REGULATIONS

COMMISSION REGULATION (EU) No 310/2011

of 28 March 2011

amending Annexes II and III to Regulation (EC) No 396/2005 of the European Parliament and of the Council as regards maximum residue levels for aldicarb, bromopropylate, chlorfenvinphos, endosulfan, EPTC, ethion, fenthion, fomesafen, methabenzthiazuron, methidathion, simazine, tetradifon and triforine in or on certain products

(Text with EEA relevance)

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EC) No 396/2005 of the European Parliament and of the Council of 23 February 2005 on maximum residue levels of pesticides in or on food and feed of plant and animal origin and amending Council Directive 91/414/EEC ⁽¹⁾, and in particular Article 14(1)(a) thereof,

Whereas:

(1) For aldicarb, bromopropylate, chlorfenvinphos, endosulfan, EPTC, ethion, fenthion, methidathion, simazine and triforine maximum residue levels (MRLs) are set in Annex II and Part B of Annex III to Regulation (EC) No 396/2005. For fomesafen, methabenzthiazuron and tetradifon MRLs were set in Part A of Annex III to Regulation (EC) No 396/2005.

(2) The non-inclusion of aldicarb in Annex I to Council Directive 91/414/EEC ⁽²⁾ is provided for in Council Decision 2003/199/EC ⁽³⁾ and certain Member States were authorised to grant a period of grace expiring no later than 31 December 2007. The non-inclusion of bromopropylate, chlorfenvinphos, EPTC, ethion, fomesafen, tetradifon and triforine is provided for in Commission Regulation (EC) No 2076/2002 ⁽⁴⁾ and

certain Member States were authorised to grant a period of grace expiring no later than 31 December 2007. The non-inclusion of endosulfan in Annex I to Directive 91/414/EEC is provided for in Commission Decision 2005/864/EC ⁽⁵⁾ and certain Member States were authorised to grant a period of grace expiring no later than 31 December 2007. The non-inclusion of fenthion in Annex I to Directive 91/414/EEC is provided for in Commission Decision 2004/140/EC ⁽⁶⁾ and certain Member States were authorised to grant a period of grace expiring no later than 31 December 2007. The non-inclusion of methabenzthiazuron in Annex I to Directive 91/414/EEC is provided for in Commission Decision 2006/302/EC ⁽⁷⁾ and certain Member States were authorised to grant a period of grace expiring no later than 31 December 2009. The non-inclusion of methidathion in Annex I to Directive 91/414/EEC is provided for in Commission Decision 2004/129/EC ⁽⁸⁾ and certain Member States were authorised to grant a period of grace expiring no later than 31 December 2007. The non-inclusion of simazine in Annex I to Directive 91/414/EEC is provided for in Commission Decision 2004/247/EC ⁽⁹⁾ and certain Member States were authorised to grant a period of grace expiring no later than 31 December 2007.

(3) Since those periods of grace have expired, it is appropriate to lower the MRLs of those substances to the relevant level of analytical determination (LOD). This should not apply to CXLs based on uses in third countries, provided that those CXLs are acceptable with regard to consumer safety. Nor should it apply in cases where MRLs have been specifically set as import tolerances.

