## COMMISSION

## COMMISSION DIRECTIVE 93/48/EEC

of 23 June 1993

setting out the schedule indicating the conditions to be met by fruit plant propagating material and fruit plants intended for fruit production, pursuant to Council Directive 92/34/EEC

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community,

Having regard to Council Directive 92/34/EEC of 28 April 1992 on the marketing of fruit plant propagating material and fruit plants intended for fruit production <sup>(1)</sup>, and in particular Article 4 thereof,

Whereas, in applying the provisions of this Directive, it is appropriate to take into account the production cycles of the various materials;

Whereas, pursuant to point (i) of Article 11 of Directive 92/34/EEC, requirements as to the supplier's document accompanying CAC propagating material and fruit plants shall be laid down in the schedule established pursuant to Article 4;

Whereas a system of certification for such material has (as far as certain species are concerned) been developed or is in the course of development at an international level by the European Plant Protection Organization (EPPO);

Whereas the conditions laid down in this Directive must be regarded as the minimum standard acceptable at this stage

taking into account the current production conditions in the Community; whereas they will progressively be developed and refined in order ultimately to achieve high standards of quality;

Whereas the measures provided for in this Directive are in accordance with the opinion of the Standing Committee on Propagating Material and Plants of Fruit Genera and Species,

HAS ADOPTED THIS DIRECTIVE:

*Article 1*

1. This Directive establishes the schedule referred to in Article 4 of Directive 92/34/EEC, and sets out requirements as to labelling and sealing referred to in Article 11 of that Directive.

2. The schedule applies to the growing crop and propagating material (including rootstocks), and fruit plants derived therefrom, of all the genera and species referred to in Annex II to Directive 92/34/EEC, and to rootstocks of other genera and species referred to in point (iii) of Article 4 (1) thereof, irrespective of the propagation system applied, those items being hereinafter referred to as 'the material'.

3. The provisions of this Directive shall apply progressively, account being taken of the production cycles of the material referred to in paragraph 2.

<sup>(1)</sup> OJ No L 157, 10. 6. 1992, p. 10.

*Article 2*

The material shall, where applicable, comply with the relevant plant health conditions laid down in Council Directive 77/93/EEC <sup>(1)</sup>.

*Article 3*

1. Without prejudice to the provisions of Article 2, in the case of CAC material the material must, at least on visual inspection, be substantially free from any harmful organisms and diseases impairing quality, or any signs or symptoms thereof, which reduce the usefulness of the propagating material or fruit plants and in particular be free from those organisms and diseases listed in the Annex hereto in respect of the genus or species concerned.

2. Any material showing visible signs or symptoms of the harmful organisms or diseases referred to in paragraph 1 at the stage of the growing crop shall be properly treated immediately upon their appearance or, where appropriate, shall be removed.

3. In the case of citrus material the following requirements shall also be met:

- (i) it shall be derived from initial material which:
  - has been checked and found to show no symptoms of the relevant viruses, virus-like organisms or diseases listed in the Annex hereto,
  - has been tested individually using appropriate methods for the detection of such viruses, virus-like organisms or diseases and has been found to be free from them;
- (ii) it shall have been checked and found to be substantially free of such viruses, virus-like organisms or diseases since the beginning of the last cycle of vegetation; and
- (iii) in the case of grafting, it shall have been grafted onto rootstocks other than those susceptible to viroids.

*Article 4*

1. CAC material shall have adequate identity and purity relative to the genus or species in question and also, without prejudice to the second sentence of Article 9 (1) of Directive 92/34/EEC, have identity and purity as to variety.

2. In the case of commonly known varieties referred to in point (i) of Article 9 (2) of Directive 92/34/EEC, the official denomination of the variety shall be used by the supplier.

3. In the case of varieties which are already the subject of an application for plants breeders' rights or an official registration referred to in point (i) of Article 9 (2) of Directive 92/34/EEC, the breeders' reference or proposed name must be used until the authorization is granted.

4. In the case of varieties entered on lists kept by suppliers pursuant to point (ii) of Article 9 (2) of Directive 92/34/EEC, the requirement referred to in paragraph 1 hereof in respect of variety shall be based on the detailed descriptions given in the lists kept by suppliers.

*Article 5*

CAC material shall be substantially free from any defects likely to impair its quality as propagating material or as fruit plants.

