COUNCIL REGULATION (EEC) No 2608/77

of 21 November 1977

opening, allocating and providing for the administration of a Community tariff quota for newsprint falling within subheading 48.01 A of the Common Customs Tariff (1978) and extending this quota to include certain other types of paper

THE COUNCIL OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community, and in particular Articles 28 and 113 thereof,

Having regard to the proposal from the Commission,

Whereas the Community has undertaken to open an annual duty-free Community tariff quota of 1 500 000 tonnes of newsprint falling within subheading 48.01 A;

Whereas, in view of present Community production capacity, that quantity is insufficient to meet anticipated import requirements; whereas provision should therefore be made for an autonomous supplementary quota which, according to the estimates submitted, may be fixed at present at 800 000 tonnes; whereas the fact that this figure has been adopted for the autonomous supplementary quota does not rule out a readjustment during the quota period; whereas a Community tariff quota should therefore be opened for 1978 for a total quantity of 2 300 000 tonnes of the product in question;

Whereas provision should be made for extending the tariff quota in question to include certain types of paper fulfilling all the conditions set out in the Additional Note to Chapter 48 except those relating to water-marks;

Whereas equal and continuous access to the quota should be ensured for all Community importers and the rate of duty for the tariff quota should be applied without interruption to all imports of the products in question until the quota is exhausted; whereas in the light of

these principles, arrangements for the utilization of the Community tariff quota based on an allocation among Member States would seem to be consistent with the Community nature of the quota; whereas, in order that it may correspond as closely as possible to the actual trend of the market in the product in question, allocation of the quota should be in proportion to the requirements of the Member States as calculated by reference to statistics on imports from third countries during a representative reference period and to the economic outlook for the year covered by the quota in question;

Whereas, for the last three years for which complete statistics are available; the imports of each of the Member States amounted to the following percentages of total imports of the products in question:

	1974	1975	1976
Benelux	14.04	14.06	12.55
Denmark	4.89	5.23	5.92
Germany	25.78	27.05	26.90
France	13.46	11.86	11.50
Ireland	2.12	2.02	2.03
Italy	0.42	0.50	0.50
United Kingdom	39.29	39.28	40.60

Whereas, in order to arrive at a proper assessment of those statistics, however, it should be borne in mind that the opening of a Community tariff quota for the enlarged Community may alter the pattern of trade of Member States with third countries; whereas, in view of the above and of the foreseeable trend on the market in newsprint in general, and of production in particular during 1978, the quota may be allocated approximately in the following percentages:

Benelux	13.89
Denmark	7.88
Germany	27.75
France	12.48
Ireland	2.29
Italy	0.04
United Kingdom	35.67

Whereas, to take account of import trends for the product concerned, the quota should be divided into two tranches, the first being allocated among the Member States and the second held as a reserve to cover subsequently the requirements of Member States which have exhausted their initial shares; whereas, to give importers some degree of certainty and yet enable Community production to be disposed of on satisfactory terms, the first tranche of the quota should be fixed at about 94% of the full amount;

Whereas Member States may exhaust their initial shares at different rates; whereas to provide for this eventuality and avoid disruption of supplies, any Member State which has almost used up its initial share should draw an additional share from the reserve; whereas each time its additional share is almost exhausted a Member State should draw a further share, and so on as many times as the reserve allows; whereas the initial and additional shares should be valid until the end of the quota period; whereas this form of administration requires close collaboration between the Member States and the Commission, which latter must be in a position to keep account of the extent to which the quota has been used up and to inform the Member States accordingly;

Whereas if at a given date in the quota period a considerable quantity of a Member State's initial share remains unused it is essential, to prevent a part of the Community tariff quota from remaining unused in one Member State while it could be used in others, that such State should return a significant proportion thereof to the reserve;

Whereas, since the Kingdom of Belgium, the Kingdom of the Netherlands and the Grand Duchy of Luxembourg are united within and jointly represented by the Benelux Economic Union, any transaction in respect of the administration of the shares allocated to that economic union may be carried out by any one of its members,

HAS ADOPTED THIS REGULATION:

Article 1

1. During the period 1 January to 31 December 1978, a Community tariff quota of 2 300 000 tonnes shall be

opened in respect of newsprint falling within subheading 48.01 A of the Common Customs Tariff ⁽¹⁾.

2. Member States may charge against this tariff quota the other types of paper complying with the definition of newsprint contained in the Additional Note to Chapter 48, except as regards the criteria governing water-marks.

3. Imports of newsprint shall not be charged against this tariff quota if they are already free of customs duties under other preferential tariff treatment. Furthermore, imports of any other paper referred to in paragraph 2 enjoying duty-free exemption under the said tariff quota shall not be charged against the indicative ceilings fixed under certain free trade agreements.

