Acts whose titles are printed in light type are those relating to day-to-day management of agricultural matters, and are generally valid for a limited period.

The titles of all other acts are printed in bold type and preceded by an asterisk.

All amounts in this budget document are expressed in euro unless otherwise indicated.

Any revenue provided for in Article 21(2) and (3) of the Financial Regulation, entered in Titles 5 and 6 of the statement of revenue, may lead to additional appropriations being entered on the headings which bore the initial expenditure giving rise to the corresponding revenue.

Figures for outturn refer to all authorised appropriations, including budget appropriations, additional appropriations and earmarked revenue.

DEFINITIVE ADOPTION (EU, Euratom) 2015/339

of the European Union's general budget for the financial year 2015

THE PRESIDENT OF THE EUROPEAN PARLIAMENT,

Having regard to the Treaty on the Functioning of the European Union, and in particular Article 314 thereof,

Having regard to the Treaty establishing the European Atomic Energy Community, and in particular Article 106a thereof,

Having regard to Council Decision 2007/436/EC, Euratom of 7 June 2007 on the system of the European Communities' own resources ([1]),

Having regard to Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 ([2])

Having regard to Council Regulation (EU, Euratom) No 1311/2013 of 2 December 2013 laying down the multiannual financial framework for the years 2014-2020 ([3])

Having regard to the Interinstitutional Agreement of 2 December 2013 between the European Parliament, the Council and the Commission on budgetary discipline, on cooperation in budgetary matters and on sound financial management ([4])

Having regard to the draft general budget of the European Union for the financial year 2015 which the Commission adopted on 24 June 2014

Having regard to the position on the draft budget of the European Union for the financial year 2015, which the Council adopted on 2 September 2014 and forwarded to Parliament on 12 September 2014

Having regard to the Commission's Letter of Amendment No 1/2015 of 15 October 2014 to the draft general budget of the European Union for the financial year 2015,

([1]) OJ L 163, 23.6.2007, p. 17.

([3]) OJ L 347, 20.12.2013, p. 884.
([4]) OJ C 373, 20.12.2013, p. 1.

Having regard to the resolution adopted by Parliament on 22 October 2014 on the Council position on the draft general budget of the European Union for the financial year 2015

Having regard to the amendments to the draft general budget adopted by Parliament on 22 October 2014

Having regard to the letter of 22 October 2014 from the President of the Council stating that the Council was unable to approve all the amendments adopted by Parliament,

Having regard to the letter to the President of the Council of 27 October 2014 convening the Conciliation Committee,

Having regard to the Conciliation Committee meetings of 6, 14 and 17 November 2014,

Having regard to the fact that the Conciliation Committee did not agree on a joint text within the 21-day time limit referred to in Article 314(6) of the Treaty on the Functioning of the European Union,

Having regard to the new draft general budget of the European Union for the financial year 2015, which the Commission adopted on 28 November 2014 in accordance with Article 314(8) of Treaty on the Functioning of the European Union,

Having regard to the position on the draft budget of the European Union for the financial year 2015, which the Council adopted on 12 December 2014 and forwarded to the Parliament on the same day,

Having regard to Parliament's approval of the Council position on 17 December 2014

Having regard to Rules 88 and 91 of Parliament's Rules of Procedure,

DECLARES:

Sole Article

The procedure under Article 314 of the Treaty on the Functioning of the European Union is complete and the general budget of the European Union for the financial year 2015 has been definitively adopted.

Done at Strasbourg, 17 December 2014.

A. INTRODUCTION AND FINANCING OF THE GENERAL BUDGET

INTRODUCTION

The general budget of the Union is the instrument which sets out and authorises the total amount of revenue and expenditure deemed necessary for the European Union and the European Atomic Energy Community for each year.

The budget is established and implemented in compliance with the principles of unity, budgetary accuracy, annuality, equilibrium, unit of account, universality, specification, sound financial management and transparency.

— The *principle of unity* and the *principle of budgetary accuracy* mean that all revenue and expenditure of the Union when it is charged to the budget must be incorporated in a single document.

— The *principle of annuality* means that the budget is adopted for one budgetary year at a time and that both commitment and payment appropriations for the current budgetary year must, in principle, be used in the course of the year.

— The *principle of equilibrium* means that forecasts of revenue for the budgetary year must be equal to payment appropriations for that year; borrowing to cover any budget deficit which may arise is not compatible with the own resources system and will not be authorised.

— In accordance with the *principle of unit of account*, the budget is drawn up and implemented in euros and the accounts shall be presented in euros.

— The *principle of universality* means that total revenue is to cover total payment appropriations with the exception of a limited number of revenue items which are assigned to particular items of expenditure. Revenue and expenditure are entered in full in the budget without any adjustment against each other.

— The *principle of specification* means that each appropriation must have a given purpose and be assigned to a specific objective in order to prevent any confusion between appropriations.

— The *principle of sound financial management* is defined by reference to the principles of economy, efficiency and effectiveness.

— The budget is established in compliance with the *principle of transparency*, ensuring sound information on the implementation of the budget and the accounts.

The budget presents appropriations and resources by purpose (activity-based budgeting), with a view to enhancing transparency in the management of the budget with reference to the objectives of sound financial management and in particular efficiency and effectiveness.

The expenditure authorised by the present budget totals EUR 145 321 531 152 in commitment appropriations and EUR 141 214 040 563 in payment appropriations, representing a variation rate of + 1,84 % and of + 1,57 % respectively by comparison with the 2014 budget.

Budgetary revenue totals EUR 141 214 040 563. The uniform rate of call for the VAT resource is 0,30 % whilst that for the GNI resource is 0,7481 %. Traditional own resources (customs duties and sugar levies) account for 11,92 % of the financing of the budget for 2015. The VAT resource accounts for 12,93 % and the GNI resource for 74,04 %. Other revenue for this financial year is estimated at EUR 1 575 497 557.

The own resources needed to finance the 2015 budget account for 1,00 % of the total GNI, thus falling below the ceiling of 1,23 % of GNI calculated using the method set out in Article 3(1) of Council Decision 2007/436/EC, Euratom of 7 June 2007 on the system of the European Communities' own resources (OJ L 163, 23.6.2007, p. 17).

The tables below set out step by step the method used to calculate the financing of the 2015 budget.

FINANCING OF THE GENERAL BUDGET

TABLE 4

Correction of budgetary imbalances for the United Kingdom for the year 2014 pursuant to Article 4 of Decision 2007/436/EC, Euratom (Chapter 1 5)

Description	Coefficient [1] (%)	Amount
1. United Kingdom's share (in %) of notional uncapped VAT base	16,2 167	
2. United Kingdom's share (in %) of enlargement-adjusted total allocated expenditure	5,9 238	
3. (1) – (2)	10,2 929	
4. Total allocated expenditure		**126 118 882 798**
5. Enlargement related expenditure [2]		29 283 982 122
6. Enlargement-adjusted total allocated expenditure = (4) – (5)		96 834 900 676
7. United Kingdom's correction original amount = (3) × (6) × 0,66		6 578 286 401
8. United Kingdom's advantage [3]		1 119 838 248
9. Core United Kingdom's correction = (7) – (8)		5 458 448 153
10. Windfall gains deriving from traditional own resources [4]		25 084 566
11. Correction for the United Kingdom = (9) – (10)		5 433 363 587

[1] Rounded percentages.

[2] The amount of enlargement-related expenditure corresponds to total allocated expenditure in the ten Member States which joined the Union on 1 May 2004 and the two Member States which joined the Union on 1 January 2007, except for agricultural direct payments and market-related expenditure as well as that part of rural development expenditure originating from the EAGGF, Guarantee Section. This amount is deducted from total allocated expenditure to ensure that expenditure which is unabated before enlargement remains so after enlargement.

[3] The 'UK advantage' corresponds to the effects arising for the United Kingdom from the changeover to capped VAT and the introduction of the GNP/GNI-based own resource.

[4] These windfall gains correspond to the net gains of the United Kingdom resulting from the increase — from 10 to 25 % as of 1 January 2001 — in the percentage of traditional own resources retained by Member States to cover the collection costs of traditional own resources (TOR).

TITLE 1

OWN RESOURCES

CHAPTER 1 1 — LEVIES AND OTHER DUTIES PROVIDED FOR UNDER THE COMMON ORGANISATION OF THE MARKETS IN SUGAR (ARTICLE 2(1)(A) OF DECISION 2007/436/EC, EURATOM)

1 1 0 Production levies related to the marketing year 2005/2006 and previous years

Financial year 2015	Financial year 2014	Financial year 2013
p.m.	– 214 000 000	– 6 770 330,36

Remarks

The common organisation of the market in the sugar sector provided that sugar, isoglucose and inulin syrup producers had to pay basic and B production levies. These levies were intended to cover market support expenditure. At present amounts entered under this article are a consequence of the revision of past established levies. Levies for the marketing years 2007/2008 and following years are entered under Article 1 1 7 of this chapter as a 'production charge'.

Figures are net of collection costs.

Legal basis

Council Regulation (EC) No 1260/2001 of 19 June 2001 on the common organisation of the markets in the sugar sector (OJ L 178, 30.6.2001, p. 1).

1 1 1 ***Sugar storage levies***

Financial year 2015	Financial year 2014	Financial year 2013
p.m.	p.m.	0,—

Remarks

This article is intended for the recording of income charged by new Member States in the event of non-elimination of sugar stocks considered surplus within the meaning of Commission Regulation (EC) No 60/2004 of 14 January 2004 laying down transitional measures in the sugar sector by reason of the accession of the Czech Republic, Estonia, Cyprus, Latvia, Lithuania, Hungary, Malta, Poland, Slovenia and Slovakia (OJ L 9, 15.1.2004, p. 8).

It is also intended to record revenue from the outstanding sugar storage levies as Council Regulation (EC) No 1260/2001 of 19 June 2001 on the common organisation of the markets in the sugar sector (OJ L 178, 30.6.2001, p. 1) abolished the storage levy.

This article also covers the outstanding amounts due pursuant to Article 5 of Commission Regulation (EEC) No 65/82 of 13 January 1982 laying down detailed rules for carrying forward sugar to the following marketing year (OJ L 9, 14.1.1982, p. 14) when the obligation to store sugar carried forward is not complied with, and the amounts due in accordance with Council Regulation (EEC) No 1789/81 of 30 June 1981 laying down general rules concerning the system of minimum stocks in the sugar sector (OJ L 177, 1.7.1981, p. 39) when the general rules concerning the system of minimum stocks in the sugar sector are not complied with.

Figures are net of collection costs.

Remarks

The assignment of customs duties as own resources to the financing of common expenditure is the logical consequence of the free movement of goods within the Union. This article may comprise levies, premiums, additional or compensatory amounts, additional amounts or factors, Common Customs Tariff duties and other duties established or to be established by the institutions of the European Union in respect of trade with third countries and customs duties on products under the expired Treaty establishing the European Coal and Steel Community.

Figures are net of collection costs.

Remarks

The GNI-based resource is an 'additional' resource, providing the revenue required to cover expenditure in excess of the amount yielded by traditional own resources, VAT-based payments and other revenue in any particular year. By implication, the GNI-based resource ensures that the general budget of the Union is always balanced *ex ante*.

The GNI call rate is determined by the additional revenue needed to finance the budgeted expenditure not covered by the other resources (VAT-based payments, traditional own resources and other revenue). Thus a call rate is applied to the GNI of each of the Member States.

The rate to be applied to the Member States' gross national income for this financial year is 0,7481 %.

Remarks

The budgetary imbalance correction mechanism in favour of the United Kingdom (UK correction) was introduced by the European Council in Fontainebleau in June 1984 and the resulting own resources decision of 1985. The purpose of the mechanism is to reduce the UK budgetary imbalance through a reduction in its payments to the Union.

p.m.	1 005 406 925	1 023 276 525,93

Remarks

In accordance with Article 18 of the Financial Regulation, the balance from each financial year, whether surplus or deficit, is entered as revenue or expenditure in the budget of the subsequent financial year.

The relevant estimates of such revenue or expenditure are entered in the budget during the budgetary procedure and, where appropriate, in a letter of amendment submitted pursuant to Article 39 of the Financial Regulation. They are drawn up in accordance with the principles set out in Article 15 of Regulation (EC, Euratom) No 1150/2000.

After the closure of the accounts for each financial year, any discrepancy in relation to the estimates is entered in the budget for the following financial year through an amending budget that must be presented by the Commission within 15 days following the submission of the provisional accounts.

A deficit is entered in Article 27 02 01 of the statement of expenditure in Section III 'Commission'.

Legal basis

Council Regulation (EC, Euratom) No 1150/2000 of 22 May 2000 implementing Decision 2007/436/EC, Euratom on the system of the European Communities' own resources (OJ L 130, 31.5.2000, p. 1).

Remarks

This article is intended to receive, once the target amount has been reached, any surplus in the Guarantee Fund for external actions in accordance with Articles 3 and 4 of Regulation (EC, Euratom) No 480/2009.

The revenue under 2013 relates to Croatia's accession to the Union, not to surplus resources in the Guarantee Fund.

Legal basis

Council Decision 2007/436/EC, Euratom of 7 June 2007 on the system of the European Communities' own resources (OJ L 163, 23.6.2007, p. 17).

Remarks

Under Article 7(1) of Regulation (EEC, Euratom) No 1553/89, Member States are to send the Commission a statement of the total amount of the VAT resources base for the previous calendar year before 31 July.

Each Member State is debited with an amount calculated on the basis of that statement according to Union rules and credited with the 12 payments actually made during the previous financial year. The Commission works out each Member State's balance and informs it in time for that Member State to enter its balance in the Commission's account referred to in Article 9(1) of Regulation (EC, Euratom) No 1150/2000 on the first working day of December of the same year.

Any corrections to the abovementioned statements resulting from Commission controls in accordance with Article 9 of Regulation (EEC, Euratom) No 1553/89 or/and any changes to the GNI of previous financial years that have an effect on the capping of the 'VAT' base will lead to adjustments of the 'VAT' balances.

Legal basis

Council Regulation (EEC, Euratom) No 1553/89 of 29 May 1989 on the definitive uniform arrangements for the collection of own resources accruing from value added tax (OJ L 155, 7.6.1989, p. 9).

Remarks

On the basis of figures for aggregate gross national income and its components from the preceding year, supplied by the Member States in accordance with Article 2(2) of Regulation (EC, Euratom) No 1287/2003, each Member State shall be debited with an amount calculated according to Union rules and credited with the 12 payments made during that previous financial year.

The Commission works out each Member State's balance and informs it in time for that Member State to enter its balance in the account referred to in Article 9(1) of Regulation (EC, Euratom) No 1150/2000 on the first working day of December of the same year.

Any changes to the gross national product/gross national income of previous financial years pursuant to Article 2(2) of Regulation (EC, Euratom) No 1287/2003, subject to Articles 4 and 5 thereof, gives rise for each Member State concerned to an adjustment to the balance established pursuant to Article 10(7) of Regulation (EC, Euratom) No 1150/2000.

Legal basis

Remarks

Article 3 of the Protocol on the position of Denmark and Article 5 of the Protocol on the position of the United Kingdom and Ireland, annexed to the Treaty on European Union and the Treaty on the Functioning of the European Union, grant full exemption to these Member States from supporting the financial consequences of some specific policies in the area of freedom, security and justice, with the exception of the related administrative costs. They can therefore obtain an adjustment to the own resources paid for each year in which they do not participate.

Each Member State's contribution to the adjustment mechanism is calculated by applying to the budget expenditure resulting from this operation or policy the scale of the aggregate gross national income and its components from the preceding year, supplied by the Member States in accordance with Article 2(2) of Council Regulation (EC, Euratom) No 1287/2003 of 15 July 2003 on the harmonisation of gross national income at market prices (OJ L 181, 19.7.2003, p. 1).

The Commission works out each Member State's balance and informs it in time for that Member State to enter its balance in the account referred to in Article 9(1) of Regulation (EC, Euratom) No 1150/2000 on the first working day of December, in accordance with Article 10a of that Regulation.

Legal basis

Council Regulation (EC, Euratom) No 1150/2000 of 22 May 2000 implementing Decision 2007/436/EC, Euratom on the system of the European Communities' own resources (OJ L 130, 31.5.2000, p. 1), and in particular Article 10a thereof.

CHAPTER 5 2 — REVENUE FROM INVESTMENTS OR LOANS GRANTED, BANK AND OTHER INTEREST *(cont'd)*

5 2 1 Revenue from investments or loans granted, bank and other interest on the accounts of organisations receiving subsidies transferred to the Commission

Financial year 2015	Financial year 2014	Financial year 2013
10 000 000	10 000 000	6 026 158,93

Remarks

This article is intended to record the revenue accruing from the repayment of interest by the subsidised organisations which have placed advances received from the Commission on interest-bearing accounts. If they remain unused, these advances and the interest on them have to be repaid to the Commission.

Commission 10 000 000

5 2 2 Interest yielded by prefinancing

Financial year 2015	Financial year 2014	Financial year 2013
40 000 000	40 000 000	36 260 716,99

Remarks

This article is intended to record revenue from the interest yielded by prefinancing.

In accordance with Article 21(3)(d) of the Financial Regulation, this revenue may be used to provide additional appropriations on the lines which bore the initial expenditure giving rise to the corresponding revenue.

