COUNCIL REGULATION (EEC) No 3882/91**of 18 December 1991****fixing, for certain fish stocks and groups of fish stocks, the total allowable catches for 1992
and certain conditions under which they may be fished**

THE COUNCIL OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community,

Having regard to Council Regulation (EEC) No 170/83 of 25 January 1983 establishing a Community system for the conservation and management of fishery resources ⁽¹⁾, as amended by the Act of Accession of Spain and Portugal, and in particular Article 11 thereof,

Having regard to the proposal from the Commission,

Whereas Article 2 of Regulation (EEC) No 170/83 requires the Council to formulate, in the light of the available scientific advice and, in particular, of the report prepared by the Scientific and Technical Committee for Fisheries, the conservation measures necessary to achieve the aims set out in Article 1 of the abovementioned Regulation;

Whereas Article 3 of Regulation (EEC) No 170/83 requires the Council, if it becomes necessary to limit fishing effort by restricting catches, to establish the total allowable catches (TAC) by stock or group of stocks, the share available for the Community and also the specific conditions under which the catches must be made;

Whereas, in order to ensure the protection of fishing grounds and fish stocks and the balanced exploitation of the resources of the sea, in the interests of both fishermen and consumers, there should be fixed, each year for the different species of which the catches must be restricted, a

TAC per stock or group of stocks and the share of these catches available to the Community taking into account its commitments to third countries;

Whereas, in accordance with the procedure provided for in Article 2 of the Agreement on fisheries between the European Economic Community and the Kingdom of Norway ⁽²⁾, Article 2 of the Agreement on fisheries between the European Economic Community and the Government of Sweden ⁽³⁾, and Article 2 of the Agreement on fisheries between the European Economic Community and the Government of Denmark and the Home Government of the Faroe Islands of the other part ⁽⁴⁾, the parties have consulted on their reciprocal fishing rights for 1992;

Whereas these bilateral consultations have been successfully concluded; whereas, as a result, it is possible to fix the TACs, the Community shares and the quotas for certain joint and autonomous stocks, of which part is allocated to Norway, Sweden and the Faroe Islands;

Whereas trilateral consultations with Norway and Sweden concerning reciprocal fishing rights in the Skagerrak and Kattegat have been successfully concluded; whereas, as a result it is possible to fix the TACs, the Community shares and the quotas for certain joint and autonomous stocks in these areas;

Whereas the Community has signed the United Nations Convention on the Law of the Sea, which contains principles and rules relating to the conservation and management of the living resources of the sea;

Whereas, in the framework of its wider international obligations, the Community participates in efforts to

conserve fish stocks arising in international waters; whereas the extent to which such stocks are fished by vessels of the Community should be viewed in the light of overall fishing activity and the contribution made hitherto by the Community towards their conservation should be taken into account;

Whereas the International Baltic Sea Fishery Commission has recommended TACs for the stocks of salmon, herring and sprat occurring in the waters of the Baltic Sea and the shares thereof for each contracting party; whereas a proposed TAC for cod which is acceptable to the Community is currently subject to procedures for approval;

Whereas, in order to ensure effective management, the shares of the TAC available for the Community in 1992 should be distributed fairly among the Member States in a manner which assures relative stability of fishing activities, in accordance with Article 4 of Regulation (EEC) No 170/83;

Whereas, in the case of certain stocks fished mainly for reduction to meal and oil, it does not appear necessary to make quota allocations;

Whereas Article 161 of the Act of Accession of Spain and Portugal fixes the share of the TACs allocated to Spain for certain stocks in certain zones and allocates flat-rate amounts of horse mackerel and blue whiting to Spain;

Whereas those flat-rate amounts of blue whiting must be divided among ICES sub-areas and divisions V b (EC zone), VI, VII and VIII a, b and d;