4. The Common Customs Tariff duty shall be totally suspended within the limits of the above quota.

Article 2

1. The Community tariff quota referred to in Article 1 shall be divided into two tranches.

2. A first tranche of 2 159 500 tonnes shall be allocated among the Member States. Member States' shares, which subject to Article 5 shall be valid from 1 January until 31 December 1978, shall be as follows:

	(tonnes)
Benelux	300 000
Denmark	170 000
Germany	599 000
France	270 000
Ireland	49 500
Italy	1 000
United Kingdom	770 000

3. The second tranche, of 140 500 tonnes, shall constitute the reserve.

Article 3

1. If 90% or more of a Member State's initial share as fixed in Article 2 (2) or of that share minus the portion returned to the reserve where Article 5 has been applied, has been used up, it shall forthwith, by notifying the Commission, draw a second share, to the extent that the reserve so permits, equal to 15% of its initial share, rounded up as necessary to the next whole number.

⁽¹⁾ Entry under this subheading is subject to conditions to be determined by the competent authorities.

2. If, after its initial share has been exhausted, 90% or more of the second share drawn by a Member State has been used up, that Member State shall, in the manner and to the extent provided in paragraph 1, draw a third share equal to 7.5% of its initial share.

3. If, after its second share has been exhausted, 90% or more of the third share drawn by a Member State has been used up, that Member State shall, in the manner and to the extent provided in paragraph 1, draw a fourth share equal to the third.

This procedure shall apply until the reserve is exhausted.

4. Notwithstanding paragraphs 1, 2 and 3, Member States may draw lesser shares than those specified in those paragraphs if there are grounds for believing that those specified may not be used in full. They shall inform the Commission of their reasons for applying this provision.

Article 4

Additional shares drawn pursuant to Article 3 shall be valid until 31 December 1978.

Article 5

The Member States shall return to the reserve, not later than 1 October 1978, the unused portion of their initial share which, on 15 September 1978, is in excess of 20% of the initial amount. They may return a greater portion if there are grounds for believing that such portion may not be used in full.

Member States shall, not later than 1 October 1978, notify the Commission of the total quantities of the products in question imported up to and including 15 September 1978 and charged against the Community tariff quota and of any portion of their initial shares returned to the reserve.

Article 6

The Commission shall keep an account of the shares opened by the Member States pursuant to Articles 2 and 3 and shall, as soon as it has been notified, inform each Member State of the extent to which the reserve has been used up.

It shall inform the Member States, not later than 5 October 1978, of the amount still in reserve after amounts have been returned thereto pursuant to Article 5.

It shall ensure that when a quantity exhausting the reserve is drawn, the amount so drawn does not exceed the balance available, and to this end shall notify the amount of that balance to the Member State making the last drawing.

Article 7

1. Member States shall take all appropriate measures to ensure that additional shares drawn pursuant to Article 3 are opened in such a way that imports may be charged without interruption against their accumulated share of the Community quota.

2. Member States shall take all measures necessary to ensure that the types of paper referred to in Article 1 (2) included in this tariff quota are in fact intended for the printing of newspapers, weekly papers or other periodicals of heading No 49.02, published at least 10 times per year.

3. Member States shall ensure that importers of the products in question established in their territory have free access to the shares allocated to it.

4. The extent to which a Member State has used up its shares shall be determined on the basis of imports of the products in question entered with the customs authorities for home use.

Article 8

On receipt of a request from the Commission, the Member States shall notify it of the importations charged against its share.

Article 9

Member States and the Commission shall cooperate closely to ensure that this Regulation is complied with.

Article 10

This Regulation shall enter into force on 1 January 1978.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 21 November 1977.

COUNCIL REGULATION (EEC) No 2609/77

of 21 November 1977

on the tariff treatment of certain products intended for use in the construction, maintenance and repair of aircraft

THE COUNCIL OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community, and in particular Article 28 thereof,

Having regard to the draft Regulation submitted by the Commission,

Whereas Council Regulation (EEC) No 2721/76 of 25 October 1976 on the tariff treatment of certain products intended for use in the construction, maintenance and repair of aircraft ⁽¹⁾, provides for the total or partial suspension, as the case may be, of the duties laid down in the Common Customs Tariff for a certain number of products which are intended to be either incorporated in the construction of aeroplanes of an unladen weight exceeding 15 000 kg or used for the maintenance or repair of aeroplanes of an unladen weight exceeding 15 000 kg or for aeroplanes or helicopters of an unladen weight exceeding 2 000 kg but not exceeding 15 000 kg;

Whereas all these suspension measures will expire on 31 December 1977;

Whereas, having regard to the technical requirements associated with the design of aeroplanes currently constructed in the Community, suspension measures differentiated according to the type to which the aeroplanes under consideration belong should be maintained from 1 January 1978 in respect of products intended for the construction of aeroplanes of an unladen weight exceeding 15 000 kg in order to take account, in each case, of the capabilities of the Community industry;

Whereas, in view of the principles laid down for suspension of Common Customs Tariff duties in respect of certain products intended for the construction of aeroplanes of an unladen weight exceeding 15 000 kg, it is necessary to establish a list of products admissible to

suspension of customs duties for the maintenance or repair of aeroplanes of that kind constructed in the Community; whereas, provided that account is taken of the current capacity of the Community industry, the arrangements should also be continued whereby users of aircraft of an unladen weight exceeding 15 000 kg constructed in third countries or the previous construction of which in the Community has required a considerable quantity of products imported from third countries, may obtain supplies of products necessary for the maintenance or repair of such aircraft under suspension of Common Customs Tariff duties;

