**derogating from Regulation (EC) No 2535/2001 as regards the period for lodging applications for
licences to import milk products under quotas**

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to Council Regulation (EC) No 1255/1999 of 17 May 1999 on the common organisation of the market in milk and milk products ⁽¹⁾, and in particular Articles 26(3) and 29(1) thereof,

Whereas:

- (1) Chapter I of Title 2 of Commission Regulation (EC) No 2535/2001 of 14 December 2001 laying down detailed rules for applying Council Regulation (EC) No 1255/1999 as regards the import arrangements for milk and milk products and opening tariff quotas ⁽²⁾ provides for, *inter alia*, the breakdown of the quantities to be imported in each six-month period under certain tariff quotas and the periods for lodging the relevant import licence applications.
- (2) According to Article 14(1) of Regulation (EC) No 2535/2001, import licence applications may be lodged only during the first 10 days of each six-month period.
- (3) It is intended that, in January 2004, the opening of the quotas referred to in Chapter I of Title 2 of that Regulation for the WTO year (1 July to 30 June) should be limited to the quantities for four rather than six months, so that operators in the new Member States which are to join the Community on 1 May 2004 may have access to an additional tranche of these quotas, to be allocated in May 2004, equal to two months' quota.

(4) Pending finalisation of the procedures for the adoption and publication of those provisions, and in the interests of legal certainty, it is necessary to postpone the period for lodging applications provided for in Article 14(1) of Regulation (EC) No 2535/2001 and to derogate from that Article.

(5) The measures provided for in this Regulation are in accordance with the opinion of the Management Committee for Milk and Milk Products,

HAS ADOPTED THIS REGULATION:

Article 1

By way of derogation from Article 14(1) of Regulation (EC) No 2535/2001, for the period 1 January to 30 April 2004, import licence applications for the quotas referred to in Annex I. A, Annex I. B, points 5 and 6, Annex I. F and Annex I. H of that Regulation may be lodged only during the period 12 to 16 January 2004.

specific measures concerning the market in ethyl alcohol of agricultural origin**

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to Council Regulation (EC) No 670/2003 of 8 April 2003 laying down specific measures concerning the market in ethyl alcohol of agricultural origin ⁽¹⁾, and in particular the second subparagraph of Article 3(1), the first subparagraph of Article 3(3), Article 4(4) and Article 11 thereof,

- (6) Save as otherwise provided in this Regulation, Commission Regulation (EC) No 1291/2000 of 9 June 2000 laying down common detailed rules for the application of the system of import and export licences and advance fixing certificates for agricultural products ⁽²⁾ and Commission Regulation (EEC) No 2220/85 of 22 July 1985 laying down common detailed rules for the application of the system of securities for agricultural products ⁽³⁾ should apply to the import licences and securities provided for in this Regulation.
- (7) Commission Regulation (EEC) No 2541/84 of 4 September 1984 fixing a countervailing charge on imports into the other Member States of ethyl alcohol of agricultural origin produced in France ⁽⁴⁾ has become obsolete and should therefore be repealed.
- (8) The measures provided for in this Regulation are in accordance with the opinion of the Management Committee for Wine,

Description	Classification CN code	Reasons
(1)	(2)	(3)
Unlined close-fitting garment, covering the whole body from the shoulder to the ankle enveloping each leg separately. With long sleeves. Hemmed at the sleeve ends and at the leg ends. With partial opening at the back reaching down to the waist and fastened by a zip. With a tight fitting collar, fastened at the back by a velcro type strap. The garment is made up of several panels, assembled by sewing. The garment is predominantly of cellular rubber panels covered on both faces with a layer of unicoloured knitted textile fabric (man-made fibres). Only a small front chest panel, two of the four back panels and the panels of the lower sleeves are of an embossed cellular rubber covered only on one face (on the inside of the garment) with a layer of unicoloured knitted textile fabric. (surf/diving suit) (see photographs No 631 A and 631 B) (*)	6113 00 10	The classification is determined by the provisions of general rules 1, 3 (b) and 6 for the interpretation of the Combined Nomenclature (GIR), by note 7(e) to Section XI, by notes 2(a) to Chapter 40, 4 to Chapter 59, 1 to Chapter 61, and 1(e) to Chapter 95, as well as the wording of CN codes 6113 and 6113 00 10. The article is made up within the meaning of note 7(e) to Section XI and consists mainly of cellular rubber panels covered on both faces with a layer of textile fabric. These panels of combined materials give the essential character to the garment (GIR 3b). As the cellular rubber is covered on both faces with a layer of textile fabric, the latter is regarded as having a function beyond that of mere reinforcement, since it confers the essential character of textile to the material. Therefore, the textile fabric being present not merely for reinforcing purposes within the meaning of Chapter note 4, last paragraph, to Chapter 59, it is considered to be the constituent material of the article. (See also the HS Explanatory Notes to heading 4008, third paragraph, and fourth paragraph, (A)). Thus, the article is a garment made up of knitted fabrics of heading 5906 and, in accordance to note 1 to Chapter 61, is classified in subheading 6113 00 10. Classification in heading 4015 is excluded within the meaning of GIR 3b as only a minor part of the garment is made of sheets of cellular rubber covered only on one face with a textile fabric being present merely for reinforcing purposes (heading 4008).