Whereas, pursuant to Article 158 of the Act of Accession, a distinction must be made between fishing for demersal species and fishing for species other than demersal; whereas the group to which blue whiting, horse mackerel and anchovy belong must therefore be defined;

Whereas, in order to ensure effective management of these TACs, the specific conditions under which fishing operations occur should be established;

Whereas, taking account of the latest scientific advice, it is necessary to establish seasonal limitations on certain fishing activities in the North Sea and to increase the minimum mesh size in order to limit catches of juvenile cod;

Whereas it is necessary to prohibit the use of nets with a mesh size of less than 32 millimetres for sprat fishing in the Skagerrak and Kattegat in order to limit catches of juvenile herring;

Whereas, in order to ensure a better exploitation of the quotas of herring and hake, transfers of quotas from zones IV c and VII d to ICES division IV b should be allowed for herring and transfers from zones V b (EC zone), VI, VII, XII and XIV and from zones VIII a, b and d to zone II a (EC zone) and IV (EC zone) should be permitted for hake, and transfers from zones II a (EC zone) and IV and zones II (except EC zone), V b (EC zone), VI, VII, VIII a, b, d and e, XII and XIV to zone IV a (EC zone) should be permitted for mackerel, and transfers between zones V b (EC zone), VI, VII and VIII a, b and d should be permitted for blue whiting;

Whereas, in order to ensure a better exploitation of the haddock stocks in zones V b (EC zone), VI, XII and XIV, catches in zone VI a should be limited;

Whereas, taking account of the latest scientific advice, it is necessary to establish seasonal limitations on fishing activities in the Firth of Clyde, the Irish Sea and the Celtic Sea in order to limit fishing for herring;

Whereas, taking account of the latest scientific advice, it is necessary to establish seasonal limitations in certain zones off the Portuguese coast so as to restrict catches of juvenile hake;

Whereas, taking account of the latest scientific advice, the definition of fishing for sole should be retained for large vessels;

Whereas the situation of several stocks, in particular haddock and cod stocks in Region 2, is extremely serious; whereas the continuation of inadequate exploitation methods causes large quantities to be discarded; whereas it is therefore essential that, taking account of the scientific recommendations for TACs which are below the existing fishing capacity in the Member States, measures to contain fishing effort be introduced; whereas, moreover, in present circumstances a reduction should be envisaged of at least 30 % of the fishing effort directed at cod or haddock in the North Sea, to the west of Scotland, and in the Skagerrak and Kattegat,

HAS ADOPTED THIS REGULATION:

Article 1

This Regulation fixes for 1992, for certain fish stocks and groups of fish stocks, total allowable catches (TACs) per stock or group of stocks, the share of these catches available to the Community, the allocation of that share

among Member States and the specific conditions under which these stocks may be fished ⁽¹⁾.

For the purposes of this Regulation, the Skagerrak is bounded on the west by a line drawn from the Hanstholm lighthouse to the Lindesnes lighthouse and on the south by a line drawn from the Skagen lighthouse to the Tistlarna lighthouse and from this point to the nearest point on the Swedish coast.

For the purposes of this Regulation, the Kattegat is bounded on the north by a line drawn from the Skagen lighthouse to the Tistlarna lighthouse and from this point to the nearest point on the Swedish coast and on the south by a line drawn from Hasenøre to Gnibens Spids, from Korshage to Spodsbjerg and from Gilbjerg Hoved to Kullen.

For the purposes of this Regulation, the North Sea shall comprise ICES sub-area IV and that part of ICES division III a which is not covered by the definition of the Skagerrak given in this Article.

Article 2

TACs for stocks or groups of stocks to which Community rules apply and the share of these catches available to the Community are hereby fixed for 1992 as set out in the Annex.

Article 3

The allocation among the Member States of the share available to the Community of the TACs mentioned in Article 2 is fixed in the Annex.