*Article 6*

In the case of pre-basic, basic and certified material, the requirements set out in Articles 3, 4 (1) and 5 hereof are applicable in so far as the certification schemes referred to in Article 7 hereof do not impose more stringent conditions.

*Article 7*

Pending the establishment of a Community certification scheme, pre-basic, basic and certified material shall satisfy the conditions for each respective category as laid down in national schemes of certification provided that they comply, as far as possible, with existing international schemes of certification.

*Article 8*

1. The supplier's document in respect of CAC material referred to in Article 11 (i) of Directive 92/34/EEC shall be of suitable material which has not previously been used and shall be printed in at least one of the official languages of the Community. It shall contain the following information headings:

- (i) indication 'EEC quality';
- (ii) indication of EEC Member State code;
- (iii) indication of responsible official body or its distinguishing code;
- (iv) registration or accreditation number;
- (v) name of supplier;
- (vi) individual serial, week or batch number;
- (vii) date of issue of the supplier's document;

<sup>(1)</sup> OJ No L 26, 31. 1. 1977, p. 20.

- (viii) botanical name;
- (ix) denomination of the variety: in the case of rootstock, denomination of the variety or its designation;
- (x) quantity;
- (xi) category;
- (xii) in the case of imports from third countries pursuant to Article 16 (2) of Directive 92/34/EEC, the name of the country of harvesting.

2. Where material is accompanied by a plant passport in accordance with Commission Directive 92/105/EEC<sup>(1)</sup>, the plant passport may, if the supplier so wishes, constitute the supplier's document referred to in paragraph 1. Nonetheless, the indication 'EEC quality' and an indication as to the responsible official body under Directive 92/34/EEC must be given, and also a reference to the denomination of the variety or rootstock and category. In the case of imports from third countries pursuant to Article 16 (2) of Directive 92/34/EEC, the name of the country of harvesting must also be given. This information may be on the same document as the plant passport but must be clearly separated.

#### Article 9

1. The labelling and sealing requirements of the material qualified as pre-basic, basic or certified pursuant to point (ii) of Article 11 of Directive 92/34/EEC, are those laid down in the national schemes of certification referred to in Article 7 hereof.

2. Member States shall nonetheless ensure that where such an official label does not include all the information laid down in Article 8 (1) hereof, with the exception of headings (iv), (v) and (vii), that information shall be added. Furthermore, an indication as to whether the material is 'virus-free' or 'virus-tested' shall also be given.

#### Article 10

1. Member States shall bring into force the laws, regulations or administrative provisions necessary to comply with this Directive not later than 31 December 1993. They shall forthwith inform the Commission thereof.

When Member States adopt these provisions, these shall contain a reference to this Directive or shall be accompanied by such reference at the time of their official publication. The procedure for making such reference shall be adopted by Member States.

2. Member States shall communicate to the Commission the text of the main provisions of domestic law which they adopt in the field covered by this Directive.

#### Article 11

This Directive is addressed to the Member States.

Done at Brussels, 23 June 1993.

## COMMISSION DIRECTIVE 93/49/EEC

of 23 June 1993

setting out the schedule indicating the conditions to be met by ornamental plant propagating material and ornamental plants pursuant to Council Directive 91/682/EEC

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community,

Having regard to Council Directive 91/682/EEC of 19 December 1991 on the marketing of ornamental plant propagating material and ornamental plants<sup>(1)</sup>, and in particular Article 4 thereof,

Whereas, in applying the provisions of this Directive, it is appropriate to take into account the production cycles of the various materials;

Whereas, the conditions laid down in this Directive must be regarded as the minimum standard acceptable at this stage taking into account the current production conditions in the Community; whereas they will progressively be developed and refined, in order ultimately to achieve high standards of improved quality;

Whereas the measures provided for in this Directive are in accordance with the opinion of the Standing Committee for propagating Materials and Ornamental Plants,

HAS ADOPTED THIS DIRECTIVE:

*Article 1*

1. This Directive establishes the schedules referred to in Article 4 of Directive 91/682/EEC including the requirements as to labelling referred to in the third paragraph of Article 11 of that Directive.

2. The schedule applies to the growing crop and ornamental propagating material (including rootstocks), and ornamental plants derived therefrom, of all the genera and species referred to in Annex to Directive 91/682/EEC, and to rootstocks of other genera and species referred to in Article 4 (2), irrespective of the propagation system applied, those items being hereinafter referred to as 'the material'.