- (4) The Commission asked the European Food Safety Authority, hereinafter 'the Authority', to give an opinion on CXLs based on uses in third countries for bromopropylate, methidathion and triforine, examining in particular the risks to the consumer and, where relevant, to animals. The Authority gave reasoned opinions on those substances and forwarded them to the Commission and the Member States and made them available to the public.
- (5) In its opinion of 31 May 2010 ⁽¹⁾ concerning bromopropylate the Authority concluded that the existing CXLs for citrus fruit, pome fruit and grapes cannot be considered acceptable with regard to consumer exposure. Therefore the current MRLs for these crops should be lowered to the relevant LOD.
- (6) In its opinion of 31 May 2010 ⁽²⁾ concerning Methidathion the Authority concluded that the available data do not support the existing MRLs on citrus fruit, cherries, peaches, plums, olives, onions, tomatoes, cucumber, head cabbage, dry peas, rape seed, sunflower seed, maize, tea, pome fruit and pineapples. As regards pome fruit and pineapples, however, the Authority proposed new MRLs, based on the available data. In respect of peas with pods and hops, the Authority concluded that the existing MRLs are obsolete and no longer required for international trade. Therefore the current MRLs for all these crops should be amended accordingly.
- (7) In its opinion of 31 May 2010 ⁽³⁾ concerning triforine the Authority concluded that the available data do not support the existing MRLs on pome fruit, stone fruit, currants, gooseberries, cucurbits (edible peel), barley, oats, rye, wheat and hops. Therefore the current MRLs for these crops should be lowered to the relevant LOD.
- (8) The Commission consulted the European Union reference laboratories for residues of pesticides as regards the need to adapt certain LODs. As regards bromopropylate, EPTC, fenthion, methabenzthiazuron, simazine, tetradifon and triforine, those laboratories concluded that for certain commodities technical development permits the setting of lower LODs. Furthermore, those laboratories advised to increase the LOD for aldicarb in tree nuts and bulb vegetables, for chlorfenvinphos in tree nuts, bulb vegetables, oilseeds and oil fruits, for endosulfan in bulb vegetables, for ethion in tree nuts, bulb vegetables, tea, coffee, herbal infusions and cocoa, hops and spices, for fenthion in tree nuts and bulb vegetables, for fomesafen in tree nuts, bulb vegetables, oilseeds and oil fruits, tea, coffee, herbal infusions and cocoa, hops and spices and for Methidathion in bulb vegetables, oilseeds and oil fruits.
- (9) Based on the reasoned opinions of the Authority and on the technical advice of those laboratories and taking into account the factors relevant to the matter under consideration, the appropriate modifications to the MRLs fulfil the requirements of Article 14(2) of Regulation (EC) No 396/2005.
- (10) Through the World Trade Organisation, the trading partners of the Union were consulted on the new MRLs and their comments have been taken into account.
- (11) A reasonable period should be allowed to elapse before the modified MRLs become applicable in order to permit third countries and food business operators to prepare themselves to meet the new requirements which will result from the modification of the MRLs.
- (12) Annexes II and III to Regulation (EC) No 396/2005 should therefore be amended accordingly.
- (13) In order to allow for the normal marketing, processing and consumption of products, the Regulation provides for a transitional arrangement for products which have been lawfully produced before the modification of the MRLs and for which the Authority's model for acute and chronic risk assessment shows that a high level of consumer protection is maintained.
- (14) The measures provided for in this Regulation are in accordance with the opinion of the Standing Committee on the Food Chain and Animal Health and neither the European Parliament nor the Council has opposed them,

COMMISSION IMPLEMENTING REGULATION (EU) No 311/2011

of 31 March 2011

replacing Annex I to Council Regulation (EC) No 673/2005 establishing additional customs duties on imports of certain products originating in the United States of America

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Council Regulation (EC) No 673/2005 of 25 April 2005 establishing additional customs duties on imports of certain products originating in the United States of America ⁽¹⁾, and in particular Article 3 thereof,

Whereas:

- (1) As a result of the United States' failure to bring the Continued Dumping and Subsidy Offset Act (CDSOA) in compliance with its obligations under the World Trade Organisation (WTO) agreements, Regulation (EC) No 673/2005 imposed a 15 % *ad valorem* additional customs duty on imports of certain products originating in the United States of America as from 1 May 2005. In conformity with the WTO authorisation to suspend the application of concessions to the United States, the Commission shall adjust the level of suspension annually to the level of nullification or impairment caused by the CDSOA to the Community at that time.
- (2) The CDSOA disbursements for the most recent year for which data are available relate to the distribution of anti-dumping and countervailing duties collected during the Fiscal Year 2010 (1 October 2009-30 September 2010). On the basis of the data published by the United States' Customs and Border Protection, the level of nullification or impairment caused to the European Union is calculated at USD 9,96 million.
- (3) Since the level of nullification or impairment and consequently of suspension has decreased, the 19

products of Annex II which were added in 2010 to the list in Annex I to Regulation (EC) No 673/2005 should be removed first from the list in Annex I to that Regulation. Eleven products of Annex I to Regulation (EC) No 673/2005 should then be withdrawn from Annex I to that Regulation following the order of that list.