**COMMISSION REGULATION (EC) No 2347/2003
of 30 December 2003
fixing the export refunds on milk and milk products**

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to Council Regulation (EC) No 1255/1999 of 17 May 1999 on the common organisation of the market in milk and milk products ⁽¹⁾, as last amended by Regulation (EC) No 1787/2003 ⁽²⁾, and in particular Article 31(3) thereof,

Whereas:

(1) Article 31 of Regulation (EC) No 1255/1999 provides that the difference between prices in international trade for the products listed in Article 1 of that Regulation and prices for those products within the Community may be covered by an export refund within the limits resulting from agreements concluded in accordance with Article 300 of the Treaty.

(2) Regulation (EC) No 1255/1999 provides that when the refunds on the products listed in Article 1 of the above-mentioned Regulation, exported in the natural state, are being fixed, account must be taken of:

- the existing situation and the future trend with regard to prices and availabilities of milk and milk products on the Community market and prices for milk and milk products in international trade,
- marketing costs and the most favourable transport charges from Community markets to ports or other points of export in the Community, as well as costs incurred in placing the goods on the market of the country of destination,
- the aims of the common organisation of the market in milk and milk products which are to ensure equilibrium and the natural development of prices and trade on this market,
- the limits resulting from agreements concluded in accordance with Article 300 of the Treaty, and
- the need to avoid disturbances on the Community market, and
- the economic aspect of the proposed exports.

(3) Article 31(5) of Regulation (EC) No 1255/1999 provides that when prices within the Community are being determined account should be taken of the ruling prices

which are most favourable for exportation, and that when prices in international trade are being determined particular account should be taken of:

- (a) prices ruling on third-country markets;
- (b) the most favourable prices in third countries of destination for third-country imports;
- (c) producer prices recorded in exporting third countries, account being taken, where appropriate, of subsidies granted by those countries; and
- (d) free-at-Community-frontier offer prices.

(4) Article 31(3) of Regulation (EC) No 1255/1999 provides that the world market situation or the specific requirements of certain markets may make it necessary to vary the refund on the products listed in Article 1 of the abovementioned Regulation according to destination.

(5) Article 31(3) of Regulation (EC) No 1255/1999 provides that the list of products on which export refunds are granted and the amount of such refunds should be fixed at least once every four weeks; the amount of the refund may, however, remain at the same level for more than four weeks.

(6) In accordance with Article 16 of Commission Regulation (EC) No 174/1999 of 26 January 1999 on specific detailed rules for the application of Council Regulation (EC) No 804/68 as regards export licences and export refunds on milk and milk products ⁽³⁾, as last amended by Regulation (EC) No 1948/2003 ⁽⁴⁾, the refund granted for milk products containing added sugar is equal to the sum of the two components; one is intended to take account of the quantity of milk products and is calculated by multiplying the basic amount by the milk products content in the product concerned; the other is intended to take account of the quantity of added sucrose and is calculated by multiplying the sucrose content of the entire product by the basic amount of the refund valid on the day of exportation for the products listed in Article 1(1)(d) of Council Regulation (EC) No 1260/2001 of 19 June 2001 on the common organisation of the markets in the sugar sector ⁽⁵⁾, as amended by Commission Regulation (EC) No 680/2002 ⁽⁶⁾, however, this second component is applied only if the added sucrose has been produced using sugar beet or cane harvested in the Community.

