THE CUSTOMS UNION OF THE EUROPEAN ECONOMIC COMMUNITY

Nikolaus VAULONT

Preface by Étienne DAVIGNON

In today's troubled economic climate, with all its implications for trade, the European Economic Community continues to make its presence felt by implementing major policies. Some of the most important — the common commercial and agricultural policies, development policy and the efforts to create a genuine internal market — are fundamentally dependent on the Customs Union.

This account of the workings of the Customs Union, elucidating its structure and the political dimension usually obscured by a mass of technical rules and regulations, should make one of the cornerstones of the common market more widely known.

This book, traces the development of the Customs Union from 1958 onwards and indicates the scope for further improvements in the future, particularly as regards progress towards a more clearly perceived freedom of movement of goods within the Community.

Nikolaus VAULONT. Born in 1937. Doctor of law (University of Bonn). Joined the Federal Republic of Germany's federal finance administration in 1967. Since 1971 has been an official at the Commission of the European Communities, where he is currently Assistant to the Director-General of the Customs Union Service.

THE OLD WORLD AND THE NEW TECHNOLOGIES

Michel GODET

Olivier RUYSEN

Preface by Guido BRUNNER

Looking to tomorrow for the action needed today — that is the approach followed by the report *The Old World and the new technologies* in reviewing the crises and issues facing Europe in the economic, energy, industrial and socio-political arenas.

The growing differences between European countries and mounting international uncertainty could in time shake the foundations of the Community. Will Europe's strengths triumph over its weaknesses? On this will depend the decline or resurgence of the old world.

The technological revolutions now under way (in microelectronics, biology and other fields) herald a new era of increasing efficiency and are bound to disrupt completely existing production structures (through automation, decentralization, etc.) and consumption patterns (e.g. new products).

As a result, the appropriate development of technology will be one of the main ways of meeting the challenges of the future. Technological development will be a crucial comparative advantage that Europe must have if it is to determine its own future and pave the way for the necessary changes in our way of life and socio-economic order.

The Old World and the new technologies is one of the first products of an EEC Commission think tank known as FAST (Forecasting and Assessment in the field of Science and Technology). The main task of the FAST programme (run by the Directorate-General for Research, Science and Education) is to identify future problems in the Community in order to guide spending on research and technological development.

The FAST team was set up in 1979 and consists of six research scientists, including the authors of this report, Dr Michel Godet and Dr Olivier Ruyssen.

Michel Godet, Doctor in Economics and in Science is the author of *The crisis in Forecasting and the Emergence of the Prospective Approach* Pergamon 1979, and of *Creative crises*, Hachette 1980.

Olivier Ruyssen, a qualified engineer and a Doctor in Economics, is co-author with Michel Godet of *Les échanges internationaux*, PUF 1978.

Published in: Danish, Dutch, English, French, German, Greek, Italian, Portuguese.

The Greek version is not yet available.