Interest generated by prefinancing payments made from the budget shall not be due to the Union except as otherwise provided for in the delegation agreements, with the exception of those agreements concluded with third countries or the bodies they have designated. In cases in which it is provided for, such interest shall either be reused for the corresponding action, deducted from payment requests in accordance with point (c) of the first subparagraph of Article 23(1) of the Financial Regulation, or recovered.

Delegated Regulation (EU) No 1268/2012 also lays down provisions regarding the accounting of interest yielded on prefinancing.

Commission 40 000 000

Legal basis

Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1), and in particular Article 21(3)(d) thereof.

Commission Delegated Regulation (EU) No 1268/2012 of 29 October 2012 on the rules of application of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council on the financial rules applicable to the general budget of the Union (OJ L 362, 31.12.2012, p. 1).

CHAPTER 5 2 — REVENUE FROM INVESTMENTS OR LOANS GRANTED, BANK AND OTHER INTEREST *(cont'd)*

Financial year 2015	Financial year 2014	Financial year 2013
p.m.	p.m.	16 820 928,89

Remarks

This article is intended to record interest and other revenue generated on Trust Accounts.

The Trust Accounts are kept on behalf of the Union by international financial institutions (European Investment Fund, European Investment Bank, Council of Europe Development Bank/Kreditanstalt für Wiederaufbau, European Bank for Reconstruction and Development) managing Union programmes and the amounts paid in by the Union remain on the account until they are made available to the beneficiaries under the single programme, such as small and medium-sized enterprises or institutions managing projects in accession countries.

In accordance with Article 21(4) of the Financial Regulation, interest generated by Trust Accounts used for Union programmes are used to provide additional appropriations on the lines which bore the initial expenditure giving rise to the corresponding revenue.

Legal basis

Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1), and in particular Article 21(4) thereof.

Commission Delegated Regulation (EU) No 1268/2012 of 29 October 2012 on the rules of application of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council on the financial rules applicable to the general budget of the Union (OJ L 362, 31.12.2012, p. 1).

CHAPTER 6 1 — REPAYMENT OF MISCELLANEOUS EXPENDITURE

6 1 1 ***Repayment of expenditure incurred on behalf of one or more Member States***

6 1 1 3 Revenue from the investments provided for in Article 4 of Decision 2003/76/EC — Assigned revenue

Financial year 2015	Financial year 2014	Financial year 2013
p.m.	p.m.	52 762 018,07

Remarks

Decision 2003/76/EC stipulates that the Commission is entrusted with winding up the financial operations of the European Coal and Steel Community which are still in progress upon expiry of the ECSC Treaty.

Pursuant to Article 4 of that Decision, net revenue from the investment of available assets will constitute revenue in the general budget of the European Union earmarked for a specific purpose, namely financing research projects in sectors related to the coal and steel industry by the Research Fund for Coal and Steel.

The net revenue available for financing research projects in year n+2 appears in the balance sheet of the ECSC in liquidation for year n, and after the liquidation process has been completed will appear as assets in the balance sheet of the Coal and Steel Research Fund. This financing mechanism took effect in 2003. Revenue coming from 2013 will be used for research in 2015. In order to reduce as far as possible the fluctuations that movements in the financial markets could cause in the financing of research, a smoothing arrangement is applied. The amount of net revenue expected to be available for research in 2015 comes to EUR 47 700 000.

In accordance with Article 4 of Decision 2003/76/EC, 72,8 % of the fund's appropriations will be for the steel-related sector and 27,2 % for the coal-related sector.

In accordance with Article 21 and Article 181(2) of the Financial Regulation, revenue will be used to provide additional appropriations under Chapter 08 05 of the statement of expenditure in Section III 'Commission'.

p.m.	p.m.	593 564 006,54

Remarks

This item is intended to accommodate amounts resulting from decisions related to conformity and accounting clearance of accounts in favour of the Union budget concerning expenditure financed by the European Agricultural Guidance and Guarantee Fund (Guarantee section) under Heading 1 of the 2000-2006 Financial Perspectives and the European Agricultural Guarantee Fund (EAGF) under Heading 2 of the 2007-2013 and the 2014-2020 Multiannual Financial Framework in accordance with Articles 51 and 52 of Regulation (EU) No 1306/2013. It includes corrections related to non-compliance with payment deadlines in accordance with Article 40 of that Regulation.

This item is also intended to accommodate amounts resulting from decisions related to conformity and accounting clearance of accounts in favour of the Union budget concerning expenditure financed by the temporary scheme for the restructuring of the sugar industry (Sugar Restructuring Fund) in the Community established by Regulation (EC) No 320/2006, which ended on 30 September 2012.

In accordance with Article 1(3) of Regulation (EC) No 320/2006 and Article 43 of Regulation (EU) No 1306/2013, such amounts shall be regarded as assigned revenue within the meaning of Articles 21 and 174 of the Financial Regulation. Any revenue under this item will be used to provide additional appropriations to any budgetary item under EAGF of the statement of expenditure in Section III 'Commission'.

The revenue under this item has been estimated at EUR 1 198 600 000, including EUR 330 000 000 carried over from 2014 to 2015 in accordance with Article 14 of Regulation (EU, Euratom) No 966/2012. When establishing the budget for 2015, an amount of EUR 469 300 000 was taken into account for financing the needs of measures under Article 05 02 08, an amount of EUR 54 300 000 was taken into account for financing the needs of measures under Article 05 02 12 and the remaining amount of EUR 675 000 000 was taken into account for financing the needs of measures under Article 05 03 01.

Legal basis

Council Regulation (EC) No 320/2006 of 20 February 2006 establishing a temporary scheme for the restructuring of the sugar industry in the Community and amending Regulation (EC) No 1290/2005 on the financing of the common agricultural policy (OJ L 58, 28.2.2006, p. 42).

Remarks

Any delay by a Member State in making the entry in the account opened in the name of the Commission referred to in Article 9(1) of Regulation (EC, Euratom) No 1150/2000 gives rise to the payment of interest by the Member State concerned.

In the case of Member States whose currency is the euro, the interest rate shall be equal to the rate as published in the *Official Journal of the European Union*, C series, which the European Central Bank applied to its refinancing operations, on the first day of the month in which the due date fell, increased by two percentage points. This rate shall be increased by 0,25 of a percentage point for each month of delay. The increased rate shall be applied to the entire period of delay.

In the case of Member States whose currency is not the euro, the rate shall be equal to the rate applied on the first day of the month in question by the central banks for their main refinancing operations, increased by two percentage points, or, for the Member States for which the Central Bank rate is not available, the most equivalent rate applied on the first day of the month in question on the Member State's money market, increased by two percentage points. This rate shall be increased by 0,25 of a percentage point for each month of delay. The increased rate shall be applied to the entire period of delay.

The interest rate applies to all entries of own resources enumerated under Article 10 of Regulation (EC, Euratom) No 1150/2000.

7 1 1 ***Excess emissions premiums for new passenger cars***

Financial year 2015	Financial year 2014	Financial year 2013
p.m.	p.m.	0,—

Remarks

This article is intended to record any excess emissions premium imposed by the Commission.

The objective of Regulation (EC) No 443/2009 is to set emission performance standards for new passenger cars registered in the Union, which forms part of the Union's integrated approach to reducing CO_2 emissions from light-duty vehicles while ensuring the proper functioning of the internal market.

However, in respect of each calendar year from 2012 onwards for which a manufacturer's average specific emissions of CO_2 exceed its specific emissions target in that year, the Commission shall impose an excess emissions premium on the manufacturer or, in the case of a pool, the pool manager.

Legal basis

Regulation (EC) No 443/2009 of the European Parliament and of the Council of 23 April 2009 setting emission performance standards for new passenger cars as part of the Community's integrated approach to reduce CO_2 emissions from light-duty vehicles (OJ L 140, 5.6.2009, p. 1), and in particular Article 9 thereof.

Commission Decision 2012/100/EU of 17 February 2012 on a method for the collection of premiums for excess CO_2 emissions from new passenger cars pursuant to Regulation (EC) No 443/2009 of the European Parliament and of the Council (OJ L 47, 18.2.2012, p. 71).

BORROWING AND LENDING OPERATIONS

CHAPTER 8 0 — REVENUE RESULTING FROM THE EUROPEAN UNION GUARANTEE FOR BORROWING AND LENDING OPERATIONS IN THE MEMBER STATES

8 0 0 *European Union guarantee for Union borrowings for balance of payments support*

Financial year 2015	Financial year 2014	Financial year 2013
p.m.	p.m.	0,—

Remarks

The Union guarantee is for borrowings raised on the capital markets or from financial institutions. The amount in principal of loans which may then be granted to the Member States is limited to EUR 50 000 000 000.

This article is intended to record any revenue arising from the exercise of rights in connection with a guarantee under Article 01 02 02 of the statement of expenditure in Section III 'Commission' provided that this revenue has not been deducted from expenditure.

A summary of borrowing-and-lending operations, including debt management, in capital and interest, is given in the Annex 'Borrowing-and-lending operations' to Section III 'Commission'.

Legal basis

8 0 2 ***European Union guarantee for Union borrowings for financial assistance under the European Financial Stabilisation Mechanism***

Financial year 2015	Financial year 2014	Financial year 2013
p.m.	p.m.	0,—

Remarks

The Union's guarantee is for borrowings raised on the capital markets or from financial institutions. The outstanding amount of loans or credit lines to be granted to Member States shall be within the limits provided for in the legal basis.

This article is intended to record any revenue arising from exercise of rights in connection with a guarantee under Article 01 02 03, provided that this revenue has not been deducted from expenditure.

A summary of borrowing-and-lending operations, including debt management, in capital and interest, is given in the Annex 'Borrowing-and-lending operations' to Section III 'Commission'.

Legal basis

CHAPTER 8 1 — LOANS GRANTED BY THE COMMISSION

8 1 0 Capital repayments and interest in respect of special loans and risk capital granted in the framework of financial cooperation with Mediterranean third countries

Financial year 2015	Financial year 2014	Financial year 2013
p.m.	151 000 000	0,—

Remarks

This article is intended to record capital repayments and interest payments on special loans and risk capital granted from the appropriations in Chapters 21 03 and 22 02 of the statement of expenditure in Section III 'Commission' to Mediterranean third countries.

It also comprises capital repayments and interest payments on special loans and risk capital granted to certain Mediterranean Member States which, however, represent a very small proportion of the overall amount. These loans/risk capital were granted at a time those countries had not yet joined the Union.

The revenue obtained normally exceeds the amounts forecast in the budget because of the interest payments on special loans which may still be disbursed during the preceding financial year as well as during the current financial year. The interest on special loans and risk capital is charged from the moment the loans are disbursed; interest on special loans is paid in six-monthly instalments and interest on risk capital generally in annual instalments.

This article may accommodate, in accordance with Article 21 of the Financial Regulation, assigned revenue which is used to provide additional appropriations to finance expenditure to which this revenue is assigned.

Legal basis

For the legal basis, see remarks for Chapters 21 03 and 22 02 of the statement of expenditure in Section III 'Commission'.

TITLE 2

BUILDINGS, FURNITURE, EQUIPMENT AND MISCELLANEOUS OPERATING EXPENDITURE

Remarks

Since risk cover has been revoked by insurance companies, the risk of industrial conflicts and terrorist attacks for the European Parliament buildings needs to be covered through the general budget of the European Union.

The appropriations of this title accordingly cover all expenses in connection with damage resulting from industrial conflicts and terrorist attacks.

Bureau Decision of 12 December 2012 creating the Directorate for Democracy Support in DG EXPO.

This appropriation is intended to cover:

— expenditure on programmes for the exchange of information and cooperation between the European Parliament and the national parliaments of the pre-accession countries, in particular the Western Balkans and Turkey;

— expenditure committed for promoting relations between the European Parliament and democratically elected national parliaments from third countries (other than those referred to in the previous indent) as well as with corresponding regional parliamentary organisations. The activities concerned are notably aimed at strengthening parliamentary capacity in new and emerging democracies in particular in the European Neighbourhood (South and East);

— expenditure on promoting activities in support of mediation, and programmes for young political leaders from the European Union and from countries in the European Neighbourhood;

— expenditure on organising the Sakharov Prize (particularly the amount of the prize, winner's/winners' travel expenses and costs of receiving them, operating costs of the Sakharov network and duty travel by members of the network) and on activities to promote human rights.

These activities include information visits to the European Parliament in Brussels, Luxembourg or Strasbourg, and the appropriations cover, wholly or partially, the expenses of the participants, particularly travel, accommodation and daily subsistence.

Bureau Decision of 16 December 2002, as last amended on 26 February 2013.

This appropriation is intended to cover subsidies granted for group visits and associated supervision and infrastructure costs, the financing of traineeships for opinion multipliers from third countries (EUVP) and the running costs of the Euroscola, Euromed-Scola and Euronest-Scola programmes. The EuroMed-Scola and Euronest-Scola programmes shall take place each year, on an alternating basis, on the European Parliament's premises in Strasbourg or Brussels, with the exception of election years.

This appropriation shall be increased every year using a deflator that takes into account movements in GNI and prices.

Each Member of the European Parliament is entitled to invite a maximum of five groups each calendar year for a total of 110 visitors. The number of participants present for any given visit may vary between a minimum of 10 and a maximum of 110.

An appropriate amount is included for visitors with disabilities.

The amount of assigned revenue in accordance with Article 21(3) of the Financial Regulation is estimated at EUR 100 000.

— expenditure committed for promoting relations between the European Parliament and national parliaments. It relates to parliamentary relations other than those covered by Chapters 1 0 and 3 0, exchanges of information and documentation, and assistance in the analysis and management of that information, including exchanges with the European Centre for Parliamentary Research and Documentation (ECPRD),

— funding of cooperation programmes and training schemes for officials of the aforementioned parliaments and, in general, activities to strengthen their parliamentary capacities.

Training schemes include study visits to the European Parliament in Brussels, Luxembourg and Strasbourg; the appropriation is intended to cover all or part of the expenditure incurred by participants, in particular travelling costs, travel expenses, accommodation and daily allowances,

— cooperation measures, including those linked to legislative work, and measures linked to documentation, analysis and information and making the www.ipex.eu domain secure, including those carried out by the ECPRD.

This appropriation aims at financing the cooperation between the European Parliament and national parliaments in the parliamentary scrutiny of the CFSP/CSDP, in accordance with the Treaty on European Union and the Treaty on the Functioning of the European Union, and in particular Articles 9 and 10 of Protocol No 1 on the role of national parliaments in the European Union.

COMMISSION

CHAPTER 5 2 — REVENUE FROM INVESTMENTS OR LOANS GRANTED, BANK AND OTHER INTEREST *(cont'd)*

5 2 2 *(cont'd)*

Interest generated by prefinancing payments made from the budget shall not be due to the Union except as otherwise provided for in the delegation agreements, with the exception of those agreements concluded with third countries or the bodies they have designated. In cases in which it is provided for, such interest shall either be reused for the corresponding action, deducted from payment requests in accordance with point (c) of the first subparagraph of Article 23(1) of the Financial Regulation, or recovered.

Delegated Regulation (EU) No 1268/2012 also lays down provisions regarding the accounting of interest yielded on prefinancing.

Legal basis

Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1), and in particular Article 8(4) and Article 21(3)(d) thereof.

Commission Delegated Regulation (EU) No 1268/2012 of 29 October 2012 on the rules of application of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council on the financial rules applicable to the general budget of the Union (OJ L 362, 31.12.2012, p. 1).

Financial year 2015	Financial year 2014	Financial year 2013
p.m.	p.m.	16 820 928,89

Remarks

This article is intended to record interest and other revenue generated on trust accounts.

The trust accounts are kept on behalf of the Union by international financial institutions (European Investment Fund, European Investment Bank, Council of Europe Development Bank/Kreditanstalt für Wiederaufbau, European Bank for Reconstruction and Development) managing Union programmes and the amounts paid in by the Union remain on the account until they are made available to the beneficiaries under the single programme, such as small and medium-sized enterprises or institutions managing projects in acceding countries.

In accordance with Article 21(4) of the Financial Regulation, interest generated by trust accounts used for Union programmes is used to provide additional appropriations on the lines which bore the initial expenditure giving rise to the corresponding revenue.

Legal basis

Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1), and in particular Article 21(4) thereof.

Financial year 2015	Financial year 2014	Financial year 2013
p.m.	p.m.	52 762 018,07

Remarks

Decision 2003/76/EC stipulates that the Commission is entrusted with winding up the financial operations of the European Coal and Steel Community (ECSC) which are still in progress upon expiry of the ECSC Treaty.

Pursuant to Article 4 of that Decision, net revenue from the investment of available assets will constitute revenue in the general budget of the European Union earmarked for a specific purpose, namely financing research projects in sectors related to the coal and steel industry by the Research Fund for Coal and Steel.

The net revenue available for financing research projects in year n + 2 appears in the balance sheet of the ECSC in liquidation for year n, and after the liquidation process has been completed will appear as assets in the balance sheet of the Coal and Steel Research Fund. This financing mechanism took effect in 2003. Revenue coming from 2013 will be used for research in 2015. In order to reduce as far as possible the fluctuations that movements in the financial markets could cause in the financing of research, a smoothing arrangement is applied. The amount of net revenue expected to be available for research in 2015 comes to EUR 47 700 000.