- (7) Commission Regulation (EEC) No 896/84 ⁽¹⁾, as last amended by Regulation (EEC) No 222/88 ⁽²⁾, laid down additional provisions concerning the granting of refunds on the change from one milk year to another; those provisions provide for the possibility of varying refunds according to the date of manufacture of the products.
- (8) For the calculation of the refund for processed cheese provision must be made where casein or caseinates are added for that quantity not to be taken into account.
- (9) It follows from applying the rules set out above to the present situation on the market in milk and in particular to quotations or prices for milk products within the Community and on the world market that the refund should be as set out in the Annex to this Regulation.

COMMISSION REGULATION (EC) No 2348/2003
of 30 December 2003
fixing the import duties in the cereals sector

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to Council Regulation (EEC) No 1766/92 of 30 June 1992 on the common organisation of the market in cereals ⁽¹⁾, as last amended by Regulation (EC) No 1104/2003 ⁽²⁾,

Having regard to Commission Regulation (EC) No 1249/96 of 28 June 1996 laying down detailed rules for the application of Council Regulation (EEC) No 1766/92 as regards import duties in the cereals sector ⁽³⁾, as last amended by Regulation (EC) No 1110/2003 ⁽⁴⁾, and in particular Article 2(1) thereof,

Whereas:

- (1) Article 10 of Regulation (EEC) No 1766/92 provides that the rates of duty in the Common Customs Tariff are to be charged on import of the products referred to in Article 1 of that Regulation. However, in the case of the products referred to in paragraph 2 of that Article, the import duty is to be equal to the intervention price valid for such products on importation and increased by 55 %, minus the cif import price applicable to the consignment in question. However, that duty may not exceed the rate of duty in the Common Customs Tariff.
- (2) Pursuant to Article 10(3) of Regulation (EEC) No 1766/92, the cif import prices are calculated on the basis of the representative prices for the product in question on the world market.

- (3) Regulation (EC) No 1249/96 lays down detailed rules for the application of Council Regulation (EEC) No 1766/92 as regards import duties in the cereals sector.
- (4) The import duties are applicable until new duties are fixed and enter into force. They also remain in force in cases where no quotation is available for the reference exchange referred to in Annex II to Regulation (EC) No 1249/96 during the two weeks preceding the next periodical fixing.
- (5) In order to allow the import duty system to function normally, the representative market rates recorded during a reference period should be used for calculating the duties.
- (6) Application of Regulation (EC) No 1249/96 results in import duties being fixed as set out in the Annex to this Regulation,

HAS ADOPTED THIS REGULATION:

Article 1

The import duties in the cereals sector referred to in Article 10(2) of Regulation (EEC) No 1766/92 shall be those fixed in Annex I to this Regulation on the basis of the information given in Annex II.

Article 2

This Regulation shall enter into force on 1 January 2004.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

COUNCIL DIRECTIVE 2003/122/EURATOM**of 22 December 2003****on the control of high-activity sealed radioactive sources and orphan sources**

THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty establishing the European Atomic Energy Community, and in particular Articles 31(2) and 32 thereof,

Having regard to the proposal from the Commission, drawn up after obtaining the opinion of a group of persons appointed by the Scientific and Technical Committee from among scientific experts in the Member States, in accordance with Article 31 of the Treaty,

After consulting the European Economic and Social Committee,

Having regard to the opinion of the European Parliament ⁽¹⁾,

Whereas:

