplýsingum sem til verða við kolvetnisstarfsemi og nýst gætu stjórnsvöldum við skynsamlega stjórnun hennar.

Um VII. kafla.

Í þessum kafla eru eignarnáms- og bótaákvæði. Í 27. gr. er almenn eignarnámsheimild til handa ráðherra. Þá er í 28. gr. að finna ákvæði um skaðabótaábyrgð vegna kolvetnisstarfsemi. Í 29. gr. er mælt fyrir um að réttur tjónþola til skaðabóta samkvæmt almennum reglum sé að engu leyti takmarkaður.

Um 27. gr.

Í ákvæði þessu kemur fram að iðnaðarráðherra sé heimilt að taka eignarnámi fasteignir til þess að kolvetnisstarfsemi geti farið fram. Bætur til handa eignarnámsþola verða ákveðnar með eignarnámsmati samkvæmt lögum um framkvæmd eignarnáms.

Um 28. gr.

Þessi grein fjallar um skaðabótaábyrgð leyfishafa á tjóni sem rekja má til kolvetnisstarfsemi. Í greininni er aðeins fjallað um skilyrði fyrir skaðabótum, en um ákvörðun bótafjárhæðar fer eftir almennum reglum skaðabótaréttar.

Í 1. mgr. kemur fram meginregla um skaðabótaábyrgð leyfishafa á tjóni sem rekja má til kolvetnisstarfsemi og er þar um hlutlæga reglu að ræða. Þannig þarf sá sem verður fyrir tjóni sem stafar að kolvetnisstarfsemi ekki að sanna að tjónið sé afleiðing saknæmrar háttsemi, en tjónþoli verður að sjálfsögðu að sýna fram á að almenn skilyrði hlutlægrar ábyrgðar séu fyrir hendi. Séu þessi skilyrði skaðabótaábyrgðar uppfyllt getur tjónþoli krafið leyfishafa um bætur, enda ber leyfishafi ábyrgðina út á við gagnvart tjónþola. Þannig skiptir t.d. ekki máli þótt verktaki sem starfar á vegum leyfishafa hafi valdið tjóninu. Leyfishafi getur aftur átt kröfu á hendur verktaka samkvæmt almennum reglum skaðabótaréttar. Helstu rökin sem búa

að baki reglunni um hlutlæga ábyrgð eru þau að um er að ræða starfsemi sem almennt má telja hættulega.

Meginregla 1. mgr. sætir sérstökum takmörkunum sem fram koma í 2. og 3. mgr. varðandi eigin sök tjónþola og óviðráðanleg atvik (vis major). Í 2. mgr. kemur fram að skaðabótaskylda falli niður ef sannað er að tjónþoli hefur valdið tjóninu af ásetningi eða stórfelldu gáleysi.

Í 3. mgr. er ákvæði um að lækka megi eða fella niður bætur ef umhverfistjón má rekja til óviðráðanlegra atvika sem leyfishafa verður ekki kennt um, t.d. náttúruhamfara. Sambærileg ákvæði tíðkast í löggjöf nágrannaríkjanna um sama efni og byggist á því að skaðabótagreiðslur vegna tjóns sem verður af kolvetnisstarfsemi geta verið verulega háar. Í þessu sambandi má einnig minnast á alþjóðasamning frá 29. nóvember 1969 um einkaréttarlega ábyrgð vegna tjóns af völdum olíumengunar, sem lögfestur var hér á landi með lögum nr. 14/1979. Þar er gert ráð fyrir að óviðráðanleg atvik eins og t.d. styrjöld eða náttúruhamfarir leysi rekstraraðila undan ábyrgð.

Um 29. gr.

Rétt þykir að árétta að ákvæði 28. gr. takmarkar að engu leyti rétt til skaðabóta sem tjónþoli kann að eiga samkvæmt almennum reglum skaðabótaréttar.

Um VIII. kafla.

Svo sem heiti kaflans ber með sér geymir hann ákvæði af ýmsum toga, þ.m.t. refsi- og viðurlagaákvæði. Í 31. gr. er meginregla um bann við framsali á leyfi samkvæmt lögunum. Þá er í 32. gr. reglugerðarheimild til handa iðnaðarráðherra. Í 33. gr. eru refsiákvæði. Loks er gildistökuákvæði í 34. gr.

Um 30. gr.

Óeðlilegt þykir að leyfi sem hér eru til umfjöllunar geti gengið kaupum og sölum eða að þau sé hægt að setja til tryggingar fjárskuldbindingum. Tilgangurinn með því að áskilja leyfi ráðherra til þess að framselja leyfi er sá að fyrirtæki sem fær leyfið framselt fullnægi þeim skilyrðum sett eru að öðru leyti fyrir veitingu leyfis í frumvarpinu. Þetta ákvæði tekur ekki einungis til beins framsals á leyfi heldur einnig til framsals með óbeinum hætti, t.d. breytinga á eignarhaldi fyrirtækis sem fengið hefur leyfi til leitar, rannsókna eða vinnslu kolvetnis.

Um 31. gr.

Greinin þarfnast ekki skýringa.

Um 32. gr.

Í 1. málsl. kemur fram að brot gegn ákvæðum frumvarpsins varði sektum, nema þyngri refsingu varði samkvæmt öðrum lögum. Þá er heimild í 2. málsl. til að dæma jafnt lögaðila sem einstaklinga til greiðslu sekta vegna brota á ákvæðum frumvarpsins. Ákvæði 3. málsl. felur í sér hlutræna refsiábyrgð lögaðila þar sem það á við. Rökin fyrir þessum reglum eru einkum þau að ekki þykir eðlilegt að lögaðili sleppi þótt hinn brotlegi finnist ekki. Ýmis dæmi eru um ákvæði um refsiábyrgð án persónulegrar sakar í íslenskum rétti, en sem dæmi má nefna 35. gr. laga nr. 57/1998, um rannsóknir og nýtingu á auðlindum í jörðu, og 28. gr. laga nr. 32/1986, um varnir gegn mengun sjávar.

Fjármálaráðuneyti,
fjárlagaskrifstofa:

Umsögn um frumvarp til laga um leit, rannsóknir og vinnslu kolvetnis.

Með frumvarpinu er settur rammi um leit, rannsóknir og vinnslu á kolvetni auk flutnings þess í landhelgi, efnahagslögsögu og á landgrunni Íslands. Einnig er kveðið á um eign íslenska ríkisins á kolvetni.

Gera má ráð fyrir einhverjum kostnaði iðnaðarráðuneytisins við leyfisveitingar til leitar að kolvetni og við mat á umsækjendum sbr. 6. og 7. gr. frumvarpsins. Í 8. gr. er kveðið á um heimild ráðuneytisins til að krefjast greiðslu kostnaðar vegna slíkra leyfisveitinga. Þá má gera ráð fyrir nokkrum kostnaði Orkustofnunar við eftirlit með leit og vinnslu kolvetnis og vegna öflunar sérþekkingar á því sviði. Í frumvarpinu er í 24. gr. gert ráð fyrir að heimilt verði að krefjast greiðslu kostnaðar vegna eftirlitsins. Í fjárlögum fyrir árið 2000 undir liðnum ýmis orkumál hefur verið gert ráð fyrir 2 m.kr. fyrir landgrunnsrannsóknir. Áætlað er að sá kostnaður auk notendagjalda komi til með að standa undir kostnaði við eftirlit, sérfræðiþekkingu og stjórnsýslu málaflokksins.

Ekki verður séð að frumvarpið hafi áhrif á afkomu ríkissjóðs verði það að lögum þar sem gert er ráð fyrir að auknum kostnaði iðnaðarráðuneytisins og Orkustofnunar verði mætt með þjónustugjöldum.

1405. Lög [210. mál]

um starfsréttindi tannsmiða.

(Afgreidd frá Alþingi 13. maí.)

Samhljóða þskj. 1107.

1406. Frumvarp til laga [488. mál]

um breytingu á samkeppnislögum, nr. 8/1993, með síðari breytingum.

(Eftir 2. umr., 13. maí.)

1. gr.

Eftirfarandi breytingar verða á 4. gr. laganna:

1. Við bætast eftirfarandi orðskýringar í réttri stafrófsröð:

   Samruni samkvæmt lögum þessum telst hafa átt sér stað þegar:

   a. tvö eða fleiri fyrirtæki, sem áður störfuðu sjálfstætt, sameinast,
   b. fyrirtæki tekur yfir annað fyrirtæki,
   c. eigendur með yfirráð í einu eða fleiri fyrirtækjum ná beinum eða óbeinum yfirráðum í einu eða fleiri fyrirtækjum til viðbótar eða
   d. fyrirtæki stofna fyrirtæki um sameiginlegt verkefni sem varir til frambúðar sem sjálfstæð efnahagseining og veldur því ekki að aðilar sem hlut eiga að máli samræmi samkeppni sín á milli eða milli sín og hins sameiginlega verkefnis.

   Yfirráð samkvæmt lögum þessum eru yfirráð sem gera aðila kleift að hafa afgerandi áhrif á rekstur og stjórnun fyrirtækis, annaðhvort sér í lagi eða sameiginlega með öðrum, hvort sem þau áhrif eru til komin vegna þess að hann getur:

   1. haft áhrif á skipun stjórnar, atkvæðagreiðslu eða ákvarðanir fyrirtækisins eða
   2. notað eða ráðstafað eignum eða hluta eigna fyrirtækis.
2. Orðskýring á orðunum „Virk yfirráð“ fellur brott.

2. gr.