This allocation shall be without prejudice to exchanges made pursuant to Article 5 (1) of Regulation (EEC) No 170/83 and re-allocations made pursuant to Article 11 (4) and Article 11 c (2) of Regulation (EEC) No 2241/87 ⁽¹⁾, as amended by Regulation (EEC) No 3483/88 ⁽²⁾.

Article 4

As regards the herring stock of the North Sea and of the eastern English Channel, transfers of up to 50 % of the quotas may be effected from ICES divisions IV c and VII d to ICES division IV.

As regards the hake stock in zones II a (EC zone) and IV (EC zone), Member States having a quota in this zone may, on exhaustion of this quota, make transfers from zones V b (EC zone), VI, VII, XII and XIV and from zones VIII a, b and d to zone II a (EC zone) and IV (EC zone).

However, such transfers must be notified in advance to the Commission.

Article 5

1. It shall be prohibited to retain on board or to land catches from stocks for which TACs or quotas are fixed unless:

(i) the catches have been taken by vessels of a Member State having a quota and that quota is not exhausted;

or

(ii) the share of the TAC available to the Community (Community share) has not been allocated by quota among Member States and the Community share has not been exhausted;

or

(iii) until 31 May 1992 for all species other than herring and mackerel, they are mixed with other species and have been taken with nets whose mesh size is 32 mm or less in Region 1 and 2 or 40 mm or less in Region 3 in accordance with Article 2 (1) of Regulation (EEC) No 3094/86 ⁽⁴⁾, and are not sorted either on board or on landing;

from 1 June 1992 for all species other than herring and mackerel, they are mixed with other species and have been taken with nets whose mesh size is 40 mm or less in Regions 1, 2 and 3 and are not sorted either on board or on landing;

or

(vi) they are caught during the course of scientific investigations carried out under Regulation (EEC) No 3094/86.

All landings shall count against the quota or, if the Community share has not been allocated between Member States by quotas, against the Community share, except for catches made under the provisions of (iii), (iv), (v) and (vi).

COUNCIL REGULATION (EEC) No 3883/91

of 18 December 1991

laying down for 1992 certain measures for the conservation and management of fishery resources applicable to vessels flying the flag of Norway

THE COUNCIL OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community,

Having regard to Council Regulation (EEC) No 170/83 of 25 January 1983 establishing a Community system for the conservation and management of fishery resources ⁽¹⁾, as amended by the Act of Accession of Spain and Portugal ⁽²⁾, and in particular Article 11 thereof,

Having regard to the proposal from the Commission,

Whereas, in accordance with the procedure provided for in Articles 2 and 7 of the Fisheries Agreement between the European Economic Community and the Kingdom of Norway ⁽³⁾, the Community and Norway have held consultations concerning mutual fishing rights in 1992 and the management of common biological resources;

Whereas, in the course of these consultations, the delegations agreed to recommend to their respective authorities that certain catch quotas for 1992 should be fixed for the vessels of the other party;

Whereas the Agreement of 19 December 1966 between Denmark, Norway and Sweden on reciprocal access to fishing in the Skagerrak and Kattegat provides that each party shall grant vessels of the other parties access to its fishing zone in the Skagerrak and part of the Kattegat up to four nautical miles from the baselines;

Whereas the necessary measures should be taken to implement, for 1992, the results of the consultations held between the delegations of the Community and Norway and thus prevent any interruption of mutual fisheries relations as at 31 December 1991;

Whereas, pursuant to the terms of Article 3 of Regulation (EEC) No 170/83, it is for the Council to fix the total catches allocated to third countries and to lay down the specific conditions under which such catches must be taken;

Whereas the fishing activities covered by this Regulation are subject to the relevant control measures provided for in Council Regulation (EEC) No 2241/87 of 23 July 1987 establishing certain control measures for fishing activities ⁽⁴⁾, as amended by Regulation (EEC) No 3483/88 ⁽⁵⁾;