- (1) Article 30 of the Treaty requires basic standards to be laid down within the Community for the protection of the health of workers and the general public against the dangers arising from ionising radiation.
- (2) Council Directive 96/29/Euratom of 13 May 1996 laying down basic safety standards for the protection of the health of workers and the general public against the dangers arising from ionising radiation ⁽²⁾, continues the line of directives laying down basic safety standards since 1959.
- (3) Article 4(1)(e) of Directive 96/29/Euratom requires prior authorisation for, amongst other practices, the use of radioactive sources for industrial radiography or processing of products or research or the exposure of persons for medical treatment. It is appropriate to extend this requirement to all practices involving high-activity radioactive sources in order further to reduce the likelihood of accidents involving such sources.
- (4) Prior to authorisation, adequate arrangements and provision for the safe management of sources should exist.
- (5) The International Atomic Energy Agency (IAEA) issues regulations for the safe transport of radioactive material that include activity limits for the requirements of the regulations, which should provide an appropriate basis for defining high-activity sealed radioactive sources within the scope of this Directive ⁽³⁾.
- (6) In Directive 96/29/Euratom exemption values were laid down for the reporting of a practice to the authorities. These values were defined in that Directive on the basis of a negligible level of risk. As the requirements of this Directive should not put an administrative burden on the holders of small sources that is not commensurate with the possible health detriment, the definition of high activity radioactive sources should not be extended to the exemption levels of Directive 96/29/Euratom.
- (7) Shipments of sealed sources between Member States are subject to the procedure established by Council Regulation (Euratom) No 1493/93 of 8 June 1993 on shipments of radioactive substances between Member States ⁽⁴⁾.
- (8) Although the legal requirements deriving from existing legislation at Community and at national level ensure basic protection, high-activity sources still imply considerable potential risks for human health and for the environment and therefore need to be subject to a strict control from the time they are manufactured to the time they are placed in a recognised installation for their long-term storage or disposal.
- (9) Prevention of radiological accidents and injuries requires the location of each high-activity source to be known, recorded and verified from the time the source is manufactured or imported into the Community to the time it is placed in a recognised installation for its long-term storage or disposal or it is exported from the Community. Changes in the situation of a high-activity source, e.g. its location or use, should also be recorded and notified. Physical or financial obstacles should not hinder any appropriate reuse, recycling or disposal of such sources when disused under any reasonably foreseeable circumstances.
- (10) Cases of unintentional exposure should be notified to the competent authority.
- (11) Movements within the Community of high-activity sources make it necessary to harmonise the control of and information on such sources through the application of minimum criteria.
- (12) Experience shows that, despite the existence of an appropriate regulatory framework, control of high-activity sources may nevertheless be lost. Furthermore, the existence of orphan sources resulting from past activities requires that specific initiatives be undertaken.

⁽¹⁾ Opinion of 18 November 2003 (not yet published in the Official Journal).

⁽²⁾ OJ L 159, 29.6.1996, p. 1.

⁽³⁾ IAEA Safety Standards Series No TS-R-1 (ST, Revised), Vienna, 2000.

⁽⁴⁾ OJ L 148, 19.6.1993, p. 1.

- (13) Accordingly, it is necessary to provide for the identification, marking and recording of each high-activity source as well as for the specific training and informing of all those involved in activities relating to the use of sources. However, the marking of existing high-activity sources by engraving or stamping by persons other than the manufacturer could be problematic and should be avoided. It is also advisable to provide appropriate training and information for those who may deal accidentally with orphan sources.
- (14) It is also necessary to provide for suitable means of dealing with orphan high-activity sources for international cooperation and exchange of information in this area, for inspection and, finally, for making financial provision for cases in which the original holder either cannot be identified or, even if identified, is found to be insolvent.
- (15) The Member States should lay down rules on penalties applicable to infringements of the provisions of this Directive and ensure that they are implemented; those penalties should be effective, proportionate and dissuasive,

HAS ADOPTED THIS DIRECTIVE:

Article 1

Purpose and scope

1. The purpose of this Directive is to prevent exposure of workers and the public to ionising radiation arising from inadequate control of high-activity sealed radioactive sources and orphan sources and to harmonise controls in place in the Member States by defining specific requirements ensuring that each such source is kept under control.
2. This Directive applies to high-activity sources as defined in Article 2. Member States may exclude sources from the scope of this Directive once their activity has fallen below the exemption levels specified in Directive 96/29/Euratom.
3. The minimum obligations resulting from this Directive supplement those set out in Directive 96/29/Euratom.

Article 2

Definitions

For the purpose of this Directive, the following definitions shall apply:

- (a) 'orphan source' means a sealed source, the activity level of which, at the time of its discovery, is above the exemption level referred to in Article 3(2)(a) of Directive 96/29/

*Article 3***Authorisation**

1. Member States shall require the holder to obtain prior authorisation for any practice involving a source, including taking possession of a source.