Whereas a limited number of products which are not available in the Community are also essential for the maintenance or repair of certain types of aeroplanes and helicopters of an unladen weight exceeding 2 000 kg, but not exceeding 15 000 kg; whereas Common Customs Tariff duties in respect of these products should accordingly be suspended;

Whereas provision should be made for the adaptation, in the light of advances in the technical capabilities of the Community aircraft industry and of Community aircraft equipment industries, of the arrangements to be made concerning the application of the Common Customs Tariff to products imported from third countries for use in the construction, maintenance or repair of aircraft; whereas such adaptation could involve a review of arrangements in force at relatively short intervals; whereas it is therefore necessary to limit the period of application of this Regulation to one year,

HAS ADOPTED THIS REGULATION:

Article 1

1. The Common Customs Tariff duties on the products listed in Annex I shall be suspended to the levels indicated in column 3 thereof provided that the said products are intended to be incorporated, on the conditions to be determined by the competent authorities, in the construction of aeroplanes of an unladen weight exceeding 15 000 kg, as individually listed in column 4 of the said Annex.

⁽¹⁾ OJ No L 313, 15. 11. 1976, p. 19.

2. This Article shall also apply to the same products intended for the manufacture, on the conditions to be determined by the competent authorities, of parts necessary for the construction of the aircraft concerned.

Article 2

1. The Common Customs Tariff duties on the products listed in Annex II shall be suspended to the level indicated in column 3 or 4 thereof, as the case may be, provided that such products are intended to be incorporated, on the conditions to be determined by the competent authorities, in the maintenance or repair of aeroplanes of an unladen weight exceeding 15 000 kg comprised in one or other of the categories specified in that Annex and, in respect of those in category B, in so far as the maintenance or repair relates to aeroplanes listed in column 5 of that Annex.

2. However, in the case of products falling within heading Nos 85.15, 85.22, 90.14, 90.28 and 90.29 of the Common Customs Tariff and indicated by a ⁽¹⁾, paragraph 1 shall apply only where such products are intended for the maintenance or repair of aeroplanes of a type certificated for the first time in a Member State of the Community before 1 January 1973 and either constructed in the Community or imported and used at that date on regular routes by airline companies of the Community.

Article 3

1. The Common Customs Tariff duties on the products listed in Annex III shall, provided that such prod-

ucts are intended to be incorporated, on the conditions to be determined by the competent authorities, in the maintenance or repair of aeroplanes and helicopters of an unladen weight exceeding 2 000 kg but not exceeding 15 000 kg, which are listed in column 4 or column 5 of that Annex, as the case may be, be suspended to the levels indicated in column 3.

2. However, in the case of products falling within heading Nos 85.15, 90.28 and 90.29 of the Common Customs Tariff and indicated by a ⁽¹⁾, paragraph 1 shall apply only where such products are intended for the maintenance or repair of aeroplanes and helicopters of a type certificated for the first time in a Member State of the Community before 1 January 1973 and either constructed in the Community or imported and used at that date on regular routes by airline companies of the Community.

Article 4

For the purposes of Articles 2 (2) and 3 (2), 'type of aeroplane or helicopter' shall be taken to mean the prototype of that aeroplane or helicopter and versions derived directly from that prototype, except versions which differ fundamentally from the prototype.

Article 5

This Regulation shall enter into force on 1 January 1978.

It shall apply until 31 December 1978.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 21 November 1977.

For the Council

The President

H. SIMONET

ANNEX I

List of products in respect of which Common Customs Tariff duties are totally or partially suspended where such products are intended to be incorporated in the construction of aircraft of an unladen weight exceeding 15 000 kilograms

CCT heading No	Description of goods	Rate of duty	Aeroplanes concerned
1	2	3	4
38.19	Chemical products and preparations of the chemical or allied industries (including those consisting of mixtures of natural products), not elsewhere specified or included; residual products of the chemical or allied industries, not elsewhere specified or included: ex P. Preparations known as 'liquids for hydraulic transmission' (for example, hydraulic brake fluids) not containing or containing less than 70% by weight of petroleum oils or oils obtained from bituminous minerals: — Based on silicate or phosphoric esters	0 %	All aeroplanes
39.02	Polymerization and copolymerization products (for example, polyethylene, polytetrahaloethylenes, polyisobutylene, polystyrene, polyvinyl chloride, polyvinyl acetate, polyvinyl chloroacetate and other polyvinyl derivatives, polyacrylic and polymethacrylic derivatives, coumarone-indene resins): C. Other: VI. Polystyrene and copolymers of styrene: ex b) In other forms: — Acrylonitrilebutadiene styrene, in sheets specially designed for lining the internal walls of aeroplanes	0 %	Airbus, F 28
	VII. Polyvinyl chloride: ex a) In one of the forms mentioned in Note 3 (a) and (b) to this Chapter: — Approved for aircraft construction, and in the form of granules	0 %	Airbus
	ex b) In other forms: — In sheets specially designed for lining the internal walls of aeroplanes	0 %	Airbus
	ex VIII. Polyvinylidene chloride; copolymers of vinylidene chloride with vinyl chloride: — In sheets specially designed for lining the internal walls of aeroplanes	0 %	Airbus