In accordance with Article 4 of Decision 2003/76/EC, 72,8 % of the fund's appropriations will be for the steel-related sector and 27,2 % for the coal-related sector.

In accordance with Article 21 and Article 181(2) of the Financial Regulation, revenue will be used to provide additional appropriations under Chapter 08 05 of the statement of expenditure in this section.

Remarks

Any delay by a Member State in making the entry in the account opened in the name of the Commission referred to in Article 9(1) of Regulation (EC, Euratom) No 1150/2000 gives rise to the payment of interest by the Member State concerned.

In the case of Member States whose currency is the euro, the interest rate shall be equal to the rate as published in the *Official Journal of the European Union*, C series, which the European Central Bank applied to its refinancing operations, on the first day of the month in which the due date fell, increased by two percentage points. This rate shall be increased by 0,25 of a percentage point for each month of delay. The increased rate shall be applied to the entire period of delay.

In the case of Member States whose currency is not the euro, the rate shall be equal to the rate applied on the first day of the month in question by the Central Banks for their main refinancing operations, increased by two percentage points, or, for the Member States for which the Central Bank rate is not available, the most equivalent rate applied on the first day of the month in question on the Member State's money market, increased by two percentage points. This rate shall be increased by 0,25 of a percentage point for each month of delay. The increased rate shall be applied to the entire period of delay.

The interest rate applies to all entries of own resources enumerated under Article 10 of Regulation (EC, Euratom) No 1150/2000.

7 1 1 Excess emissions premiums for new passenger cars

Financial year 2015	Financial year 2014	Financial year 2013
p.m.	p.m.	0,—

Remarks

This article is intended to record any excess emissions premium imposed by the Commission.

The objective of Regulation (EC) No 443/2009 is to set emission performance standards for new passenger cars registered in the Union, which forms part of the Union's integrated approach to reducing CO_2 emissions from light-duty vehicles while ensuring the proper functioning of the internal market.

However, in respect of each calendar year from 2012 onwards for which a manufacturer's average specific emissions of CO_2 exceed its specific emissions target in that year, the Commission shall impose an excess emissions premium on the manufacturer or, in the case of a pool, the pool manager.

Legal basis

Regulation (EC) No 443/2009 of the European Parliament and of the Council of 23 April 2009 setting emission performance standards for new passenger cars as part of the Community's integrated approach to reduce CO_2 emissions from light-duty vehicles (OJ L 140, 5.6.2009, p. 1), and in particular Article 9 thereof.

BORROWING AND LENDING OPERATIONS

CHAPTER 8 0 — REVENUE RESULTING FROM THE EUROPEAN UNION GUARANTEE FOR BORROWING AND LENDING OPERATIONS IN THE MEMBER STATES

8 0 0 *European Union guarantee for Union borrowings for balance of payments support*

Financial year 2015	Financial year 2014	Financial year 2013
p.m.	p.m.	0,—

Remarks

The Union guarantee is for borrowings raised on the capital markets or from financial institutions. The amount in principal of loans which may then be granted to the Member States is limited to EUR 50 000 000 000.

This article is intended to record any revenue arising from exercise of rights in connection with a guarantee under Article 01 02 02, provided that this revenue has not been deducted from expenditure.

A summary of borrowing and lending operations, including debt management, in capital and interest, is given in Annex Part II to the statement of expenditure in this section.

Legal basis

For the legal basis, see the remark for Article 01 02 02 of the statement of expenditure in this section.

Financial year 2015	Financial year 2014	Financial year 2013
p.m.	p.m.	0,—

Remarks

The Union guarantee is for borrowings raised on the capital markets or from financial institutions. The outstanding amount of loans or credit lines to be granted to Member States shall be in the limits set out in the legal basis.

This article is intended to record any revenue arising from exercise of rights in connection with a guarantee under Article 01 02 03, provided that this revenue has not been deducted from expenditure.

A summary of borrowing and lending operations, including debt management, in capital and interest, is given in Annex Part II to the statement of expenditure in this section.

Legal basis

For the legal basis, see the remark for Article 01 02 03 of the statement of expenditure in this section.

CHAPTER 8 1 — LOANS GRANTED BY THE COMMISSION

8 1 0 ***Capital repayments and interest in respect of special loans and risk capital granted in the framework of financial cooperation with Mediterranean third countries***

Financial year 2015	Financial year 2014	Financial year 2013
p.m.	151 000 000	0,—

Remarks

This article is intended to record capital repayments and interest payments on special loans and risk capital granted from the appropriations in Chapters 21 03 and 22 02 of the statement of expenditure in this section to Mediterranean third countries.

It also comprises capital repayments and interest payments on special loans and risk capital granted to certain Mediterranean Member States which, however, represent a very small proportion of the overall amount. These loans/risk capital were granted at a time the countries had not yet joined the Union.

The revenue obtained normally exceeds the amounts forecast in the budget because of the interest payments on special loans which may still be disbursed during the preceding financial year as well as during the current financial year. The interest on special loans and risk capital is charged from the moment the loans are disbursed; interest on special loans is paid in six-monthly instalments and interest on risk capital generally in annual instalments.

This article may accommodate, in accordance with Article 21 of the Financial Regulation, assigned revenue which is used to provide additional appropriations to finance expenditure to which this revenue is assigned.

Remarks

This appropriation is intended to cover the following decentralised operating expenditure:

Missions:

— travel expenses, including ancillary costs relating to tickets and reservations, daily subsistence allowances and additional or exceptional expenditure incurred in connection with missions by Commission staff covered by the Staff Regulations and by national or international experts or officials seconded to Commission departments (refunds of mission expenses paid for the account of other Union institutions or bodies and for third parties will constitute assigned expenditure).

Representation expenses:

— reimbursement of the costs incurred by persons officially representing the Commission (reimbursement is not possible for expenses incurred in the performance of representation duties vis-à-vis staff of the Commission or other Union institutions).

Meetings of experts:

— reimbursement of the costs incurred for the functioning of the expert groups established or convened by the Commission: travel, subsistence and incidental expenses of experts participating in study groups and working parties, and the cost of organising such meetings where they are not covered by the existing infrastructure in the headquarters of the institutions or external offices (experts are reimbursed on the basis of decisions made by the Commission).

Conferences:

— expenditure relating to conferences, congresses and meetings organised by the Commission in support of its various policies, and expenditure for running a network for financial control organisations and bodies, including an annual meeting between such organisations and the members of the European Parliament's Committee on Budgetary Control, as requested in paragraph 88 of European Parliament resolution of 27 April 2006 with comments forming an integral part of the decision on the discharge for implementation of the European Union general budget for the financial year 2004, Section III — Commission (OJ L 340, 6.12.2006, p. 5),

— expenditure relating to conferences, seminars, meetings, training courses and practical in-house training for officials of the Member States who manage or monitor operations financed by the Union funds or operations to collect revenue that constitutes Union own resources or cooperate in the Union statistics system, and expenditure of the same type for officials from the countries of central and eastern Europe managing or monitoring operations financed under Union programmes,

— expenditure on training third country officials who carry out management or control duties with a direct bearing on protecting the Union's financial interest,

— the cost of the Commission's participation in conferences, congresses and meetings,

— conference enrolment fees, excluding training expenses,

— subscriptions to trade and scientific associations,

— the cost of refreshments and food served on special occasions during internal meetings.

Meetings of Committees:

— travel, subsistence and incidental expenses of experts participating in committees set up by the Treaty and by European Parliament and Council Regulations or Council Regulations, and the cost of organising such meetings where they are not covered by the existing infrastructure (in the headquarters of the institutions or external offices) (experts are reimbursed on the basis of decisions made by the Commission).

Studies and consultations:

— expenditure on specialised studies and consultations contracted out to highly qualified experts (individuals or firms) if the Commission does not have suitable staff available to carry out such studies,

— the purchase of studies already carried out or subscriptions with specialist research institutions.

A part of this appropriation is intended for two studies on:

(1) *The feasibility and long term viability of a Pan-European sentinel network for the early detection of new threats in allergies*

This study should aim to prove the long term viability of a Pan-European sentinel network for the early detection of new threats in allergies with the following long term objectives of this network:

— creating a central database, collect data (on country and Union-wide level), analyse and publish data regularly,

— identifying new trends in allergic diseases before they become major public health problems that may cause an additional burden to European health care systems,

— reporting to policymakers and alert them in a timely manner about new allergens where action is needed,

— building up a sustainable system for better awareness, starting in schools, to decrease the burden of allergies for society.

Actions:

— assess existing national systems of allergy surveillance which can be linked to the sentinel network,

CHAPTER XX 01 — ADMINISTRATIVE EXPENDITURE ALLOCATED TO POLICY AREAS *(cont'd)*

XX 01 02 *(cont'd)*

XX 01 02 11 *(cont'd)*

— involve an already existing infrastructure of more than 100 allergy centres, covering the entire Union. This network has been in place for a number of years and is still expanding, which confirms the viability of the project,

— use standardised series for inhalant and food allergens (taking into account regional diversity) in 100 centres in all patients and to deploy this activity in the entire Union. This allows consistent monitoring of allergy trends in patients in a standardised manner,

— use, in a pilot study, a patient sample, called 'reporters', for consistent monitoring of allergy in selected centres using internet and smart phone technology (aeroallergen sentinel network),

— report cases of unknown allergies in the field of inhalant, food, drug or contact allergy to a central database, to detect novel allergens coming into the Union at an early stage,

— disseminate results to policymakers, health care professionals and the general public;

(2) *Understanding and measuring the role of cultural and creative sectors for growth and territorial development*

Cultural and creative industries (CCI) contribute significantly to shaping the identity of the European Union, its economy and the lives of its citizens. Heritage, music, film, entertainment, publishing, fashion, design, architecture and crafts, are areas at the intersection of art, technology and business. According to the Commission communication of 26 September 2012 entitled 'Promoting cultural and creative sectors for growth and jobs in the EU' (COM(2012) 537 final), the economic contribution of these sectors accounts for 3,3 % of the Union's GDP and they employ 6,7 million people. Beyond their intrinsic cultural value and their economic weight, these sectors also have a wider ripple effect on economic and social development, by their impact on other sectors, on regional attractiveness or in stimulating creativity and innovation.

However, the contribution that the cultural and creative sectors can make to economic and social development in the Union is still not fully recognised.

European Parliament noted in its resolution of 12 May 2011 on unlocking the potential of cultural and creative industries the necessity of analysing the effects of the activity of cultural and creative industries on the European economy, by 'identifying, defining and describing them each in turn, in order to highlight their characteristics, better understand their goals and problems and implement more effective measures.' In the same resolution, the Parliament called on the Commission 'to pursue its efforts to produce a better definition of CCI with a view to analysing in depth their impact on long-term growth and international competitiveness and to foster greater recognition of the specific features of the sector'.

The Union lacks information and indicators to measure the contribution of cultural industries to economic development, which fragments, hinders and discourages initiatives and investments in these sectors. For example, the European Capital of Culture label acts as a catalyst for urban regeneration and territorial attractiveness. However, no comprehensive data are available on the impact of investments made during the labelling. Furthermore, the role of cultural resources and actors at the heart of creative ecosystems, in stimulating economic and social innovation is still poorly understood.

Information and management systems:

— the development and maintenance under contract of management and information systems,

— the acquisition and maintenance of complete (turnkey) information and management systems in the field of administrative management (staff, budget, finance, accounts, etc.),

— studies, documentation and training linked to those systems and project management,

— the acquisition of skills and expertise in the area of information technology for all departments: quality, security, technology, development methodology, information technology management, etc.,

— technical support for those systems, and the technical work needed to ensure that they operate satisfactorily.

Further training and management training:

— expenditure on general training designed to improve the skills of the staff and the performance and efficiency of the Commission:

  — fees for experts employed to identify training needs, design, develop and hold courses and evaluate and monitor results,

  — fees for consultants in various fields, in particular organisational methods, management, strategy, quality assurance and personnel management,

  — expenditure incurred in designing, holding and evaluating the training organised by the Commission in the form of courses, seminars and conferences (course instructors/speakers and their travel and subsistence expenses, and teaching materials),

  — the cost of attending external training and of joining the relevant professional organisations,

  — expenditure related to the practical aspects of organising such courses and the use of premises and transport and the cost of food and accommodation for the participants of residential courses,

  — training expenditure related to publications and information, associated internet sites and the purchase of teaching equipment, subscriptions and licences for distance teaching, books, press and multimedia products,

  — financing teaching aids.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

Revenue from contributions from the EFTA States to the Union's general costs under Article 82 of the Agreement on the European Economic Area gives rise to the provision of supplementary appropriations to be entered in the budget lines concerned in accordance with the Financial Regulation. The amount of such revenue is estimated at EUR 833 500.

Any revenue from the Swiss Confederation's contribution for participation in Union programmes entered under Item 6 0 3 3 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

Remarks

This appropriation is intended to cover the cost of carrying out the Joint Harmonised EU Programme of Business and Consumer Surveys in the Member States and candidate countries. The programme was initiated by a Commission Decision in November 1961 and was modified through subsequent Council and Commission decisions. It was last approved through Commission Decision C(97) 2241 of 15 July 1997 and presented in the Commission communication COM(2006) 379 on 12 July 2006 (OJ C 245, 12.10.2006, p. 5).

This appropriation is also intended to cover the cost of studies, workshops, conferences, analyses, evaluations, publications, technical assistance, the purchase and maintenance of databases and software and the part-financing and support of measures relating to:

— economic monitoring, analysis of the combination of measures and coordination of economic policies,

COMMISSION
TITLE 01 — ECONOMIC AND FINANCIAL AFFAIRS

CHAPTER 01 02 — ECONOMIC AND MONETARY UNION *(cont'd)*

01 02 01 *(cont'd)*

— the external aspects of the economic and monetary union (EMU),

— macroeconomic developments in the euro area,

— monitoring structural reforms and improving the operation of markets in the EMU,

— coordination with financial institutions and analysis and development of financial markets, and borrowing and lending operations involving Member States,

— the facility providing financial assistance for Member States' balance of payments and the European financial stabilisation mechanism,

— cooperation with economic operators and decision-makers in the abovementioned fields,

— expanding the EMU.

This appropriation is also intended to cover the funding of priority information measures on Union policies on all aspects of the rules and functioning of EMU, as well as on the benefits of closer policy coordination and structural reforms, and to address information needs of citizens, local authorities and enterprises in relation to the euro.

This measure is designed to be an effective channel of communication and dialogue between the people of the European Union and the Union institutions, and to take account of specific national and regional characteristics, in close cooperation with the Member State authorities. Special emphasis is put on preparing citizens in the new Member States for the introduction of the euro.

It includes:

— partnership agreements with Member States that wish to provide information about the euro or the economic and monetary union (EMU),

— close cooperation and networking with all Member States in the framework of the network of Directors of Communication on EMU-related issues,

— the development of communication activities at central level (brochures, leaflets, newsletters, website design, development and maintenance, exhibitions, stands, conferences, seminars, audiovisual products, opinion polls, surveys, studies, promotional material, twinning programmes, etc.),

— communication initiatives in third countries, in particular to point out the international role of the euro and the value of financial integration.

The Commission, when implementing this article, should take duly into account the outcomes of the meetings of the Interinstitutional Group on Information (IGI).

The Commission has set out its communication strategy on the euro in the Communication of 11 August 2004 on the implementation of an information and communication strategy on the euro and Economic and Monetary Union (COM(2004) 552 final). The implementation of the communication strategy takes place in close coordination with the Member States and the European Parliament.

CHAPTER 01 02 — ECONOMIC AND MONETARY UNION *(cont'd)*

01 02 01 *(cont'd)*

The Commission reports regularly to the European Parliament's relevant committee on the implementation of the programme and on planning for the coming year.

This appropriation is also intended to cover or to temporarily pre-finance costs incurred by the Union in concluding and carrying out operations linked with the borrowing and lending operations for macro-financial assistance, Euratom, balance of payment and European financial stabilisation mechanism.

Any revenue entered in Article 5 5 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21(3)(a) of the Financial Regulation.

Legal basis

Task resulting from the Commission's prerogatives at institutional level, as provided for in Article 54(2) of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1).

Remarks

The European Union guarantee is for borrowings raised on the capital markets or from financial institutions. The amount in principal of loans which may then be granted to the Member States is limited to EUR 50 000 000 000.

This article constitutes the structure for the guarantee provided by the Union. It will enable the Commission to service the debt should debtors default.

In order to honour its obligations, the Commission may draw on its cash resources to service the debt provisionally. In this case, Article 12 of Council Regulation (EC, Euratom) No 1150/2000 of 22 May 2000 implementing Decision 2007/436/EC, Euratom on the system of the European Communities own resources (OJ L 130, 31.5.2000, p. 1) applies.

A specific annex to this part of the statement of expenditure in this section gives a summary of borrowing-and-lending operations guaranteed by the general budget, including debt management, in respect of capital and interest.

Remarks

Article 122(2) of the Treaty on the Functioning of the European Union provides for the possibility of granting Union financial assistance to a Member State in difficulties or seriously threatened with severe difficulties caused by exceptional occurrences beyond its control.

The guarantee provided by the Union is for borrowings raised on the capital markets or from financial institutions.

