10A	Amount of gas supplied to undertakings, to which authorisations were issued for the placing on the market refrigeration, air conditioning and heat pump equipment charged with hydrofluorocarbons.	The receiving undertaking/s shall be specified. With the report, undertakings should submit additional proof for all physical supplies reported here (e.g. invoices).

Section 11: To be filled in by undertakings having placed on the market gases contained in products or equipment pursuant to Article 19(4) of Regulation 517/2014 — Article 19(4) of Regulation (EU) No 517/2014 and point 6 of Annex VII to Regulation (EU) No 517/2014

Applicable for the first time to reporting on activities carried out in 2014 (by 31 March 2015 at the latest).

Quantities of fluorinated greenhouse gases listed in Annex I or Annex II to Regulation (EU) No 517/2014 or mixtures containing at least one of those gases contained in the products and equipment shall be reported in metric tonnes with accuracy to the third decimal place, by category. In addition to the total quantity of gases, the number of units shall be reported per category, unless otherwise stated.

Producers of products or equipment manufactured in the Union shall not report on products and equipment where the contained gases were previously imported into or produced in the Union. Where a producer itself produces bulk gas in the Union for use in the Union for manufacturing their products and equipment, its reporting on production (reporting section 1) would similarly cover the relevant gas amounts, so these amounts shall also not be reported in this section.

Importers of products or equipment containing a fluorinated greenhouse gas listed in Annex I or II to Regulation (EU) No 517/2014 shall report on all gas containing imports released by customs for free circulation in the Union. Imports of pre-blended polyols are not to be reported in this section but in section 2. Where hydrofluorocarbons (gases listed in Section 1 of Annex I to Regulation (EU) No 517/2014 or mixture containing at least one of those gases) contained in imported refrigeration, air conditioning or heat pump equipment had previously been exported from the Union, and had been subject to the hydrofluorocarbon quota limitation for placing on the market, that shall be reported in reporting section 12 in order to prove compliance with Article 14 of Regulation (EU) No 517/2014.

The categories of products or equipment listed below include components intended for the specified product or equipment categories.

The term 'direct design' refers in particular to air-to-air, water-to-air, brine-to-air systems; the term 'indirect design' in particular to air-to-water, water-to-water, brine-to-water systems, including hydronic heat-pumps.

DECISIONS

COMMISSION IMPLEMENTING DECISION

of 31 October 2014

determining, pursuant to Regulation (EU) No 517/2014 of the European Parliament and of the Council on fluorinated greenhouse gases, reference values for the period 1 January 2015 to 31 December 2017 for each producer or importer who has reported placing on the market hydrofluorocarbons under Regulation (EC) No 842/2006 of the European Parliament and of the Council

(notified under document C(2014) 7920)

(2014/774/EU)

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EU) No 517/2014 of the European Parliament and of the Council of 16 April 2014 on fluorinated greenhouse gases ⁽¹⁾, and in particular Article 16(1) thereof,

Whereas:

- (1) In accordance with Regulation (EU) No 517/2014, the placing on the Union market of at least 100 tonnes of CO₂ equivalent of hydrofluorocarbons by producers or importers is subject to quantitative limits in order to ensure their gradual reduction.
- (2) The Commission is required to determine those quantitative limits and allocate quotas to each producer or importer.
- (3) For the period 2015 to 2017, the quota allocation for producers and importers who reported data under Article 6 of Regulation (EC) No 842/2006 of the European Parliament and of the Council ⁽²⁾ should be determined on the basis of individual reference values.
- (4) The reference values are calculated on the basis of the annual average of the quantities of hydrofluorocarbons the producers or importers have reported to have placed on the market from 2009 to 2012, while excluding quantities of hydrofluorocarbons for the usage referred to in Article 15(2) of Regulation (EU) No 517/2014 during the same period, on the basis of available data.
- (5) The determination of the reference value is limited by the constraints of the reported data under Article 6 of Regulation (EC) No 842/2006.
- (6) The calculation of reference values on the basis of reported data resulted in negative quantities for some undertakings. These undertakings are therefore considered to not having reported placing hydrofluorocarbons on the market from 2009 to 2012. They may obtain a quota in accordance with Article 16(2) of Regulation (EU) No 517/2014.
- (7) The reference values for producers and importers should be recalculated every three years as from 2017 in order to ensure that undertakings are allowed to continue their activities on the basis of the average volumes they placed on the market in immediately preceding years. This Decision should therefore expire on 31 December 2017.

⁽²⁾ Regulation (EC) No 842/2006 of the European Parliament and of the Council of 17 May 2006 on certain fluorinated greenhouse gases (OJ L 161, 14.6.2006, p. 1).

- (8) The measures provided for in this Decision are in accordance with the opinion of the Committee established by Article 24 of Regulation (EU) No 517/2014,

HAS ADOPTED THIS DECISION:

Article 1

Determination of reference values

For the purpose of the quota allocation, the reference values for each importer and producer shall be those set out in the Annex to this Decision, calculated on the basis of data reported in compliance with Regulation (EC) No 842/2006 by subtracting from the annual average of the quantities of the hydrofluorocarbons (bulk gases) placed on the Union market for the period of 2009 to 2012 the total quantities of hydrofluorocarbons (bulk gases) covered by the exemptions set out in Article 15(2) points (a) to (e) of Regulation (EU) No 517/2014 for that period of time, where data is available.

The annual average of bulk gases placed on the Union market referred to in this Article has been calculated by subtracting from the total annual quantities of hydrofluorocarbons (bulk gases) produced and imported in the Union market the total quantities of hydrofluorocarbons (bulk gases) exported from the Union market, taking into account the year-end balance of gases in stock.

Article 2

Period of validity

The Decision shall apply from 1 January 2015 and shall expire on 31 December 2017.

ANNEX

Reference values ⁽¹⁾ for the period 1 January 2015 to 31 December 2017 for each producer and importer who reported to have placed on the market hydrofluorocarbons from 2009 to 2012

The reference value (RV) is calculated according to the following formula:

$$RV = \text{average [2009-2012] (POM - EX)}$$

The (POM - EX) is determined annually and then averaged over the 4-year period where:

- POM, is bulk gases placed on the market. $POM = P + I - E + \Delta s$, where: P: production, I: imports, E: direct exports, Δs : difference in year-end stocks, i.e. stocks on 1 January 20xx – stocks on 31 December 20xx,
- EX, is bulk gases covered by exemptions according to Article 15(2) points (a) to (e) of the Regulation based on available data.