CCT heading No	Description of goods	Rate of duty	Aeroplanes concerned
1	2	3	4
39.02 (cont'd)	C. XIV. Other polymerization or copolymerization products: ex a) In one of the forms mentioned in Note 3 (a) and (b) to this Chapter: — For cavity filling	0 %	Airbus
39.07	Articles of materials of the kinds described in heading Nos 39.01 to 39.06: E. Of other materials: ex IV. Other: — Flexible pipes of polytetrafluoroethylene for hydraulic or fuel circuits	0 %	Airbus, Mercure, Concorde
62.05	Other made up textile articles (including dress patterns): ex D. Other: — Passenger escape chutes	0 %	Airbus
ex 70.08	Safety glass consisting of toughened or laminated glass, shaped or not: — Laminated glass panels of high temperature resistance, used for the cockpit visor	0 %	Concorde
70.20	Glass fibre (including wool), yarns, fabrics, and articles made therefrom: ex A. Non-textile fibre and articles made therefrom: — Superfine glass fibre of low moisture absorption capacity	0 %	Airbus, Mercure, F 28, Concorde
73.18	Tubes and pipes and blanks therefor, of iron (other than of cast iron) or steel, excluding high-pressure hydro-electric conduits: ex C. Other: — Tubes for the hydraulic system of steel 21.6.9 made to Deutsche Airbus' standard DAN 41/BMS 7185	0 %	Airbus
73.20	Tube and pipe fittings (for example, joints, elbows, unions and flanges), of iron or steel	0 %	All aeroplanes
73.40	Other articles of iron or steel: ex B. Other: — Devices for stowing and clamping freight — Ball bearings used in freight loading systems	0 % 0 %	Airbus Airbus
ex 76.02	Wrought bars, rods, angles, shapes and sections, of aluminium; aluminium wire: — Square angles — Conical shapes for reinforcing lateral rudders	0 % 0 %	F 28 Airbus

CCT heading No	Description of goods	Rate of duty	Aeroplanes concerned
1	2	3	4
ex 76.03	Wrought plates, sheets and strip, of aluminium, of a thickness exceeding 0.20 mm: — Plates and sheets of variable thickness obtained by lamination for widths of 1 200 mm or more	0 %	F 28
76.16	Other articles of aluminium: ex D. Other: — 'Quick change' apparatus for transforming passenger transport aeroplanes into goods transport aeroplanes and vice versa	0 %	F 28
81.04	Other base metals, unwrought or wrought, and articles thereof; cermet, unwrought or wrought, and articles thereof: K. Titanium: ex II. Wrought: — Thin-walled tubes ready for use in ventilation and air-conditioning systems	0 %	Airbus, Mercure
83.07	Lamps and lighting fittings, of base metal, and parts thereof, of base metal (excluding switches, electric lamp holders, electric lamps for vehicles, electric battery or magneto lamps, and other articles falling within Chapter 85 except heading No 85.22)	0 %	All aeroplanes
84.08	Other engines and motors: B. Gas turbines: ex II. Other: — Developing a power of more than 360 kW ex C. Other engines and motors: — Pneumatic drive units for thrust reverser actuators	0 % 0 % 0 %	Airbus, Mercure, F 28 Concorde
84.10	Pumps (including motor pumps and turbo pumps) for liquids, whether or not fitted with measuring devices; liquid elevators of bucket, chain, screw, band and similar kinds: B. Other pumps: ex I. Pumps having a pressure capacity of 20 bar or more: — Having a pressure capacity of 200 bar or more	0 %	Airbus, Mercure, F 28
	ex III. Parts: — Of pumps mentioned in B ex I above	0 %	Airbus, Mercure, F 28

CCT heading No	Description of goods	Rate of duty	Aeroplanes concerned
1	2	3	4
84.11	Air pumps, vacuum pumps and air or gas compressors (including motor and turbo pumps and compressors, and free-piston generators for gas turbines); fans, blowers and the like: ex C. Fans, blowers and the like: — Fan and motor unit in housing for cabin temperature probes	0 %	Airbus
ex 84.12	Air-conditioning machines, self-contained, comprising a motor-driven fan and elements for changing the temperature and humidity of air: — Air-conditioning machines, with or without refrigeration elements, of a capacity exceeding 5 000 kcal/h	0 %	Airbus, Mercure
84.15	Refrigerators and refrigerating equipment (electrical and other): ex B. Other: — Refrigerating equipment adapted to the air-conditioning system	0 %	F 28
84.17	Machinery, plant and similar laboratory equipment, whether or not electrically heated, for the treatment of materials by a process involving a change of temperature such as heating, cooking, roasting, distilling, rectifying, sterilizing, pasteurizing, steaming, drying, evaporating, vapourizing, condensing or cooling, not being machinery or plant of a kind used for domestic purposes; instantaneous or storage water heaters, non-electrical: ex C. Heat-exchange units: — Of the constant speed drive (CSD) system — Of the air-conditioning system	0 % 0 %	Airbus, Mercure Airbus, Mercure
ex 84.21	Mechanical appliances (whether or not hand operated) for projecting, dispersing or spraying liquids or powders; fire extinguishers (charged or not); spray guns and similar appliances; steam or sand blasting machines and similar jet projecting machines: — Built-in fire extinguishers for jet engines and auxiliary power units — Built-in fire extinguishers for luggage holds	0 % 0 %	Airbus, Mercure, F 28 Airbus
84.22	Lifting, handling, loading or unloading machinery, telfers and conveyors (for example, lifts, hoists, winches, cranes, transporter cranes, jacks, pulley tackle, belt conveyors and teleferics), not being machinery falling within heading No 84.23:		