Eftirfarandi breytingar verða á 5. gr. laganna:

1. Við 2. mgr. bætist nýr stafliður sem orðast svo: að fylgjast með þróun á samkeppnis- og viðskiptaháttum á einstökum mörkuðum í íslensku viðskiptalífi og kanna stjórnunar- og eignatengsl á milli fyrirtækja. Skal þetta gert m.a. í því skyni að meta hvort í íslensku viðskiptalífi sé að finna einkenni hringamyndunar, óæskilegra tengsla eða valdasamþjöppunar sem takmarkað geta samkeppni.
2. Við bætist ný málsgrein sem orðast svo:

   Við afgreiðslu mála samkvæmt lögum þessum er samkeppnisráði heimilt að raða málum í forgangsröð.

3. gr.

10. gr. laganna orðast svo:

Allir samningar og samþykktir milli fyrirtækja, hvort heldur þær eru bindandi eða leiðbeinandi, og samstilltar aðgerðir sem hafa að markmiði eða af þeim leiðir að komið sé í veg fyrir samkeppni, hún sé takmörkuð eða henni raskað eru bannaðar.

Bann þetta tekur m.a. til samninga, samþykkta og samstilltra aðgerða sem:

a. áhrif hafa á verð, afslætti, álagningu eða önnur viðskiptakjör með beinum eða óbeinum hætti,
b. takmarka eða stýra framleiðslu, mörkuðum, tækniþróun eða fjárfestingu,
c. skipta mörkuðum eða birgðalindum,
d. mismuna viðskiptaaðilum með ólíkum skilmálum í sams konar viðskiptum og veikja þannig samkeppnisstöðu þeirra,
e. setja sem skilyrði fyrir samningagerð að hinir viðsemjendurnir taki á sig viðbótarskuldbindingar sem tengjast ekki efni samninganna, hvorki í eðli sínu né samkvæmt viðskiptavenju.

4. gr.

11. gr. laganna orðast svo:

Misnotkun eins eða fleiri fyrirtækja á markaðsráðandi stöðu er bönnuð.

Misnotkun skv. 1. mgr. getur m.a. falist í því að:

a. beint eða óbeint sé krafist ósanngjarns kaup- eða söluverðs eða aðrir ósanngjarnir viðskiptaskilmálar settir,
b. settar séu takmarkanir á framleiðslu, markaði eða tækniþróun, neytendum til tjóns,
c. viðskiptaaðilum sé mismunað með ólíkum skilmálum í sams konar viðskiptum og samkeppnisstaða þeirra þannig veikt,
d. sett sé það skilyrði fyrir samningagerð að hinir viðsemjendurnir taki á sig viðbótarskuldbindingar sem tengjast ekki efni samninganna, hvorki í eðli sínu né samkvæmt viðskiptavenju.

5. gr.

13. gr. laganna orðast svo:

Samningar milli fyrirtækja falla ekki undir bann skv. 10. gr. ef samanlögð markaðshlutdeild allra samstarfsfyrirtækja fer ekki á neinum markaði sem skiptir máli yfir:

a. 5% viðmiðunarmörk, ef samningurinn er milli fyrirtækja sem starfa á sama framleiðslu- eða sölustigi (láréttur samningur),

b. 10% viðmiðunarmörk, ef samningurinn er á milli fyrirtækja sem starfa á mismunandi framleiðslu- eða sölustigi (lóðréttur samningur).

Ef um sambland af láréttum og lóðréttum samningum er að ræða eða ef erfitt er að flokka samning annaðhvort sem láréttan eða lóðréttan gilda 5% viðmiðunarmörkin.

Samningar skv. 1. mgr. falla ekki undir bann skv. 10. gr. þrátt fyrir að markaðshlutdeild fari upp fyrir viðmiðunarmörk skv. 1. mgr. ef hlutdeildin fer ekki upp fyrir 5,5% í láréttum samningum eða 11% í lóðréttum samningum tvö fjárhagsár í röð.

Samstarfsfyrirtæki skv. 1. mgr. eru fyrirtæki sem eiga aðild að samningnum, fyrirtæki sem aðilar samningsins hafa bein eða óbein yfirráð yfir eða fyrirtæki sem hafa bein eða óbein yfirráð yfir aðilum samningsins.

Ákvæði þessarar greinar gilda einnig um samstilltar aðgerðir skv. 10. gr. og ákvarðanir samtaka fyrirtækja skv. 12. gr.

Ákvæði þessarar greinar gilda ekki ef samkeppni á viðkomandi markaði er takmörkuð af uppsöfnuðum áhrifum sambærilegra samninga á markaðnum.

6. gr.

1. mgr. 14. gr. laganna fellur brott.

7. gr.

15. gr. laganna fellur brott.

8. gr.

16. gr. laganna orðast svo:

Samkeppnisráð getur veitt undanþágu frá ákvæðum 10. og 12. gr. Skilyrði slíkrar undanþágu eru að samningar, samþykktir, samstilltar aðgerðir eða ákvarðanir skv. 10. og 12. gr.:

a. stuðli að bættri framleiðslu eða dreifingu á vöru eða þjónustu eða efli tæknilegar og efnahagslegar framfarir,
b. veiti neytendum sanngjarna hlutdeild í ávinningi sem af þeim hlýst,
c. leggi ekki höft á hlutaðeigandi fyrirtæki sem óþörf eru til að settum markmiðum verði náð og
d. veiti fyrirtækjunum ekki færi á að koma í veg fyrir samkeppni að því er varðar verulegan hluta framleiðsluvaranna eða þjónustunnar sem um er að ræða.

Hægt er að setja skilyrði fyrir undanþágu. Samkeppnisráð getur krafist þess að umsóknir um undanþágu skv. 1. mgr. verði settar fram á sérstöku eyðublaði.

Samkeppnisráð getur dregið undanþágu til baka eða breytt skilyrðum hennar ef:

a. forsendur sem lágu til grundvallar undanþágunni hafa breyst,
b. undanþágan hefur verið veitt á grundvelli rangra eða villandi upplýsinga eða
c. fyrirtæki brýtur þau skilyrði sem sett voru fyrir undanþágunni.

Samkeppnisráð setur reglur þar sem tilteknum tegundum samninga sem uppfylla skilyrði 1. mgr. er veitt undanþága frá ákvæðum 10. og 12. gr. (hópundanþága).

9. gr.

17. gr. laganna orðast svo:

Samkeppnisráð getur gripið til aðgerða gegn:

a. samningum, skilmálum og hvers konar athöfnum sem brjóta í bága við 10., 11. og 12. gr.,

b. athöfnum opinberra aðila að því marki sem þær kunna að hafa skaðleg áhrif á samkeppni að því tilskildu að sérlög hafi ekki að geyma sérstakar reglur um heimild eða skyldu til slíkra athafna,
c. aðstæðum sem hafa skaðleg áhrif á samkeppni.

Aðgerðir samkeppnisráðs geta falið í sér bann, fyrirmæli eða heimild með ákveðnu skilyrði. Aðgerðir geta m.a. falið í sér að samkeppnisráð grípi til ákvörðunar um verð og viðskiptakjör einstakra fyrirtækja eða fyrirtækjahópa, enda verði að mati samkeppnisráðs ekki með öðru móti komið í veg fyrir skaðleg áhrif á samkeppni í viðkomandi grein.

10. gr.

18. gr. laganna orðast svo:

Telji samkeppnisráð að samruni hindri virka samkeppni með því að markaðsráðandi staða, eins eða fleiri fyrirtækja, verði til eða slík staða styrkist getur ráðið ógilt samruna sem þegar hefur átt sér stað. Samkeppnisráð getur einnig sett slíkum samruna skilyrði sem verður að uppfylla innan tilskilins tíma. Við mat á lögmæti samruna skal samkeppnisráð taka tillit til þess að hvaða marki alþjóðleg samkeppni hefur áhrif á samkeppnisstöðu hins sameinaða fyrirtækis. Enn fremur skal við mat á lögmæti samruna taka tillit til þess hvort markaður er opinn eða aðgangur að honum er hindraður.

Ákvæði 1. mgr. tekur einungis til samruna þar sem sameiginleg heildarvelta viðkomandi fyrirtækja er 1 milljarður kr. eða meira. Telja skal með veltu móður- og dótturfélaga, fyrirtækja innan sömu fyrirtækjasamstæðu og fyrirtækja sem aðilar samrunans hafa bein eða óbein yfirráð yfir. Þá skulu a.m.k. tvö af þeim fyrirtækjum sem aðild eiga að samrunanum hafa a.m.k. 50 millj. kr. ársveltu hvert um sig til að 1. mgr. taki til hans.

Tilkynna skal Samkeppnisstofnun um samruna sem fellur undir 1. mgr. eigi síðar en einni viku eftir að samningi um hann er lokið eða tilkynnt er opinberlega um yfirtökuboð eða að tiltekinn aðili hafi náð yfirráðum í fyrirtæki. Frestur hefst þegar eitt af þessu hefur gerst. Í tilkynningunni skal veita upplýsingar um samrunann og um þau fyrirtæki sem honum tengjast. Samkeppnisráð setur reglur þar sem nánar eru tilgreindar þær upplýsingar sem fram verða að koma í tilkynningu, þar á meðal um markaði sem samruninn hefur áhrif á og um önnur nauðsynleg atriði við athugun á samkeppnislegum áhrifum hans.