2. Member States shall ensure that, before issuing authorisation:

- (a) adequate arrangements, including those arising from this Directive, have been made for the safe management of sources, including when they become disused sources. These latter arrangements may provide for the transfer of these sources to the supplier or their placement in a recognised installation or an obligation for the manufacturer or the supplier to receive these sources;
- (b) adequate provision, by way of a financial security or any other equivalent means appropriate to the source in question, have been made for the safe management of sources when they become disused sources, including the case where the holder becomes insolvent or goes out of business.

3. Member States shall ensure that the authorisation covers:

- (a) responsibilities;
- (b) minimum staff competencies, including information and training;
- (c) minimum source, source container and additional equipment performance criteria;
- (d) requirements for emergency procedures and communication links;
- (e) work procedures to be followed;
- (f) maintenance of equipment, sources and containers;
- (g) adequate management of disused sources, including agreements regarding the transfer, if appropriate, of disused sources to a supplier, another authorised holder or a recognised installation.

*Article 4***Transfers**

Member States shall set up a system to enable them to be adequately informed of individual transfers of sources.

*Article 5***Records**

1. The holder shall keep records of all sources under his responsibility, their location and their transfer. The records shall include the information set out in Annex II. This information may be recorded on a standard record sheet pursuant to paragraph 5.

2. The holder shall provide the competent authority with an electronic or written copy of all or part of the records referred to in paragraph 1, as required by the Member State concerned,

- without undue delay, at the time of the establishment of such records, which should be as soon as possible after the source is acquired,
- at intervals, to be determined by Member States/competent authorities, of not more than 12 months thereafter,
- if the situation indicated on the information sheet has changed,
- without undue delay on the closure of the records for a specific source when the holder no longer holds this source; in this case the name of the holder or recognised installation to which the source is transferred shall be included,
- without undue delay on the closure of such records when the holder no longer holds any sources, and
- whenever so requested by the competent authority.

The holder's records shall be available for inspection by the competent authority.

3. The competent authorities shall keep records of authorised holders and of the sources they hold. These records shall include the radionuclide involved, the activity at the time of manufacture, or if this activity is not known, the activity at the time of the first placing on the market or at the time the holder acquired the source, and the type of source.

4. The competent authorities shall keep the records up to date, taking transfers into account, among other factors.

5. The Commission shall make available in electronic format the standard record sheet for the records set out in Annex II.

6. The Commission may, in accordance with the procedure referred to in Article 17, update the required information set out in Annex II and the standard record sheet for the records set out in Annex II.

*Article 6***Requirements for holders**

Each holder of sources shall:

- (a) ensure that suitable tests, such as leak tests based on international standards, are undertaken regularly in order to check and maintain the integrity of each source;

- (b) regularly verify, at specific intervals which may be determined by Member States, that each source and, where relevant, the equipment containing the source, is still present and in apparently good condition at its place of use or of storage;
- (c) ensure that each fixed and mobile source is subject to adequate documented measures, such as written protocols and procedures, aimed at preventing unauthorised access to or loss or theft of the source or its damage by fire;
- (d) promptly notify the competent authority of any loss, theft or unauthorised use of a source, arrange for a check on the integrity of each source after any event, including fire, that may have damaged the source and, if appropriate, inform the competent authority thereof and of the measures taken;
- (e) return each disused source to the supplier or place it in a recognised installation or transfer it to another authorised holder unless otherwise agreed by the competent authority, without undue delay after termination of the use;
- (f) ascertain that, before a transfer is made, the recipient holds appropriate authorisation;
- (g) promptly notify the competent authority of any incident or accident resulting in unintentional exposure of a worker or a member of the public.

Article 7

Identification and marking

1. The manufacturer shall identify or, in the case of sources imported from outside the Community, the supplier shall ensure that each source is identified by a unique number. This number shall be engraved or stamped on the source, where practicable.

This number shall also be engraved or stamped on the source container. If this is not feasible or in the case of reusable transport containers, the source container shall at least have information on the nature of the source.

The manufacturer or the supplier shall ensure that the source container and, where practicable, the source are marked and labelled with an appropriate sign to warn people of the radiation hazard.

The manufacturer shall provide a photograph of each manufactured source design type and of the typical source container.