In accordance with Article 2(2) of Regulation (EU) No 407/2010, the outstanding amount of loans and credit lines granted to Member States under this stabilisation mechanism is to be limited to the margin available under the Union's own resources for payment appropriations.

This article constitutes the structure for the guarantee provided by the Union. It will enable the Commission to service the debt should debtors default.

In order to honour its obligations, the Commission may draw on its cash resources to service the debt provisionally. Article 12 of Council Regulation (EC, Euratom) No 1150/2000 of 22 May 2000 implementing Decision 2007/436/EC, Euratom on the system of the European Communities own resources (OJ L 130, 31.5.2000, p. 1) applies.

A specific annex to this part of the statement of expenditure in this section gives a summary of borrowing-and-lending operations guaranteed by the general budget, including debt management, in respect of capital and interest.

Remarks

Macro-financial assistance ('MFA') is a form of financial aid extended by the Union to partner countries experiencing a balance of payments crisis. MFA is designed for countries geographically, economically and politically close to the Union. These include candidate and potential candidate countries, countries covered by the European Neighbourhood Policy and, in certain circumstances, other third countries. In principle, MFA is only available to countries benefiting from an International Monetary Fund programme.

MFA is exceptional in nature and is mobilised on a case-by-case basis to help countries dealing with serious balance-of-payments difficulties. Its objective is to restore a sustainable external financial situation, while encouraging economic adjustments and structural reforms.

While MFA can take the form of medium/long-term loans or grants, or a combination of these, this article only covers the grant element of MFA operations.

Appropriations under this article will also be used to cover costs incurred in relation to MFA operations, and in particular: (i) costs incurred to conduct operational assessments in the beneficiary countries to obtain reasonable assurances on the functioning of administrative procedures and financial circuits, (ii) costs for ex-post evaluations of MFA operations, and (iii) costs to cover comitology requirements.

The Commission will inform the budgetary authority regularly of the macro-financial situation of the beneficiary countries and will report extensively on the implementation of MFA on a yearly basis.

Any revenue entered in Article 5 5 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21(3)(a) of the Financial Regulation.

Remarks

Pursuant to Council Decision of 8 March 1977, the Union guarantees loans made by the European Investment Bank (EIB) in the context of the Union's financial commitments in respect of the Mediterranean countries.

That decision was the basis for a contract of guarantee between the European Economic Community and the EIB signed in Brussels on 30 October 1978 and in Luxembourg on 10 November 1978, setting up a comprehensive guarantee, equal to 75 % of all the funds available for loan operations in the following countries: Malta, Tunisia, Algeria, Morocco, Portugal (Financial Protocol, emergency aid), Turkey, Cyprus, Syria, Israel, Jordan, Egypt, former Yugoslavia and Lebanon.

Decision 90/62/EEC was the basis for a contract of guarantee between the European Economic Community and the EIB signed in Brussels on 24 April 1990 and in Luxembourg on 14 May 1990 as regards Hungary and Poland and for the extension of that contract to cover Czechoslovakia, Romania and Bulgaria, signed in Brussels and in Luxembourg on 31 July 1991.

Decision 93/696/EC was the basis for a contract of guarantee between the European Community and the EIB signed in Brussels on 22 July 1994 and in Luxembourg on 12 August 1994.

Pursuant to Decisions 93/115/EEC and 96/723/EC, the Union guarantees loans which may be made individually by the EIB in countries of Latin America and Asia with which the European Community has concluded cooperation agreements. Decision 93/115/EEC was the basis for a contract of guarantee between the European Community and the EIB signed in Brussels on 4 November 1993 and in Luxembourg on 17 November 1993. Decision 96/723/EC was the basis for a contract of guarantee between the European Community and the EIB signed in Brussels on 18 March 1997 and in Luxembourg on 26 March 1997.

Pursuant to Decision 95/207/EC, the Union guarantees loans which may be made individually by the EIB in South Africa. Decision 95/207/EC was the basis for a contract of guarantee between the European Community and the EIB signed in Brussels on 4 October 1995 and in Luxembourg on 16 October 1995.

Decision 97/256/EC was the basis for a contract of guarantee between the European Community and the EIB signed in Brussels on 25 July 1997 and in Luxembourg on 29 July 1997 setting up a guarantee restricted to 70 % of the aggregate amount of the appropriations opened, plus all related sums. The overall ceiling of the appropriations opened is equivalent to EUR 7 105 000 000.

CHAPTER 01 03 — INTERNATIONAL ECONOMIC AND FINANCIAL AFFAIRS *(cont'd)*

01 03 05 *(cont'd)*

Decision 2000/24/EC was the basis for a contract of guarantee between the European Community and the EIB signed in Brussels on 24 January 2000 and in Luxembourg on 17 January 2000, last restated in 2005, setting up a guarantee restricted to 65 % of the aggregate amount of the appropriations opened, plus all related sums. The overall ceiling of the appropriations made available is equivalent to EUR 19 460 000 000. The EIB is invited to aim to cover the commercial risk on 30 % of its lending from non-sovereign guarantees. This percentage is to be increased whenever possible, in so far as the market allows.

Decision 2001/777/EC was the basis for a contract of guarantee between the European Community and the EIB signed in Brussels on 6 May 2002 and in Luxembourg on 7 May 2002 setting up a guarantee at 100 % against losses under a special lending action for selected environment projects in the Baltic Sea basin of Russia under the Northern Dimension. The overall ceiling is EUR 100 000 000.

Decision 2005/48/EC was the basis for a contract of guarantee between the European Community and the EIB signed in Luxembourg on 9 December 2005 and in Brussels on 21 December 2005 setting up a guarantee at 100 % against losses under loans for certain types of projects in Russia, Ukraine, Moldova and Belarus. The overall ceiling is EUR 500 000 000. It covers a period ending on 31 January 2007. At the end of this period, the loans granted by the EIB not having attained the overall amounts referred to above, the period was automatically extended by six months.

Decision 2006/1016/EC was the basis for a contract of guarantee between the European Community and the EIB signed in Luxembourg on 1 August 2007 and in Brussels on 29 August 2007 setting up a guarantee restricted to 65 % of the aggregate amount of credits disbursed and guarantees provided in respect of EIB financing operations, less amounts reimbursed, plus all related sums. The overall ceiling of the appropriations made available for all countries under the Decision is equivalent to EUR 27 800 000 000 and covers the period beginning on 1 February 2007 and ending on 31 December 2013 with a possible extension of six months. That Decision has been replaced by Decision No 633/2009/EC.

Decision No 633/2009/EC was the basis for an amendment, signed on 28 October 2009, to the contract of guarantee between the European Community and the EIB which was signed in Luxembourg on 1 August 2007 and in Brussels on 29 August 2007. The Union guarantee is restricted to 65 % of the aggregate amount of credits disbursed and guarantees. The maximum ceiling of the EIB financing operations, less amounts cancelled, shall not exceed EUR 27 800 000 000, broken down in a basic ceiling of EUR 25 800 000 000 and an optional mandate of EUR 2 000 000 000. It covers a period ending on 31 October 2011.

Decision No 1080/2011/EU was the basis for a contract of guarantee between the European Union and the EIB signed in Luxembourg and in Brussels on 22 November 2011. The Union guarantee is restricted to 65 % of the aggregate amount of credits disbursed and guarantees less amounts reimbursed, plus all related amounts. The maximum ceiling of the EIB financing operations, less amounts cancelled, shall not exceed EUR 29 484 000 000, broken down into a general mandate of EUR 27 484 000 000 and a Climate Change mandate of EUR 2 000 000 000. It covers a period beginning on 1 February 2007 and ending on 31 December 2013 with an extension until the entry into force of a new decision.

Decision No 466/2014/EU was the basis for a contract of guarantee between the European Union and the EIB signed in Luxembourg on 22 July 2014 and in Brussels on 25 July 2014. The Union guarantee is restricted to 65 % of the aggregate amount disbursed and guaranteed under EIB financing operations, less amounts reimbursed, plus all related amounts. The maximum ceiling of the EIB financing operations under the Union guarantee, less amounts cancelled, shall not exceed EUR 30 000 000 000, broken down into a fixed ceiling of EUR 27 000 000 000 and an optional mandate of EUR 3 000 000 000. The European Parliament and the Council shall decide in accordance with the ordinary legislative procedure on the activation in whole or in part of the optional mandate. The Union guarantee covers EIB financing operations signed during the period beginning on 25 July 2014 and ending on 31 December 2020 with an extension of six months if the European Parliament and the Council have not adopted a new decision granting the Union guarantee to the EIB against losses under its financing operations outside the Union before the end of 2020.

In order to honour its obligations, the Commission may draw on its cash resources to service the debt provisionally. In this case, Article 12 of Council Regulation (EC, Euratom) No 1150/2000 of 22 May 2000 implementing Decision 2007/436/EC, Euratom on the system of the European Communities own resources (OJ L 130, 31.5.2000, p. 1) applies.

This article constitutes the structure for the guarantee provided by the Union. It will enable the Commission, if necessary, to service the debt (repayment of principal, interest and other costs) should a debtor default on the loans granted by the EIB.

Remarks

This appropriation is intended to cover the financing of the provision of paid-up shares of the capital subscribed by the Union.

The European Investment Fund (EIF) was created in 1994. Its founder members were the European Community, represented by the Commission, the European Investment Bank (EIB) and a number of financial institutions. Union membership of the EIF is presently governed by Decision 94/375/EC.

In the conclusions of the European Council of 19 and 20 December 2013, the European Council called on the Commission and the EIB to further enhance the EIF capacity through an increase in its capital with a view to reaching final agreement by May 2014.

Legal basis

Council Decision 94/375/EC of 6 June 1994 on Community membership of the European Investment Fund (OJ L 173, 7.7.1994, p. 12).

Council Decision 2007/247/EC of 19 April 2007 on the Community participation in the capital increase of the European Investment Fund (OJ L 107, 25.4.2007, p. 5).

Remarks

This appropriation is intended to cover the financing of the technical and legal assistance necessary for the evaluation of the safety, environmental, economic and financial aspects of the projects for which financing in the form of a Euratom loan has been requested, including studies undertaken by the European Investment Bank (EIB). The measures are also intended to enable loan contracts to be concluded and carried out.

Appropriation under this article will also be used to cover or temporarily pre-finance costs incurred by the Union in concluding and carrying out operations linked with Euratom borrowing and lending operations.

Any revenue entered in Article 5 5 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21(3)(a) of the Financial Regulation. The amount of assigned revenue for the year 2014 is estimated at EUR 1 235 000.

Legal basis

Council Decision 77/270/Euratom of 29 March 1977 empowering the Commission to contract Euratom loans for the purpose of contributing to the financing of nuclear power stations (OJ L 88, 6.4.1977, p. 9).

Remarks

The authorised borrowing ceiling is EUR 4 000 000 000, of which EUR 500 000 000 is authorised pursuant to Decision 77/270/Euratom, EUR 500 000 000 pursuant to Decision 80/29/Euratom, EUR 1 000 000 000 pursuant to Decision 82/170/Euratom, EUR 1 000 000 000 pursuant to Decision 85/537/Euratom and EUR 1 000 000 000 pursuant to Decision 90/212/Euratom.

This article constitutes the structure for the guarantee provided by the Union. It will enable the Commission to service the debt should debtors default.

In order to honour its obligations, the Commission may draw on its cash resources to service the debt provisionally. In this case, Article 12 of Council Regulation (EC, Euratom) No 1150/2000 of 22 May 2000 implementing Decision 2007/436/EC, Euratom on the system of the European Communities own resources (OJ L 130, 31.5.2000, p. 1) applies.

A specific annex to this part of the statement of expenditure in this section gives a summary of borrowing-and-lending operations guaranteed by the general budget, including debt management, in respect of capital and interest.

Legal basis

Council Decision 77/270/Euratom of 29 March 1977 empowering the Commission to contract Euratom loans for the purpose of contributing to the financing of nuclear power stations (OJ L 88, 6.4.1977, p. 9).

Remarks

This appropriation is intended to cover payments in respect of commitments remaining to be settled from previous years.

Even though the end of the commitment period has been reached, the facilities have to be operated for several years during which time payments will be needed for investments and in order to honour guarantee obligations. Therefore reporting and monitoring requirements will continue until the end of the facility periods.

In order to honour its obligations, the Commission may draw on its cash resources to service the debt provisionally. In this case, Article 12 of Council Regulation (EC, Euratom) No 1150/2000 of 22 May 2000 implementing Decision 2007/436/EC, Euratom on the system of the European Communities own resources (OJ L 130, 31.5.2000, p. 1) applies.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates, for participating in Union programmes and entered in Item 6 0 3 1 of the statement of revenue, may give rise to the provision of additional appropriations in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

Any revenue generated on Trust Accounts entered in Article 5 2 3 of the statement of revenue will give rise to the provision of additional appropriations to be entered in this article, in accordance with the Financial Regulation.

Remarks

National (and regional) Promotional Banks (NPB), together with the European Investment Bank (EIB) and the European Investment Fund (EIF) are considered important actors to finance long-term projects at European level. The Commission communication of 27 March 2014 on long-term financing of the European economy — a follow-up to a Green Paper — confirmed that during consultations 'calls were made for more joint Union-national or multinational initiatives to promote cooperation and synergies between the Union budget and the EIB/EIF, Multilateral Development Banks (MDBs) and NPBs'. In that communication, the Commission undertook to 'encourage and monitor the cooperation of NPBs, as requested by the June 2013 European Council and to report to the December 2014 Council'.

In this context, it is important to enable the Commission to develop a pilot project to create, through visible support from the Union budget, a structured network of national and regional promotional banks based in the Member States, in order to enhance their cooperation and to achieve the objective of long-term financing of the real economy and thus support long-term growth, well-being and employment in Europe. Such cooperation will foster the exchange of best practices and help to develop innovative systems to channel private capital towards SMEs and towards project of public interest, such as investments in material and immaterial infrastructure, particularly in the regions hardest hit by recession and unemployment.

To this end, the project will include the following activities:

— promoting the exchange of information and best practices among participants and between participants and European Institutions, through meetings, seminars and publications,

— initiating research programmes and holding conferences for the participants,

— developing initiatives to promote the concept of long-term investment within the economic and financial sector,

— promoting the removal of obstacles and the development of incentives to favour long-term investing.

Legal basis

Pilot project within the meaning of Article 54(2) of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1).

Remarks

This appropriation is intended to cover expenditure on studies, meetings of experts, information and publications directly linked to the achievement of the objective of the programme or measures coming under this item, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidate countries for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations, according to the same ratio as between the amount authorised for expenditure on administrative management and the total appropriations entered for the programme in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

Any revenue from contributions from third parties entered in Item 6 0 3 3 of the statement of revenue will give rise to the provision of additional appropriations to be entered in this Item in accordance with the Financial Regulation.

Remarks

This appropriation is intended to strengthen the competitiveness of enterprises, in particular that of small and medium-sized enterprises (SMEs), and to encourage entrepreneurship and foster the creation and growth of SMEs.

The implemented measures will include:

— networks bringing together a variety of stakeholders,

— market replication projects,

— policy analyses, development and coordination with participating countries,

— studies on gender-related discrimination linked to female entrepreneurship and implementation of policies to foster female entrepreneurship,

— information sharing, dissemination and awareness raising,

— support to joint actions of Member States or regions, as well as other measures under the COSME programme.

TITLE 02 — ENTERPRISE AND INDUSTRY

CHAPTER 02 02 — COMPETITIVENESS OF ENTERPRISES AND SMALL AND MEDIUM-SIZED ENTERPRISES (COSME) *(cont'd)*

02 02 01 *(cont'd)*

The Union will provide support to activities such as the Enterprise Europe Network and entrepreneurship promotion. It will also support projects concerned with the first applications or market replication of techniques, practices or products (e.g. new business concepts for consumer goods) of Union relevance that have already been technically demonstrated with success but, owing to residual risk, have not yet significantly penetrated the market. Those projects will be designed to promote wider use within the participating countries and facilitate market uptake.

Projects will also seek to improve the framework conditions including through capacity building in clusters and other business networks notably with regard to support SME internationalisation in order to ensure that Union enterprises are competitive and sustainable, including in the tourism sector, by supporting coherence and consistency in implementation, as well as informed policy-making at Union level. In addition, projects will be put in place to support the implementation of the Small Business Act for Europe. Support actions, directly linked to the achievement of these objectives are also considered for funding: meetings, studies, information and publications, participation in study groups, conferences, workshops.

In relation to gender equality, projects to promote the position of female entrepreneurs will receive particular attention in order to help overcome gender-based hurdles women may face and to attain an equal representation of male and female entrepreneurs throughout the EU.

Sustainable tourism activities will receive a special focus with initial priority given to soft mobility, cycling networks, eco-tourism and nature protection. Accessibility for all, particularly for people with reduced mobility and for socially disadvantaged people is also of high importance in this context.

The Union will coordinate, promote and support actions for sustainable tourism, such as:

— preservation of long-term sustainable tourism resources through protection of natural, cultural, historical and industrial heritage,

— coordination and support for access to sustainable tourism information and services for less-advantaged citizens living in poverty, as well as for persons with reduced mobility,

— cross-border coordination of European cycling networks, together with rail and long-distance bus information and services.

The Erasmus for Entrepreneurs programme aims to encourage European entrepreneurship, the sharing of knowledge and best practices, and the creation of valuable networks and partnerships.

