REGULATIONS

COUNCIL IMPLEMENTING REGULATION (EU) No 871/2011

of 26 August 2011

terminating the expiry and partial interim review of the anti-dumping measures concerning imports of certain castings originating in the People's Republic of China and repealing those measures

THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Council Regulation (EC) No 1225/2009 of 30 November 2009 on protection against dumped imports from countries not members of the European Community ⁽¹⁾ (the basic Regulation) and in particular Articles 9 and 11(2), (3), (5) and (6) thereof,

Having regard to the proposal submitted by the European Commission (the Commission) after having consulted the Advisory Committee,

Whereas:

1. PROCEDURE

1.1. Measures in force

- (1) Following an anti-dumping investigation carried out pursuant to Article 5 of the basic Regulation, the Council, by Regulation (EC) No 1212/2005 ⁽²⁾, imposed a definitive anti-dumping duty on imports of certain castings originating in the People's Republic of China. That Regulation was last amended by Regulation (EC) No 500/2009 ⁽³⁾.
- (2) Individual duty rates ranged from 0 % to 37,9 % depending on the manufacturer of the product concerned, and the residual duty level was set at 47,8 %.

1.2. Requests for reviews

- (3) Following the publication of a notice of impending expiry of certain anti-dumping measures applicable to imports of certain castings originating in the People's

Republic of China ⁽⁴⁾, the Commission received on 25 March 2010 a request for review pursuant to Article 11(3) of the basic Regulation and on 29 April 2010 another request for review pursuant to Article 11(2) of the basic Regulation.

- (4) The request pursuant to Article 11(2) of the basic Regulation was lodged by the Eurofonte, acting on behalf of seven of its members, and by Fundiciones de Odena (the applicants) on behalf of producers representing a major proportion, in this case more than 25 % of the Union production of certain castings.
- (5) The request contained prima facie evidence showing that the expiry of the measures would be likely to result in a continuation or recurrence of dumping and injury to the Union industry.
- (6) The request pursuant to Article 11(3) of the basic Regulation was lodged by Shandong Lulong Group Co. Ltd, an exporting producer from the People's Republic of China. The request was limited in scope to the examination of dumping as far Shandong Lulong Group Co. Ltd was concerned.

1.3. Initiations

- (7) Accordingly, after consultation of the Advisory Committee, the Commission published a notice of initiation in the *Official Journal of the European Union* ⁽⁵⁾ of an expiry review of the anti-dumping measures applicable to imports of certain castings currently falling within CN codes 7325 10 50, 7325 10 92, ex 7325 10 99 (TARIC code 7325 10 99 10), and ex 7325 99 10 (TARIC code 7325 99 10 10), originating in the People's Republic of China.
- (8) The Commission officially advised the exporting producers, importers concerned, the representatives of the People's Republic of China, the representative users

and the Union producers of the initiation of the expiry review investigation. Interested parties were given the opportunity to make their views known in writing and to request a hearing within the time-limit set in the notice of initiation.

- (9) The Commission also published in the *Official Journal of the European Union* ⁽¹⁾ a notice of initiation of a partial interim review of the anti-dumping measures referred to under recital (7), limited in scope to the examination of dumping as far as Shandong Lulong Group Co. Ltd was concerned.

2. WITHDRAWAL OF THE REQUEST FOR EXPIRY REVIEW

- (10) By a letter addressed to the Commission, dated 9 June 2011, the applicants formally withdrew their request. In their letter the applicants argued that, in view of the volatility of the relevant economic parameters, future injurious dumping could not be excluded. Under those circumstances they consider that a surge of Chinese imports could cast the viability of the Union industry into doubt and, on this basis, the applicants consider that the Commission should actively monitor imports of the product concerned and be ready to open a new proceeding at short notice.
- (11) The Commission acknowledges that the castings market has been subject to significant changes in the last year, in particular due to the recent economic crisis which has had a significant impact on the construction industry and resulted in cuts in public spending for infrastructure projects. This has caused a general decline in demand, including for imports of certain castings. Since it is not clear how the market will develop in the short-to-medium term, the reappearance of injurious dumping can not be entirely excluded. It is therefore considered appropriate to monitor imports of the product concerned originating in the People's Republic of China. The monitoring period should not exceed 24 months from the publication of the termination of the present proceeding. Furthermore, the Commission does not rule out the opening of a new investigation concerning the same product if and when evidence is provided that points to injurious dumping, in line with the requirements of the basic Regulation.