2. The holder shall ensure that each source is accompanied by written information indicating that the source is identified and marked in compliance with paragraph 1 and that the markings and labels referred to in paragraph 1 remain legible. The information shall include photographs of the source, source container, transport packaging, device and equipment as appropriate.

Article 8

Training and information

1. When arranging information and training in the field of radiation protection in compliance with Article 22 of Directive 96/29/Euratom, the holder shall ensure that such training includes specific requirements for the safe management of sources.

The information and training shall place particular emphasis on the necessary safety requirements and shall contain specific information on possible consequences of the loss of adequate control of sources.

The information and training shall be repeated at regular intervals and documented, with a view to preparing the relevant workers adequately for such events.

The relevant information and training shall be addressed to exposed workers.

2. Member States shall provide encouragement to ensure that the management and workers in installations where orphan sources are most likely to be found or processed (e.g. large metal scrap yards and major metal scrap recycling plants), and the management and workers in significant nodal transit points (e.g. customs posts), are

- (a) informed of the possibility that they may be confronted with a source;
- (b) advised and trained in the visual detection of sources and of their containers;
- (c) informed of basic facts about ionising radiation and its effects;
- (d) informed of and trained in the action to be taken on site in the event of the detection or suspected detection of a source.

Article 9

Orphan sources

1. Member States shall ensure that the competent authorities are prepared, or have made provision, including assignment of responsibilities, to recover orphan sources and to deal with radiological emergencies due to orphan sources and have drawn up appropriate response plans and measures.

2. Member States shall ensure that specialised technical advice and assistance is promptly made available to the persons, not normally involved in operations subject to radiation protection requirements, who suspect the presence of an orphan source. The primary aim of advice and assistance shall be the protection of workers and members of the public from radiation and the safety of the source.

3. Member States shall encourage the establishment of systems aimed at detecting orphan sources in places such as large metal scrap yards and major metal scrap recycling installations where orphan sources may generally be encountered, or at significant nodal transit points, wherever appropriate, such as customs posts.

4. Member States shall ensure that campaigns are organised, as appropriate, to recover orphan sources left behind from past activities.

The campaigns may include the financial participation of Member States in the costs of recovering, managing and disposing of the sources and may also include surveys of historical records of authorities, such as customs, and of holders, such as research institutes, material testing institutes or hospitals.

Article 10

Financial security for orphan sources

Member States shall ensure that, on the basis of arrangements to be decided by Member States, a system of financial security is established or any other equivalent means to cover intervention costs relating to the recovery of orphan sources and which may result from implementation of the requirements set out in Article 9.

AGREEMENT IN THE FORM OF AN EXCHANGE OF LETTERS**between the European Community and the State of Israel concerning reciprocal liberalisation measures and the replacement of Protocols 1 and 2 to the EC-Israel Association Agreement***A. Letter from the European Community*

Sir,

I have the honour of referring to the negotiations which took place under Article 11 of the Euro-Mediterranean Agreement establishing an association between the European Communities and their Member States, of the one part, and the State of Israel, of the other part (Association Agreement), in force since 1 June 2000, which states that the Community and the State of Israel shall progressively establish greater liberalisation of their trade in agricultural products of interest to both parties.

These negotiations were held in accordance with the provisions of Article 11, which stipulates that, from 1 January 2000, the Community and Israel shall examine the situation in order to determine the measures to be applied by the Community and Israel from 1 January 2001 in accordance with the objective of progressive greater liberalisation in agriculture.

On the conclusion of the negotiations the two Parties agreed to the following:

1. Protocols 1 and 2 to the Association Agreement and their annexes shall be replaced by Protocols 1 and 2 and their annexes appearing in Annex I and II to this Exchange of Letters.
2. The Exchange of Letters between the European Community (the Community) and Israel relating to Protocol 1 and concerning imports into the Community of fresh cut flowers and flower buds falling within subheading 0603 10 of the Common Customs Tariff is hereby repealed.
3. The Joint Declaration on live plants and floriculture and horticulture products, appearing in Annex III to this Exchange of Letters, shall be inserted in the Association Agreement.
4. With regard to edible oils falling within HS heading 1507, 1512 and 1514, Israel will start the necessary internal legislative procedures in order to extend the Community's preferences to the percentage which will be decided by the Knesset as a result of its ongoing discussions.
5. From 1 January 2007 the Community and the State of Israel will assess the situation with a view to determining the liberalisation measures to be applied by the Community and the State of Israel from 1 January 2008, in accordance with the objective laid down in Article 11 of the Association Agreement.