Samkeppnisstofnun skal tilkynna viðkomandi fyrirtækjum innan þrjátíu daga ef hún telur ástæðu til frekari rannsóknar á samkeppnislegum áhrifum samrunans. Frestur þessi byrjar að líða þegar Samkeppnisstofnun berst tilkynning sem uppfyllir skilyrði 3. mgr. og reglna sem settar eru samkvæmt ákvæðinu. Berist tilkynning frá Samkeppnisstofnun skv. 1. málsl. ekki innan tilskilins frests getur samkeppnisráð ekki ógilt samrunann. Ákvörðun um ógildingu skal taka eigi síðar en þremur mánuðum eftir að tilkynning skv. 1. málsl. hefur verið send viðkomandi fyrirtækjum.

Til þess að tryggja að hugsanleg ákvörðun skv. 1. mgr. nái að fullu fram að ganga getur samkeppnisráð gripið til íhlutunar í samruna til bráðabirgða. Íhlutun getur falist í banni til bráðabirgða gegn því að láta samruna koma til framkvæmda þar til endanleg niðurstaða samkeppnisyfirvalda á athugun á samrunanum liggur fyrir eða öðrum ráðstöfunum sem hafa sömu áhrif.

Ákveði samkeppnisráð að ógilda samruna getur ráðið, samhliða ákvörðun á grundvelli 1. mgr. eða með sérstakri ákvörðun, mælt fyrir um að fyrirtæki eða eignir sem sameinaðar hafa verið verði aðskildar eða sameiginlegri stjórn hætt eða að gripið verði til annarra viðeigandi aðgerða til að skapa að nýju skilyrði fyrir virkri samkeppni.

11. gr.

Á eftir 20. gr. laganna kemur ný grein, 20. gr. a, sem orðast svo:

Samanburðarauglýsingar eru allar þær auglýsingar þar sem beint eða óbeint er vísað til keppinautar eða vöru eða þjónustu sem keppinautur býður.

Samanburðarauglýsingar skulu, að því er samanburð varðar, leyfðar að uppfylltum eftirtöldum skilyrðum:

a. að þær séu ekki villandi,
b. að samanburðurinn taki til vöru eða þjónustu sem fullnægir sömu þörfum eða er ætluð til sömu nota,
c. að gerður sé samanburður á einum eða fleiri áþreifanlegum, viðeigandi, sannreynanlegum og dæmigerðum eiginleika eða eiginleikum vöru eða þjónustu, að meðtöldu verði ef vill,
d. að á markaðnum verði ekki villst á auglýsanda og keppinauti hans eða á vörumerkjum eða vöruheitum auglýsanda og keppinautar, öðrum auðkennum, vöru- eða þjónustutegundum,
e. að ekki sé kastað rýrð á vörumerki, vöruheiti, önnur auðkenni, vöru, þjónustu, starfsemi eða aðstæður keppinautar, eða þeim sýnd lítilsvirðing,
f. að ef um er að ræða vöru með upprunatáknum skuli í öllum tilvikum bera saman vörur með sömu táknum,
g. að ekki sé með ósanngjörnum hætti hagnýttur orðstír vörumerkis, vöruheitis eða annarra auðkenna keppinautar eða upprunatáknunar samkeppnisvöru,
h. að vara eða þjónusta sé ekki kynnt sem eftirlíking eða eftirgerð vöru eða þjónustu sem ber verndað vörumerki eða vöruheiti.

Sé getið um sértilboð í samanburði skal tiltaka skýrt og ótvírætt á hvaða degi sértilboðinu ljúki eða, þar sem við á, að sértilboðið sé háð framboði á vörunni eða þjónustunni og, hafi sértilboðið enn ekki tekið gildi, á hvaða degi byrjað verði að bjóða sérstakt verð eða önnur sérkjör.

12. gr.

Eftirtaldar breytingar verða á 23. gr. laganna:

1. Á eftir orðunum „að veita fullnægjandi“ í 1. mgr. kemur: skriflegar.
2. 2. málsl. 1. mgr. orðast svo: Leiðbeiningarnar skulu vera á íslensku, ensku eða Norðurlandamáli, öðru en finnsku, og miðaðar við tegund og gerð viðkomandi vöru, þjónustu eða annars þess sem í té er látið.

13. gr.

Við 30. gr. laganna bætist ný málsgrein sem orðast svo:

Samkeppnisráð getur gripið til aðgerða gegn athöfnum sem brjóta í bága við ákvæði 20., 20. gr. a, 21. og 22. gr. laga þessara. Aðgerðir samkeppnisráðs geta falið í sér bann, fyrirmæli eða heimild með ákveðnu skilyrði.

14. gr.

VIII. kafli laganna fellur brott.

15. gr.

Á eftir 50. gr. laganna kemur ný grein, 50. gr. a, sem orðast svo:

Samkeppnisstofnun er heimilt að afhenda samkeppnisyfirvöldum annarra ríkja upplýsingar

og gögn sem nauðsynleg þykja við framkvæmd á íslenskum eða erlendum samkeppnislögum í samræmi við skuldbindingar Íslands samkvæmt milliríkjasamningum.

Við afhendingu upplýsinga og gagna til yfirvalda sem nefnd eru í 1. mgr. skal Samkeppnisstofnun setja sem skilyrði að:

a. farið verði með upplýsingarnar og gögnin sem trúnaðarmál hjá þeim sem við þeim tekur,
b. upplýsingarnar og gögnin megi aðeins nota í því skyni sem kveðið er á um í viðkomandi milliríkjasamningi og
c. upplýsingarnar og gögnin megi aðeins afhenda öðrum með samþykki Samkeppnisstofnunar og í þeim tilgangi sem samþykkið kveður á um.

Viðskiptaráðherra getur sett nánari reglur um afhendingu Samkeppnisstofnunar á gögnum og upplýsingum til yfirvalda og stofnana skv. 1. mgr.

16. gr.

51. gr. laganna orðast svo:

Samkeppnisráð getur lagt stjórnvaldssektir á fyrirtæki sem brjóta gegn ákvörðunum skv. 2. mgr. 30. gr., ákvæðum 31. og 32. gr. eða reglum eða fyrirmælum settum samkvæmt þeim. Sektir geta numið allt að 10 millj. kr.

17. gr.

Eftirfarandi breytingar verða á 52. gr. laganna:

1. Í stað orðanna „getur lagt“ í 1. mgr. kemur: leggur.
2. 2. mgr. 52. gr. orðast svo:

   Sektir geta numið frá 50 þús. kr. til 40 millj. kr. eða meira, en sektin skal þó ekki vera hærri en sem nemur 10% af veltu síðasta almanaksárs hjá hverju því fyrirtæki eða samtökum fyrirtækja sem aðild eiga að samkeppnishömlunum. Við ákvörðun fjárhæðar sektar getur samkeppnisráð m.a. haft hliðsjón af samstarfsvilja hins brotlega fyrirtækis.

18. gr.

Orðin „sbr. 39., 40. og 41. gr.“ í 1. mgr. 58. gr. laganna falla brott.

19. gr.

Lög þessi öðlast gildi sex mánuðum eftir birtingu.

1407. Nefndarálit [652. mál]

um frv. til l. um afnám lagaákvæða um skattfrelsi forseta Íslands.

Frá meiri hluta efnahags- og viðskiptanefndar.

Nefndin hefur fjallað um málið og fengið á sinn fund Garðar Garðarsson, formann Kjaradóms, Stefán Lárus Stefánsson forsetaritara, Árna Kolbeinsson frá fjármálaráðuneyti, Skarphéðin Berg Steinarsson frá forsætisráðuneyti, Sigurð Líndal lagaprófessor, Gísla Tryggvason frá Bandalagi háskólamanna, Ara Skúlason frá Alþýðusambandi Íslands, Ara Edwald frá Samtökum atvinnulífsins og Steinþór Haraldsson frá ríkisskattstjóra.

Með frumvarpinu er lagt til að öll lagaákvæði sem fela í sér undanþágur fyrir forseta og maka hans frá greiðslu skatta verði afnumin.

Nefndin tók til sérstakrar skoðunar hvaða áhrif sú ákvörðun að afnema skattfrelsi forseta Íslands hefði á störf Kjaradóms. Kom fram í máli Garðars Garðarssonar, formanns Kjaradóms, að við ákvörðun launa alþingismanna og ráðherra hefði verið horft til sambærilegra starfa á almennum vinnumarkaði og laun þeirra ákvörðuð út frá því. Í kjölfarið hefðu laun forseta verið ákveðin og fylgt þeirri hefð að hafa þau hæst þeirra launa sem eiga undir dóminn þrátt fyrir að forseti nyti skattfrelsis, með öðrum orðum að laun þeirra sem Kjaradómur úrskurðar um hafi ekki haft viðmiðun í launum forseta Íslands. Formaður Kjaradóms taldi enn fremur að í kjölfar samþykktar frumvarpsins mundi Kjaradómur koma saman og úrskurða um hækkun launa forseta Íslands með hliðsjón af breyttum forsendum. Um áhrif slíks úrskurðar sagði formaðurinn að þrýstingur mundi aukast á Kjaradóm um að úrskurða um hækkanir til annarra sem undir hann heyra. Taldi hann hins vegar að Kjaradómur hefði ekki tilefni til að úrskurða um hækkanir til annarra þrátt fyrir nýjan úrskurð um laun forseta Íslands. Meiri hlutinn tekur undir þetta mat formanns Kjaradóms.

Í máli formanns Kjaradóms kom enn fremur fram að hann teldi æskilegt að dómurinn fengi betri leiðbeiningar um vilja Alþingis varðandi breytingar á launum forseta Íslands en væru í frumvarpinu eða greinargerð þess eða fram hefðu komið í máli í þingmanna við 1. umræðu um málið.