3. The provisions of this Directive shall apply progressively, account being taken of the production cycles of the material referred to in paragraph 2.

*Article 2*

The material shall, where applicable, comply with the relevant plant health conditions laid down in Council Directive 77/93/EEC<sup>(2)</sup>.

*Article 3*

1. Without prejudice to the provisions of Article 2, the material must, at least on visual inspection, be substantially free from any harmful organisms and diseases impairing quality, or any signs or symptoms thereof, which reduce the usefulness of the propagating material or ornamental plants and in particular be free from those organisms and diseases listed in the Annex hereto in respect of the genus or species concerned.

2. Any material showing visible signs or symptoms of the harmful organisms or diseases referred to in paragraph 1 at the stage of the growing crop shall be properly treated immediately upon appearance or, where appropriate, shall be removed.

3. In the case of citrus material the following requirements shall also be met:

- (i) it shall be derived from initial material which has been checked and found to show no symptoms of the relevant viruses, virus-like organisms or diseases listed in the Annex hereto;
- (ii) it shall have been checked and found to be substantially free of such viruses, virus-like organisms or diseases since the beginning of the last cycle of vegetation; and
- (iii) in the case of grafting, it shall have been grafted onto rootstocks other than those susceptible to viroids.

4. In the case of flower bulbs the following requirement shall also be met:

- the propagating material shall be derived directly from material which, at the stage of the growing crop, has been checked and found to be substantially free from any harmful organisms and diseases, signs or symptoms

(1) OJ No L 376, 31. 12. 1991, p. 21.

(2) OJ No L 26, 31. 1. 1977, p. 20.

thereof referred to in paragraph 1 and in particular from those listed in the Annex hereto.

#### Article 4

1. The material shall have adequate identity and purity relative to the genus or species in question, or where appropriate, group of plants, and, where marketed or intended to be marketed with a reference to the variety pursuant to Article 9 (1) of Directive 91/682/EEC, shall also have identity and purity as to variety.

2. In the case of commonly known varieties referred to in the first indent of Article 9 (2) of Directive 91/682/EEC the official denomination of the variety shall be used by the supplier.

3. In the case of varieties which are already the subject of an application for plant breeders' rights or an official registration referred to in the first indent of Article 9 (2) of Directive 91/682/EEC, the breeders' reference or proposed name must be used until the authorization is granted.

4. In the case of varieties entered on lists kept by suppliers pursuant to the second indent of Article 9 (2) of Directive 91/682/EEC, the requirement referred to in paragraph 1 in respect of variety shall be based on the detailed descriptions given in the lists kept by suppliers.

#### Article 5

1. The material shall be substantially free from any defects likely to impair their quality as propagating or as planting material.

2. The vigour and dimensions of the material shall be satisfactory in respect of its usefulness as propagating material and ornamental plants. Furthermore, an appropriate balance shall be assured between the roots, stems and leaves.

3. In the case of seeds, in addition to the requirements in paragraph 1, the germination capacity shall be satisfactory.

#### Article 6

1. The supplier's document referred to in Article 11 of Directive 91/682/EEC shall be of suitable material which has not previously been used and shall be printed in at least one of the official languages of the Community. It shall contain the following information headings:

- (i) indication 'EEC quality';
- (ii) indication of EEC Member State code;
- (iii) indication of responsible official body or its distinguishing code;

- (iv) registration or accreditation number;
- (v) name of supplier;
- (vi) individual serial, week or batch number;
- (vii) date of issue of the supplier's documents;
- (viii) botanical name;
- (ix) denomination of the variety, where appropriate. In the case of rootstock, denomination of the variety of its designation;
- (x) denomination of the group of plants, where appropriate;
- (xi) quantity;
- (xii) in the case of imports from third countries pursuant to Article 16 (2) of Directive 91/682/EEC, the name of the country of harvesting.

2. In the case where the material is accompanied by a plant passport in accordance with Commission Directive 92/105/EEC (1) the plant passport may, if the supplier so wishes, constitute the supplier's document referred to in paragraph 1. Nonetheless, the indication 'EEC quality' and an indication as to the responsible official body under Directive 91/682/EEC must be given and a reference to the denomination of the variety, rootstock or group of plants. In the case of imports from third countries pursuant to Article 16 (2) of Directive 91/682/EEC, the name of the country of harvesting must also be given. This information may be on the same document as the plant passport but clearly separated.