CCT heading No	Description of goods	Rate of duty	Aeroplanes concerned
1	2	3	4
84.22 (cont'd)	ex D. Other: — Clamp jacks — Apparatus for fixing permanently in aeroplanes and used for loading, unloading and stowing freight	0 % 0 %	Airbus, Mercure Airbus, Mercure
84.59	Machines and mechanical appliances, having individual functions, not falling within any other heading of this Chapter: ex E. Other: — Air humidifiers and dehumidifiers — Windscreen wipers — Hydraulic servo-motors — Hydropneumatic spherical batteries — Pneumatic starters for jet engines — Toilet units specially designed for aeroplanes — Mechanical actuators for thrust reversers	 0 % 0 % 0 % 0 % 0 % 0 % 0 %	 Airbus, Mercure, F 28 F 28 F 28 Airbus, Mercure, F 28 Airbus Airbus, Concorde, Mercure, F 28 Concorde
84.61	Taps, cocks, valves and similar appliances, for pipes, boiler shells, tanks, vats and the like, including pressure reducing valves and thermostatically controlled valves: A. Pressure reducing valves ex B. Other: — Isolating valves for thrust reversers — Valves used in air-conditioning and cabin pressurization systems — Valves used in the fire-control system — Valves used in the water-circulation system	 0 % 0 % 0 % 0 % 0 %	 F 28 Concorde Airbus, Mercure, F 28 Airbus, Mercure, F 28 Airbus, Mercure, F 28
ex 84.62	Ball, roller or needle roller bearings: — Bearings used in freight loading systems	 0 %	 Airbus
ex 84.63	Transmission shafts, cranks, bearing housings, plain shaft bearings, gears and gearing (including friction gears and gear-boxes and other variable speed gears), flywheels, pulleys and pulley blocks, clutches and shaft couplings: — Constant speed drive (CSD) apparatus — Flexible drive shafts made of a double mesh of steel wire connecting the pneumatic drive unit with the thrust reverser actuator	 0 % 0 %	 Airbus, Mercure, F 28 Concorde

CCT heading No	Description of goods	Rate of duty	Aeroplanes concerned
1	2	3	4
85.01	Electrical goods of the following descriptions: generators, motors, converters (rotary or static), transformers, rectifiers and rectifying apparatus, inductors: A. Generators, motors (whether or not equipped with speed reducing, changing or step-up gear) and rotary converters: ex II. Other: — Electrical actuators used in the air-conditioning system 0 % — High speed alternators (exceeding 3 600 r/min) 0 % — Electric motors with speed reducer for freight loading systems 0 % — 500 watt, 28 volt d.c. motors used in freight-door opening systems 0 % — Generators in the anti-skid control system incorporated in the landing gear 0 % ex B. Transformers, static converters, rectifiers and rectifying apparatus, inductors: — Static converters of a power of 250 V/A, converting a direct current of 28 volts into an alternating current of 115 volts 0 % — Rectifying transformers with a direct current output of 100 amps at 28 volts 0 % ex C. Parts: — High speed alternators (exceeding 3 600 r/min) 0 % — Electric motors, with speed reducer for freight loading systems 0 % — Generators in the anti-skid control system incorporated in the landing gear 0 % — Other apparatus referred to in A and B above 0 %		Airbus Airbus, Mercure, F 28 Airbus F 28 F 28, Airbus, Mercure, Concorde
85.15	Radiotelegraphic and radiotelephonic transmission and reception apparatus; radio-broadcasting and television transmission and reception apparatus (including receivers incorporating sound recorders or reproducers) and television cameras; radio navigational aid apparatus, radar apparatus and radio remote control apparatus: A. Radiotelegraphic and radiotelephonic transmission and reception apparatus; radio-broadcasting and television transmission and reception apparatus (including receivers incorporating sound recorders or reproducers) and television cameras: ex II. Transmitter-receivers: — HF transmitter-receiver apparatus 0 %		Airbus, Concorde, Mercure, F 28