Due to the currently difficult economic situation it is indispensable to support European enterprises, in particular young innovative start-ups, and female entrepreneurs as well to foster entrepreneurship by assigning enough funds to programmes like the programme for the competitiveness of enterprises and small and medium-sized enterprises (COSME). In particular the programme 'Erasmus for young entrepreneurs' has been very successful and can contribute successfully to fight unemployment across Europe.

The financial means for the 'Erasmus for young Entrepreneurs' programme must be increased in particular due to the following reasons:

CHAPTER 02 02 — COMPETITIVENESS OF ENTERPRISES AND SMALL AND MEDIUM-SIZED ENTERPRISES (COSME) *(cont'd)*

02 02 01 *(cont'd)*

— the programme helps fostering European entrepreneurship, the sharing of knowledge and best-practices as well as the creation of valuable networks and partnerships,

— the programme is very successful and has shown an increasing number of participants over the last years which is expected to increase further,

— the programme effectively tackles the problem of youth unemployment as it helps young people without work to become self-employed and existing SME to create jobs by expanding and/or internationalising their business,

— the number of applications exceeds by far the possibilities the Commission can fulfil with the financial means currently available.

Part of this appropriation is intended to be used for operations carried out by the Confederation of European Senior Expert Services — CESES — and its Member Associations, including technical assistance, advisory services and training in selected public and private sector enterprises and institutions. For that to be achieved, EU authorising officers are encouraged to make full use of the possibilities offered by the Financial Regulation, notably taking into account in-kind financing by CESES as contribution to EU projects.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

A loan guarantee facility (LGF) shall provide counter-guarantees, direct guarantees and other risk sharing arrangements for debt financing which shall reduce the particular difficulties that viable SMEs face in accessing finance either due to their perceived higher risk or their lack of sufficient available collateral and for securitisation of SME debt finance portfolios.

An equity facility for growth (EFG) shall allow investments in risk capital funds which invest in SMEs in the expansion and growth stage, whilst taking a gender-sensitive and non-discriminatory approach, and in particular in those operating cross-borders. The possibility shall exist to invest in early stage funds in conjunction with the equity facility for RDI under Horizon 2020. In cases of joint investments in multi-stage funds, investments will be provided on a pro-rata basis from the EFG of COSME and the equity facility for RDI under Horizon 2020. Support from the EFG shall be (a) either directly by the European Investment Fund (EIF) or other entities entrusted with the implementation on behalf of the Commission or (b) by funds-of-funds or investment vehicles investing across borders.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Any repayment from financial instruments pursuant to Article 140(6) of the Financial Regulation, including capital repayments, guarantees released, and repayment of the principal of loans, paid back to the Commission and entered in Item 6341 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Articles 21(3)(i) of the Financial Regulation.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under this preparatory action.

Under the Treaty of Lisbon, the Union was granted competence in the field of tourism for the first time. This preparatory action seeks to support cross-border thematic tourism products which reflect in particular common European cultural and industrial heritage and local traditions and will seek to draw on previous actions in this area and on the consolidated experience of other international partners and organisations, such as the Council of Europe, the United Nations World Tourism Organization (UNWTO), the European Travel Commission (ETC), etc.

In particular, to help encourage the European tourism sector to become more competitive, this preparatory action will promote the diversification of the supply of tourism products. There is excellent potential for growth in a number of transnational thematic tourism products and services as, for example, in cultural and industrial itineraries crossing several regions or Member States. Those European and transnational tourism products should also be promoted in third countries in close cooperation with the ETC, in order to enhance the image of Europe as a unique destination on long-haul markets.

CHAPTER 02 02 — COMPETITIVENESS OF ENTERPRISES AND SMALL AND MEDIUM-SIZED ENTERPRISES (COSME) *(cont'd)*

02 02 77 *(cont'd)*

02 02 77 08 *(cont'd)*

The preparatory action has the following main objectives:

— by funding cross-border tourism projects, to help improve the quality of tourism products and destinations as a whole across the Union,

— to further develop cultural products and tourism as an integral part of a sustainable economy and to support regional economies,

— to promote tourism in regions in reconversion, in order to boost employment and growth in these regions,

— to establish a network of regional, national and Union-level stakeholders and decision-makers, in particular in the fields of cultural and industrial tourism,

— to promote the value of cultural products and cultural tourism within Europe and to reinforce the image of Europe as the number one destination for tourists worldwide,

— to support transnational cultural or industrial themes and products which help to foster a greater sense of European identity.

Under this preparatory action, support for projects related to European cultural routes (recognised by the Council of Europe and others) should be continued.

As these routes cross several regions or countries, they are a good basis for promoting European cultural tourism in all its variety and complexity.

Cultural routes have strong tourism potential still largely unexplored. They are both transnational and representative of Europe's common heritage and values. They are also regarded as a sustainable, ethical and social model because they build on local knowledge, skills and heritage assets, often promoting less well known European destinations.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under this preparatory action.

Following the entry into force of the Lisbon Treaty, tourism has been added to the competences given to the Union, which can coordinate and complement Member States' actions in this field. In order to foster this new important task of the Union, a preparatory action, launched in 2012, aimed at preparing the ground for future initiatives in the field of tourism and accessibility has been proposed. Its main aim is to develop a better awareness of accessibility in tourism, with a special focus on the disability issue and special needs of certain categories of people. In fact, despite the UN Convention on the Rights of Persons with Disabilities, signed by all Member States, a large number of disabled persons are still facing problems in accessing services in the tourism and transport field.

The preparatory action has the following main objectives:

— raising public awareness, including through information campaigns, to the accessibility of tourism products and services, as well as improving dialogue and collaboration between organisations representing disabled persons, people with special needs in general and the tourism industry, in order to favour a more inclusive society and guarantee high quality free movement of people in Europe,

— contributing to facilitating the development of specific training for staff on disability awareness, in particular in the field of fire prevention and safety of accommodation in general,

— developing skilled, trained and well-informed citizens and professionals on the concept of hospitality in relation to accessibility, including through close cooperation and synergies with universities and schools,

— incentivising and rewarding European destinations which make accessibility a key priority in their promotional offers,

— incentivising better use of innovation in order to improve accessibility in tourism services for all,

— incentivising adaptation of tourist products to the needs of persons with reduced mobility and people with special needs in general,

— contributing to the creation of a favourable and accessible environment for disabled persons, persons with reduced mobility and people with special needs in all fields, notably in transport (mobility), accommodation, catering and tourism services in general,

— increasing campaigns and information actions with regard to the rights of persons with reduced mobility, and people with special needs when travelling abroad, in order to guarantee that customers have better information and better access,

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under this pilot project.

This pilot project will explore scenarios for the reindustrialisation of Europe and employment-related issues in line with the aim of increasing industry's share of European GDP from its current level of around 16 % to 20 % by 2020.

It will further implement of the Commission's recommendations, facilitate the exchange of best practice, drawing on Eurofound expertise and assistance, and will also support performance monitoring as part of the European Semester and country-specific recommendations.

This pilot project will have a key focus on manufacturing — a priority of the Commission's Industrial Policy Communication Update, which sets out a detailed strategy for addressing some of the factors that can contribute to economic recovery. Beyond its industrial policy context, the project will have a very clear employment dimension, addressing questions related to job creation and reintegration into the labour market, restructuring trends, the gender dimension, skills/reskilling, entrepreneurship, and SME engagement in markets outside the Union.

This pilot project will look into and put into practice methods for predicting the future of manufacturing. In particular, the pilot project will:

— support a European reindustrialisation strategy capable of responding to the rapid changes brought by globalisation,

— explore the key drivers which will support positive developments in manufacturing, where the employment impact will be central; the case for a European manufacturing renaissance is, in some respects, more economic than technological: because labour-saving technology decreases the need for the productive factor labour, labour costs in manufacturing will be less important for determining location of operations; in addition, the pay gap between Europe and the rest of the world can surely only decline with time,

CHAPTER 02 02 — COMPETITIVENESS OF ENTERPRISES AND SMALL AND MEDIUM-SIZED ENTERPRISES (COSME) *(cont'd)*

02 02 77 *(cont'd)*

02 02 77 16 *(cont'd)*

— involve detailed quantitative exploration of the employment dimension: there is good reason to believe that most of the jobs created by keeping and increasing manufacturing in Europe will in fact be in related non-manufacturing activities, i.e. in business services, R & D, sales and marketing and in other stages in the manufacturing supply chain; this will multiply the positive employment effects,

— include studies to quantify these employment spill-over effects, which will be quantitative analyses estimating substitution and complementarity effects,

— explore how progress in industrial policy and performance can translate into employment growth — to encourage 'job-rich growth',

— involve a large number of case studies exploring why big companies remain in or go back to Europe in order to manufacture, thus creating jobs in core activities and along the supply chain,

— include key emerging dimensions of entrepreneurship, for example with regard to 'Born Global' (i.e. start-ups that immediately have global operations); such companies often have a very high-tech focus on, for example, life sciences and ICT; this ties in closely with the Entrepreneurship 2020 action plan and one of its targets: 25 % of SMEs to engage in markets outside the Union,

— explore what existing spill-over effects mean for male and female jobs today and for gender distribution in the future,

— explore the skills/reskilling issue, in particular as a strategic tool for structural change; an in-depth study on dual and vocational systems for creating a hub of industrial professionals and researchers could be considered in cooperation with Cedefop.

Eurofound, with its European Monitoring Centre on Change, is well placed to carry out the pilot project.

Remarks

SMEs in Europe are faced with the challenge of ageing entrepreneurs whose businesses could disappear if no successor is found. Given the number of bankruptcies or business failures where at least part of the business was profitable, the potential for saving activities and jobs is considerable. When a business closes down, jobs are lost, as are know-how, products and the services the business provided, and the indirect jobs among suppliers and local service providers. SMEs in particular find it difficult to prepare for business transfer because of a lack of time, money and know-how. A failure to prepare for business transfer leads to difficulties in finding successors and funds, as well as in reorganising the business.

The purpose of the project is to develop and implement concrete actions to help bring about successful business transfers with employee involvement. The pilot project is in line with the report of the cooperative working group launched by Commissioner Tajani. The overall objective is to facilitate the transfer of 'healthy' businesses to employees and employee buy-outs of failed or bankrupt businesses, using the cooperative model in both cases. Experience on the ground has demonstrated that the cooperative model is the one most often chosen by employees during restructuring processes. This pilot project will help raise awareness among entrepreneurs, employees, trade unions, business and trade associations, enterprise support service providers and public authorities of the added value of this option for business transfers. Many failures could be avoided if transfers were planned well ahead and specialised advice were sought. Working towards successful business transfers should thus be seen as an investment rather than a cost. The project will also support activities to make business owners aware of the need for timely preparation. Experience shows that the further in advance a transfer is prepared, the higher the chances are of its being a success. Member States should actively promote and support mentoring schemes involving the transfer of knowledge and core competencies essential to transfer businesses to employees as cooperatives. The main target groups for the pilot activities are SME entrepreneurs and employees.

Europe is not fully exploiting its entrepreneurial potential and lags behind in start-ups and self-employment. Women in particular are reluctant to create their own businesses. The EU has recognised that female entrepreneurship must be promoted and supported in order to strengthen Europe's competitiveness.

One of the main obstacles for women in general is their lack of access to finance. Studies show that for female entrepreneurs it is significantly more difficult to obtain loan financing by comparison with their male partners. At the same time they also lack access to relevant technical, scientific and general business networks. Those networks are in many ways essential for creating and expanding a business, in particular for finding investors, business partners and mentors.

Remarks

Europe should benefit from world-bridging tourism because of the increasing share of GDP accounted for by the tourism sector. It could bring significant economic growth, including the creation of sustainable employment. Europe should be prepared for the difficulties and challenges posed by the arrival of more visitors from countries with different cultural customs, such as China. Europe should become the lead economy within world tourism competition.

Over the last few decades, tourism has become one of the largest and fastest growing economic sectors in the world. International tourist arrivals rose from 278 million in 1980 to 1 035 million in 2012 and are expected to grow by 3,3% a year on average by 2030. Europe remains the world's number one tourist destination, accounting for half of all international tourist arrivals worldwide — with three quarters of those in European Union (EU) countries. However, its position is being challenged by new tourist destinations in emerging economies.

Tourists from emerging economies such as Brazil, Russia, China and India have increased in number over the past few years. Statistics show that 1 026 000 visas were issued in 2011 to Chinese tourists, compared with 560 000 in 2008. In 2011, foreign visitor spending amounted to over EUR 330 billion and, according to recent estimates, could increase to around EUR 430 billion in 2022. The 'Europe – Whenever you're ready' campaign, highlighting Europe's diverse cultural and natural heritage and targeting potential tourists, in particular from Brazil, India and China, was introduced in 2012. This programme has been very successful and has achieved extremely positive results thanks to the development and implementation of a common visa policy. Visa facilitation has increased international tourist arrivals from relevant markets by between 5 and 25 %. But visas are not the only issue, as all foreign visitors have different needs and expectations.

Among the emerging economies referred to above, the focus should be on China, which is the fastest-growing tourism source market in the world. According to the World Tourism Organisation's report on the Chinese Outbound Travel Market (2013), Chinese tourists' propensity to travel abroad is expected to continue rising in the coming decades. Furthermore, beyond Asia and the Pacific, Europe is the largest destination region for Chinese travellers. As Europe has a prominent place on the Chinese 'wish list', it is necessary to think about how EU Member States could better host Chinese tourists. What is needed is mutual understanding and continuous and sustainable training of tourism sector employees all over Europe.

Furthermore, Europe should be prepared for the challenges posed by the arrival of many Chinese tourists, including public security, laws on foreign nationals, and the possibility of racist and xenophobic attitudes stemming from cultural differences between our societies.

This pilot project has the following main objectives:

— facilitating the development of networks and exchanges of best practices between public decision-makers and representatives of the tourism industry,

— promoting opportunities to create new and sustainable jobs in the service sector across Europe,

— establishing professional and structural dialogue among the EU institutions,

— identifying best practices concerning the profile of the Chinese traveller (how to host them better) and promoting them in the European tourism industry, including service providers (hotels, restaurants),

— improving dialogue and collaboration between Chinese and European tour operators and travel agencies,

— facilitating the development of specific training for staff (for example improving language skills and cultural knowledge),

— raising public awareness through campaigns on multiculturalism in cooperation with Chinese cultural institutes (Confucius Institutes),

— incentivising the tailoring of tourist products and services to the needs of Chinese tourists, including marketing tools (websites and flyers in Chinese) and their promotion on Chinese social networks (Weibo),

— enhancing cross-border cooperation to boost the image of Europe and the European identity — this project could be linked to the preparatory action 'Promotion of European and transnational tourism products with special emphasis on cultural and industrial products' — for example preparing a unique promotional video in Chinese about the European Union.

To face its main societal challenges, the EU has set up the Horizon 2020 R & D investment programme for a competitive and sustainable Europe; and to help the EU regions to follow a common healthy path, through smart regional specialisation, the EU has introduced the Research and Innovation Strategies for Smart Specialisation (RIS3) initiative.

This pilot project will create closer links between Horizon 2020 and RIS3 in order to speed up R & D results exploitation and regional economic convergence at the same time. Although both Horizon 2020 and RIS3 are very well targeted programmes, a bridge between them which focused on social and economic convergence between EU regions would help to foster their success.

The TREC pilot project will include a call for tenders directed at European technology centres and the related industrial clusters, with the following conditions:

— clusters represented must have been selected in their regional RIS3 strategic plans,

— a common proposal must be presented by clusters from at least three EU countries,

— a comprehensive economic picture of the clusters must be presented,

— there must be a readiness to share information and best practices.

Among the project candidates, at least three should be selected to receive financing for a project involving:

— complete benchmarking of the clusters,

— detecting bottlenecks and improvement opportunities,

— searching for available R & D results and drawing up an application plan,

— drawing up of an investment and training plan to meet the needs detected,

— making the necessary technology investments and implementing the training plans laid down,

— assessing and disseminating the results obtained.

Owing to the difficulties involved in estimating the necessary duration and investment levels, the pilot project will consist of two phases, the first covering the first four activities listed above, the second covering implementation and assessment and dissemination.

The first phase could last for up to one year and the necessary EU financing could be some EUR 500 000. The second phase could last for up to three years and require up to EUR 4 000 000 and would be co-financed by the participating companies and/or countries.

In terms of performance, the projects selected must demonstrate a cluster productivity increase of at least 10 % and a spread of about +/- 3 % between clusters.

The final aim is to analyse the impact of specific industrial policies which can be carried out by the EU. The TREC pilot project seeks to determine how an innovative entity can best apply existing innovation to improve exploitation of R & D results and reduce unemployment, thus contributing to growth and more jobs in the EU.

The Unesco logo is world-famous; it is a guarantee of the special cultural relevance of a site, but it is also a hook for attracting new tourism flows. Cooperation with Unesco, a specialised UN organisation, could be essential for enhancing international cooperation with the UN and developing a regional strategy for the promotion of European sites on the Unesco list. A map of emblematic Unesco sites grouped by theme (e.g. mediaeval towns, underwater heritage, Greek/Roman archaeological sites) or telling a story which pulls together their common strands will help to promote cultural tourism in both domestic and long-haul markets. Different communication tools can be developed on the basis of a European map of Unesco sites. This preparatory action will further explore the relationship between tourism and culture.