Whereas Article 3 (2) of Commission Regulation (EEC) No 1381/87 of 20 May 1987 establishing detailed rules concerning the marking and documentation of fishing vessels ⁽⁶⁾ provides that all vessels with chilled or refrigerated sea-water tanks are to keep on board a document certified by a competent authority and specifying the calibration of the tanks in cubic metres at 10-centimetre intervals,

HAS ADOPTED THIS REGULATION:

Article 1

1. Vessels flying the flag of Norway are hereby authorized until 31 December 1992 to fish for the species listed in Annex I, within the geographical and quantitative limits laid down therein and in accordance with this Regulation, in the 200-nautical-mile fishing zone of the Member States in the North Sea, Skagerrak, Kattegat, Baltic Sea and Atlantic Ocean north of 43°00'N.

2. Fishing authorized pursuant to paragraph 1 shall be limited to those parts of the 200-nautical-mile fishing zone lying seawards of 12 nautical miles from the baselines from which the fishing zones of Member States are measured; however, fishing in the Skagerrak will be allowed seawards of four nautical miles from the Danish baselines.

Whereas, in accordance with the procedure provided for in the Fisheries Agreement between the European Economic Community and the Government of Sweden⁽³⁾, and in particular Articles 2 and 6 thereof, the Community and Sweden have held consultations concerning their mutual fishing rights for 1992 and the management of common biological resources;

Whereas, in the course of these consultations, the delegations agreed to recommend to their respective authorities that certain catch quotas for 1992 should be fixed for the vessels of the other Party;

Whereas the Convention of 31 December 1932 between Denmark and Sweden concerning fishing conditions in the maritime waters bordering on both Parties provides that each Party shall grant fishing vessels of the other Party access to its fishing zone in the Kattegat up to three nautical miles from the coast and in certain parts of the Øresund and the Baltic Sea up to the baselines, without any quantitative limitation,

Whereas the Agreement comprises an exchange, for 1992, of certain supplementary catch quotas, as a consequence of the German unification, the Community being the legal successor to the German Democratic Republic with respect to the Agreement between the Government of the German Democratic Republic and the Government of Sweden on Fisheries;

HAS ADOPTED THIS REGULATION:

Whereas, under the terms of Article 3 of Regulation (EEC) No 170/83, it is for the Council to fix the total catches allocated to third countries and to lay down the specific conditions under which such catches must be taken;

COUNCIL REGULATION (EEC) No 3888/91

of 18 December 1991

laying down for 1992 certain measures for the conservation and management of fishery resources applicable to vessels registered in the Faroe Islands

THE COUNCIL OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community,

Having regard to Council Regulation (EEC) No 170/83 of 25 January 1983 establishing a Community system for the conservation and management of fishery resources ⁽¹⁾, as amended by the Act of Accession of Spain and Portugal ⁽²⁾, and in particular Article 11 thereof,

Having regard to the proposal from the Commission,

Whereas, in accordance with the procedure provided for in Article 2 of the Agreement on fisheries between the European Economic Community, of the one part, and the Government of Denmark and the Home Government of the Faroe Islands, of the other part ⁽³⁾, the Community and the Home Government of the Faroe Islands have held consultations concerning their mutual fishing rights for 1992;

Whereas, in the course of these consultations, the delegations agreed to recommend to their respective authorities that certain catch quotas for 1992 should be fixed for the vessels of the other party;

Whereas measures should be taken to implement the results of these consultations between the Community and the Faroe Islands and thus prevent any interruption of mutual fisheries relations as at 31 December 1992;

Whereas, under the terms of Article 3 of Regulation (EEC) No 170/83, it is for the Council to fix the total catches allocated to third countries and to lay down the specific conditions under which such catches may be taken;

Whereas the fishing activities covered by this Regulation are subject to the relevant control measures provided for by Council Regulation (EEC) No 2241/87 of 23 July 1987

establishing certain control measures for fishing activities ⁽⁴⁾; as amended by Regulation (EEC) No 3483/88 ⁽⁵⁾;