#### Article 7

This Directive is without prejudice to the provisions laid down in Council Regulation (EEC) No 315/68 (2).

#### Article 8

1. Member States shall bring into force the laws, regulations or administrative provisions necessary to comply with this Directive not later than 31 December 1993. They shall forthwith inform the Commission thereof.

When Member States adopt these provisions, these shall contain a reference to this Directive or shall be accompanied by such reference at the time of their official publication. The procedure for such reference shall be adopted by Member States.

(1) OJ No L 4, 8. 1. 1993, p. 22.

(2) OJ No L 71, 21. 3. 1968, p. 1.

2. Member States shall communicate to the Commission the text of the main provisions of domestic law which they adopt in the field covered by this Directive.

Done at Brussels, 23 June 1993.

*Article 9*

This Directive is addressed to the Member States.

*For the Commission*

René STEICHEN

*Member of the Commission*

## ANNEX

## LIST OF SPECIFIC HARMFUL ORGANISMS AND DISEASES OF QUALITY AFFECTING SIGNIFICANCE

| Genus or species                                      | Specific harmful organisms and diseases                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

## COMMISSION DIRECTIVE 93/61/EEC

of 2 July 1993

setting out the schedules indicating the conditions to be met by vegetable propagating and planting material, other than seed pursuant to Council Directive 92/33/EEC

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community,

Having regard to Council Directive 92/33/EEC of 28 April 1992 on the marketing of vegetable propagating and planting material, other than seed <sup>(1)</sup>, and in particular Article 4 thereof,

Whereas, in applying the provisions of this Directive, it is appropriate to take into account the production cycles of the various materials;

Whereas, the conditions laid down in this Directive may be regarded as the minimum standard acceptable at this stage, regard being had to the current production conditions in the Community; whereas they will progressively be developed and refined in order ultimately to achieve high standards of quality;

Whereas the measures provided for in this Directive are in accordance with the opinion of the Standing Committee on Seeds and Propagating Material for Agriculture, Horticulture and Forestry,

HAS ADOPTED THIS DIRECTIVE:

*Article 1*

1. This Directive establishes the schedules referred to in Article 4 of Directive 92/33/EEC and sets out requirements as to labelling referred to in Article 11 of that Directive.

2. The schedules apply to the growing crop and vegetable propagating material (including rootstock), and planting material derived therefrom, of all the genera and species referred to in Annex II to Directive 92/33/EEC, and to rootstocks of other genera and species referred to in Article 4 of that Directive, irrespective of the propagation system applied, the abovementioned items being hereinafter collectively referred to as 'the material'.

3. The provisions of this Directive shall apply progressively, account being taken of the production cycles of the material referred to in paragraph 2.

*Article 2*

The material shall, where applicable, comply with the relevant plant health conditions laid down in Council Directive 77/93/EEC <sup>(2)</sup>.

*Article 3*

1. Without prejudice to the provisions of Article 2, material must at least appear, on visual inspection, to be substantially free from harmful organisms and diseases liable to affect quality, or signs or symptoms thereof, which reduce the usefulness of the vegetable propagating and planting material, and in particular from those listed in the Annex hereto, in respect of the genus or species concerned.

2. Any material showing visible signs or symptoms of harmful organisms or diseases referred to in paragraph 1 at the stage of the growing crop shall be treated properly immediately upon their appearance or, where appropriate, shall be eliminated.

3. In the case of bulbs of shallots and garlic, the following requirements shall also be met: the propagating material shall be derived directly from material which, at the stage of the growing crop, has been checked and found to be substantially free from any harmful organisms and diseases, or signs or symptoms thereof, referred to in paragraph 1 and in particular from those listed in the Annex hereto.

*Article 4*

The material shall have identity and purity in respect of genera or species and shall also have sufficient varietal identity and varietal purity.

*Article 5*

1. The material shall be substantially free from defects likely to impair its quality as propagating or planting material.

2. The vigour and dimensions of the material shall be satisfactory in respect of its usefulness as vegetable

<sup>(1)</sup> OJ No L 157, 10. 6. 1992, p. 1.

<sup>(2)</sup> OJ No L 26, 31. 1. 1977, p. 20.

propagating and planting material. Furthermore, an appropriate balance shall be assured between the roots, stems and leaves.