Remarks

In accordance with the general aim of maintaining the proper functioning of the internal market and the competitiveness of European industry, in particular through the mutual recognition of standards and the establishment of European standards in suitable cases, this appropriation is intended to cover:

— financial obligations arising from contracts to be signed with the European standardisation organisations (such as ETSI, CEN and Cenelec), for the development of standards,

— checking and certifying conformity with the standards, and demonstration projects,

— contract expenditure for the execution of the programme and projects indicated above. The contracts in question cover the following: research, association, evaluation, technical operations, coordination, scholarships, grants, training and mobility of scientific staff, participation in international agreements and participation in expenditure on equipment,

— improving the performance of standards bodies,

— promoting quality in standardisation, and the verification thereof,

— supporting the transposition of European standards into national standards, particularly by having them translated,

— measures relating to information, promotion and profile-raising of standardisation and the promotion of European interests in international standardisation,

— secretarial services for the technical committees,

— technical projects in the field of tests for compliance with the standards,

— examination of the compliance of draft standards to the relevant mandates,

— programmes of cooperation with and assistance to third countries,

— carrying out the work needed to apply international information technology standards uniformly throughout the Union,

— specifying methods of certification and laying down technical methods of certification,

— encouraging use of these standards in public procurement contracts,

— coordinating the various operations to prepare the standards and doing more to implement them (user guides, demonstrations, etc.).

Union finance is to be used to frame and implement the standardisation operation in consultation with the main participants: industry, workers' representatives, consumers, small and medium-sized enterprises, the national and European standardisation institutions, the public procurement agencies in the Member States, all users and industrial policymakers at national and Union levels.

In the case of IT equipment, and in support of interoperability, specific provisions are included in Council Decision 87/95/EEC of 22 December 1986 on standardisation in the field of information technology and telecommunications (OJ L 36, 7.2.1987, p. 31) requiring Member States to ensure that, in public procurement orders, reference is made to European or international standards.

Remarks

This appropriation is intended to cover the costs of the functioning and activities of European non-governmental and non-profit organisations representing the interests of SMEs and consumers, as well as environmental and social interests, in standardisation activities.

Such representation in the standardisation process at European level forms part of the statutory objectives of such organisations, and they have been mandated by national non-profit organisations in at least two thirds of the Member States to represent those interests.

Contributions to such European organisations have previously been covered by the Competitiveness and Innovation Programme, the consumer policy and the Financial Instrument for the environment, LIFE+. In Regulation (EU) No 1025/2012 the actions in the field of standardisation financed by specific programmes have been brought together in a single legal act.

Legal basis

02 03 03 *(cont'd)*

The Agency must inform the European Parliament and the Council about transfers of appropriations between operational and administrative expenditure.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this Item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

The amounts repaid in accordance with Article 16 of the Commission Regulation (EC, Euratom) No 2343/2002 constitute assigned revenue (Article 21(3)(c) of the Financial Regulation) to be charged to Item 6 6 0 0 of the general statement of revenue.

In 2015, the Agency's 'Revenue from fees and charges' and the surplus carried over from previous year will not be sufficient to cover for the expected expenditure, which implies the need of a subsidy from the Commission. The Union contribution for 2015 amounts to a total of EUR 7 800 000.

Remarks

These remarks are applicable to all the budget lines in this chapter.

This appropriation will be used for the Horizon 2020 — the Framework Programme for Research and Innovation which covers the 2014 to 2020 period.

Horizon 2020 shall play a central role in the implementation of the Europe 2020 flagship initiative 'Innovation Union' and other flagship initiatives, notably 'Resource efficient Europe', 'An industrial policy for the globalisation era', and 'A digital agenda for Europe', as well as in the development and functioning of the European Research Area (ERA). Horizon 2020 shall contribute to building an economy based on knowledge and innovation across the whole Union by leveraging sufficient additional research, development and innovation funding. It will be carried out in order to pursue the general objectives set out in Article 179 of the Treaty on the Functioning of the European Union, in order to contribute to the creation of a society of knowledge, based on the European Research Area, i.e. supporting transnational cooperation at all levels throughout the Union, taking the dynamism, creativity and the excellence of European research to the limits of knowledge, strengthening human resources for research and for technology in Europe, quantitatively and qualitatively and research and innovation capacities in the whole of Europe and ensuring optimum use thereof.

CHAPTER 02 04 — HORIZON 2020 — RESEARCH RELATING TO ENTERPRISES *(cont'd)*

Also entered against these articles and items are the costs of high-level scientific and technological meetings, conferences, workshops and seminars of European interest organised by the Commission, the funding of high-level scientific and technological analyses and evaluations carried out on behalf of the Union to investigate new areas of research suitable for Union action, inter alia, in the context of the European Research Area, and measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

This appropriation will be used in accordance with Regulation (EU) No 1290/2013 of the European Parliament and of the Council of 11 December 2013 laying down the rules for participation and dissemination in 'Horizon 2020 — the Framework Programme for Research and Innovation (2014-2020)' and repealing Regulation (EC) No 1906/2006 (OJ L 347, 20.12.2013, p. 81).

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this chapter. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

The possibility of third countries or institutes from third countries taking part in European cooperation in the field of scientific and technical research is envisaged for some of these projects. Any financial contribution entered in Items 6 0 1 3 and 6 0 1 5 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Any revenue from States taking part in the European cooperation in the field of scientific and technical research entered in Item 6 0 1 6 of the of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidate countries for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

Any revenue from the contributions by outside bodies to Union activities entered in Item 6 0 3 3 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Additional appropriations will be provided under Item 02 04 50 01.

Administrative appropriations of this chapter will be provided under Chapter 02 01 05.

02 04 02 Industrial leadership

Remarks

This priority of Horizon 2020 aims at making Europe a more attractive location to invest in research and innovation, by promoting activities where businesses set the agenda as well as at accelerating the development of new technologies which will underpin future businesses and economic growth. It will provide major investment in key industrial technologies, maximise the growth potential of European companies by providing them with adequate levels of finance and help innovative SMEs to grow into world-leading companies.

Remarks

The aim of this appropriation is to:

— foster a competitive and innovative space industry and research community to develop and exploit space infrastructure to meet future Union policy and societal needs. The lines of activities are: enabling European competitiveness, non-dependence and innovation of the European space sector, enabling advances in space technologies, enabling exploitation of space data and enabling European research in support of international space partnerships,

— foster today's industrial forms of production towards more sustainable and low-carbon manufacturing and processing resulting in more innovative products, processes and services. In particular, sustainable and low-carbon technologies in energy-intensive process industries will be targeted to increase the competitiveness of process industries, by drastically improving resource and energy efficiencies and reducing the environmental impact of such industrial activities through the whole value chain, promoting the adoption of low-carbon technologies.

Remarks

The aim of this appropriation is to help remedy market deficiencies in accessing risk finance for research and innovation. In particular, the equity facility will target investments in risk capital funds which make early stage investments. It shall enable equity investments in, amongst others, seed capital funds, cross-border seed funds, business angel co-investment vehicles and early-stage venture capital funds. The equity facility, which will be demand-driven, shall use a portfolio approach, where venture capital funds and other comparable intermediaries select the firms to be invested in.

Any repayment from financial instruments pursuant to Article 140(6) of the Financial Regulation, including capital repayments, guarantees released, and repayment of the principal of loans, paid back to the Commission and entered in Item 6 3 4 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21(3)(i) of the Financial Regulation.

Remarks

The aim of this appropriation is to:

— provide financing to the Enterprise Europe Network established under the COSME programme for their reinforced services linked to Horizon 2020. The support could range from improved information and advisory services through partner search activities for SMEs wishing to develop cross-border innovation projects, to providing innovation support services,

— support the implementation and complementing the SME specific measures across Horizon 2020, notably to enhance the innovation capacity of SMEs. Activities may include awareness raising, information and dissemination, training and mobility activities, networking and exchange of best practices, developing high quality innovation support mechanisms and services with strong Union added value for SMEs (e.g. intellectual property and innovation management, knowledge transfer), as well as assisting SMEs to connect to research and innovation partners across the Union, allowing them to spin in technology and develop their innovation capacity. Intermediary organisations representing groups of innovative SMEs shall be invited to conduct cross-sectoral and cross-regional innovation activities with SMEs having mutually reinforcing competences, in order to develop new industrial value chains,

— support market-driven innovation in view of enhancing the innovation capacity of firms by improving the framework conditions for innovation as well as tackling the specific barriers preventing the growth of innovative firms, in particular SMEs and enterprises of intermediate size with potential for fast growth. Specialised innovation support (e.g. IP exploitation, networks of procurers, support to technology transfer offices, strategic design) and reviews of public policies in relation to innovation may be supported.

Part of this appropriation is intended to be used for operations carried out by the Confederation of European Senior Expert Services — CESES — and its member associations, including technical assistance, advisory services and training in selected public and private sector enterprises and institutions. For that to be achieved, EU authorising officers are encouraged to make full use of the possibilities offered by the new Financial Regulation, including CESES contributions in kind to EU projects.

02 04 03 ***Societal challenges***

Remarks

This priority of Horizon 2020 responds directly to the policy priorities and societal challenges identified in the Europe 2020 strategy. Those activities will be implemented using a challenge-based approach which brings together resources and knowledge across different fields, technologies and disciplines. The activities will cover the full cycle from research to market, with a new focus on innovation-related activities such as piloting, demonstration, test-beds, support for public procurement, design, end-user driven innovation, social innovation and market take-up of innovations. The activities will support directly the corresponding sectoral policy competences at Union level.

Remarks

The aim of this appropriation will be to support secure supply of raw materials in order to meet the needs of a growing global population within the sustainable limits of the planet's natural resources. Activities will target the improvement of the knowledge base on raw materials and the development of innovative solutions for the cost-effective and environmentally friendly exploration, extraction, processing, recycling and recovery of raw materials and for their substitution by economically attractive alternatives.

Support will also be provided for tackling barriers impeding the deployment of circular-economy business models, in particular by SMEs, such as the use of materials from waste streams, the development of industrial symbiosis processes and the building of eco-industry clusters.

— support Union policies for internal and external security, whilst at the same time improving the competitiveness and technology base of the Union's security industry and to stimulate cooperation between providers and users of security solutions. Activities will target the development of innovative technologies and solutions that address security gaps and lead to the prevention of security threats. The focus of activities shall be to fight crime and terrorism, including critical infrastructure protection; strengthen security through border management; increase Europe's resilience to crises and disasters whilst protecting personal data and fundamental human rights,

— support the strengthening of the evidence base and support for the Innovation Union and ERA which are needed to foster the development of innovative societies and policies in Europe through the engagement of citizens, enterprises and users in research and innovation and the promotion of coordinated research and innovation policies in the context of globalisation.

Remarks

This appropriation is intended to cover payments in respect of commitments remaining to be settled from previous years.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

02 04 77 Pilot Projects and preparatory actions

02 04 77 01 Pilot project — Design, roll-out and implementation of an EU-wide technical architecture to assess 112 PSAPs' readiness to transport GNSS location and other data from 112 emergency apps to European PSAPs securely and reliably

Remarks

People use smartphones and apps for everyday activities. Smartphone penetration is growing rapidly and, while society benefits from the digital world, how we will make emergency calls in the future, using apps, is not so clear. Accurate and reliable GNSS-based location data is being used for commercial and other purposes, but it is not accessible for emergency services when citizens make an emergency call.

CHAPTER 02 04 — HORIZON 2020 — RESEARCH RELATING TO ENTERPRISES *(cont'd)*

02 04 77 *(cont'd)*

02 04 77 01 *(cont'd)*

As a result, very many 112-related apps have been created and are available today, but with limited functionality and accessibility. In the recent past, almost all European emergency services have been contacted by app developers who have made proposals to develop 112 apps in order to establish a voice connection and send location data and other data directly to 112 centres.

Unfortunately, these apps can only be used by citizens living in certain geographical areas and often do not work in the same way if they are used outside the boundaries of a given Public Service Answering Points (PSAPs) area. It is therefore common for apps developed in one region/country not to work in another region/country, making them redundant outside their own regions/countries.

Therefore, there is currently no pan-EU common architecture for utilising 112 apps.

Vice-Presidents Kroes and Kallas decided to work jointly on this, stating in 2010 that they intended to ensure that every European could access a 112 smartphone app in his or her own language. In recent years many 112 mobile apps had been developed, but much more could be done in the field.

Clearly, both Vice-Presidents identified the need for a common approach to developing a pan-EU architecture for 112 apps.

This project seeks to ensure PSAP readiness by funding the creation of a common EU-wide architecture to make it possible to send data, including GNSS location data and other vital information, using existing 112 apps to the most appropriate PSAP. This will ensure market freedom, which will have direct societal benefits. A series of interoperability and capability tests of both the apps and the platforms on which they run can be carried out at national and EU level.

The societal benefits will be for all citizens and will have a direct positive impact for citizens with disabilities.

The pilot project will be implemented in close collaboration with the relevant Commission stakeholders, who are currently looking into the use of GNSS location data for 112 services, using EGNOS and Galileo. The technical architecture designed as part of the project will strictly comply with the requirements of those stakeholders, ensure the involvement of 112 PSAPs and prepare the way for additional data to be sent in a harmonised manner.

The project will:

— identify the main requirements of the emergency services (the demand side), in the medium term, building on extensive research already conducted as well as carrying out further research,

— involve the design and implementation of a method for conducting interoperability tests on 112 apps and platforms in a number of EU countries,

— involve readiness and compatibility tests on a number of PSAPs across the Member States participating in the pilot project,

— benefit citizens, including those with disabilities or special needs, by creating the environment and infrastructure required to allow apps technology and solution providers (the supply side) to send GNSS-based location and other data to the most appropriate PSAP,

— build on the successful work completed as part of the REACH112 project, which identified the requirements for ensuring that people with disabilities have greater access to 112 services, and the PEACE research project , which examined IP-based emergency applications and services for next-generation networks,

— partner European data protection authorities, European technology providers, free software communities, emergency services organisations, research and development laboratories, application developers, telecommunication network providers, Voice- Over-IP providers and other software providers to build on expertise in a collaborative fashion,

— map the future of 112 apps in line with citizens' and emergency services' needs and requirements in order to deliver on the vision for greater efficiencies and more impactful and effective services for our society.

At present, most 112 PSAPs in Europe are based on old analogue technologies and legacy-based networks. As a result, PSAPs have a very limited capability to handle emergency communications other than voice and are significantly out of step with the speed of modern communications systems. Citizens' expectations are also significantly greater than emergency services' capabilities, and many citizens with disabilities are not receiving an equivalent service. The 2014 COCOM Report also highlighted the lack of accessibility for citizens with disabilities and of accurate, reliable and on-time caller location information.

Many Member States are struggling to understand the impact and reach of apps based services and, especially, how such services access and interact with 112. European national authorities have limited exposure to apps-based services and urgently need to test the boundaries in order to be able to regulate effectively and proportionately and protect the consumer appropriately. Given the lack of cohesion and coordination with apps services and technologies, there is a need for such services to be developed and tested so that there is a match between their capabilities and an appropriate and effective standardisation and regulatory approach which includes assessment of privacy, data theft and surveillance risks.

As a result, all stakeholders need to be provided with a neutral, non-discriminatory, innovative architecture to ensure interoperability and to help design apps solutions that make for a more effective and efficient 112 service for the benefit of European citizens and visitors.

Remarks

The project will involve:

— developing cooperation between the Commission and the European Defence Agency (EDA) in connection with the Agency implementing Union objectives and managing Union budget appropriations, as provided for by Council Decision 2011/411/CFSP,

— funding two research and development activities:

  — one high-risk, high-payoff research activity whose outcome could potentially reshape future operations. The beneficiaries should be selected by means of a competition of ideas. The EDA will carry out the activity on behalf of the Union. Member States, the Commission and the EEAS will keep a watching brief on the activity in an advisory capacity. Third countries and organisations which have concluded an administrative arrangement with the EDA may also be invited to monitor the activity,

  — one research and development activity for certification against military and — if applicable — civilian requirements. Member States and third countries and organisations which have concluded an administrative arrangement with the EDA will be invited to contribute to the activity. The EDA will manage the activity on behalf of the Union and the other contributing members,

— monitoring the two processes in order to learn lessons for future EU action in support of building defence capabilities relevant for the CSDP and for Member States. The EU Military Staff should participate in the monitoring team.

Where appropriate, the NATO Secretary-General should be invited to send an observer to meetings held under this pilot project.

Work on weapons which due to their very nature would not be compliant with international humanitarian law, on lethal or excessively destructive weapons and related warhead technologies, and on autonomous target discrimination and engagement without human interaction will not be funded under this pilot project.

CHAPTER 02 06 — EUROPEAN EARTH OBSERVATION PROGRAMME *(cont'd)*

02 06 01 *(cont'd)*

This appropriation will, in particular, fund the set-up, the establishment and operation of the six services mentioned in the Copernicus Regulation and the related activities.

This appropriation may also fund cross-cutting activities among the services or their articulation and co-ordination, as well as for the in-situ co-ordination, user uptake and training and communication.

The budget envelope will be managed either directly by the Commission services or indirectly via delegation agreements with Union agencies and international organisations, or any entity eligible under Article 58 of the Financial Regulation.