- (12) In accordance with Article 9(1) and Article 11(2) of the basic Regulation, a proceeding may be terminated where the request for review is withdrawn unless such a termination would not be in the Union interest.

- (13) It was considered that the present proceeding should be terminated since the investigation had not brought to light any consideration showing that its termination would not be in the Union interest. Interested parties were informed accordingly and were given the opportunity to submit comments. However, no such comments were received as would give reason to reach a different conclusion.

- (14) It was therefore concluded that the anti-dumping expiry review proceeding concerning imports of certain castings originating in the People's Republic of China should be terminated and the existing measures should be repealed.

- (15) As a consequence it was further concluded that the partial interim review limited in scope to the examination of dumping as far as Shandong Lulong Group Co. Ltd was concerned should also be terminated,

HAS ADOPTED THIS REGULATION:

Article 1

The expiry and partial interim review of the anti-dumping measures concerning imports of castings of non-malleable cast iron and spheroidal graphite cast iron (ductile iron) of a kind used to cover and/or to give access to ground or sub-surface systems, and parts thereof, whether or not machined, coated or painted or fitted with other materials, excluding fire hydrants, currently falling within CN codes 7325 10 50, 7325 10 92, ex 7325 10 99 (TARIC code 7325 10 99 10) and ex 7325 99 10 (TARIC code 7325 99 10 10), and originating in the People's Republic of China, are hereby terminated and those measures repealed.

Article 2

This Regulation shall enter into force on the day following its publication in the *Official Journal of the European Union*.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

COMMISSION IMPLEMENTING REGULATION (EU) No 873/2011
of 27 July 2011
concerning the classification of certain goods in the Combined Nomenclature

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Council Regulation (EEC) No 2658/87 of 23 July 1987 on the tariff and statistical nomenclature and on the Common Customs Tariff⁽¹⁾, and in particular Article 9(1)(a) thereof,

Whereas:

- (1) In order to ensure uniform application of the Combined Nomenclature annexed to Regulation (EEC) No 2658/87, it is necessary to adopt measures concerning the classification of the goods referred to in the Annex to this Regulation.
- (2) Regulation (EEC) No 2658/87 has laid down the general rules for the interpretation of the Combined Nomenclature. Those rules apply also to any other nomenclature which is wholly or partly based on it or which adds any additional subdivision to it and which is established by specific provisions of the Union, with a view to the application of tariff and other measures relating to trade in goods.
- (3) Pursuant to those general rules, the goods described in column (1) of the table set out in the Annex should be classified under the CN code indicated in column (2), by virtue of the reasons set out in column (3) of that table.
- (4) It is appropriate to provide that, subject to the measures in force in the European Union relating to double checking systems and to prior and retrospective

surveillance of textile products on importation into the European Union, binding tariff information issued by the customs authorities of Member States in respect of the classification of goods in the Combined Nomenclature and which is not in accordance with this Regulation, may continue to be relied on for a period of 60 days by the holder, under Article 12(6) of Council Regulation (EEC) No 2913/92 of 12 October 1992 establishing the Community Customs Code⁽²⁾.

- (5) The Customs Code Committee has not issued an opinion within the time limit set by its Chairman,

HAS ADOPTED THIS REGULATION:

Article 1

The goods described in column (1) of the table set out in the Annex shall be classified within the Combined Nomenclature under the CN code indicated in column (2) of that table.