Meiri hlutinn telur að Alþingi geti ekki gefið Kjaradómi svo nákvæma forskrift að niðurstöðu að stöðu hans sem gerðardóms verði raskað. Hins vegar telur meiri hlutinn að til viðmiðunar fyrir nýjan úrskurð sé í fyrsta lagi eðlilegt að miða við þrönga skilgreiningu á skattfrelsi forseta þannig að ekki sé þörf á að bæta rýrnun kjara vegna skatts á fjármagnstekjur eða aðrar tekjur en þeirra sem koma beint frá embættinu þótt eðlilegt sé að rýrnun kjara vegna tekjuskatts og útsvars á embættislaun sé bætt. Í öðru lagi telur meiri hlutinn að ekki sé sjálfgefið að kjararýrnun vegna óbeinna skatta sé bætt og er þar sérstaklega litið til virðisaukaskatts en hann er almennur skattur á alla neyslu. Meiri rök eru til að bæta kjararýrnun af öðrum óbeinum sköttum, svo sem tollum og vörugjaldi, þar sem sérstakir útgjaldaliðir sem í ýmsum tilvikum bera háa skatta verða að teljast óhjákvæmilegir fyrir forseta Íslands. Í þriðja lagi telur meiri hlutinn að Kjaradómur hljóti að skoða rækilega alla aðra þætti í kjörum forseta Íslands sem raskast við samþykkt þessa frumvarps og meta að hve miklu leyti sanngjarnt og eðlilegt er að taka tillit til þeirra í nýjum úrskurði.

Meiri hlutinn leggur til að bráðabirgðaákvæði verði bætt við lög um laun forseta Íslands, nr. 10/1990. Er þar kveðið á um að skipa skuli nefnd sem hafi það verkefni að enduskoða þau lög og önnur lög sem áhrif hafa á störf forseta. Verði miðað við að unnt verði að koma á nýrri skipan í upphafi þess kjörtímabils sem hefst 2004. Markmið breytinganna er að undirstrika sérstöðu launaákvarðana fyrir forseta Íslands og að kjör hans skuli ekki vera viðmiðun fyrir aðra. Þá leggur meiri hlutinn til að hlunnindi forseta Íslands vegna embættisbústaðar og rekstrar hans, risnu og bifreiða eða önnur hlunnindi sem embættinu fylgja verði ekki talin til skattskyldra tekna. Ástæða þess er sú að hlunnindi þessi eru vandmetin og í eðli sínu embættiskvöð en nýtast mjög takmarkað þeim sem gegnir embætti forseta Íslands.

Meiri hlutinn leggur til að frumvarpið verði **samþykkt** með eftirfarandi

BREYTINGUM:

1. Við I. kafla bætist ný grein sem verði 2. gr., svohljóðandi:
   Við lögin bætist ákvæði til bráðabirgða, svohljóðandi:

Forsætisráðherra skal skipa nefnd til að endurskoða lög þessi og önnur lög sem kunna að hafa áhrif á kjör forseta Íslands. Meðal annars skal nefndin fjalla um hvort ástæða sé til að breyta fyrirkomulagi á ákvörðun launa forseta Íslands þannig að annar aðili en Kjaradómur úrskurði um þau. Störf nefndarinnar skulu miðast við að nýtt fyrirkomulag geti eftir því sem við á tekið gildi eigi síðar en að loknu kjörtímabilinu 2000–2004, þ.e. 1. ágúst 2004.

2. Við II. kafla bætist ný grein sem verði 4. gr., svohljóðandi:
6. tölul. 28. gr. laganna orðast svo: Hlunnindi forseta Íslands vegna embættisbústaðar og rekstrar hans, risnu og bifreiða eða önnur hlunnindi sem embættinu fylgja.

1408. Nefndarálit [652. mál]

um frv. til l. um afnám lagaákvæða um skattfrelsi forseta Íslands.

Frá minni hluta efnahags- og viðskiptanefndar.

Þingmenn Samfylkingarinnar eru því hlynntir að unnið verði að því að afnema skattfrelsi forseta Íslands og maka hans, enda hafa þingmenn hennar bæði flutt og stutt frumvörp þar að lútandi.

Hins vegar lýsir minni hlutinn vanþóknun sinni á því hvernig að þessu frumvarpi er staðið. Öll vinnubrögð og meðferð málsins einkennist af virðingarleysi við forsetaembættið. Harma ber að samskipti þjóðkjörins þjóðhöfðingja og Alþingis skuli dregin niður á þetta plan.

Málið er keyrt fram af offorsi og þinginu ætlað að afgreiða frumvarpið gegnum þrjár umræður og meðferð í nefnd þingsins á einum og sama sólarhringnum. Það vekur vissulega upp spurningar af hverju frumvarpið er ekki fyrr fram komið — en það birtist þá fyrst í þinginu er ljóst mátti vera að núverandi forseti mundi gegna embættinu áfram næsta kjörtímabil.

Frumvarpið er líka vanbúið til efnislegrar ákvörðunar því að ekkert liggur fyrir í greinargerð þess um hvað fyrir flutningsmönnum vakir varðandi kjör forseta eftir að skattfrelsi hefur verið afnumið. Misvísandi viðhorf gagnvart því komu fram hjá flutningsmönnum við 1. umræðu þar sem þeim bar ekki saman um hvernig þeir litu á framhald málsins. Fyrsti flutningsmaður, Pétur H. Blöndal, segir einnig í viðtali í dagblaðinu Degi í dag að hann reikni með því að hugsanlega verði forsætisráðherra hækkaður eitthvað í launum við þessa breytingu.

Mikil óvissa er um hvaða áhrif þessi breyting kann að hafa á kjör forsetaembættisins, þ.m.t. lífeyrisrétt. Forsætisráðuneytið hefur einnig í skriflegri umsögn greint frá því að ekki

sé ljóst hvaða breytingar þurfi að gera á fjárveitingu til embættis forseta Íslands verði frumvarpið samþykkt.

Það sem þó skiptir mestu, og enginn treystir sér til að meta til fulls, eru áhrifin sem þessar breytingar geta haft á laun þeirra sem Kjaradómur eða kjaranefnd tekur ákvörðun fyrir. Má í því sambandi nefna að árið 1996 þegar sambærilegt mál var til umfjöllunar á Alþingi setti meiri hluti allsherjarnefndar, sem hafði málið til umfjöllunar, fram þá skoðun undir forustu núverandi dómsmálaráðherra og formanns fjárlaganefndar að breyting í þessa veru gæti leitt til hækkunar á launum annarra embættismanna og sett af stað keðjuverkun í kjaramálum opinberra starfsmanna.

Þótt nefndin hefði þá haft marga mánuði til að fjalla um málið var talið nauðsynlegt að ríkisstjórnin kannaði áhrif slíkra lagabreytinga og undirbyggi lagafrumvarp ef raunhæft þætti. Engin slík vinna hefur farið fram. Samt gengur ríkisstjórnin fram undir forustu forsætisráðherra og gerir vanbúið þingmannamál að sínu og fær það nú meðferð í þinginu eins og um stjórnarfrumvarp væri að ræða.

Þau rök að breyta verði kjörum forseta núna, annars líði önnur fjögur áður en hægt verði að breyta þeim, standast ekki. Sigurður Líndal lagaprófessor, sem kom á fund nefndarinnar, sagði að hægt væri að breyta kjörum forseta hvenær sem væri nema tilgangurinn væri að rýra þau.

Formaður Kjaradóms, Garðar Garðarsson, sagði á fundi nefndarinnar að þessi breyting mundi skapa mikinn þrýsting á Kjaradóm og kjaranefnd varðandi hækkun launa embættismanna. Hann taldi brýnt að vanda mjög til breytingar sem þessarar. Þá kom fram sú skoðun að réttast væri að lögin um laun forseta Íslands yrðu endurskoðuð. Í lögunum yrðu laun og önnur kjör ákvörðuð og ákvörðun þeirra því færð frá Kjaradómi til Alþingis.

Minni hlutinn tekur undir þessi sjónarmið og telur að með því móti væri sérstaða forsetaembættisins undirstrikuð og samanburður á launum forseta og launum ráðherra og æðstu embættismanna úr sögunni en Kjaradómi ber að gæta innbyrðis samræmis í ákvörðunum sínum sem getur leitt til þess að aðrir sem taka laun samkvæmt ákvörðun Kjaradóms hækki verulega.

Fulltrúar launafólks hafa augljóslega verulegar áhyggjur af þessu máli og þeirri skyndiafgreiðslu sem hér stefnir í. Framkvæmdastjóri ASÍ spáir að þessi breyting muni koma sem högg á launakerfið. Þing Landssambands iðnverkafólks sem nú er haldið hefur sent frá sér ályktun þar sem mótmælt er harðlega hugmyndum um að afnema skattfríðindi forseta Íslands. Telur þingið að þær aðgerðir muni hafa í för með sér stórfellda hækkun launa æðstu embættismanna og auka þannig stórlega launabilið í landinu, enda virðist það eini tilgangurinn með breytingunni.

Leiðarahöfundur talar í dag um pukurslegt næturbrölt í þessu máli og virðist það ætla að halda áfram með því að málið verði afgreitt í skjóli nætur.

Minni hlutinn vísar allri ábyrgð á þessum vinnubrögðum, sem eru fordæmalaus í samskiptum þjóðkjörins þjóðhöfðingja og þjóðþingsins, á hendur ríkisstjórninni, sem undir forustu Davíðs Oddssonar forsætisráðherra hefur gert þetta mál að forgangsmáli undir lok þinghaldsins.

1420. Svar [624. mál]

félagsmálaráðherra við fyrirspurn Rannveigar Guðmundsdóttur um viðbótarlán Íbúðalánasjóðs.