#### Article 6

1. The supplier's document referred to in Article 11 of Directive 92/33/EEC shall be of suitable material which has not previously been used and shall be printed in at least one of the official languages of the Community. It shall contain the following information headings:

- (i) indication 'EEC quality'
- (ii) indication of EEC Member State code;
- (iii) indication of responsible official body or its distinguishing code;
- (iv) registration or accreditation number;
- (v) name of supplier;
- (vi) individual serial, week or batch number;
- (vii) date of issue of the supplier's document;
- (viii) reference number of seed lot in the case of young plants raised direct from seeds marketed pursuant to Council Directive 70/458/EEC<sup>(1)</sup>. Alternatively this reference number shall be made available, on request, to the responsible official body;
- (ix) common name, or where the material is accompanied by a plant passport in accordance with Commission Directive 92/105/EEC<sup>(2)</sup>, botanical name;
- (x) denomination of the variety. In the case of rootstock, denomination of the variety or its designation;
- (xi) quantity;
- (xii) in the case of imports from third countries pursuant to Article 16 (2) of Directive 92/33/EEC, the name of the country of harvesting.

2. Where the material is accompanied by a plant passport in accordance with Directive 92/105/EEC, the plant passport may, if the supplier so wishes, constitute the supplier's document referred to in paragraph 1. Nonetheless, the remark 'EEC-quality' and an indication as to the responsible official body under Directive 92/33/EEC must be given, together with a reference to the denomination of the variety. In the case of imports from third countries under Article 16 (2) of Directive 92/33/EEC, the name of the country of harvesting must also be given. This information may be on the same document as the plant passport but must be clearly separated.

#### Article 7

1. Member States shall bring into force the laws, regulations or administrative provisions necessary to comply with this Directive not later than 31 December 1993. They shall forthwith inform the Commission thereof.

When Member States adopt these provisions, these shall contain a reference to this Directive or shall be accompanied by such reference at the time of their official publication. The procedure for such reference shall be adopted by Member States.

2. Member States shall communicate to the Commission the text of the main provisions of domestic law which they adopt in the field covered by this Directive.

#### Article 8

This Directive is addressed to the Member States.

Done at Brussels, 2 July 1993.

## COMMISSION DIRECTIVE 93/62/EEC

of 5 July 1993

setting out the implementing measures concerning the supervision and monitoring of suppliers and establishments pursuant to Council Directive 92/33/EEC on the marketing of vegetable propagating and planting material, other than seed

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

(2) thereof, account being taken of the particular nature of the activity or activities of the supplier.

Having regard to the Treaty establishing the European Economic Community,

## Article 3

Having regard to Council Directive 92/33/EEC of 28 April 1992 on the marketing of vegetable propagating and planting material, other than seed <sup>(1)</sup>, and in particular Article 6 (4) thereof,

As far as the identification of critical points in the production process referred to in the first indent of Article 5 (2) of Directive 92/33/EEC and the keeping of records referred to in the fourth indent of Article 5 (2) thereof are concerned, the responsible official body shall supervise and monitor the supplier to ensure that the supplier:

Whereas it is appropriate so set out measures concerning the supervision and monitoring of all suppliers and their establishments, with the exception of those whose activity is confined to the placing on the market of vegetable propagating and planting material;

(a) continues to take into account the following critical points, where appropriate:

Whereas the measures provided for in this Directive are in accordance with the opinion of the Standing Committee on Agricultural, Horticultural and Forestry Seeds and Plants,

- the quality of the vegetable propagating and planting material utilized to start the production process;
- the sowing, pricking-out, potting-up, and planting of vegetable propagating and planting material,
- compliance with the conditions laid down in Articles 3, 4 and 5 of Council Directive 77/93/EEC <sup>(2)</sup>,
- the cultivation plan and method,
- general crop care,
- the multiplication operations,
- the harvesting operations,
- hygiene,
- treatments,
- packaging,
- storage,
- transport,
- administration;

HAS ADOPTED THIS DIRECTIVE:

(b) keeps records, with a view to having complete information available for the said responsible official bodies, on:

## Article 1

1. This Directive lays down implementing measures concerning the supervision and monitoring of suppliers and their establishments, other than those whose activity is confined to the placing on the market of vegetable propagating and planting material, pursuant to Article 6 (4) of Directive 92/33/EEC, in cases where the checks referred to in Article 5 (2) of the said Directive are carried out by the suppliers themselves or an accredited supplier.