Whereas Article 3 (2) of Commission Regulation (EEC) No 1381/87 of 20 May 1987 establishing detailed rules concerning the marking and documentation of fishing vessels ⁽⁶⁾ provides that all vessels with chilled or refrigerated sea-water tanks are to keep on board a document certified by a competent authority and specifying the calibration of the tanks in cubic metres at 10-centimetre intervals,

HAS ADOPTED THIS REGULATION:

Artikel 1

1. Vessels registered in the Faroe Islands are hereby authorized, until 31 December 1992, to fish for the species listed in Annex I, within the geographical and quantitative limits laid down therein and in accordance with this Regulation, in the 200-nautical-mile fishing zone of the Member States in the North Sea, Skagerrak, Kattegat, Baltic Sea and Atlantic Ocean north of 43°00'N.

2. Fishing authorized under paragraph 1 shall be limited, except in the Skagerrak, to those parts of the 200-nautical-mile fishing zone lying seawards of 12 nautical miles from the baselines from which the fishing zones of Member States are measured.

3. Notwithstanding paragraph 1, unavoidable by-catches of species for which no quota has been fixed in a given zone shall be permitted within the limits laid down by the conservation measures in force in the zone concerned.

4. By-catches in a given zone of a species for which a quota is established in that zone shall be counted against the quota concerned.

COUNCIL REGULATION (EEC) No 3890/91

of 18 December 1991

fixing catch possibilities for 1992 for certain fish stocks and groups of fish stocks in the
Regulatory Area as defined in the NAFO Convention

THE COUNCIL OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community,

Having regard to Council Regulation (EEC) No 170/83 of 25 January 1983 establishing a Community system for the conservation and management of fishery resources ⁽¹⁾, as amended by the Act of Accession of Spain and Portugal, and in particular Article 11 thereof,

Having regard to the proposal from the Commission,

Whereas, pursuant to Article 2 of Regulation (EEC) No 170/83, it falls to the Council to prepare, in the light of the available scientific advice and, in particular, of the report drawn up by the Scientific and Technical Fisheries Committee, the conservation measures necessary to achieve the aims set out in Article 1 of the said Regulation;

Whereas the Community has signed the United Nations Convention on the Law of the Sea, which contains principles and rules relating to the conservation and management of the living resources of the sea;

Whereas the Convention on Future Multilateral Cooperation in the Northwest Atlantic Fisheries, hereinafter referred to as the NAFO Convention, was approved by the Council in its Regulation (EEC) No 3179/78 ⁽²⁾ and entered into force on 1 January 1979;

Whereas, in the framework of its wider international obligations, the Community participates in efforts to conserve fish stocks arising in international waters;

Whereas conservation efforts should be assessed on the basis of relevant scientific data so as to permit the implementation of conservation measures suited to the biological situation of stocks and their foreseeable development depending on the various options for exploiting them;

Whereas the present state of biological data as analysed by international scientific organizations and the conclusions which may be drawn therefrom should be taken as a basis for formulating choices regarding the management of stocks;

Whereas the extent to which such stocks are fished by the fleets of the Member States should be viewed in the light of overall fishing activity and the contribution made hitherto by the Community towards their conservation should be taken into account;

Whereas, in accordance with Article 3 of Regulation (EEC) No 170/83, it falls to the Council to establish the total allowable catches (TACs) by stock or group of stocks, the share available for the Community and also the specific conditions under which the catches must be made;

Whereas, in order to ensure effective management, the TACs available for the Community in 1992 should be fairly allocated among the Member States in accordance with Article 4 of the said Regulation;

Whereas the fishing activities covered by this Regulation are subject to the control measures provided for by Council Regulation (EEC) No 2241/87 of 23 July 1987 establishing certain control measures for fishing activities ⁽³⁾, as amended by Regulation (EEC) No 3483/88 ⁽⁴⁾, and by Regulation (EEC) No 1956/88 of 9 June 1988 adopting provisions for the application of the scheme of joint international inspection adopted by the Northwest Atlantic Fisheries Organization ⁽⁵⁾,