1. *Hver var fjöldi umsókna um viðbótarlán Íbúðalánasjóðs og heildarfjárhæð þeirra frá janúar 1999 til apríl 2000?*

Einstaklingar eða fjölskyldur snúa sér til viðkomandi húsnæðisnefndar sem samþykkir eða synjar veitingu viðbótarláns. Til Íbúðalánasjóðs berast eingöngu umsóknir sem húsnæðisnefndir hafa samþykkt. Upplýsingar um fjölda umsókna um viðbótarlán liggja því ekki fyrir hjá Íbúðalánasjóði.

2. *Hver var fjöldi veittra viðbótarlána, heildarfjárhæð þeirra og meðalfjárhæð á tímabilinu?*

Fjöldi veittra viðbótarlána á tímabilinu var 1.556 og heildarfjárhæð þeirra 2.320.887.759 kr. Meðalfjárhæð var því 1.491.573 kr. Á fimm ára tímabili frá 1993 til 1997 voru veitt 622 lán til félagslegra eignaríbúða eða að meðaltali um 124 íbúðir á ári.

3. *Hvert var meðalkaupverð íbúða sem veitt voru viðbótarlán út á?*

Meðalkaupverð íbúða sem veitt voru viðbótarlán út á var 6.819.000 kr.

4. *Hver var meðalfjárhæð viðbótarlána sem hlutfall af meðalkaupverði íbúða sem veitt voru viðbótarlán út á?*

Meðalfjárhæð viðbótarlána sem hlutfall af meðalkaupverði íbúða var 21,9%.

5. *Hver voru að meðaltali mánaðarlaun íbúðarkaupenda sem fengu viðbótarlán á tímabilinu?*

Mánaðarlaun íbúðarkaupenda sem fengu viðbótarlán voru að meðaltali 216.000 kr.

6. *Hver var að meðaltali mánaðarleg greiðslubyrði allra lána íbúðarkaupenda sem fengu viðbótarlán?*

Upplýsingar um greiðslubyrði allra lána íbúðarkaupenda eru ekki aðgengilegar hjá Íbúðalánasjóði.

Upplýsingar um lán kaupenda eru í tveimur skrám, í greiðslumatsforriti sem unnið er af lánastofnunum og umsóknaskrá Íbúðalánasjóðs. Upplýsingar í greiðslumati byggjast ekki á samþykktu kauptilboði þannig að lántökur umsækjenda geta orðið allt aðrar en þar koma fram þegar upp er staðið. Í umsóknaskrá Íbúðalánasjóðs, sem byggist á samþykktum kauptilboðum, eru skráð ný fasteignaveðbréf, yfirtekin fasteignaveðbréf, ný og yfirtekin viðbótarlán og lán frá öðrum lánastofnunum með veði í eigninni. (Yfirleitt er hér um að ræða langtímalán, svo sem lífeyrissjóðslán o.þ.h.) Athugun leiðir í ljós að skráð lán í umsóknarskrá eru í flestum tilfellum 90% af kaupverði. Greiðslubyrði þeirra var um 34.000 kr. á mánuði, en þar dragast í flestum tilfellum frá vaxtabætur. Inn í myndina vantar þá hugsanlega lántökur vegna greiðslu á 10% af kaupverði, að hluta eða öllu leyti.

7. *Hve margir lántakendur eru í vanskilum með viðbótarlán, þriggja mánaða eða eldri?*

Í eftirfarandi töflu er yfirlit yfir fjölda lána í vanskilum, þriggja mánaða og eldri, sundurgreind eftir mánuðum og sveitarfélögum. Miðað er við gjalddagann 1. janúar 2000. Í Reykja-

vík, svo að dæmi sé tekið, voru samtals 24 lántakendur í vanskilum. Þannig voru sjö lán í vanskilum frá og með gjalddaganum 1. janúar 2000, sex frá og með gjalddaganum 1. desember 1999 o.s.frv.

1421. Tillaga til þingsályktunar [656. mál]

um Kristnihátíðarsjóð.

Flm.: Sigríður A. Þórðardóttir, Rannveig Guðmundsdóttir, Kristinn H. Gunnarsson, Ögmundur Jónasson, Guðjón A. Kristjánsson.

Alþingi ályktar, í tilefni þess að 1000 ár eru liðin frá því að kristinn siður var lögtekinn á Íslandi, að stofna sjóð, Kristnihátíðarsjóð, er njóti framlaga af fjárlögum næstu fimm ár, 100 millj. kr. á ári, og hafi að markmiði:

a. að efla fræðslu og rannsóknir á menningar- og trúararfi þjóðarinnar og stuðla að umræðum um lífsgildi hennar, siðferði og framtíðarsýn;
b. að kosta fornleifarannsóknir á helstu sögustöðum þjóðarinnar, m.a. á Þingvöllum, í Skálholti og á Hólum.

Alþingi kjósi sjóðnum stjórnarnefnd.

Stjórnarnefndin eigi samvinnu við menntamálaráðuneytið, kirkjumálaráðuneytið, þjóðkirkjuna og önnur trúfélög, Þjóðminjasafnið og háskólana í Reykjavík og á Akureyri, svo og frjáls félagasamtök, um viðfangsefni sjóðsins, skipti fé hans milli meginverkefna, skipi verkefnisstjórnir, hvora á sínu sviði, og staðfesti áætlanir þeirra.

Greinargerð.

Á þessu ári minnast Íslendingar þess að 1000 ár eru liðin frá því að kristinn siður var tekinn upp í landinu. Um þann atburð eru til ritaðar heimildir. Hann varð með þeim hætti, svo sem öllum er kunnugt, að sætt tókst með þingheimi á Alþingi árið 1000 um að Íslendingar skyldu verða kristnir.

Þetta var einstæður atburður í sögu Evrópu. Hér á landi urðu þessi umskipti á óvenju friðsaman hátt en fyrir kom að blóðug átök fylgdu trúskiptum. Eftir atburðina á Þingvöllum árið 1000 festi ritmenning hinnar alþjóðlegu kirkju rætur í landinu smám saman og varð því ein af forsendunum fyrir bókmenningu í landinu þegar líða tók á 11. öld og blómaskeiði sagnritunar nokkru síðar.

Alþingi hefur því ríka ástæðu til þess að minnast þessa atburðar veglega. Þingið kemur saman á Þingvöllum, hinum fornhelga þingstað, til hátíðarfundar 2. júlí nk. í tengslum við kristnihátíð sem þjóðkirkjan, stjórnvöld og Alþingi hafa sameinast um að undirbúa og skipuleggja.

Alþingi hefur, eftir endurreisn þess, komið saman til fundar á Þingvöllum fjórum sinnum, af ríkulegu tilefni hverju sinni, árið 1930 er 1000 ár voru liðin frá stofnun þess, 1944 er lýðveldi var stofnað, 1974 er minnst var 11 alda búsetu í landinu og 1994 er minnst var 50 ára afmælis lýðveldisins. Enn er stefnt til Þingvalla, nú í tilefni þess að 1000 ár eru liðin frá því að kristinn siður var leiddur í lög með sáttargerð Þorgeirs Ljósvetningagoða á Alþingi árið 1000.

Að venju hafa formenn þingflokka átt viðræður um efni þeirrar tillögu sem til afgreiðslu verður á hátíðarfundinum á Þingvöllum. Niðurstaða þeirra viðræðna er að Alþingi styðji í senn:

– sérstakt átak, í samvinnu við þjóðkirkjuna og önnur trúfélög, stjórnvöld, stofnanir, skóla og félagasamtök, um að efla fræðslu og rannsóknir á menningar- og trúararfi þjóðarinnar og enn fremur að stuðla að umræðum með þjóðinni, í skólum, í fjölmiðlum og meðal alls

almennings, um lífsgildi þjóðarinnar, siðferði og framtíðarsýn við þessi tímamót; markmiðið er að stuðla að heilbrigðri og sterkri sjálfsmynd einstaklinga og þjóðar;
- fornleifarannsóknir á helstu sögustöðum þjóðarinnar, þ.e. á Þingvöllum, hinum gamla þingstað, svo og á biskupssetrunum gömlu, í Skálholti og á Hólum, og e.t.v. fleiri stöðum, t.d. við klaustrin, það þeirra sem áhugaverðast þykir, til að varpa megi skýrara ljósi á sögu þeirra staða sem miklu hafa skipt á kristnum tíma og raunar í sögu þjóðarinnar frá upphafi.

Lögð er áhersla á að verkefni sjóðsins verði fjölþætt, þar geti komið að skólar, stofnanir, söfnuðir, félagasamtök og einstaklingar, og að þess verði gætt að verkefnin dreifist um allt land. Stefnt verði að því að a.m.k. önnur tveggja verkefnisstjórna hafi aðsetur á landsbyggðinni.

Það verður verkefni stjórnarnefndar að leggja meginlínur í þessu starfi, ákveða skiptingu hins árlega fjárframlags milli aðalverkefna sjóðsins, sbr. a- og b-lið tillögugreinarinnar, og skipa verkefnisstjórnir. Mikilvægt er að til þeirra starfa veljist hæfir einstaklingar sem hafi trausta þekkingu og reynslu en auk þess góð tengsl við helstu stofnanir og fræðahópa á sínu sviði. Verkefnisstjórnunum er ætlað að vera faglegur vettvangur, hvorri á sínu sviði, þar sem gerðar verða tillögur um styrkveitingar, ýmist að eigin frumkvæði þeirra, í samvinnu við stofnanir eða eftir almennum umsóknum. Stjórnarnefnd gengur loks endanlega frá ákvörðunum sjóðsins.

