THE COMMISSION OF THE EUROPEAN COMMUNITIES,

carried out during the 30 days prior to dispatch outside the herd of origin.

Having regard to the Treaty establishing the European Community,

- (5) The measures provided for in this Decision are in accordance with the opinion of the Standing veterinary Committee,

Having regard to Council Directive 64/432/EEC of 26 June 1964 on health problems affecting intra-Community trade in bovine animals and swine ⁽¹⁾, as last amended by Directive 2000/20/EC ⁽²⁾, and in particular Article 16(3) thereof,

HAS ADOPTED THIS DECISION:

Whereas:

Article 1

- (1) In accordance with Article 6(2)(a) of Directive 64/432/EEC, bovine animals intended for intra-Community trade must come from a holding officially free of bovine tuberculosis and in addition in the case of animals more than six weeks old, be tested with negative reaction within 30 days of dispatch by use of an intradermal tuberculin test carried out in accordance with the provisions in Annex B point 32(d).
- (2) The test referred to above is not required where the animals originate in a Member State or part of a Member State recognised as officially tuberculosis free or in a Member State or part of a Member State with an approved surveillance network.
- (3) Certain Member States are not officially free from bovine tuberculosis and have not yet accomplished the installation of a surveillance network. However, pursuant to Council Directive 71/285/EEC ⁽³⁾ they had established a system of tuberculin testing carried out by authorised veterinary surgeons outside the herd of origin both at approved dealers premises and assembly centres, during the 30 days prior to dispatch to other Member States.
- (4) Since 1 July 1999, the practice to carry out the tuberculin testing for certification purposes outside the herd of origin is no longer in line with Directive 64/432/EEC. It appears appropriate to allow under certain conditions until the surveillance network is approved in accordance with Article 17 and in any case for a transitional period of not more than two years, the tuberculin testing to be

1. Derogating from the provisions of Article 6(2)(a), first paragraph of Directive 64/432/EEC, Member States listed in the Annex may authorise the intradermal tuberculin test required for certification of bovine animals for intra-Community trade to be carried out outside the herd of origin.

2. Member States using the derogation provided for in paragraph 1 shall ensure that bovine animals older than six weeks of age are only certified for intra-Community trade, if they fulfil the following conditions:

- they come from herds officially free from bovine tuberculosis, and
- they have reacted with a negative result as defined in Annex B point 32(d) of Directive 64/432/EEC to an intradermal tuberculin test, carried out during the 30 days period prior to certification.

Article 2

Member States using the procedures for tuberculin testing referred to in Article 1 shall ensure, that bovine animals for intra-Community trade so tested are accompanied by an animal health certificate as laid down in Annex F Model 1 of Directive 64/432/EEC amended as follows:

1. In the second indent of paragraph 3 in Section A the words 'Article 6(2)' are replaced by the words 'Article 6(2)(b) and (c)'.
2. In the table under the second indent of paragraph 3 in Section A the row relating to the tuberculin test and the word 'testing' in the header of the fourth column are deleted.

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to Council Directive 90/539/EEC of 15 October 1990 on animal health conditions governing intra-Community trade in, and imports from third countries of, poultry and hatching eggs ⁽¹⁾, as last amended by Directive 1999/90/EC ⁽²⁾, and in particular Article 23(1), 24, 26(2), 27a and 34 thereof,

Having regard to Council Directive 91/496/EEC of 15 July 1991 laying down the principles governing the organisation of veterinary checks on animals entering the Community and amending Directives 89/662/EEC, 90/425/EEC and 90/675/EEC ⁽³⁾, as last amended by Directive 96/43/EC ⁽⁴⁾, and in particular Article 10 thereof,

Whereas:

(1) Commission Decision 96/482/EC ⁽⁵⁾, as last amended by Decision 1999/549/EC ⁽⁶⁾, lays down the animal health conditions and veterinary certificates for the importation of poultry and hatching eggs other than ratites and eggs thereof from third countries including the animal health measures to be applied after such importation.

(2) Given the experience gained during the application of the measures provided for, the conditions under which day-old chicks originating from hatching eggs which have been imported from third countries are traded within the Community should be modified. The modification should enable Member States to dispatch day-old chicks to holdings located in another Member State ensuring that the post importation isolation is carried out.

(3) It is necessary therefore to amend the model certificate as laid down in Annex IV to Directive 90/539/EEC and Decision 96/482/EC accordingly.

(4) It is necessary that the competent authority of the Member State of dispatch informs the competent authority of the final destination of the day-old chicks through the Animo system about the animal health requirements concerning the isolation period which have to be applied in these cases.

(5) The measures provided for in this Decision are in accordance with the opinion of the Standing Veterinary Committee,