COUNCIL REGULATION (EEC) No 3891/91

of 18 December 1991

establishing, for 1992, certain measures for the conservation and management of fishery resources, applicable to vessels flying the flag of a Member State, other than Spain and Portugal, in waters falling under the sovereignty or within the jurisdiction of the Kingdom of Spain

THE COUNCIL OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community,

Having regard to the Act of Accession of Spain and Portugal, and in particular Article 164 thereof,

Having regard to the proposal from the Commission,

Whereas, pursuant to Article 164 of the Act of Accession, it is for the Council to fix the fishing possibilities and the corresponding number of Community vessels which may fish in Atlantic waters falling under the sovereignty or within the jurisdiction of the Kingdom of Spain and covered by the International Council for the Exploration of the Sea (ICES);

Whereas these possibilities are determined, with respect to species subject to the system of total allowable catches (TACs) and quotas, on the basis of the fishing possibilities allocated and, with respect to species not subject to the TAC and quota system, according to the relative stability of stocks and the need to ensure their conservation;

Whereas specialized fishing activities shall be carried out with the same quantitative limits as those specified for Spanish vessels authorized to carry out their fishing activities in the waters of Member States apart from Portugal;

Whereas the specific conditions governing the fishing activities of such vessels should be laid down:

Whereas the fishing activities covered by this Regulation are subject to the control measures provided for by Regulation (EEC) No 2241/87⁽¹⁾, as well as to the specific procedures drawn up in accordance with Article 164 (4) of the Act of Accession,

HAS ADOPTED THIS REGULATION:

Article 1

The number of vessels flying the flag of a Member State of the Community, other than Spain and Portugal, authorized to fish in waters falling under the sovereignty or within the jurisdiction of the Kingdom of Spain as provided for in Article 164 of the Act of Accession and the procedures governing access, shall be as set out in the Annex.

Article 2

This Regulation shall enter into force in 1 January 1992.

It shall be applicable until 31 December 1992.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 18 December 1991.

COUNCIL REGULATION (EEC) No 3892/91

of 17 December 1991

laying down for 1992 certain measures for the conservation and management of fishery resources applicable to vessels flying the flag of certain non-member countries in the 200-nautical-mile zone off the coast of the French department of Guiana

THE COUNCIL OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community,

Having regard to Council Regulation (EEC) No 170/83 of 25 January 1983 establishing a Community system for the conservation and management of fishery resources ⁽¹⁾, and in particular Article 11 thereof,

Having regard to the proposal from the Commission,

Whereas under the terms of Article 2 of Regulation (EEC) No 170/83 it is incumbent upon the Council to formulate, in the light of the available scientific advice the conservation measures necessary to achieve the aims set out in Article 1 of that Regulation;

Whereas, since 1977, the Community has operated a system of conservation and management of fishery resources applicable to vessels flying the flag of certain non-member countries in the 200-nautical-mile-zone off the coast of the French department of Guiana most recently laid down by Council Regulation (EEC) No 3935/90 ⁽²⁾; whereas the latter Regulation expires on 31 December 1991;

Whereas the continuity of the system should be assured, in particular by maintaining the restriction on some fish stocks in the zone in order to conserve the stock and ensure adequate profitability for the fishermen concerned;

Whereas the processing industry based in the French department of Guinea depends on landings from vessels of non-member countries operating in the fishing zone off that department;

Whereas therefore, it is necessary to ensure that those vessels which are under contract to land their catches in the French department of Guinea can continue to fish;

Whereas shrimp fishing licences calculated on the basis of scientific advice have been issued to non-member countries whose vessels fish in the zone of the said department; whereas therefore a number of those licences are subject to changes on the basis of that scientific advice;

Whereas the technical and control measures applicable under Regulation (EEC) No 3935/90 should be maintained and, should this prove necessary, supplemented,

HAS ADOPTED THIS REGULATION:

Article 1

Vessels flying the flag of one of the countries listed in Annex I shall be authorized, during the period 1 January to 31 December 1992 to fish for the species listed in the said Annex in the part of the 200-nautical-mile fishing zone off the coast of the French department of Guiana that lies more than 12 nautical miles from the base lines, in conformity with the conditions laid down in this Regulation.