Mikilvægt er að styrkveitingar úr Kristnihátíðarsjóði verði ekki til þess að skerða árleg framlög til verkefna á þeim sviðum sem sjóðurinn á að styðja, t.d. til fornleifarannsókna sem standa yfir hér á landi eða eru áformaðar með fé úr ríkissjóði, frá sveitarfélögum, rannsóknasjóðum eða öðrum, heldur komi fé sjóðsins sem viðbót til rannsókna þau fimm ár sem honum er ætlað að starfa.

Í haust verður lagt fyrir Alþingi frumvarp um Kristnihátíðarsjóð með nánari útfærslu á verkefnum hans. Þar verði m.a. ákvæði um að stjórnarnefndin geri Alþingi árlega grein fyrir störfum sínum og ráðstöfun fjár.

Með tillögu þessari verður í senn reynt að hlúa að menningararfi Íslendinga með því að auka og treysta þekkingu landsmanna á menningu sinni og sögu, en jafnframt horft til framtíðar með því að efla umræðu í landinu um framtíðarsýn þjóðarinnar og þau lífsgildi sem hún ætlar að hafa í fyrirrúmi á nýrri öld.

Hér á eftir verður gerð nánari grein fyrir hvoru verkefni fyrir sig.

TRÚARARFUR, SIÐFERÐI OG FRAMTÍÐARSÝN

Á þeirri öld sem nú er að ljúka hefur Íslendingum tekist að byggja upp öflugt velferðarsamfélag. Á þessum tíma hafa breytingar, m.a. í atvinnuháttum, óvíða verið meiri og hraðari; nýr hugsunarháttur og tækni hefur vikið til hliðar aldagömlum aðferðum við framleiðslu og verðmætasköpun. Þessar róttæku þjóðfélagsbreytingar hafa einnig náð til gildismats og lífssýnar Íslendinga. Svo dæmi sé tekið hefur aukin velferð og bættur efnahagur breytt afstöðu fólks til efnislegra verðmæta og þekking og tækni hafa m.a. breytt viðhorfum til náttúrunnar.

Þótt umtalsverðar breytingar hafi orðið á 20. öld á afstöðu Íslendinga til ýmissa gilda hafa þeir um leið byggt á ákveðnum menningarlegum, trúarlegum og siðferðilegum grunni sem ætla má að hafi verið kjölfesta þeirra í umróti þessara breytinga. Hér skiptir hinn kristni arfur þjóðarinnar miklu. Áhrif kristni á þjóðina er erfitt að meta til fulls; hún er samofin íslensku þjóðerni og sjálfsmynd, siðferðiskennd, gildismati og lífsafstöðu. Kristin trú og kristnar siðferðishugmyndir hafa með öðrum orðum að verulegu leyti mótað þá þætti í fari stórs hluta

Íslendinga sem dýpst liggja og ráða því að miklu leyti hvernig þeir haga lífi sínu og umgangast aðrar manneskjur og umhverfi sitt.

Því er við hæfi þegar Íslendingar minnast þúsund ára kristni í landinu að þeir hyggi að trúararfi sínum, siðferði, lífsgildum og framtíðarsýn. Landsmenn geta nýtt sér þessi tímamót sem sérstakt tilefni til að huga að þeim gildum sem þeir telja að skipti mestu í lífi sínu, til að þroska verðmætamat sitt og lífsafstöðu og til að efla umræður á nýrri öld um gildismat og framtíðarsýn Íslendinga. Fyrir þessu má m.a. færa eftirfarandi rök:

I. Ekki er sjálfgefið að lífsgildi okkar og lífssýn þróist í framtíðinni sjálfkrafa með þeim hætti sem við teljum nú að væri æskilegt. Þvert á móti má allt eins búast við að við glötum ýmsu sem við nú teljum dýrmætt ef við gefum því ekki gaum. Einstaklingar og þjóðir þurfa með öðrum orðum að leggja *rækt* við gildismat sitt og lífssýn, bæði með því að hlúa að menningarlegum rótum sínum og með því að yfirvega af víðsýni nýjar hugmyndir og aðstæður. Á þann hátt geta þau í senn varðveitt það besta úr hinum menningarlega og hugmyndalega arfi og skilað honum áfram til komandi kynslóða, ef til vill í bættri mynd. Raunar eru þung rök fyrir því að ein af meginskyldum þjóðar á hverjum tíma sé að stuðla að því að þegnarnir yfirvegi skipulega hvernig lífi þeir vilja lifa og hvert þeir vilja að samfélagið stefni. Fátt er betur til þess fallið að styðja að velfarnaði einstaklinga og samfélags til lengri tíma litið.

II. Örar breytingar á ýmsum öðrum sviðum mannlífsins kalla á það að trúarhugmyndir, en einkum þó siðferðishugmyndir, séu sífellt til umræðu og endurmats. Í þekkingarsamfélagi nýrrar aldar verða einstaklingar og samfélag að bregðast við einstökum uppgötvunum og tækninýjungum, með lagasetningu og siðferðilegri rökræðu. Jafnframt verður æ brýnna að almenningur, stjórnmálamenn og vísindamenn séu í stöðugum opinberum samræðum um þróun vísinda og tækni og ábyrgð vísindamanna. Sú spurning verður með öðrum orðum æ mikilvægari, eftir því sem vísindi og tækni móta líf okkar á afdrifaríkari hátt, hvernig við getum notað þekkingu á þessum sviðum í þágu mannsins en forðast þá vá að maðurinn verði þræll vísindanna.

III. Vísbendingar eru um að á nýrri öld muni fólk í velmegunarlöndum á borð við Ísland leggja vaxandi áherslu á andleg og siðferðileg gæði, auk hinna efnislegu gæða. Sjá má merki um þetta í vaxandi áhuga á náttúruvernd, útivist, menntun og persónulegum þroska, og mikil gróska er í listsköpun hvers konar og trúariðkun. Jafnframt mun samfélag framtíðarinnar leggja æ meiri metnað í að stuðla að því að hver einstaklingur hafi raunverulegt frelsi til að móta eigið gildismat og lífsstíl. Það mun reyna enn frekar en nú að stuðla að sjálfstæðu gildismati og sjálfstrausti ungs fólks, t.d. með fjölskyldu- og menntastefnu. Með því móti ýtir samfélagið undir það að ungt fólk verði fært um að standast ýmsan óheillavænlegan þrýsting frá umhverfinu, svo sem þann að hefja neyslu eiturlyfja. Þó er jafnvel enn meira um vert að þannig mun fjölbreytilegur þroski einstaklinganna verða settur í öndvegi.

IV. Ein meginröksemdin fyrir því að stuðla að fræðslu og umræðu um trúar- og siðferðisskoðanir er af lýðræðislegum toga. Sjálfstætt og gagnrýnið gildismat þegnanna er ein mikilvægasta forsenda þess að stjórnvöld fái nauðsynlegt aðhald við stjórnarathafnir. Skörp og yfirveguð siðferðisvitund borgaranna hamlar gegn því að valdhafar geti hrundið í framkvæmd ákvörðunum sem fara í bága við grundvallarréttindi eða hagsmuni borgaranna eða einstakra hópa þeirra. Enn fremur eru margar af mikilvægustu ákvörðunum sem taka þarf í samfélaginu að meira eða minna leyti siðferðilegar í eðli sínu. Farsæl stjórn samfélagsins er þess vegna undir því komin að bæði almenningur og stjórnmálamenn hafi getu og vilja til að

taka þátt í málefnalegri rökræðu um siðferðileg efni og að niðurstöður slíkra umræðna séu grundvöllur ákvarðana.

Þær röksemdir sem hér hafa verið nefndar hníga allar í þá átt að efla beri fræðslu, rannsóknir og umræður í íslensku samfélagi um trúarlegar og siðferðilegar hugmyndir. Íslendingar hafa vanrækt þennan þátt í menningu sinni og eru fyrir því margar ástæður. Eins og áður sagði hefur samfélagið tekið örum breytingum á 20. öld frá því að vera vanþróað landbúnaðarsamfélag yfir í háþróað tækni- og velferðarsamfélag. Því hafa ef til vill ekki fyrr en á allra síðustu áratugum skapast forsendur fyrir þeirri „umræðuhefð“ í trúarlegum og siðferðilegum efnum sem víða annars staðar hefur fengið að þróast um aldir. Nú eru hins vegar allar forsendur fyrir hendi til að slík hefð geti þroskast og dafnað. Að sú þróun verði hér á landi er ekki aðeins mögulegt heldur gera nýir tímar það beinlínis óhjákvæmilegt. Líf okkar hefur aldrei verið undirorpið eins miklum hraða og margbreytileika og nú og við þurfum að horfast í augu við afdrifaríkar ákvarðanir í einkalífi og opinberu lífi. Eigi þessar ákvarðanir að verða til heilla á komandi árum verða Íslendingar að leggja rækt við siðferðilega dómgreind og hæfni til að rökræða siðferðileg úrlausnarefni.

Eftirfarandi þættir eru meðal þeirra sem hafa má sérstaklega í huga varðandi fræðslu, umræðu og rannsóknir á trúararfi, siðferði og framtíðarsýn þjóðarinnar.

Fræðsla.