(i) plants or other objects:

## Article 2

The responsible official body shall carry out regularly, at least once a year at an appropriate time, supervision and monitoring of suppliers and their establishments in order to ensure continued compliance with the requirements laid down in Directive 92/33/EEC, and in particular with the principles set out in the first to fourth indents of Article 5

- purchased for storage or planting on the premises,
- under production,
- or
- dispatched to others;
- and

<sup>(1)</sup> OJ No L 157, 10. 6. 1992, p. 10.

<sup>(2)</sup> OJ No L 26, 31. 1. 1977, p. 20.

- (ii) any chemical treatments which have been applied to the plants, and that he keeps related documents for at least one year;
- (c) is available personally or designates another person technically experienced in plant production and related plant-health matters, to liaise with the said responsible official bodies;
- (d) carries out visual inspections as necessary and at appropriate times in a manner accepted by the said responsible official bodies;
- (e) allows access by persons entitled to act for the said responsible official bodies, in particular for inspection and/or sampling purposes, and allows access to the records and related documents referred to in point (b);
- (f) otherwise cooperates with the said responsible official bodies.

#### *Article 4*

As far as the establishment and implementation of methods for monitoring and checking the critical points as referred to in the second indent of Article 5 (2) of Directive 92/33/EEC are concerned, the responsible official body shall supervise and monitor the supplier to ensure that, where appropriate, such methods continue to be carried out, giving particular attention to:

- (a) the availability and actual use of methods for checking each of the critical points mentioned in Article 3;
- (b) the reliability of those methods;
- (c) their suitability for an assessment of the content of the production and marketing arrangements, including the administrative aspects; and
- (d) the competence of the supplier's staff to carry out the checks.

#### *Article 5*

As far as the taking of samples for analysis in an accredited laboratory as referred to in the third indent of Article 5 (2) of Directive 92/33/EEC is concerned, the responsible

official body shall supervise and monitor the supplier to ensure, where appropriate, that:

- (a) samples are taken during the various stages of production at such intervals as are established by the responsible official body when the production methods were verified at the time of accreditation;
- (b) samples are taken in a technically correct manner and using a statistically reliable procedure, regard being had to the kind of analysis to be carried out;
- (c) the persons who take the samples are qualified to do so; and
- (d) the analysis of samples is carried out by a laboratory which is accredited for that purpose pursuant to Article 6 (2) of the said Directive.

#### *Article 6*

1. Member States shall bring into force the laws, regulations or administrative provisions necessary to comply with this Directive not later than 30 June 1994. They shall forthwith inform the Commission thereof.

When Member States adopt these provisions, these shall contain a reference to this Directive or shall be accompanied by such reference at the time of their official publication. The procedure for such reference shall be adopted by Member States.

2. Member States shall communicate to the Commission the text of the main provisions of domestic law which they adopt in the field covered by this Directive.

#### *Article 7*

This Directive is addressed to the Member States.

## COMMISSION DIRECTIVE 93/63/EEC

of 5 July 1993

setting out the implementing measures concerning the supervision and monitoring of suppliers and establishments pursuant to Council Directive 91/682/EEC on the marketing of ornamental plant propagating material and ornamental plants

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community,

Having regard to Council Directive 91/682/EEC of 19 December 1991 on the marketing of ornamental plant propagating material and ornamental plants<sup>(1)</sup>, and in particular Article 6 (4) thereof,

Whereas it is appropriate to set out measures concerning the supervision and monitoring of all suppliers and their establishments, with the exception of those whose activity is confined to the placing on the market of ornamental plant propagating material and ornamental plants;

Whereas the measures provided for in this Directive are in accordance with the opinion of the Standing Committee on Propagating Material and Ornamental Plants,

HAS ADOPTED THIS DIRECTIVE:

*Article 1*

1. This Directive lays down implementing measures concerning the supervision and monitoring of suppliers and their establishments, other than those whose activity is confined to the placing on the market of ornamental propagating material and ornamental plants, pursuant to Article 6 (4) of Directive 91/682/EEC, in cases where the checks referred to in Article 5 (2) of the said Directive are carried out by the suppliers themselves or an accredited supplier.

*Article 2*

The responsible official body shall carry out regularly, at least once a year at an appropriate time, supervision and monitoring of suppliers and their establishments in order to ensure continued compliance with the requirements laid down in Directive 91/682/EEC, and in particular with the principles set out in the first to fourth indents of Article 5

(2) thereof, account being taken of the particular nature of the activity or activities of the supplier.