Article 2

1. Fishing in the fishery zone referred to in Article 1 shall be subject to the possession on board of a licence, issued by the Commission on behalf of the Community, and to the observance of the conditions set out in that licence and the control measures and other provisions regulating fishing activities in that zone.

2. Applications for licences shall be submitted by the authorities of the non-member countries concerned to the Commission's services at least 15 working days before the desired date of commencement of validity. Licences will be issued to the authorities of the third countries concerned.

3. The registration letters and numbers of a vessel in possession of a licence must be clearly marked on both sides of the prow and on both sides of the superstructure at the most visible point. The letters and numbers must be painted in a colour that contrasts with the colour of the hull or superstructure and must not be obliterated, altered, covered or masked in any other way.

⁽¹⁾ OJ No L 24, 27. 1. 1983, p. 1.

⁽²⁾ OJ No L 378, 31. 12. 1990, p. 77.

Article 3

1. Licences may be issued for shrimp fishing to vessels which fly the flag of one of the countries listed in point 1 of Annex I. The catch quantities authorized under such licences, the maximum number of licences and the maximum number of days at sea during which such licences are valid shall be as specified for each country in point 1 of Annex I.

2. The licences referred to in paragraph 1 shall be issued on the basis of a fishing plan submitted by the authorities of the country concerned, approved by the Commission and not exceeding the limits for the country concerned specified in point 1 of Annex I.

3. The period of validity of each of the licences referred to in paragraph 1 shall be limited to the fishing period provided for in the fishing plan on the basis of which the licence was issued.

4. All licences referred to in paragraph 1 issued to vessels of a non-member country shall cease to be valid as soon as it is established that the quota laid down in point 1 of Annex I for that country has been used up.

Article 4

1. Licences may be issued for the fishing of species other than shrimps to vessels flying the flag of one of the countries listed in point 2 of Annex I. The maximum number of such licences for each country shall be as specified in point 2 of Annex I.

2. Snapper fishing licences shall be granted subject to an undertaking by the owner of the vessel concerned to land 75 % of the catches in the French department of Guiana.

3. Shark fishing licences shall be granted subject to an undertaking by the owner of the vessel concerned to land 50 % of the catches in the French department of Guiana.

Article 5

1. The following information shall accompany applications for licences submitted to the Commission:

- (a) name of the vessel;
- (b) registration number;

- (c) external identification letters and numbers;
- (d) port of registration;
- (e) name and address of the owner or charterer;
- (f) gross tonnage and overall length;
- (g) engine power;
- (h) call sign and radio frequency;
- (i) intended method of fishing;

- (k) period for which a licence is requested.

2. Each licence shall be valid for one vessel only. Where several vessels are taking part in the same fishing operation, each vessel must be in possession of a licence.

Article 6

1. To obtain a fishing licence for snapper or shark, as referred to in Article 4, proof must be produced, in respect of each of the vessels concerned, that a valid contract exists between the shipowner applying for the licence and a processing undertaking situated in the French department of Guiana and that it includes an obligation to land at least 75 % of all snapper catches, or 50 % of all shark catches from the vessel concerned in that department so that they may be processed in that undertaking's plant.

2. The contract referred to in paragraph 1 must be endorsed by the French authorities, which shall ensure that it is consistent both with the actual capacity of the contracting processing undertaking and with the objectives for the development of the Guianese economy. A copy of the duly endorsed contract shall be appended to the licence application.