- (4) The effect of a 15 % *ad valorem* additional customs duty on imports from the United States of the products in the amended Annex I represents, over 1 year, a value of trade that does not exceed USD 9,96 million.
- (5) To make sure that there are no delays in the customs clearance of goods removed from the scope of the 15 % *ad valorem* additional customs duty, this Regulation should enter into force on the day of its publication.
- (6) The measures provided for in this Regulation are in accordance with the opinion of the Committee on trade retaliation,

HAS ADOPTED THIS REGULATION:

Article 1

Annex I to Regulation (EC) No 673/2005 is replaced by the text of the Annex to this Regulation.

Article 2

This Regulation shall enter into force on the day of its publication in the *Official Journal of the European Union*.

It shall apply from 1 May 2011.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

1. An article (so-called 'ultrasonic transmitter') consisting of a piezo- electric element in the form of a ceramic disc to which a metal membrane with a radially orientated cone is attached. The whole is fixed to a base plate and is fitted into a plastic casing with connecting pins. Alternating current causes the piezo- electric element to oscillate, creating ultrasonic waves (inaudible to the human ear) that are transmitted through the air. The article thus converts electrical signals into ultrasonic waves. The article is used for a variety of purposes including distance measurement in parking aids, space monitoring in car burglar alarms, and liquid level measurement in certain products.	8548 90 90	Classification is determined by General Rules 1 and 6 for the interpretation of the Combined Nomenclature and by the wording of CN codes 8548, 8548 90 and 8548 90 90. As the article cannot be considered to be a part of a specific machine of Section XVI, classification by virtue of Note 2 to Section XVI is excluded. As the article cannot be considered to be a part of a specific instrument or apparatus of Chapter 90, classification by virtue of Note 2 to Chapter 90 is also excluded. The article is an electrical part of machinery or apparatus, not specified or included elsewhere in Chapter 85. The article is therefore to be classified under CN code 8548 90 90.

Description of the goods	Classification (CN code)	Reasons

A piece of furniture (so-called 'television stand') with measurements of approximately 80 × 40 × 45 cm. The product consists of a top and two shelves made of clear tempered glass, and four cylindrical legs of approximately 45 × 5 cm made of metal. The maximum weight load of the product is 80 kg. The metal components and the glass components comprise approximately 47 % and 44 %, respectively, of the total value of the product. (*) See the image.	9403 20 80	Classification is determined by General Rules 1, 3(b) and 6 for the interpretation of the Combined Nomenclature and by the wording of CN codes 9403, 9403 20 and 9403 20 80. Tables and similar furniture made of different materials are classified according to the material of which the support (legs and frame) is made, unless, by application of General Interpretative Rule 3(b), the material from which the top is made gives the table its essential character, for example, by being of a higher value (see also the CN Explanatory Notes to heading 9403). Classification under CN code 9403 89 00 as furniture of other materials (glass) is therefore excluded, as the glass top, being of less value than the metal support, does not give the product its essential character. Consequently, the product is to be classified according to the material of which the support is made. The product is therefore to be classified under CN code 9403 20 80 as other metal furniture.

Description of the goods	Classification (CN code)	Reasons
(1)	(2)	(3)
An apparatus (so-called 'infrared thermal camera') for capturing images of infrared radiation by means of a microbolometer and displaying such images in colours representing different temperatures, with dimensions of approximately 26 × 8 × 11 cm. The apparatus comprises: — a detachable lens, — a microbolometer with a resolution of 160 × 120 pixels, capable of measuring temperatures within a range of – 20 °C to 250 °C, — a colour liquid crystal display (LCD) with a resolution of 320 × 240 pixels and a diagonal measurement of the screen of approximately 7 cm (2,5 inches), and — a memory capable of storing up to 200 images in JPEG format. The microbolometer, being a thermal sensor used as a detector in the camera, provides for 19 200 pixels in each image where each pixel represents the result of a temperature measurement. The image is displayed in various colours representing the measurement of various temperatures together with a vertical scale showing the temperature at the top and bottom of the chosen range of temperatures and the range of colours going from top to bottom. The apparatus is also capable of measuring the temperature of a specific point and displaying the result on a temperature scale. The apparatus is used for preventative maintenance to detect defective construction or insulation and heat leaks.	9025 19 20	Classification is determined by General Rules 1 and 6 for the interpretation of the Combined Nomenclature and by the wording of CN codes 9025, 9025 19 and 9025 19 20. As the apparatus is capable of measuring temperature and representing the measured values in figures, which is a function covered by heading 9025, classification under heading 8525 as a camera is excluded (see also the CN Explanatory Notes to heading 8525). As the purpose of the apparatus is not to measure or to check quantities of heat but to detect the level of infrared radiation (temperature measurement), classification under heading 9027 is excluded. Given its characteristics, the apparatus is therefore to be classified under CN code 9025 19 20 as a thermometer.

