COMMISSION REGULATION (EC) No 1037/2007

of 29 August 2007

suspending the introduction into the Community of specimens of certain species of wild fauna and flora

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to Council Regulation (EC) No 338/97 of 9 December 1996 on the protection of species of wild fauna and flora by regulating trade therein ⁽¹⁾ and in particular Article 19(2) thereof,

After consulting the Scientific Review Group,

Whereas:

- (1) Article 4(6) of Regulation (EC) No 338/97 provides that the Commission may establish restrictions to the introduction of certain species into the Community in accordance with the conditions laid down in points (a) to (d) thereof. Furthermore, implementing measures for such restrictions have been laid down in Commission Regulation (EC) No 865/2006 of 4 May 2006 laying down detailed rules concerning the implementation of Council Regulation (EC) No 338/97 of the protection of species of wild fauna and flora by regulating trade therein ⁽²⁾.
- (2) A list of species for which the introduction into the Community is suspended was established in Commission Regulation (EC) No 349/2003 of 25 February 2003 suspending the introduction into the Community of specimens of certain species of wild fauna and flora ⁽³⁾.
- (3) The enlargement of the European Union to 27 Member States from 1 January 2007 requires that all pre-existing suspensions in respect of species originating from the new Member States be deleted from that list.
- (4) On the basis of recent information, the Scientific Review Group has concluded that the conservation status of

certain species listed in Annexes A and B to Regulation (EC) No 338/97 will be seriously jeopardised if their introduction into the Community from certain countries of origin is not suspended. The introduction of the following species should therefore be suspended: *Capra falconeri* from Uzbekistan (hunting trophies); *Manis temminckii* from Democratic Republic of the Congo; *Hieraaetus ayresii*, *Polemaetus bellicosus*, *Sagittarius serpentarius*, *Poicephalus gularis*, *Glaucidium perlatum*, *Scotopelia bouvieri* and *Chamaeleo montium* from Cameroon; *Torgos tracheliotus* from Cameroon and Sudan; *Coracopsis vasa* from Madagascar; *Otus leucotis* from Guinea; *Geochelone sulcata* from Togo (ranchéed specimens); *Pelochelys cantorii*, *Hippocampus barbouri*, *H. comes*, *H. hirtix* and *H. spinosissimus* from Indonesia; *Strombus gigas* from Grenada; *Agaricia agaricites* from Haiti; *Platygyra sinensis* from Tonga; *Dendrobium bellatulum*, *D. wardianum* and *Phalaenopsis parishii* from Vietnam.

- (5) The Scientific Review Group has also concluded that, on the basis of the most recent available information, the suspension of the introduction into the Community of the following species should no longer be required: *Kinixys erosa* from Togo; *Phelsuma minuthi* and *Furcifer pardalis* (ranchéed specimens) from Madagascar; *Chamaeleo gracilis* (ranchéed specimens with snout to vent length lesser than 8 cm), *Chamaeleo senegalensis* (ranchéed specimens with snout to vent length lesser than 6 cm) and *Varanus exanthematicus* (ranchéed specimens smaller than 35 cm in length) from Togo; *Strombus gigas* from Antigua and Barbuda, Barbados, Dominica, Trinidad and Tobago; *Galanthus nivalis* from Bulgaria; *Pericopsis elata* from Central African Republic and Republic of Congo; *Ophrys insectifera*, *O. sphegodes*, *Orchis papilionacea* and *O. simia* from Romania.
- (6) The countries of origin of the species which are subject to new restrictions to introduction into the Community pursuant to this Regulation have all been consulted.
- (7) The list of species for which the introduction into the Community is suspended should therefore be amended. In view of the number of previous amendments, Regulation (EC) No 349/2003 should be, for clarity reasons, replaced.
- (8) The measures provided for in this Regulation are in accordance with the opinion of the Committee on Trade in Wild Fauna and Flora,

⁽²⁾ OJ L 166, 19.6.2006, p. 1.

HAS ADOPTED THIS REGULATION:

Article 2

Regulation (EC) No 349/2003 is repealed.

Article 1

References to the repealed Regulation shall be construed as references to this Regulation.