3. Where the endorsement referred to in paragraph 2 is refused, the French authorities shall give notification of this refusal and state their reasons for it to the party concerned and the Commission.

Article 7

Licences may be cancelled with a view to issuing new licences. Such cancellation shall take effect on the date of issuance of the new licence by the Commission.

Article 8

1. Fishing for shrimps of the species *Penaeus subtilis* and *Penaeus brasiliensis* shall be forbidden in waters of a depth less than 30 metres. During these fishing activities carried out by vessels using trawls, by-catches shall be permitted.

2. Tuna fishing shall be authorized only for vessels using long lines.

3. Snapper fishing shall be authorized only for vessels using long lines or traps.

4. Shark fishing shall be authorized only for vessels using long lines or mesh nets having a minimum mesh of 100 mm and shall be forbidden in waters of a depth less than 30 metres.

Article 9

A log-book, a model of which appears in Annex II, shall be completed after each fishing operation. A copy of this log-book shall be sent to the Commission within 30 days of the last day of each fishing trip via the French authorities.

Article 10

1. The master of each vessel in possession of a licence referred to in Articles 3 and 4 (1), as concerns tuna fishing, shall observe the special conditions set out in Annex III, and in particular forward the information specified in the Annex. These conditions shall form an integral part of the licence.

2. The master of each vessel in possession of a licence as referred to in Article 4 (2) and (3) shall, on landing the catch after each trip, submit to the French authorities a declaration, for whose accuracy the master alone is responsible, stating the quantities of shrimp caught and kept on board since the last declaration. This declaration shall be made using the form of which a model appears in Annex IV.

Article 11

1. The French authorities shall take all appropriate measures to verify the accuracy of the declarations referred to in Article 10 (2), by checking them in particular against the log-book referred to in Article 9. The declaration shall be signed by the competent official after it has been verified.

2. The French authorities shall ensure that all landings of shrimps in the French department of Guiana by vessels in possession of a licence as referred to in Article 4 (2) and (3) shall be the subject of a declaration as referred to in Article 10 (2).

3. Before the end of each month, the French authorities shall send to the Commission all the declarations referred to in paragraph 2 relating to the preceding month.

Article 12

The granting of licences to vessels from third countries shall be subject to the undertaking by the owner of the vessel concerned to permit an observer to come on board at the Commission's request.

Article 13

1. The French authorities shall take appropriate measures to ensure that the obligations set out in this Regulation are complied with, including the regular inspection of vessels.

2. Where an infringement is formally ascertained, the French authorities shall, without delay, and in any event not later than 30 days from the date on which the infringement was ascertained, inform the Commission of the name of the vessel concerned and of any action they may have taken.

Article 14

1. Licences for vessels which have not complied with the obligations provided for in this Regulation, including the obligation to land all or part of the catches laid down in a contract as referred to in Article 6 shall be withdrawn.

No licence shall be issued to such vessels for a period of four to 12 months from the date on which the infringement was committed.

2. Where a vessel fishes without a valid licence in the zone referred to in Article 1, and where that vessel belongs to a shipowner or is managed by a natural or legal person who has or exercises the management of one or more other vessels to which licences have been issued, one of those licences may be withdrawn.

3. The granting of a licence may be refused during the period referred to in paragraph 1 to one or more vessels belonging to a shipowner who owns a vessel whose licence has been withdrawn under this Article or which has fished without a licence in the zone referred to in Article 1.

Article 15

If, for a period of one month, the Commission receives no communication as referred to in Article 12 (1) concerning a vessel in possession of a licence referred to in Articles 3 and 4, the licence of such vessel shall be withdrawn.

Article 16

The period of validity of licences valid on 31 December 1991 pursuant to Article 1 of Regulation (EEC) No 3935/90 may be extended, at the request of the authorities of the country concerned, until 31 January 1992. Licences thus extended shall be counted against the number of