The provisions of this Agreement shall be applicable from 1 January 2004.

I would be grateful if you could confirm the agreement of your Government to the above.

Please accept, Sir, the assurance of my highest consideration.

*On behalf of the Council of the European
Union*

ANNEX I

PROTOCOL 1

concerning the arrangements applicable to imports into the Community of agricultural products originating in Israel

1. The products listed in the Annex, originating in Israel shall be admitted for importation into the Community, according to the conditions contained hereafter and in the Annex.
2. (a) Customs duties are eliminated or reduced as indicated in column 'a'.
(b) For certain products, for which the Common Customs Tariff foresees the application of an *ad valorem* duty and a specific duty, the rates of reduction, indicated in columns 'a' and 'c', only apply to the *ad valorem* duty. However, for the products corresponding to the CN codes 0207, 0404 10, 0709 90 60, 2204 21 and 2209, the duty reductions also apply to the specific duty.
(c) For certain products, customs duties are eliminated within the limit of the tariff quotas listed in column 'b' for each of them.
(d) For the quantities imported in excess of the quotas, the common customs duties are, according to the product concerned, applied in full or reduced, as indicated in column 'c'.
3. For certain products, the exemption of customs duties is granted in the framework of reference quantities as indicated in column 'd'.

Should the volume of imports of one of these products exceed the reference quantity, the Community, having regard to an annual review of trade flows which it shall carry out, may make the product in question subject to a Community tariff quota, the volume of which shall be equal to the reference quantity. In that case, for quantities imported in excess of the quota, the common customs duty is, according to the product concerned, applied in full or reduced as indicated in column 'c'.

4. As indicated in column 'e', for some products, for which neither a quota nor a reference quantity is fixed, the Community may fix a reference quantity as provided for in point 3 if, in the light of the annual review of trade flows which it shall carry out, it establishes that the volume of imports of a product or products threatens to cause difficulties on the Community market. If subsequently, the product is subject to a tariff quota under the conditions set out in point 3, for quantities imported in excess of the quota, the customs duty is, according to the product concerned, applied in full or reduced, as indicated in column 'c'.
5. For the first year of application, the volumes of the tariff quotas and the reference quantities shall be calculated as a pro rata of the basic volumes, taking into account the part of the period elapsed before the date of entry into force of this agreement.
6. For all the products listed in the Annex, the tariff quota and reference quantity volumes are increased from 1 January 2004 to 1 January 2007, on the basis of four equal instalments, each corresponding to 3 % of these volumes.

⁽¹⁾ CN codes corresponding to Regulation (EC) No 1832/2002 (OJ L 290 of 28 October 2002).

⁽²⁾ Notwithstanding the rules for the interpretation of the Combined Nomenclature, the wording for the description of the products is to be considered as having no more than an indicative value, the preferential scheme being determined, within the context of this Annex, by the coverage of the CN codes. Where 'ex' CN codes are indicated, the preferential scheme is to be determined by the application of the CN codes and corresponding description taken together.

⁽³⁾ Duty reduction only applies to *ad valorem* customs duties except for the products corresponding to the following codes: 0207, 0404 10, 0709 90 60, 2204 21 and 2209.

^(*) Entry under this subheading is subject to the conditions laid down in the relevant Community provisions (Regulation (EC) No 790/2000 of 14 April 2000 (OJ L 95, 15.4.2000), and subsequent amendments).

^(**) Within this tariff quota, the specific duty provided in the Community's list of concessions to the WTO is reduced to zero, for the period from 1 December to 31 May, if the entry price is not less than EUR 264/tonne, being the entry price agreed between the European Community and Israel. If the entry price for a consignment is 2, 4, 6 or 8 % lower than the agreed entry price, the specific customs quota duty shall be equal respectively to 2, 4, 6 or 8 % of this agreed entry price. If the entry price of a consignment is less than 92 % of the agreed entry price, the specific customs duty bound within the WTO shall apply.