CCT heading No	Description of goods	Rate of duty	Aeroplanes concerned
1	2	3	4
85.15 (cont'd)	ex B. Other apparatus: — Meteorological all weather radar complying with standard ARINC 564 0 % — VOR navigational receivers complying with standard ARINC 547 8 % — ILS navigational receivers complying with standard ARINC 547 8 % — RD-DRMI combined indicators for VOR and DME 0 % C. Parts: ex III. Other: — VOR I.O.K. aerals complying with standard ARINC 547 0 % — Aerial couplers for HF transmitter-receivers 0 % — Meteorological radar aerals complying with standard ARINC 564 0 %		Airbus, Concorde, Mercure, F 28 F 28 F 28 Airbus
85.17	Electric sound or visual signalling apparatus (such as bells, sirens, indicator panels, burglar and fire alarms), other than those of heading No 85.09 or 85.16: — Warning apparatus for protection against fire 0 % — Smoke detectors 0 % — Anti-collision flash lights 0 %		Airbus, F 28 Mercure, Concorde, F 28 All aeroplanes
85.19	Electrical apparatus for making and breaking electrical circuits, for the protection of electrical circuits, or for making connections to or in electrical circuits (for example, switches, relays, fuses, lightning arresters, surge suppressors, plugs, lampholders and junction boxes); resistors, fixed or variable (including potentiometers), other than heating resistors; printed circuits; switchboards (other than telephone switchboards) and control panels: ex A. Electrical apparatus for making and breaking electrical circuits, for the protection of electrical circuits or for making connections to or in electrical circuits: — Switches used in the freight-loading, in auxiliary power unit and in emergency lighting systems 0 %		Airbus, Mercure, F 28
90.24	Instruments and apparatus for measuring, checking or automatically controlling the flow, depth, pressure or other variables of liquids or gases, or for automatically controlling temperature (for example, pressure gauges, thermostats, level gauges, flow meters, heat meters, automatic oven-draught regulators), not being articles falling within heading No 90.14: ex C. Other: — Pneumatic regulators used in air-conditioning and cabin pressurization systems 0 %		Airbus, Mercure

CCT heading No	Description of goods	Rate of duty	Aeroplanes concerned
1	2	3	4
90.28	Electrical measuring, checking, analyzing or automatically controlling instruments and apparatus: ex A. Electronic instruments and apparatus: — Terrestrial magnetic-field detector apparatus, by saturation of magnetic circuits (flux valve) 0 % — Air-speed indicators and associated instruments 0 % — Stall warning calculators 0 % — Apparatus for fuel consumption flow control 0 % — Electronic regulators for air-conditioning 0 % — Inertial navigation equipment 0 % — Electronic controllers for thrust reversers 0 % — Servo airspeed indicators with built-in maximum speed warning system 0 % ex B. Other: — Indicator apparatus for pressure of fuel and jet-engine oil 0 % — Oil contents gauge for jet-engine control 0 % — Speed indicator apparatus for air-speed indicators and jet-engine control 0 % — Temperature indicator apparatus for air-speed indicators and jet-engine control 0 % — Electro-magnetic pressure indicators and associated modules, intended for control of the jet-engine air intake system 0 % — Thrust reverser position indicators 0 %		Airbus, Mercure, F 28, Concorde Airbus, Mercure, F 28 Airbus, Mercure, F 28 Airbus, Mercure, F 28 Airbus, Mercure, F 28 Concorde Concorde Concorde Airbus, Mercure, F 28 Airbus, Mercure, F 28 Airbus, Mercure, F 28 Airbus, Mercure, F 28 Concorde Concorde
90.29	Parts or accessories suitable for use solely or principally with one or more of the articles falling within heading No 90.23, 90.24, 90.26, 90.27 or 90.28: ex A. Parts or accessories suitable for use solely or principally with the electronic instruments falling within subheading 90.28 A: — Of inertial navigation equipment 0 % — Of electronic controllers for thrust reversers 0 % — Of servo airspeed indicators with built-in maximum speed warning system 0 % — Of other instruments or apparatus falling within subheading 90.28 A included in this list 0 %		Concorde Concorde Concorde Airbus, Mercure, F 28

92.11	Gramophones, dictating machines and other sound recorders and reproducers, including record-players and tape decks, with or without sound-heads; television image and sound recorders or reproducers: A. Sound recorders or reproducers: ex II. Sound reproducers: — Music reproducers and automatic announcers	 0 %	 Concorde, Airbus, Mercure, F 28
94.01	Chairs and other seats (other than those falling within heading No 94.02), whether or not convertible into beds; and parts thereof: ex B. Other: — Hydraulic positioning and locking actuators and associated controls (Hydroloks)	 0 %	All aeroplanes

ANNEX II

Tariff treatment applicable to certain products intended to be incorporated as a result of maintenance and repair in aeroplanes of an unladen weight exceeding 15 000 kilograms

Note for the purpose of the following table:

- (a) category A comprises aeroplanes of an unladen weight exceeding 15 000 kilograms other than those specified under (b) below;
- (b) category B comprises aeroplanes of the following types: BAC 111, Siddeley Trident, Airbus, Concorde, Mercure and F 28.