*Article 3*

As far as the identification of critical points in the production process referred to in the first indent of Article 5 (2) of Directive 91/682/EEC and the keeping of records referred to in the fourth indent of Article 5 (2) thereof are concerned, the responsible official body shall supervise and monitor the supplier to ensure that the supplier:

(a) continues to take into account the following critical points, where appropriate:

- the quality of propagating material and plants utilized to start the production process;
- the sowing, pricking-out, potting-up, and planting of propagating material and plants,
- compliance with the conditions laid down in Articles 3, 4 and 5 of Council Directive 77/93/EEC<sup>(2)</sup>,
- the cultivation plan and method,
- general crop care,
- the multiplication operations,
- the harvesting operations,
- hygiene,
- treatments,
- packaging,
- storage,
- transport,
- administration;

(b) keeps records, with a view to having complete information available for the said responsible official bodies, on:

(i) plants or other objects:

- purchased for storage or planting on the premises,
- under production,
- or
- dispatched to others;
- and

<sup>(1)</sup> OJ No L 376, 31. 12. 1991, p. 21.

<sup>(2)</sup> OJ No L 26, 31. 1. 1977, p. 20.

- (ii) any chemical treatments which have been applied to the plants, and that he keeps related documents for at least one year;
- (c) is available personally or designates another person technically experienced in plant production and related plant-health matters, to liaise with the said responsible official bodies;
- (d) carries out visual inspections as necessary and at appropriate times in a manner accepted by the said responsible official bodies;
- (e) allows access by persons entitled to act for the said responsible official bodies, in particular for inspection and/or sampling purposes, and allows access to the records and related documents referred to in point (b);
- (f) otherwise cooperates with the said responsible official bodies.

#### Article 4

As far as the establishment and implementation of methods for monitoring and checking the critical points as referred to in the second indent of Article 5 (2) of Directive 91/682/EEC are concerned, the responsible official body shall supervise and monitor the supplier to ensure that, where appropriate, such methods continue to be carried out, giving particular attention to:

- (a) the availability and actual use of methods for checking each of the critical points mentioned in Article 3;
- (b) the reliability of those methods;
- (c) their suitability for an assessment of the content of the production and marketing arrangements, including the administrative aspects; and
- (d) the competence of the supplier's staff to carry out the checks.

#### Article 5

As far as the taking of samples for analysis in an accredited laboratory as referred to in the third indent of Article 5 (2) of Directive 91/682/EEC is concerned, the responsible

official body shall supervise and monitor the supplier to ensure, where appropriate, that:

- (a) samples are taken during the various stages of production at such intervals as are established by the responsible official body when the production methods were verified at the time of accreditation;
- (b) samples are taken in a technically correct manner and using a statistically reliable procedure, regard being had to the kind of analysis to be carried out;
- (c) the persons who take the samples are qualified to do so; and
- (d) the analysis of samples is carried out by a laboratory which is accredited for that purpose pursuant to Article 6 (2) of the said Directive.

#### Article 6

1. Member States shall bring into force the laws, regulations or administrative provisions necessary to comply with this Directive not later than 30 June 1994. They shall forthwith inform the Commission thereof.

When Member States adopt these provisions, these shall contain a reference to this Directive or shall be accompanied by such reference at the time of their official publication. The procedure for such reference shall be adopted by Member States.

2. Member States shall communicate to the Commission the text of the main provisions of domestic law which they adopt in the field covered by this Directive.

#### Article 7

This Directive is addressed to the Member States.

## COMMISSION DIRECTIVE 93/64/EEC

of 5 July 1993

setting out the implementing measures concerning the supervision and monitoring of suppliers and establishments pursuant to Council Directive 92/34/EEC on the marketing of fruit plant propagating material and fruit plants intended for fruit production

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

particular nature of the activity or activities of the supplier.