Electromechanical machine (so-called 'vibrating platform'), comprising a steel platform and a central column equipped with a handle and a control panel. The machine measures approximately 80 × 80 × 120 cm and weighs 34 kg. The control panel has a keypad and buttons for starting, repeating or interrupting the training programmes encoded. The platform is powered by a motor, which makes the platform oscillate from side to side relative to the central column, reproducing movements similar to fast walking. The oscillating movement is transmitted to the feet of the person standing on the platform (and then upwards to the muscles) at a frequency of between 30 Hz and 50 Hz. The machine acts as a stimulator to muscle contraction and is for use, for example, in medicine, physiotherapy and well-being.	8479 89 97	Classification is determined by General Rules 1 and 6 for the interpretation of the Combined Nomenclature and by the wording of CN codes 8479, 8479 89 and 8479 89 97. Classification as a mechano-therapy appliance under heading 9019 is excluded as the machine is not used for the treatment under medical supervision of joints or muscles (See also the Harmonised System Explanatory Notes (HSEN) to heading 9019, (I)). Classification as massage apparatus under heading 9019 is also excluded as the main purpose of the machine is to stimulate all muscles of the body in such a way that they contract naturally. (See also the HSEN to heading 9019, (II)). Classification as articles or equipment for general physical exercise under heading 9506 is excluded as the machine is not intended for physical exercise. (See also the HSEN to heading 9506). Given that the machine acts as a muscle stimulator by mechanical means, it is to be classified under CN code 8479 89 97 as a machine or mechanical appliance having individual functions, not specified or included elsewhere.

It consists of: — a four-door cabin equipped with two rows of seats for 5 persons, including the driver. The cabin has a luxurious interior, with electrically adjustable leather seats, three-point safety belts behind the driver's seat, electrically operated windows and air-conditioning. It is equipped with a radio-broadcast receiver, a radio navigation system and a CD/DVD player, — an open load space of an inner length of 156 cm. The sides and tailgate of the load space have a height of 50 cm. The sides are equipped with catches to attach the load. The length of the load space can be extended to 206 cm by opening the tailgate and mounting an element in the form of a barrier.	8703 33 90	Classification is determined by General Rules 1 and 6 for the interpretation of the Combined Nomenclature and by the wording of CN codes 8703, 8703 33 and 8703 33 90. Classification under heading 8704 as a vehicle for the transport of goods is excluded, given its intended use, which is inherent to the entirety of its objective characteristics and general appearance, as a vehicle principally designed for the transport of persons. The maximum inner length at the floor of the area for transport of goods is limited by the sides and the tailgate when the latter is closed. (See also the Harmonised System Explanatory Notes to heading 8703 and the CN Explanatory Notes to heading 8703). The vehicle is therefore to be classified under CN code 8703 33 90 as a used motor vehicle principally designed for the transport of persons.

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Council Regulation (EC) No 881/2002 of 27 May 2002 imposing certain specific restrictive measures directed against certain persons and entities associated with Usama bin Laden, the Al-Qaida network and the Taliban, and repealing Council Regulation (EC) No 467/2001 prohibiting the export of certain goods and services to Afghanistan, strengthening the flight ban and extending the freeze of funds and other financial resources in respect of the Taliban of Afghanistan⁽¹⁾, and in particular Article 7(1)(a) and 7a(1) thereof,

Whereas:

The transitional period shall end, at the latest, on the day before the start date of the single Eurosystem tender procedure laid down in Article 2(1).’

This Guideline is addressed to all Eurosystem central banks.

(3) The expected SETP start date may be changed by a Governing Council decision, in the context of the review of Guideline ECB/2004/18, in particular where more than half of the national central banks (NCBs) representing more than half of the Eurosystem's total banknote printing requirement choose not to participate in the SETP.

Done at Frankfurt am Main, 18 March 2011.

(4) In view of the amendment to the expected start date of the SETP, an amendment to the definition of the transitional period is also necessary,

For the Governing Council of the ECB
The President of the ECB
Jean-Claude TRICHET