85.19	Electrical apparatus for making and breaking electrical circuits, for the protection of electrical circuits, or for making connections to or in electrical circuits (for example, switches, relays, fuses, lightning arresters, surge suppressors, plugs, lampholders and junction boxes); resistors, fixed or variable (including potentiometers), other than heating resistors; printed circuits; switchboards (other than telephone switchboards and control panels:			
	A. Electrical apparatus for making and breaking electrical circuits, for the protection of electrical circuits or for making connections to or in electrical circuits:			
	— Switches used in freight loading, in auxiliary power units and in emergency lighting systems	0 %	0 %	Airbus, Mercure, F 28
	— Other	0 %	—	—
	B. Resistors, fixed or variable (including potentiometers), other than heating resistors	0 %	—	—
	C. Printed circuits	0 %	—	—
	D. Switchboards and control panels	0 %	—	—
85.20	Electric filament lamps and electric discharge lamps (including infra-red and ultra-violet lamps); arc-lamps:			
	A. Filament lamps for lighting	0 %	—	—
	ex B. Other:			
	— Discharge lamps and tubes for lighting, including combined filament and discharge lamps and tubes	0 %	—	—
85.21	Thermionic, cold cathode and photo-cathode valves and tubes (including vapour or gas-filled valves and tubes, cathode-ray tubes, television camera tubes and mercury arc rectifying valves and tubes); photocells; mounted piezo-electric crystals; diodes, transistors and similar semiconductor devices; light-emitting diodes; electronic microcircuits:			
	A. Valves and tubes	0 %	—	—
	B. Photocells, including photo-transistors	0 %	—	—
	C. Mounted piezo-electric crystals	0 %	—	—

1	2	3	4	5
85.22	Electrical appliances and apparatus, having individual functions, not falling within any other heading of this Chapter: ex C. Other: — Engine pressure indicators	0 % ⁽¹⁾	—	—
ex 85.23	Insulated (including enamelled or anodized) electric wire, cable, bars, strip and the like (including coaxial cable), whether or not fitted with connectors: — Electric cables in the form of a harness, ready for fitting	0 %	—	—
85.28	Electrical parts of machinery and apparatus, not being goods falling within any of the preceding headings of this Chapter	0 %	—	—
90.08	Cinematographic cameras, projectors, sound recorders and sound reproducers but not including re-recorders or film editing apparatus; any combination of these articles: B. Projectors and sound reproducers, combined or not	0 %	—	—
90.14	Surveying (including photogrammetrical surveying), hydrographic, navigational, meteorological, hydrological and geophysical instruments; compasses; rangefinders: A. Compasses	0 % ⁽¹⁾	—	—
	ex B. Other: — Instruments and apparatus for air navigation	0 % ⁽¹⁾	—	—
	— Meteorological instruments and rangefinders	0 % ⁽¹⁾	—	—
ex 90.18	Mechano-therapy appliances; massage apparatus; psychological aptitude-testing apparatus; artificial respiration, ozone therapy, oxygen therapy, aerosol therapy or similar apparatus; breathing appliances (including gas masks and similar respirators): — Oxygen masks; respiratory apparatus for the crew and passengers of aeroplanes	0 %	—	—

⁽¹⁾ To be eligible for suspension, the products in question must be intended for the maintenance or repair of aeroplanes of types certificated for the first time in a Member State of the Community before 1 January 1973 and which have either been constructed in the Community or imported and used at that date on regular routes by airline companies of the Community.

ex 92.13	Other parts and accessories of apparatus falling within heading No 92.11: — Cockpit voice-recorders of subheading 92.11 A I — Music reproducers and automatic announcers referred to in subheading 92.11 A II of this list.....	0 % 0 %	0 % 0 %	Airbus, Mercure, Concorde, F 28 Airbus, Mercure, Concorde, F 28
94.01	Chairs and other seats (other than those falling within heading No 94.02), whether or not convertible into beds, and parts thereof: ex A. Specially designed for aircraft: — Specially designed seats for the crew — Parts of seats specially designed for the crew ex B. Other: — Hydraulic positioning and locking actuators and associated controls (Hydroloks)	0 % 0 % 0 %	— — 0 %	— — All aeroplanes

ANNEX III

List of products in respect of which Common Customs Tariff duties are totally or partially suspended where such products are intended to be incorporated in the maintenance and repair of aeroplanes and helicopters of an unladen weight exceeding 2 000 kilograms but not exceeding 15 000 kilograms

CCT heading No	Description of goods	Rate of duty	Aircraft concerned	
			Aeroplanes	Helicopters
1	2	3	4	5
38.19	Chemical products and preparations of the chemical or allied industries (including those consisting of mixtures of natural products), not elsewhere specified or included; residual products of the chemical or allied industries, not elsewhere specified or included: ex P. Preparations known as 'liquids for hydraulic transmission' (for example, hydraulic brake fluids) not containing or containing less than 70% by weight of petroleum oils or oils obtained from bituminous minerals: — Based on silicate and phosphoric esters	0 %	All aeroplanes	All helicopters
73.20	Tube and pipe fittings (for example, joints, elbows, unions and flanges) of iron or steel	0 %	All aeroplanes	All helicopters
83.07	Lamps and lighting fittings, of base metal, and parts thereof, of base metal (excluding switches, electric lamp holders, electric lamps for vehicles, electric battery or magneto lamps, and other articles falling within Chapter 85 except heading No 85.22)	0 %	All aeroplanes	All helicopters
84.10	Pumps (including motor pumps and turbo pumps) for liquids, whether or not fitted with measuring devices; liquid elevators of bucket, chain, screw, band and similar kinds: B. Other pumps: II. Other	0 %	F 27	—
	ex III. Parts of pumps referred to under subheading B II	0 %	F 27	—
84.61	Taps, cocks, valves, and similar appliances, for pipes, boiler shells, tanks, vats and the like, including pressure reducing valves and thermostatically controlled valves: A. Pressure reducing valves	0 %	All aeroplanes	All helicopters
	ex B. Other: — Valves used in air-conditioning and cabin pressurization systems	0 %	F 27	—
ex 84.63	Transmission shafts, cranks, bearing housings, plain shaft bearings, gears and gearing (including friction gears and gear-boxes and other variable speed gears), flywheels, pulleys and pulley blocks, clutches and shaft couplings: — Constant speed drive (CSD) apparatus	0 %	VFW 614	—