Subject to the provisions of Article 71 of Regulation (EC) No 865/2006, the introduction into the Community of specimens of the species of wild fauna and flora listed in the Annex to this Regulation is hereby suspended.

Article 3

This Regulation shall enter into force on the 20th day following its publication in the *Official Journal of the European Union*.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

COMMISSION REGULATION (EC) No 1039/2007**of 10 September 2007****suspending the standing invitations to tender provided for in Chapters II and III of Regulation (EC) No 1898/2005**

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to Council Regulation (EC) No 1255/1999 of 17 May 1999 on the common organisation of the market in milk and milk products ⁽¹⁾, and in particular Articles 10 and 15 thereof,

Whereas:

- (1) In accordance with Commission Regulation (EC) No 1898/2005 of 9 November 2005 laying down detailed rules for implementing Council Regulation (EC) No 1255/1999 as regards measures for the disposal of cream, butter and concentrated butter on the Community market ⁽²⁾, the intervention agencies may sell at a reduced price by standing invitation to tender certain quantities of intervention butter intended for use in pastry products, ice-creams and other foodstuffs. The intervention agencies may also grant aid for the use of butter, concentrated butter and cream in pastry products, ice-creams and other foodstuffs, and for concentrated butter intended for direct consumption in the Community.
- (2) Given the current situation on the Community market, and in particular the lack of surplus public stocks of butter, no award should be made under these tendering procedures. This situation is likely to last for some time

to come. In order to simplify the management of these measures, the sale referred to in Article 1(a) of Regulation (EC) No 1898/2005 and the aid provided for in Article 1(b)(i) and (ii) should be suspended.

- (3) So as not to interfere with the functioning of the invitations to tender, this Regulation should apply from the start of the period for submitting tenders for a specific invitation.
- (4) The measures provided for in this Regulation are in accordance with the opinion of the Management Committee for Milk and Milk Products,

HAS ADOPTED THIS REGULATION:

Article 1

The invitations to tender provided for in Section 5 of Chapter II and in Section 2 of Chapter III of Regulation (EC) No 1898/2005 are hereby suspended.

A notice announcing the suspension of these standing invitations to tender shall be published in the *Official Journal of the European Union*.

Article 2

This Regulation shall enter into force on the day of its publication in the *Official Journal of the European Union*.

It shall apply from 12 September 2007.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

4.4. Proof of origin

Melon du Quercy has been produced in Quercy since the XVIth century. In 1930, production received a boost when the area planted was increased and the melon appeared on local markets. Production again increased between 1940 and 1945. Since 1960, exports have permitted further production growth.

Melon du Quercy now has a confirmed reputation and the range of marks used in itself shows the importance of the link between the product and the area.

At the beginning of each marketing year, experts approved by the Certifying Body authorise each grower's parcels (geographical area and eligible land). Each parcel is entered in the Melon du Quercy cultivation register: commune, section, land register references, area in ares.

A copy of the information is kept in the grower's cultivation register, a copy sent to the fruit packing station and another to the 'Syndicat Interprofessionnel du Melon du Quercy'.

For each lot delivered to the packing station, the name of the grower, the variety and the parcels are identified and recorded. The packing station puts together lots from several growers. Certified lots are separated from non-certified lots on entry into the packing station and are packed, labelled and marketed separately.

4.5. Method of production

The melons are grown from selected varieties. They are harvested when fully ripe and, if possible, before 1 p.m. every day. They are then placed in a single layer on wooden trays or in plastic crates, closely packed but not crushed together.

After harvesting, the melons are placed under cover to protect them from the sun and any bad weather and transported to the packing station the same day. The melons are then checked and approved on the basis of their appearance and sugar content. They are sorted, graded and packed in trays on cellular trays and/or in paper depending on their weight and colour.

4.6. Link

What makes Quercy suited to melon growing are its soil and its climate. The alternance of ocean (cool and wet) and Mediterranean (hot and dry) influences typical of its climate produces large temperature ranges on a daily basis, providing the plant with ideal growing conditions (temperature and moisture).

Another factor is the limy-clayey soil. The clay is basically of illite and montmorillonite, which retain potassium, thus regulating the plant's uptake of the mineral. This gives the melon a particular perfume and unique characteristics. The soil retains water well, ensuring that the plant receives a regular supply.

4.7. Inspection body