When the Commission manages the budget directly, it may entrust the Joint Research centre with scientific and technical support tasks. The funding of these tasks may be entered into the JRC's indirect budget under Article 183(2)(c) and (6) of the Financial Regulation.

In addition, in support of competiveness and growth, this appropriation may also fund data dissemination and the incubation of new businesses by supporting more robust and innovative IT structures in Europe.

Copernicus services will facilitate access to key data required in policy formulation at Union, national, regional and local level in fields such as agriculture, forest monitoring, water management, transport, urban planning, climate change and many others. This appropriation covers mainly the implementation of delegation agreements for the Copernicus programme, pursuant to Article 58 of the Financial Regulation.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget. Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidate countries for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Any revenue from contributions from third parties entered in Item 6 0 3 3 of the statement of revenue will give rise to the provision of additional appropriations to be entered in this Item in accordance with the Financial Regulation.

CHAPTER 02 06 — EUROPEAN EARTH OBSERVATION PROGRAMME *(cont'd)*

Remarks

The aim of this appropriation is to:

— build an autonomous Union's Earth observation capacity by funding the space infrastructure and favouring the European industry in that regard, namely in the construction and launch of satellites,

— contribute to the availability of the observation capacity necessary to enable the Copernicus services, in particular through the operations of the ground segment of the space infrastructure,

— create opportunities for increased private sector usage of information sources, thereby facilitating innovation by value-adding service providers.

The development of a European space infrastructure has a key role in enhancing competitiveness and innovation, and requires consistent public intervention to sustain the industrial effort.

This appropriation will fund the development and construction of satellites, as well as their operation. The data and information obtained through the space infrastructure is subject to the free, full and open data policy, which will increase their availability and thereby boost the downstream market.

To supplement the data needed by users, this appropriation may also fund the acquisition of data from third parties and the access to contributing mission from Member States, as well as the dedicated dissemination platform (core ground segment) which will serve, in priority the operational services funded by Article 02 06 01.

The budget envelope will be managed either directly by the Commission services or indirectly via delegation agreements with Union agencies and international organisations, or any entity eligible under Article 58 of the Financial Regulation.

When the Commission manages the budget directly, it may entrust the Joint Research centre with scientific and technical support tasks. The funding of these tasks may be entered into the JRC's indirect budget under Article 183(2)(c) and (6) of the Financial Regulation.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidate countries for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Any revenue from contributions from third parties entered in Item 6 0 3 3 of the statement of revenue will give rise to the provision of additional appropriations to be entered in this Item in accordance with the Financial Regulation.

Remarks

In order to ensure that the rules on competition concerning agreements, decisions by associations of undertakings and concerted practices (Article 101 of the Treaty on the Functioning of the European Union), abuses of a dominant position (Article 102 of the Treaty on the Functioning of the European Union), aids granted by States (Articles 107 and 108 of the Treaty on the Functioning of the European Union) and concentrations between undertakings (Regulation (EC) No 139/2004) are enforced, the Commission is empowered to take decisions, to conduct investigations and to impose penalties or order recovery.

The Commission's decisions are subject to review by the Court of Justice of the European Union in accordance with the Treaty on the Functioning of the European Union.

As a prudential measure, it is appropriate to take into account the possibility of budgetary implications stemming from rulings of the Court of Justice of the European Union.

This appropriation is intended to cover any expenditure arising from damages awarded by the Court of Justice of the European Union to claimants and resulting from legal proceedings against the Commission's decisions in the field of competition.

Since a reasonable estimate of the financial impact on the general budget cannot be established beforehand, a token entry ('p.m.') appears in this article. If necessary, the Commission will propose to make available the appropriations related to actual needs by means of transfers or through a draft amending budget.

Remarks

This appropriation is intended to cover expenditure on studies, committees, meetings of experts, conferences, information and publications directly linked to the achievement of the objectives of the programme or measures falling under this item, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations, according to the same ratio as between the amount authorised for expenditure on administrative management and the total appropriations entered for the programme, in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

Remarks

This appropriation is intended to cover:

— expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts for the mutual benefit of the Commission and beneficiaries,

— expenditure on studies, meetings of experts, information and publications directly linked to the achievement of the objective of the Instrument for Pre-Accession Assistance.

Any income from financial contributions from Member States and third countries, including in both cases their public agencies, entities or natural persons to certain external aid projects or programmes financed by the Union and managed by the Commission on their behalf, may give rise to the provision of additional appropriations. Such contributions under Article 6 3 3 of the statement of revenue constitute assigned revenue under Article 21(2)(b) of the Financial Regulation. The amounts entered on the line for administrative support expenditure will be determined, without prejudice to Article 187(7) of the Financial Regulation, by the contribution agreement for each operational programme with an average not exceeding 4 % of the contributions for the corresponding programme for each chapter.

This appropriation covers administrative expenditure under Chapter 04 05.

Remarks

Article 175 of the Treaty on the Functioning of the European Union (TFEU) provides that the objectives of economic, social and territorial cohesion set out in Article 174 shall be supported by the action it takes through the Structural Funds, which includes European Social Fund ('ESF'). The tasks, priority objectives and the organisation of the Structural Funds are defined in accordance with Article 177 TFEU.

Article 80 of the Financial Regulation provides for financial corrections in the event of expenditure incurred in breach of applicable law.

Article 39 of Regulation (EC) No 1260/1999, Articles 100 and 102 of Regulation (EC) No 1083/2006 and Articles 85, 144 and 145 of Regulation (EU) No 1303/2013 on criteria for financial corrections by the Commission provide for specific rules on financial corrections applicable to the ESF.

Any revenue from the financial corrections carried out on that basis is entered in Item 6 5 0 0 of the statement of revenue and constitutes assigned revenue in accordance with Article 21(3)(c) of the Financial Regulation.

Article 177 of the Financial Regulation lays down the conditions for the repayment in full, or in part, of pre-financing payments in respect of a given operation.

Article 82 of Regulation (EC) No 1083/2006 provides for specific rules on repayment of pre-financing amounts applicable to the ESF.

CHAPTER 04 02 — EUROPEAN SOCIAL FUND *(cont'd)*

Pre-financing amounts repaid shall constitute internal assigned revenue in accordance with Article 21(4) of the Financial Regulation and shall be entered in Item 6 1 5 0 or 6 1 5 7.

Measures to combat fraud are funded under Article 24 02 01.

Remarks

This appropriation is intended to cover the funding by the ESF of commitments remaining to be settled from the 2000-2006 programming period for innovative actions and technical assistance as provided for in Articles 22 and 23 of Regulation (EC) No 1260/1999. The innovative actions included studies, pilot projects and exchanges of experience. They were intended in particular to bring about a qualitative improvement in Structural Fund measures. Technical assistance covered preparatory, monitoring, evaluation, supervision and management measures required for implementation of the ESF. This appropriation was, in particular, used to cover:

— support expenditure (representation expenses, training, meetings and missions),

— information and publishing expenditure,

— expenditure on information technology and telecommunications,

— contracts for the provision of services and studies,

— grants.

Remarks

This appropriation is intended to cover commitments remaining to be settled for programmes under the ESF convergence objective in the 2007-2013 programming period. That objective is aimed at speeding up the convergence of the least developed Member States and regions by improving conditions for growth and employment.

This appropriation aims to reduce the economic, social and territorial disparities which have arisen, particularly in countries and regions whose development is lagging behind, in connection with the speeding-up of economic and social restructuring and population ageing.

In accordance with Article 105a(1) of Regulation (EC) No 1083/2006, as modified by point 7 of Annex III to the Treaty concerning the Accession of the Republic of Croatia to the European Union (OJ L 112, 24.4.2012), programmes and major projects which, on the date of accession of Croatia, have been approved under Regulation (EC) No 1085/2006 and the implementation of which has not been completed by that date, shall be considered to have been approved by the Commission under Regulation (EC) No 1083/2006, with the exception of the programmes approved under the components referred to in points (a) and (e) of Article 3(1) of Regulation (EC) No 1085/2006.

Remarks

This appropriation is intended to cover commitments remaining to be settled for the programmes under the ESF regional competitiveness and employment objective during the 2007-2013 programming period. That objective shall, outside the least developed regions, be aimed at strengthening regions' competitiveness and attractiveness as well as employment by taking into consideration the goals set in the Europe 2020 strategy.

This appropriation aims to reduce the economic, social and territorial disparities which have arisen, particularly in countries and regions whose development is lagging behind, in connection with the speeding-up of economic and social restructuring and population ageing.

This appropriation is intended to cover commitments remaining to be settled from the 2007-2013 programming period for technical assistance measures as provided for in Articles 45 and 46 of Regulation (EC) No 1083/2006 and in Article 9 of Regulation (EC) No 1081/2006.

Technical assistance covers preparatory, monitoring, evaluation, supervision and management measures required for implementation of the ESF. This appropriation may, in particular, be used to cover:

— support expenditure (representation expenses, training, meetings and missions),

— information and publishing expenditure,

— expenditure on information technology and telecommunications,

— expenditure on support for accessibility for people with disabilities within technical assistance measures,

— expenditure on a high-level group to ensure the implementation of overarching principles such as equality between men and women, accessibility for people with disabilities and sustainable development,

— contracts for the provision of services and studies,

— grants.

This appropriation is also intended to support measures approved by the Commission in the context of the preparation of the 2014-2020 programming period.

Remarks

This appropriation is intended to cover ESF support under the Investment for growth and jobs goal in less developed regions in the 2014-2020 programming period. The catching up process for these economically and socially lagging regions requires long-term sustained efforts. This category of regions concerns those regions whose GDP per capita is less than 75 % of the average GDP of the EU-27.

Remarks

This appropriation is intended to cover ESF support under the Investment for growth and jobs goal in the 2014-2020 programming period in a new category of region ('transition regions') that replaces the 2007-2013 phasing-out and phasing-in system. This category of regions includes all regions with a GDP per capita is between 75 and 90 % of the average GDP of the EU-27.

Remarks

This appropriation is intended to cover ESF support under the Investment for growth and jobs goal in more developed regions in the 2014-2020 programming period. While interventions in the less developed regions will remain the priority for cohesion policy, this appropriation is thus intended to cover important challenges that concern all Member States such as global competition in the knowledge-based economy, the shift towards the low carbon economy and social polarisation exacerbated by the current economic climate. This category of regions concerns those regions whose GDP per capita is above 90 % of the average GDP of the EU-27.

Legal basis

Remarks

This appropriation is intended to provide additional support to measures against youth unemployment financed by the ESF. It represents the specific allocation to the Youth Employment Initiative under the Investment for growth and jobs goal in regions with a level of youth unemployment exceeding 25 % in 2012 or for Member States where the youth unemployment rate has increased by more than 30 % in 2012, regions that have a youth unemployment rate of more than 20 % in 2012 ('eligible regions'). The additional EUR 3 000 000 000 allocated to this line for the 2014-2020 period is intended to provide match funding to ESF interventions in the eligible regions. This appropriation is intended to finance the creation of decent jobs.

The margins available below the multiannual financial framework (MFF) ceilings for commitment appropriations for 2014-2017 will constitute a global MFF margin for commitments, to be made available over and above the ceilings established in the MFF for 2016-2020 for policy objectives related to growth and employment, in particular youth employment, as established in the Council Regulation laying down the multiannual financial framework for the years 2014-2020.

Remarks

The objective of this activity is to promote geographic and professional mobility (including the coordination of social security schemes) of workers in Europe in order to overcome the obstacles to free movement of workers and to contribute to the establishment of a real labour market at European level.

This appropriation is intended to cover actions supporting the monitoring of Union law through financing of a network of experts on free movement of workers and social security reporting regularly on the implementation of Union legal acts in the Member States and at Union level, and analysing and evaluating the major trends in legislations of the Member States with regard to the free movement of workers and coordination of social security systems. This appropriation is also intended to cover actions supporting governance of Union legal acts through meetings of the committees, actions for awareness raising and implementation and other specific technical support and the development of Electronic Exchange of Social Security Information (EESSI) system and its implementation.

This appropriation is intended to cover in particular:

CHAPTER 04 03 — EMPLOYMENT, SOCIAL AFFAIRS AND INCLUSION *(cont'd)*

04 03 01 *(cont'd)*

04 03 01 03 *(cont'd)*

— expenditure on studies, meetings of experts, information and publications directly linked to the achievement of the objectives of the programme or measures falling under this item, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts,

— the analysis and evaluation of the major trends in legislation of the Member States with regard to the free movement of workers, and coordination of social security systems, as well as the financing of networks of experts in those fields,

— the analysis and research on new policy developments in the domain of free movement of workers linked for example to the end of transitional periods and modernisation of social security coordination provisions,

— support for the work of the Administrative Commission and its sub-groups and follow-up of the decisions taken, as well as support for the work of the Technical and Advisory Committees on free movement of workers,

— support for actions preparing for the application of the new regulations on social security, including transnational exchanges of experience and information and training initiatives developed at national level,

— the financing of actions aimed at providing a better service and raising public awareness, including measures aimed at identifying migrant workers' social security problems, and measures speeding up and simplifying administrative procedures, analysis of the barriers to free movement of workers and lack of coordination of social security systems and their impact on people with disabilities, including adaptation of administrative procedures to new information-processing techniques, in order to improve the system for acquiring rights and the calculation and payment of benefits pursuant to Regulations (EEC) No 1408/71, (EEC) No 574/72, Regulation (EC) No 859/2003 as well as Regulation (EC) No 883/2004, its implementing Regulation (EC) No 987/2009, and Regulation (EU) No 1231/2010,

— the development of information and actions to make members of the public aware of their rights on free movement of workers and coordination of social security schemes,

— the support of the electronic exchange of social security information among Member States, with a view to facilitating the implementation of Regulation (EC) No 883/2004 and its implementing Regulation (EC) No 987/2009. This includes the maintenance of the central node of the EESSI system, testing system components, helpdesk activities, support for further development of the system and training.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Legal basis

Treaty on the Functioning of the European Union, and in particular Articles 45 and 48 thereof.

Remarks

The objective of this activity is to promote better policy responses in the Member States to demographic and social challenges by producing and disseminating comparative information in the context of the implementation of the Europe 2020 strategy and the identification of future priorities for social policies, including gender-specific measures.

CHAPTER 04 03 — EMPLOYMENT, SOCIAL AFFAIRS AND INCLUSION *(cont'd)*

04 03 01 *(cont'd)*

04 03 01 04 *(cont'd)*

This appropriation is intended to cover actions promoting the development of comparative analysis and the exchange of views and experience at all relevant levels (regional, national, Union, international) regarding the social and demographic situation and the socio-economic trends in the Union, as well as the gender pay gap and discrimination against women in the workplace. This appropriation is also intended to cover actions supporting an Observatory of the Social Situation, the cooperation with relevant activities in Member States and with international organisations and the management of a technical support group for the European Alliance for Families.

This appropriation is intended to cover in particular expenditure on studies, meetings of experts, information and publications directly linked to the achievement of the objectives of the programme or measures falling under this item, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts.

This appropriation is intended to cover in particular expenditure on Commission reports (including an annual report on the social situation and a report on demographic change and its implications every two years, in accordance with Article 159 TFEU), as well as Commission reports on problems concerning the social situation (which can be requested by the European Parliament pursuant to Article 161 TFEU).

This appropriation is also intended to cover expenditure on analysis for the reporting referred to in TFEU, as well as for the dissemination of knowledge on major social and demographic challenges and ways of tackling them. In particular, the following activities can be pursued with due consideration of the gender aspect:

— analysis of the impact of population ageing in the context of a society for all ages, in terms of trends in care and social protection needs, behaviour and flanking policies, including research on elderly minorities or migrants and the situation of informal carers,

— analysis of the impact of demographic change on Union and Member State policies, measures and programmes, and formulation of recommendations for adjustments to economic and other policies, measures and programmes at Union and national levels in order to prevent the ageing of society from having a negative impact,

— analysis of the links between family units and demographic trends,

— analysis of trends in poverty, income and wealth distribution and their broader societal impact,

— identification of the existing relations between technological development (impact on communication technologies, geographical and occupational mobility) and the consequences for households and society in general,

— analysis of the links between disability and demographic trends, analysis of the social situation of people with disabilities and their families and the needs of children with disabilities within their families and communities,

— analysis of trends in social objectives (in terms of safeguarding acquired rights or extending them) regarding both goods and services, taking account of new social challenges as well as demographic trends and changing the relationships between generations,

— development of appropriate methodological tools (sets of social indicators, simulation techniques, data collection on policy initiatives at all levels, etc.), so as to underpin the reports on the social situation, on social protection and social inclusion with a solid quantitative and scientific foundation,

Remarks

This appropriation is intended to cover expenditure on information and training measures for workers' organisations, including representatives of workers' organisations in the candidate countries, deriving from Union action in the framework of the implementation of the Union social dimension. Those measures should help workers' organisations to address the overarching challenges facing European employment and social policy as laid down in the Europe 2020 strategy and within the context of Union initiatives to address the consequences of the economic crisis.