Tvenns konar meginverkefni geta fallið undir þennan þátt. Annars vegar eru mörg verkefni í skólastarfi á öllum stigum skólakerfisins. Hér býðst m.a. tækifæri til að styrkja gerð námsefnis á sviði siðfræði, en námsefni í þeirri grein hefur verið af skornum skammti. Það má ýmist gera með því að styrkja útgáfu frumsamins efnis eða þýðingu á vönduðu erlendu efni. Jafnframt gefst færi á að styðja við skóla sem taka vilja upp kennslu í siðfræði eða láta nemendur sína vinna sérstök verkefni um lífsgildi og framtíðarsýn þjóðarinnar á nýrri öld. Verðugt markmið er að stuðla að því að nemendum í grunn- og framhaldsskólum bjóðist hvarvetna kennsla í siðfræði og þjálfun í rökræðum um siðferðileg gildi og ákvarðanir. Í þessu augnamiði þarf að huga sérstaklega að því að efla menntun uppeldisstétta á þessu sviði, m.a. með auknu námsframboði og kennsluefni. Fleiri leiðir má fara til að efla umhugsun og samræður nemenda um lífsgildi og framtíðarsýn, svo sem að efna til ritgerðarsamkeppni meðal nemenda í grunnskólum landsins um valið efni eða halda ráðstefnu þar sem fulltrúar nemenda úr skólum víðs vegar um land kæmu saman til að ræða Ísland framtíðarinnar. Þá er einnig vert að benda á ýmsa spennandi möguleika til að tengja saman umræður um menningararf þjóðarinnar, trúararf hennar og lífsgildi. Hér mætti hugsa sér að styrkja verkefni þar sem nemendur ræða samband þessara þátta og hvaða áhrif það hafi á verðmætamat og lífssýn Íslendinga. Í þessu sambandi er einnig vert að nefna að þekking á kristnum trúarhugmyndum er forsenda fyrir skilningi á stórum hluta menningar- og listaarfs Vesturlanda síðustu árþúsund. Því mætti fræða nemendur í auknum mæli um trúarlegan bakgrunn og trúarlegar tilvísanir sem t.d. koma fram í bókmenntum, myndlist og kvikmyndum. Þá er brýnt að efla skilning nemenda á ólíkum menningarlegum, trúarlegum og siðferðilegum hugmyndum og lífsstíl. Fyrir þessu má færa mörg gild rök. Nú á dögum búa Íslendingar að líkindum yfir meiri fjölbreytileika í menningarlegum, trúarlegum og siðferðilegum efnum en nokkru sinni áður, enda hefur æ fleira fólk af erlendu bergi brotið sest hér að á undanförnum árum. Þetta kallar á margbreytilega trúar- og menningarfræðslu þar sem ólíkur bakgrunnur fólks er viðurkenndur og útskýrður fyrir nemendum. Slík fræðsla er til þess fallin að auðvelda aðlögun fólks af erlendum uppruna að íslensku samfélagi og auka skilning

nemenda á ólíkri menningu og lífsháttum. Síðast en ekki síst skerpir fræðsla af þessu tagi skilning nemenda á íslenskum menningar- og hugmyndaarfi og auðveldar lifandi rökræður meðal þeirra um trú og lífsgildi. Hins vegar eru margs konar verkefni á sviði almannafræðslu sem vert væri að styðja við. Hér má t.d. nefna gerð útvarps- og sjónvarpsþátta um siðferðileg álitamál í lífvísindum, svo sem á sviði erfðavísinda, en þar standa íslenskir vísindamenn framarlega eins og kunnugt er. Einnig mætti styðja við ýmiss konar námskeiðahald fyrir almenning um siðfræði og tengd efni. Þá er þarft að auka eins og kostur er fræðslu til verðandi foreldra um fjölskyldulíf og foreldrahlutverk. Minnt skal á að fjölskylda og heimili er sterkasti siðferðismótandinn og þar er lagður grunnur að andlegum og siðferðilegum þroska einstaklingsins. Í víðara samhengi er æskilegt að efla dómgreind og umhugsun fólks um eðli náinna mannlegra samskipta og flókin tilfinningabönd, skuldbindingar og ábyrgð sem þeim fylgja, ekki síst í fjölskyldulífi.

Umræður.

Ýmsar leiðir má fara til að hvetja til umræðu um lífsgildi og framtíðarsýn þjóðarinnar. Mikilvægt er að leita leiða til að virkja sem flesta í slíkum umræðum. Ein besta leiðin til þess er að stuðla að því að sem flestum aðferðum sé beitt til að ná til almennings og virkja hann í umræðum. Sjálfsagt er að nýta sér fjölmiðla í þeim efnum en áhrifavald þeirra er mikið. Einnig má nefna ráðstefnur eða ráðstefnuraðir þar sem tekin væru til umræðu ýmis siðferðileg umræðuefni eins og hugmyndir okkar um hið góða líf og hið góða samfélag, stefna okkar í uppeldis- og fjölskyldumálum, siðferðileg álitamál í líf- og tæknivísindum, afstaða okkar til náttúrunnar og svo framvegis. Í þessu sambandi má einnig benda á mikilvægi þess að efla umræður um lífsgildi og verðmætamat í atvinnulífinu, í fyrirtækjum og stofnunum, með þátttöku þeirra sem þar starfa og halda um stjórnvölinn. Þá mætti örva almennar umræður í samfélaginu með því að kalla saman borgara úr ýmsum stéttum og landshlutum, úr öllum stjórnmálaflokkum og á ýmsum aldri til að ræða hvernig bæta megi mannlífið á Íslandi á 21. öldinni. Síðast en ekki síst mætti búa til vandaða umræðuþætti í sjónvarpi og öðrum fjölmiðlum um lífsgildi og framtíðarsýn þjóðarinnar, auk þátta um einstök siðferðileg viðfangsefni.

Rannsóknir.

Tækifæri er til að efla margvíslegar rannsóknir á gildismati og lífssýn þjóðarinnar auk ýmissa siðfræðilegra rannsókna. Margt er enn órannsakað varðandi þessa þætti sem vert væri að styrkja rannsóknir á. Má þar t.d. nefna afstöðu almennings til siðferðilegra hugtaka eins og friðhelgi einkalífs, siðferðilega þýðingu sjálfboðaliðsstarfa í lífi fólks og áhrif siðferðilegra verðmæta og gildismats á ákvarðanir í stjórnmálum. Þá er einnig vert að hleypa af stokkunum rannsóknarverkefnum af siðfræðilegum toga. Mörg mikilvæg verkefni eru óunnin á þessu sviði, t.d. í tengslum við hraða þróun í erfðavísindum. Í kjölfar slíkrar vísindabyltingar vakna stórar siðferðilegar spurningar sem almenningur, vísindamenn jafnt sem aðrir, þarf að takast á við. Þjóðfélag sem ætlar sér að vera í fararbroddi í rannsóknum á komandi árum verður að efla rannsóknir og umræður í samfélaginu um siðferðilegar og félagslegar afleiðingar þessarar nýju þekkingar og um æskilega og óæskilega nýtingu hennar.

FORNLEIFARANNSÓKNIR

Söguþekking og skýr vitund þjóðarinnar um fortíð sína er háð því að á hverjum tíma séu gerðar öflugar rannsóknir á sem flestum sviðum. Fræðimenn telja líklegt að markvissar fornleifarannsóknir séu líklegastar til þess að skila nýrri þekkingu á elstu sögu þjóðarinnar.

Fornleifarannsóknir á Íslandi hafa verið færri og minni að umfangi en t.d. annars staðar á Norðurlöndum. Þess vegna er brýnt að gera átak í rannsóknum og skráningu fornleifa og móta stefnu um sérstaklega valin verkefni og fyrirkomulag rannsókna. Styrkja þarf rannsóknir sem leiða til varanlegrar uppbyggingar íslenskrar fornleifafræði sem vísinda- og atvinnugreinar. Markmiðið er að auka þekkingu og skilning á íslenskum menningararfi og þjóðarsögu en jafnframt að stuðla að eflingu menningartengdrar ferðaþjónustu, bættri minjavörslu og auknu samstarfi, auk bættrar þjálfunar fræðimanna.

Samstarf vísindamanna.

Mikilvægt er í þessu sambandi að góð samvinna takist milli Þjóðminjasafnsins, annarra rannsóknastofnana og fræðimanna og menntastofnana í landinu. Á þann veg verða rannsóknir og fræðimennska almennt efldar og sérfræðingum á sviði menningarsögu fjölgað. Átak það sem hér er gerð tillaga um gæti því styrkt fræðigreinina verulega til lengri tíma litið. Með því móti mætti byggja á sérkennum menningar okkar og sögu við að efla fornleifafræði á Íslandi.

Þjóðminjasafn Íslands annast af opinberri hálfu rannsóknir og vörslu fornleifa, sbr. lög nr. 88/1989. Hlutverk þess er einnig að auka og miðla þekkingu á menningararfi þjóðarinnar, en jafnframt fást önnur söfn og stofnanir við fornleifarannsóknir, auk sjálfstætt starfandi fræðimanna. Mikilvægt er því að sem breiðast samstarf verði um rannsóknirnar meðal fornleifafræðinga.

Fornleifafræði er sjálfstæð fræðigrein, en fornleifarannsóknir eru jafnframt þverfaglegar þar sem margir sérfræðingar vinna sameiginlega að verkefnum. Við fornleifarannsóknir á helstu minjastöðum þjóðarinnar er því nauðsynlegt að efna til samstarfs ýmissa fræði- og vísindamanna og ljóst að leita þarf bæði til innlendra og erlendra fræðimanna og stofnana. Slíkt samstarf er líka til þess fallið að efla rannsóknir hér á landi og stuðla að framförum á sviði íslenskrar fornleifafræði.