ANNEX II

PROTOCOL 2**concerning the arrangements applicable to imports into Israel of agricultural products originating in the Community**

1. The products listed in the Annex originating in the Community shall be admitted for importation into Israel according to the conditions contained herein and in the Annex.
2. Import duties on imports are either eliminated or reduced to the level indicated in column 'a', within the limit of the tariff quota listed in column 'b', and subject to the specific provisions indicated in column 'e'.
3. For the quantities imported in excess of the tariff quotas, the customs duties are, according to the product concerned, applied in full or reduced, as indicated in column 'c'.
4. For certain products for which no tariff quota is fixed, reference quantities are fixed as indicated in column 'd'.

Should the volume of imports of one of the products exceed the reference quantity, Israel, having regard to an annual review of trade flows which it shall carry out, may make the product in question subject to a tariff quota, the volume of which shall be equal to the reference quantity. In that case, for quantities imported in excess of the quota, the duty referred to in point 3 shall apply.

5. For products for which neither a tariff quota nor a reference quantity is fixed, Israel may fix a reference quantity as provided for in point 4 if, in the light of the annual review of trade flows which it shall carry out, it establishes that the volume of imports of a product or products threatens to cause difficulties on the Israeli market. If subsequently, the product is subjected to a tariff quota under the conditions set out in point 4, the provisions of point 3 shall apply.
6. For the first year of application, the volumes of the tariff quotas and the reference quantities shall be calculated as a pro rata of the basic volumes, taking into account the part of the period elapsed before the date of entry into force of this agreement.
7. For all the products listed in the Annex, the tariff quota and reference quantity volumes are increased from 1 January 2004 to 1 January 2007, on the basis of four equal instalments, each corresponding to 3 % of these volumes.

*ANNEX III***JOINT DECLARATION**

In order to promote and facilitate trade particularly in live plants, floriculture and horticulture products, the contracting parties hereby agree to take all measures necessary to ensure that documentary, identity and plant health checks are carried out within a timeframe that is compatible with and proportionate to the sensitive nature of the products concerned.

Should any difficulties arise, the Commission and the Israeli authorities shall hold immediate consultations in order to seek appropriate solutions.

B. Letter from the State of Israel

Sir,

I have the honour to acknowledge receipt of your letter of today's date, worded as follows:

'I have the honour of referring to the negotiations which took place under Article 11 of the Euro-Mediterranean Agreement establishing an association between the European Communities and their Member States, of the one part, and the State of Israel, of the other part (Association Agreement), in force since 1 June 2000, which states that the Community and the State of Israel shall progressively establish greater liberalisation of their trade in agricultural products of interest to both parties.

These negotiations were held in accordance with the provisions of Article 11, which stipulates that, from 1 January 2000, the Community and Israel shall examine the situation in order to determine the measures to be applied by the Community and Israel from 1 January 2001 in accordance with the objective of progressive greater liberalisation in agriculture.

On the conclusion of the negotiations the two Parties agreed to the following:

1. Protocols 1 and 2 to the Association Agreement and their annexes shall be replaced by the Protocols 1 and 2 and their annexes, appearing in Annex I and II to this Exchange of Letters.
2. The Exchange of Letters between the European Community (the Community) and Israel relating to Protocol 1 and concerning imports into the Community of fresh cut flowers and flower buds falling within subheading 0603 10 of the Common Customs Tariff is hereby repealed.
3. The Joint Declaration on live plants and floriculture and horticulture products, appearing in Annex III to this Exchange of Letters, shall be inserted in the Association Agreement.
4. With regard to edible oils falling within HS heading 1507, 1512 and 1514, Israel will start the necessary internal legislative procedures in order to extend the Community's preferences to the percentage which will be decided by the Knesset as a result of its ongoing discussions.
5. From 1 January 2007 the Community and the State of Israel will assess the situation with a view to determining the liberalisation measures to be applied by the Community and the State of Israel from 1 January 2008, in accordance with the objective laid down in Article 11 of the Association Agreement.

The provisions of this Agreement shall be applicable from 1 January 2004.

I would be grateful if you could confirm the agreement of your Government to the above.'

The State of Israel has the honour of confirming its agreement with the contents of this letter.

Please accept, Sir, the assurance of my highest consideration.

For the Government of the State of Israel