CCT heading No	Description of goods	Rate of duty	Aircraft concerned	
			Aeroplanes	Helicopters
1	2	3	4	5
85.01	Electrical goods of the following descriptions: generators, motors, converters (rotary or static), transformers, rectifiers and rectifying apparatus, inductors: ex B. Transformers, static converters, rectifiers and rectifying apparatus, inductors: — Rectifying transformers with an output of 100 amps at 28 volts for the d.c. electric generating system ex C. Parts: — Of d.c. generators of a power of 10.5 kW — Of rotary converters of a.c. 115 V, 400 Hz, of a power of 250 VA or 1 800 VA — Of a.c. generators, 120/208 V, of a power of 15 kVA — Of electric actuators for control of auxiliary flaps and ailerons — Of static converters of a.c. 115 V, 400 Hz, of a power of 250 VA or 700 VA	0 % 0 % 0 % 0 % 0 %	VFW 614 F 27 F 27 F 27 F 27 F 27	— — — — — —
85.15	Radiotelegraphic and radiotelephonic transmission and reception apparatus; radio-broadcasting and television transmission and reception apparatus (including receivers incorporating sound recorders or reproducers) and television cameras; radio navigational aid apparatus, radar apparatus and radio remote control apparatus: A. Radiotelegraphic and radiotelephonic transmission and reception apparatus; radio-broadcasting and television transmission and reception apparatus (including receivers incorporating sound recorders or reproducers) and television cameras: ex II. Transmitter-receivers excluding VHF radio communication transmitter-receivers complying with standard ARINC 566 A, and on-board inter-communications systems complying with standards ARINC 306 and 412 ex III. Receivers, whether or not combined with a sound recorder or reproducer, excluding radio-broadcasting or television apparatus and receivers for selective calling equipment SELCAL complying with standards ARINC 531 and 596	8 % ⁽¹⁾ 8 % ⁽¹⁾	All aeroplanes All aeroplanes	All helicopters All helicopters

⁽¹⁾ To be eligible for suspension, the products in question must be intended for the maintenance or repair of aeroplanes or helicopters of types certificated for the first time in a Member State of the Community before 1 January 1973 and which have been either constructed in the Community or imported and used at that date on regular routes by airline companies of the Community.

1	2	3	4	5
85.15 (cont'd)	ex B. Other apparatus with the exception of radioaltimeters complying with standard ARINC 552 A, DME interrogators complying with standard ARINC 568 and receivers for OMEGA radio navigation systems complying with standards ARINC 580 and 599 C. Parts: ex II. Parts of base metal, obtained by turning bars, angles, shapes, sections of wire, of solid section, the greatest diameter of which does not exceed 25 mm, excluding parts for receivers for OMEGA radio navigation systems complying with standards ARINC 580 and 599 ex III. Other, excluding parts for receivers for OMEGA radio navigation systems complying with standards ARINC 580 and 599	8 % ⁽¹⁾ 8 % ⁽¹⁾ 8 % ⁽¹⁾	All aeroplanes All aeroplanes All aeroplanes	All helicopters All helicopters All helicopters
90.14	Surveying (including photogrammetrical surveying), hydrographic, navigational, meteorological, hydrological and geophysical instruments; compasses; rangefinders: ex B. Other: — Parts: — For cabin altimeter and differential pressure gauge — For cabin rate of climb indicator	0 % 0 %	F 27 F 27	— —
90.24	Instruments and apparatus for measuring, checking or automatically controlling the flow, depth, pressure or other variables of liquids or gases, or for automatically controlling temperature (for example, pressure gauges, thermostats, level gauges, flow meters, heat meters, automatic oven-draught regulators), not being articles falling within heading No 90.14: ex C. Other: — Pneumatic regulators used in air-conditioning and cabin pressurization systems	0 %	F 27	—
90.28	Electrical measuring, checking, analyzing or automatically controlling instruments and apparatus: ex A. Electronic instruments and apparatus: — Terrestrial magnetic-field detector apparatus, by saturation of magnetic circuits (flux valve)	0 % ⁽¹⁾	All aeroplanes	All helicopters

⁽¹⁾ To be eligible for suspension, the products in question must be intended for the maintenance or repair of aeroplanes or helicopters of types certificated for the first time in a Member State of the Community before 1 January 1973 and which have been either constructed in the Community or imported and used at that date on regular routes by airline companies of the Community.