Íslenskum fornleifafræðingum hefur fjölgað mjög á seinni árum og menntun þeirra og reynsla að sama skapi aukist. Sá hópur getur lyft grettistaki ef stutt er myndarlega við bakið á honum. Á Íslandi starfa fornleifafræðingar við Þjóðminjasafnið og á minjasöfnum um landið en auk þess við sjálfstæðar stofnanir eða eru sjálfstætt starfandi. Því er mikilvægt að sem flestir sérfræðingar komi að því átaki í fornleifarannsóknum sem hér er gerð tillaga um. Slíkt samstarf gæti orðið mikilvæg lyftistöng fyrir allt rannsóknarstarf hér á landi og styrkt íslenskt fræðastarf verulega í erlendu samstarfi.

Efling fornleifafræðirannsókna og kennslu.

Íslenskir fornleifafræðingar hafa þurft að sækja menntun sína til útlanda en síðan aðlagað fræðimennsku sína íslenskum verkefnum með rannsóknum hér á landi. Vonir standa þó til þess að átak á sviði fornleifarannsókna, í samstarfi íslenskra og erlendra vísindamanna, gæti orðið til þess að ýta við því að háskólanám í fornleifafræði, sem margir telja tímabært, komist á. Þótt miklu hafi verið áorkað í íslenskri fornleifafræði á 20. öld hafa flestar rannsóknir staðið stutt og mörg stærri rannsóknarverkefni hafa orðið endaslepp vegna fjárskorts og skorts á hæfum vísindamönnum. Íslenskir fornleifafræðingar hafa þó lært af þessari reynslu, og hafa á síðasta áratug verið unnin viðamikil þverfagleg rannsóknarverkefni með þátttöku alþjóðlegs hóps vísindamanna í Reykholti í Borgarfirði og á Hofstöðum í Mývatnssveit. Báðar rannsóknirnar njóta vaxandi viðurkenningar í alþjóðlegu vísindasamfélagi og reynslan af þeim sýnir að fornleifarannsóknir þurfa að vera umfangsmiklar og standa í langan tíma ef fullur árangur á að nást af starfinu. Fleiri stór langtímaverkefni munu því verða mikil lyftistöng fyrir vísindagrein sem lengst af hefur barist í bökkum og ekki getað boðið

nemendum og ungum fræðimönnum upp á vinnu við rannsóknir nema stuttan tíma í senn. Fornleifarannsóknir á helstu minjastöðum í landinu yrðu afar mikilvægt tækifæri til að byggja upp þekkingu og reynslu og fjölga sérfræðingum í fornleifafræði á Íslandi. Þannig yrði unnt að mennta fleira ungt fólk sérstaklega í íslenskri fornleifafræði. Má í raun segja að viðamiklar fornleifarannsóknir séu forsenda árangursríkrar háskólakennslu. Fornleifarannsóknirnar gætu þannig leitt til mikillar grósku í fræðastarfi á sviði íslenskrar menningarsögu.

Nútímafornleifafræði fjallar einnig um sögulega stöðu manna í náttúrunni, samspil menningar og náttúru, og því verður nám í fornleifafræði að vera tengt náttúruvísindum. Kennsla og rannsóknir tengdar sérstöðu íslenskrar menningarsögu og náttúru eru því áhugaverðar.

Menningartengd ferðamennska.

Menningarminjar á Íslandi eru að margra mati vannýtt auðlind. Um allt land bera verðmætar minjar, hús og fornleifar vitni um langa og fjölþætta sögu. Má í því sambandi nefna byggingararf okkar og þróun húsagerðar í landinu, fornleifar á fornum verslunarstöðum og þingstöðum, kirkjusögulegar minjar, klausturstaði og bæjarleifar. Áhugi Íslendinga og ekki síst erlendra ferðamanna er ótvíræður á sögulegum minjum ekki síður en náttúruminjum. Þess vegna þarf að gera átak í kynningu slíkra minjastaða, aðkomu ferðamanna að þeim og sögu þeirra, auk viðhalds og rannsókna á þeim.

Þýðingarmikið er að velja staði til rannsókna með það fyrir augum að þeir séu dreifðir um landið allt. Þannig má sjá fyrir sér að fornleifarannsóknir gætu varpað ljósi á sögu hvers landshluta. Þá er þess að geta að aukið fjármagn til rannsókna á menningararfi okkar yrði mikilvæg lyftistöng fyrir menningartengda ferðamennsku. Kannanir sýna að meiri hluti erlendra ferðamanna nefnir sögu landsins og bókmenntir sem fyrstu eða aðra ástæðu þess að þeir ákváðu að koma til Íslands. Eins og nú er ástatt finnur þessi hópur fátt til að svala forvitni sinni. Reynslan sýnir líka að forvitnilegir minjastaðir hafa aukið áhuga ferðamanna á því að heimsækja slíka staði í öllum landshlutum. Þeir geta dregið fram sérkenni og sögu byggðarlaga og styrkt þau með tilliti til þjónustu við íslenska og erlenda ferðamenn. Fornleifar og rannsóknir á þeim þykja mörgum afar forvitnilegar og án alls vafa mun afrakstur þeirra verða til þess að efla ferðaþjónustu enn frekar á þeim stöðum þar sem rannsóknir munu fara fram. Rannsóknirnar sjálfar draga oft að fjölda áhugasamra ferðamanna meðan þær standa yfir.

Þá er mikilvægt að fylgja rannsóknum eftir með úrvinnslu og útgáfu á niðurstöðum þeirra. Niðurstöðum rannsókna þarf að miðla til almennings og ferðamanna. Má sjá fyrir sér útgáfu, sýningar og ekki síst betri merkingar minjastaða í landinu. Slíkt væri vel til þess fallið að efla menningartengda ferðamennsku og bæta söguvitund og sjálfsmynd þjóðarinnar.

Rannsóknarstaðir.

Íslendingar hafa lengst af litið til bókmenntaarfsins sem aðalheimildar um fortíð sína, m.a. af því að aðrar heimildir, þ.m.t. byggingaleifar, hafa verið lítt sýnilegar í landslaginu. Mikilvægt er því að efla rannsóknir sem gætu aukið á fjölbreytileikann á þessu sviði.

Þrír staðir, öðrum fremur, hafa komið við sögu á þeim tíu öldum sem liðnar eru frá því að kristinn siður var lögtekinn í landinu, þ.e. Þingvellir og biskupsstólarnir í Skálholti og á Hólum. Fleiri áhugaverða staði um landið væri vert að rannsaka. Hér eru nokkrir þeir helstu nefndir:

Þingvellir. Lengi hefur staðið til að gera fornleifarannsóknir á Þingvöllum en lítið orðið úr enn sem komið er, einkum sökum fjárskorts. Er þess að vænta að slíkar rannsóknir geti skilað mikilli þekkingu á þjóðarsögunni, þeim þætti hennar sem þar gerðist.

Talsverðar rannsóknir voru gerðar á þingbúðum á Þingvöllum á 19. öld en á þeirri 20. var lítið gert fyrr en rannsóknir fóru fram við Þingvallakirkju 1999. Mjög brýnt er að skrá fornleifar á þingstaðnum og í landi Þingvalla, og mörgum mikilvægum spurningum mætti svara með uppgreftri á ýmsum stöðum.

Skálholt. Fyrir tæpri hálfri öld fór fram merkileg rannsókn á kirkjugrunnum í Skálholti, en mikið svæði er þar enn ókannað. Fyrir u.þ.b. áratug fóru fram könnunarrannsóknir á bæjarstæðinu í Skálholti. Varðveisluskilyrði fornleifa í Skálholti þykja nokkuð góð og ljóst er að mikils má vænta af frekari rannsóknum þar. Þjóðminjasafnið gerði þar rannsóknir á sínum tíma og varðveitir ýmis gögn þar að lútandi. Um staðinn eru til góðar úttektir, af honum eru til teikningar frá 18. öld og til viðbótar er staðarkort frá sama tíma. Þar er því von um áhugaverðan samanburð ritheimilda, teikninga og niðurstaðna fornleifauppgraftar.

Mælingar Fornleifastofnunar á jarðvegi sumarið 1999 benda til þess að rústir séu óraskaðar undir yfirborði. Skálholtsstaður hefur látið skrá fornleifar í landi Skálholts og hefur einnig látið gera áætlun um rannsóknir á bæjarstæðinu.

Hólar í Hjaltadal. Engar verulegar rannsóknir hafa enn farið fram á Hólum í Hjaltadal og þar mun ekki hafa verið byggt að ráði yfir eldri leifar. Til er rissuppdráttur af Hólastað frá seinni öldum og varðveisla á staðarúttektum virðist nokkuð góð.

Klaustur. Þá er þess að geta að klausturstaðirnir gömlu þykja margir hverjir mjög áhugaverðir til fornleifarannsókna. Heppilegast væri að gera úttekt á öllum klausturstöðunum með tilliti til varðveisluskilyrða og þess hversu miklar leifar eru eftir á hverjum stað og stefna svo að því að velja einn stað til ítarlegrar rannsóknar.

Aðrir staðir. Margir aðrir staðir á landinu þykja líka mjög fýsilegir til fornleifarannsókna, kirkjustaðir, verslunarstaðir, miðaldabæir, forn eyðibýli, verstöðvar, heiðnar grafir, sel, þingstaðir og fleiri staðir þar sem eru m.a. minjar frá upphafi byggðar í landinu, en ekki er ástæða til að telja þá hér. Misjafnt er hins vegar hversu mikið rask hefur orðið á þeim stöðum og hversu mikið er til af heimildum um þá. Er eðlilegt að stjórnarnefnd fari yfir þá og kanni hvort unnt sé að stofna til rannsókna þar á starfstíma sjóðsins.