Having regard to the Treaty establishing the European Economic Community,

*Article 3*

Having regard to Council Directive 92/34/EEC of 29 April 1992 on the marketing of fruit plant propagating material and fruit plants intended for fruit production <sup>(1)</sup>, and in particular Article 6 (4) thereof,

As far as the identification of critical points in the production process referred to in the first indent of Article 5 (2) of Directive 92/34/EEC and the keeping of records referred to in the fourth indent of Article 5 (2) thereof are concerned, the responsible official body shall supervise and monitor the supplier to ensure that the supplier:

Whereas it is appropriate to set out measures concerning the supervision and monitoring of all suppliers and their establishments, with the exception of those whose activity is confined to the placing on the market of propagating material and fruit plants;

(a) continues to take into account the following critical points, where appropriate:

Whereas the measures provided for in this Directive are in accordance with the opinion of the Standing Committee Propagating Material and Plants of Fruit Genera and Species,

- the quality of propagating material and fruit plants utilized to start the production process,
- the sowing, pricking-out, potting-up, and planting of propagating material and fruit plants,
- compliance with the conditions laid down in Articles 3, 4 and 5 of Council Directive 77/93/EEC <sup>(2)</sup>,
- the cultivation plan and method,
- general crop care,
- the multiplication operations,
- the harvesting operations,
- hygiene,
- treatments,
- packaging,
- storage,
- transport,
- administration;

HAS ADOPTED THIS DIRECTIVE:

*Article 1*

1. This Directive lays down implementing measures concerning the supervision and monitoring of suppliers and their establishments, other than those whose activity is confined to the placing on the market of propagating material and fruit plants, pursuant to Article 6 (4) of Directive 92/34/EEC, in cases where the checks referred to in Article 5 (2) of the said Directive are carried out by the suppliers themselves or an accredited supplier.

*Article 2*

The responsible official body shall carry out regularly, at least once a year at an appropriate time, supervision and monitoring of suppliers and their establishments in order to ensure continued compliance with the requirements laid down in Directive 92/34/EEC, and in particular, in respect of with the principles set out in the first to fourth indents of Article 5 (2) thereof, account being taken of the

(b) keeps records, with a view to having complete information available for the said responsible official bodies, on:

(i) plants or other objects:

- purchased for storage or planting on the premises,
- under production,
- or
- dispatched to others;
- and

<sup>(1)</sup> OJ No L 157, 10. 6. 1992, p. 1.

<sup>(2)</sup> OJ No L 26, 31. 1. 1977, p. 20.

- (ii) any chemical treatments which have been applied to the plants, and that he keeps related documents for at least one year;
- (c) is available personally or designates another person technically experienced in plant production and related plant-health matters, to liaise with the said responsible official bodies;
- (d) carries out visual inspections as necessary and at appropriate times in a manner accepted by the said responsible official bodies;
- (e) allows access by persons entitled to act for the said responsible official bodies, in particular for inspection and/or sampling purposes, and allows access to the records and related documents referred to in point (b);
- (f) otherwise cooperates with the said responsible official bodies.

#### Article 4

As far as the establishment and implementation of methods for monitoring and checking the critical points as referred to in the second indent of Article 5 (2) of Directive 92/34/EEC are concerned, the responsible official body shall supervise and monitor the supplier to ensure that, where appropriate, such methods continue to be carried out, giving particular attention to:

- (a) the availability and actual use of methods for checking each of the critical points mentioned in Article 3;
- (b) the reliability of those methods;
- (c) their suitability for an assessment of the content of the production and marketing arrangements, including the administrative aspects; and
- (d) the competence of the supplier's staff to carry out the checks.

#### Article 5

As far as the taking of samples for analysis in an accredited laboratory as referred to in the third indent of Article 5 (2) of Directive 92/34/EEC is concerned, the responsible

official body shall supervise and monitor the supplier to ensure, where appropriate, that:

- (a) samples are taken during the various stages of the production process and in conformity with the frequency as communicated to the responsible official body when the production methods were verified at the time of accreditation;
- (b) samples are taken in a technically correct manner and using a statistically reliable procedure, regard being had to the kind of analysis to be carried out;
- (c) the persons who take the samples are qualified to do so; and
- (d) the analysis of samples is carried out by a laboratory which is accredited for that purpose pursuant to Article 6 (2) of the said Directive.

#### Article 6

1. Member States shall bring into force the laws, regulations or administrative provisions necessary to comply with this Directive not later than 30 June 1994. They shall forthwith inform the Commission thereof.

When Member States adopt these provisions, these shall contain a reference to this Directive or shall be accompanied by such reference at the time of their official publication. The procedure for such reference shall be adopted by Member States.

2. Member States shall communicate to the Commission the text of the main provisions of domestic law which they adopt in the field covered by this Directive.

#### Article 7

This Directive is addressed to the Member States.