Article 2

Subject to the measures in force in the European Union relating to double checking systems and to prior and retrospective surveillance of textile products on importation into the European Union, binding tariff information issued by the customs authorities of Member States which is not in accordance with this Regulation, may continue to be relied on for a period of 60 days, under Article 12(6) of Regulation (EEC) No 2913/92.

Article 3

This Regulation shall enter into force on the 20th day following its publication in the *Official Journal of the European Union*.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 27 July 2011.

ANNEX

Description of the goods	Classification (CN code)	Reasons
(1)	(2)	(3)
A composite good made up of a sponge of cellular plastic (polyurethane) (11,5 cm × 8,2 cm × 1,1 cm), and a cloth of knitted polyester fabric which encloses the sponge. The fabric is made of textured yarn of polyesters and aluminium-covered polyester fibres (produced through a vapour metalising process) knitted together. The sponge is fully inserted into the fabric. (cleaning cloth) (See photographs No 656 A and No 656 B) (*)	6307 10 10	Classification is determined by General Rules 1, 3(b) and 6 for the interpretation of the Combined Nomenclature, note 7(e) to Section XI, note 1 to Chapter 63 and the wording of CN codes 6307, 6307 10 and 6307 10 10. The article is a composite good within the meaning of GIR 3(b) because the sponge is attached to the cloth to form a practically inseparable whole. (See also the Harmonised System Explanatory Note (HS EN) to GIR 3(b), (IX)). The cloth which is a textile article is a made-up article within the meaning of note 7(e) to Section XI, because the knitted fabric is assembled by gumming. In addition, the fact that a sponge is inserted into the made-up textile article makes the whole good a made-up article. Thus, the article is covered by sub-chapter I of Chapter 63 by virtue of note 1 to Chapter 63. Both the knitted cloth and the sponge have the objective characteristics of articles that are designed for cleaning with water and detergents. However, the rough surface of the knitted cloth gives the article its essential character within the meaning of GIR 3(b), because due to its rough surface the article is meant to clean dried-in spots from smooth surfaces. The sponge only serves to enhance the ability of the cloth to absorb water and detergent. The essential character of the composite good is thus determined by the textile material. The article is therefore to be classified under CN code 6307 10 10 as a knitted cleaning cloth.

ANNEX

Description of the goods	Classification CN code	Reasons
(1)	(2)	(3)
Underwater housing for digital cameras made mainly of plastic within the meaning of Note 1 to Chapter 39. The product consists of two transparent halves which are fitted with manually operated push buttons, control or operating knobs made of metal, and frames with clasps made of plastic. It can also be fitted with an anti-glare screen shield, a mount and an extra handgrip. The watertight housing has a hollow at the front to fit the lens, which consists of a glass window and metal surround with an internal thread for ancillary lenses. At the back there is a padded space for the camera viewfinder. The product is intended to hold a complete digital camera and enables the camera to be used in damp or dusty surroundings. (See photos 1 and 2) (*)	3926 90 97	Classification is determined by General Rules 1, 3 (b) and 6 for the interpretation of the Combined Nomenclature, Note 1 to Chapter 39 and the wording of CN codes 3926, 3926 90 and 3926 90 97. Classification under heading 4202 as a camera case is excluded. Camera cases are included in heading 4202. However, the underwater housing is not just a container for holding digital cameras but a product with a function of its own. Given the presence of push buttons and control or operating knobs, the product is not to be considered a container. Classification under heading 8529 is excluded since, although the article is a camera accessory, it cannot be considered a digital camera part as it is not essential to the functioning of a digital camera. Classification under headings 9006 or 9007 pursuant to Note 2 (b) to Chapter 90 is also excluded as those headings cover traditional photographic and cinematographic cameras, not digital cameras. The product consists of different materials and has therefore to be classified according to the constituent material which gives the product its essential character, in application of General Rule 3 (b). As plastic gives the product its essential character, it is therefore to be classified under heading 3926 as other article of plastics of CN code 3926 90 97.