This appropriation is intended to cover in particular the following activities:

— support for the work programmes of the two specific trade union institutes, European Trade Union Institute and European Centre for Workers' Questions, which have been established to facilitate capacity-building through training and research at European level, as well as to improve the degree of involvement of workers' representatives in European governance,

— information and training measures for workers' organisations, including representatives of workers' organisations in the candidate countries, deriving from the implementation of Union action in the framework of the implementation of the Union social dimension,

— measures involving representatives of the social partners in the candidate countries with the specific purpose of promoting social dialogue at Union level. It is also intended to promote equal participation of women and men in the decision-making bodies of workers' organisations.

Remarks

This appropriation is intended to cover in particular the following activities:

— measures to set the conditions for social dialogue in companies and proper employee involvement in undertakings as provided under Directive 2009/38/EC on European Works Councils, Directives 2001/86/EC and 2003/72/EC on employees' involvement in the European company and in the European cooperative society, respectively, Directive 2002/14/EC establishing a general framework for informing and consulting employees in the European Community, Directive 98/59/EC on collective redundancies and Article 16 of Directive 2005/56/EC on cross-border mergers of limited liability companies,

— initiatives to strengthen transnational cooperation between workers' and employers' representatives in respect of information, consultation and participation of employees within companies operating in more than one Member State and short training actions for negotiators and representatives in transnational information, consultation and participation bodies may be funded in that context. This may involve social partners from candidate countries,

— measures to enable social partners to exercise their rights and duties as regards employee involvement, especially within the framework of European Works Councils, to familiarise them with transnational company agreements and strengthen their cooperation in respect to Union law on employee involvement,

— operations fostering the development of employee involvement in undertakings as well as to follow up on the findings of the 'Fitness check' on Union acts in the area of information and consultation of workers,

Remarks

The European Year for Active Ageing and Solidarity between Generations was intended to raise general awareness of the value of active ageing, to stimulate debate, to exchange information and to develop mutual learning between Member States and stakeholders at all levels, to offer a framework for commitment and concrete action to enable the Union, Member States and stakeholders at all levels to develop innovative solutions, policies and long-term strategies through specific activities and to pursue specific objectives relating to active ageing and intergenerational solidarity, and to promote activities which will help to combat age discrimination.

This appropriation is intended to cover at Union-level activities in line with the European Year's for Active Ageing and Solidarity between Generations objectives and to cover the costs relating to the organisation of the closing Union conference by the incumbent Presidency. Part of this appropriation will also cover the costs relating to the evaluation of the European Year for Active Ageing and Solidarity between Generations.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto must be added to the appropriations entered in this item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Remarks

The objective of this activity is to strengthen the role of social dialogue and promote the adoption of agreements and other joint actions between the social partners at the Union level. The actions financed should help social partner organisations to address the overarching challenges facing European employment and social policy as laid down in the Europe 2020 strategy and within the context of Union initiatives to address the consequences of the economic crisis and to contribute to the improvement and dissemination of knowledge of industrial relations institutions and practices.

This appropriation is intended to cover in particular the following activities:

— studies, consultations, meetings of experts, negotiations, information, publications and other operations directly linked to the achievement of the objectives of the programme or measures falling under this item, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts,

— actions undertaken by social partners to promote social dialogue (including capacity of social partners) at cross-industry and sector level,

— actions to improve knowledge on industrial relations institutions and practices across the Union and dissemination of results,

— measures involving representatives of the social partners in the candidate countries with the specific purpose of promoting social dialogue at Union level. It is also intended to promote equal participation of women and men in the decision-making bodies of both trade unions and employers' organisations,

— actions to support industrial relations measures, in particular those designed to develop expertise and the exchange of Union-relevant information.

Legal basis

Task resulting from specific powers directly conferred on the Commission by the Treaty on the Functioning of the European Union pursuant to Articles 154 and 155.

Remarks

The general objective of the European Union Programme for Employment and Social Innovation (EaSI) is to contribute to the Europe 2020 strategy and the related headline targets for employment, education and poverty by providing financial support for the Union's objectives.

To achieve the general objectives of EaSI in terms of promoting a high level of employment, guaranteeing adequate social protection, combating social exclusion and poverty, improving working conditions and protecting worker's safety and health, the specific objectives of the Progress axis are to:

— develop and disseminate high-quality comparative analytical knowledge in order to ensure that Union employment and social policy and working conditions and occupational health and safety legislation are based on sound evidence and are relevant to needs, challenges and conditions in the individual Member States and the other participating countries,

— facilitate effective and inclusive information-sharing, mutual learning and dialogue on Union employment and social policy and working conditions and occupational health and safety legislation at Union, national and international level in order to assist the Member States and the other participating countries in developing their policies and in implementing Union law,

— provide policymakers with financial support to promote social and labour market policy reforms, build up the main actors' capacity to design and implement social experimentation, and make the relevant knowledge and expertise accessible,

— monitoring and evaluating the implementation of the European Employment Guidelines and Recommendations and their impact, notably through the Joint Employment Report, and analysing the interaction between the EES and general economic and social policy areas,

— provide Union and national organisations with financial support to develop, promote and support the implementation of Union employment and social policy and working conditions and occupational health and safety legislation,

— raising awareness, exchanging good practice, disseminating information and promoting the debate on the key challenges and policy issues in relation to working conditions, gender equality, occupational health and safety and the reconciliation of work and family life and the ageing society, including among social partners,

— to encourage job creation, promote youth employment and fight poverty by promoting increased social convergence by means of Social Mark.

In addition support could be provided to actions related to the implementation of the common provisions of EaSI such as monitoring, evaluation, dissemination of results and communication. Article 16 of Regulation (EU) No 1296/2013 describes the types of actions which may be financed.

Remarks

The general objective of the European Union Programme for Employment and Social Innovation ('EaSI') is to contribute to the Europe 2020 strategy and the related headline targets for employment, education and poverty by providing financial support for the Union's objectives.

The EaSI is structured around three complementarity axes: Progress, EURES and Microfinance and Social Entrepreneurship.

To achieve the general objectives of EaSI in particular to promote workers' geographical mobility and boost employment opportunities by developing Union labour markets that are open and accessible to all, whilst also contributing to the promotion of gender equality and gender mainstreaming, the specific objectives of the EURES axis are to:

— ensure that job vacancies and applications, and any related information as well as working conditions and rights are transparent for the potential applicants and the employers; this shall be achieved through their exchange and dissemination at transnational, interregional and cross-border level using standard interoperability forms,

— help ensure that European-level job vacancies and mobility options are advertised in parallel to national job vacancies and applications and not only after local or national options are exhausted,

CHAPTER 04 03 — EMPLOYMENT, SOCIAL AFFAIRS AND INCLUSION *(cont'd)*

04 03 02 *(cont'd)*

04 03 02 02 *(cont'd)*

— develop services for the recruitment and placing of workers in employment through the clearance of job vacancies and applications at European level; this shall cover all phases of placement, ranging from pre-recruitment preparation to post-placement assistance, including language skill development options, with a view to the applicant's successful integration into the labour market; such services shall include targeted mobility schemes to fill job vacancies where labour market shortcomings have been identified and/or help particular groups of workers such as young people,

— provide assistance for national and cross-border support activities organised by EURES partners,

— initial and further training of EURES advisers in the Member States,

— contacts between EURES advisers and cooperation between government employment services, including those of candidate countries,

— promotion of EURES among firms and the general public,

— development of special structures for cooperation and services in border regions pursuant to Article 17(1)(b) of Regulation (EEC) No 1612/68,

— measures to help remove mobility obstacles, particularly in the field of work-related social security.

Objectives should include a gender-sensitive approach, including gender budgeting and gender impact assessment.

This programme should also facilitate the matching and placement of apprentices and trainees as a critical element in helping the transition of young people from school to work, as already begun under the preparatory action 'Your first EURES job' and complemented by the Youth Employment Initiative. Companies, particularly small and medium-sized enterprises (SMEs), will be encouraged to recruit more young people, including by financial support.

Target groups:

— young people up to 30 years of age, regardless of their qualifications and work experience as the scheme is not exclusively tailored for labour market entrants,

— all legally established businesses, particularly SMEs, to assist with reducing the costs of international hiring that affect mostly smaller companies.

Eligible jobs under this part of the programme will offer young people apprenticeships, a first work experience or specialised jobs. The scheme will not support situations of job substitution or precarious employment, or in any circumstances be contrary to national labour law.

To be eligible for funding, jobs have also to comply with the following criteria:

— be located in a EURES member country other than the country of origin of the young job seeker (transnational vacancies),

— ensure a work placement for a minimum contractual period of six months.

To achieve the general objectives of EaSI in particular to promote employment and social inclusion by increasing the availability and accessibility of microfinance for vulnerable groups and micro-enterprises, and by increasing access to finance for social enterprises, whilst also contributing to the promotion of gender equality and gender mainstreaming, the specific objectives of the Microfinance and Social Entrepreneurship axis are to:

— increase access to, and the availability of, microfinance for persons who have lost or are at risk of losing their jobs, or who have difficulty in entering or re-entering the labour market, persons at risk of social exclusion and vulnerable persons who are in a disadvantaged position with regard to access to the conventional credit market and who wish to start up or develop their own micro-enterprises; and for micro-enterprises, especially those which employ these persons as referred to,

— build up the institutional capacity of microcredit providers,

— support the development of social enterprises, in particular by facilitating access to finance on the basis of a gender-sensitive approach.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. Remarks

This appropriation is intended to cover the European Foundation for the Improvement of Living and Working Conditions (Eurofound) staff and administrative expenditure (Titles 1 and 2), and operational expenditure for the work programme (Title 3).

The Eurofound must inform the European Parliament and the Council about transfers of appropriations between operational and administrative expenditure.

The Union contribution for 2015 amounts to a total of EUR 20 371 000.

Part of this appropriation is intended for the work of the European Monitoring Centre for Change, decided upon at the Nice European Council of 7 to 9 December 2000 with a view to identifying, anticipating and managing technological, social (in particular demographic) and economic trends. To that end, high-quality information must be collected, processed and analysed.

Part of this appropriation is intended to cover also work on three topics of importance in relation to family policies:

— family-friendly policies in the workplace (balance between work and family life, working conditions, etc.),

— factors influencing the situation of families with regard to community housing (access to decent housing for families),

— lifelong family support concerning, for example, childcare and other issues that fall within the Foundation's forms of reference.

This appropriation is also intended to cover studies on the impact of new technologies in the workplace and on occupational illnesses.

The Foundation's establishment plan is set out in Annex 'Staff' to this section.

Remarks

This appropriation is intended to cover the European Agency for Safety and Health at Work (Agency) staff and administrative expenditure (Titles 1 and 2), and operational expenditure relating to the work programme (Title 3).

The Agency must inform the European Parliament and the Council about transfers of appropriations between operational and administrative expenditure.

The Agency's objective is to provide the Union institutions, Member States and interested parties with technical, scientific and economic information of use in the area of health and safety at work.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

The Union contribution for 2015 amounts to a total of EUR 14 679 000. An amount of EUR 145 000 coming from the recovery of surplus is added to the amount of EUR 14 534 000 entered in the budget.

This appropriation is intended to cover the measures necessary to accomplish the Agency's tasks as defined in Regulation (EC) No 2062/94, and in particular:

— awareness-building and risk anticipation measures, with special emphasis on SMEs,

— operation of the European Risk Observatory based on examples of good practice collected from firms or specific branches of activity,

— preparation and provision of relevant tools for smaller companies to manage health and safety at work,

— operation of the network comprising the main component elements of the national information networks, including the national social partner's organisations, according to national legislation and/or practice, as well as the national focal points,

— also in collaboration with the International Labour Organization and other international organisations, organising exchanges of experience, information and good practices,

— integrating the candidate countries into these information networks and devising working tools which are geared to their specific situation,

— organising and running the European Campaign on Healthy Workplaces as well as the European Week on health and safety, focusing on specific risks and needs of users and final beneficiaries.

The Agency's establishment plan is set out in Annex 'Staff' to this section.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

This appropriation is intended to continue to cover actions with the general objective to ensure the equal treatment and non-discrimination of migrant workers on the host labour market by means of information centres in the Member States to provide information, advice and support, including legal support, to posted workers as well as to migrant workers.

The objective of this preparatory action is to ensure the equal treatment and non-discrimination of migrant workers on the host labour market by means of information centres in the Member States to provide information, advice and support, including legal support, to migrant workers.

This preparatory action is linked to the upcoming Union initiative on the freedom of movement within the Union. This initiative is aimed at improving the enforceability of Regulation (EU) No 492/2011 of the European Parliament and of the Council of 5 April 2011 on freedom of movement for workers within the Union (OJ L 141, 27.5.2011, p. 1). It aims to remove existing barriers to mobility of Union workers by enhancing the enforcement of rights conferred by Union law and providing information and legal support to migrants facing discrimination based on nationality. This preparatory action will build on the work done in the framework of the past pilot project 'Working and living conditions of posted workers' (Item 04 03 77 03) as well as actions started under the preparatory action in 2013.

Actions:

— a study to explore the modalities of organising a network of centres across the Union,

— launching 3 pilot measures to test the network of centres in selected Member States,

— a stakeholder conference.

The information centres can be based upon established trade union information activities and should with the assistance of the Commission:

— provide immigrant groups with support and information with regard to labour and foreign national issues,

— provide legal services for EU migrants who may be the object of exploitation and harassment, and who are entitled to present claims and formal complaints in accordance with current legislation,

— combat discrimination and intolerance, which damage labour and social integration,

— support those in an irregular situation by providing legal assistance with the objective of regularising workers and defending their fundamental rights,

— keep up-to-date and provide permanent legal information, in particular in relation to employment cases, in order to ensure the full recognition of the rights of posted and migrant workers,

— provide legal support in the following cases: deportation orders, migrants in irregular situations, undocumented migrant workers, work and residence permit renewal,

— develop actions that tackle the fight against undeclared work and develop employer's awareness of the issue of undeclared work,

— develop campaigns about labour market shortages and hiring in the country of origin,

— design informative campaigns and hold conferences, seminars, etc.,

— foster cooperation and the exchange of information between employment and immigration services.

The expected results of this preparatory action are: helping a smooth integration of migrant workers in host labour markets while at the same time helping them to protect and enforce their right to equal treatment. In terms of improving the administrative environment, the preparatory action will foster cooperation between employment and immigration services at the level of the Commission and the Member States.

TITLE 04 — EMPLOYMENT, SOCIAL AFFAIRS AND INCLUSION

CHAPTER 04 03 — EMPLOYMENT, SOCIAL AFFAIRS AND INCLUSION *(cont'd)*

04 03 77 *(cont'd)*

04 03 77 14 *(cont'd)*

This preparatory action builds on the importance of social innovation and the emergence of social enterprises. Together these serve as drivers of change that operate on the basis of viable business models to further inclusive, socially fairer and environmentally sustainable growth. They also generate jobs through activities that meet social needs in the context of sustainable and inclusive development. The objective of this preparatory action is to identify, develop, promote and disseminate the good practice of national, regional or local governments and of financial intermediaries in assisting young or social entrepreneurs at times of high youth unemployment. As such, the preparatory action contributes to realising the potential of young and social entrepreneurship, emphasised also in the Annual Growth Survey 2012 and in the Commission communication of 18 April 2012 entitled 'Towards a job-rich recovery' (COM(2012) 173 final). The goal is to improve the economic and social situation at local level, and this preparatory action will show ways in which support for young and social entrepreneurship can be most effectively incorporated into regional, urban and/or local development strategies. Special focus is made on the use in the 2014-2020 period of Union financial instruments, in particular the Structural Funds.

The main task will be to work together with potential finance providers (in particular managing authorities for Structural Fund programmes, notably those financed by the ESF), and financial intermediaries, including the EIB Group, in a limited number of pilot regions. This will help develop and establish feasible, suitable and reliable schemes or funds providing equity or mezzanine funding (including venture philanthropy). These can be used to support structures providing business development services and networking facilities, with the aim of stimulating and facilitating the green shoots of development and growth in social enterprises. Actions may include feasibility studies, mutual learning, dissemination of good practice, and targeted assistance to the national or regional authorities, where appropriate. Where relevant, such actions may build on the results of previous actions for capacity-building and mutual learning of regional authorities and financial intermediaries, such as the JESSICA Networking Platform ([1]). The results of these learning pilots will be beneficial for implementing the relevant Europe 2020 strategy flagship initiatives ([2]), and will prepare the ground for effective use of the ESF and other Union funds after 2014.

04 03 77 15 *(cont'd)*

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project. This pilot project aims at assessing the feasibility and added value of introducing a European unemployment insurance or benefit scheme possibly taking the form of a minimum unemployment allowance. The ultimate aim would be to pave the way for the concrete implementation of this idea, as a key component of the social dimension of the Economic and Monetary Union.

The actions/measures to be funded are:

— a detailed study in three part on the options, feasibility and added value of a European insurance scheme. First, the study will examine the different possible options as for the scope and content of the scheme, inter alia a minimum unemployment allowance. Second, the study will test their feasibility with due regard for differing practices, and for collective labour agreements and legislation in the various Member States. Third, the study should asses their European added value and in particular how such scheme could allow economic growth, prevent poverty and serve as a basis for people to live in dignity, play a full part in society and make headway with finding employment, and which will play an automatic stabilising role for the economy,

— the creation of a network to facilitate the exchange of best practices between Member States, local and territorial administrations, trade unions and associations on national unemployment insurance schemes. The information collected and exchanged should also facilitate the drawing up of the study,

— the organisation of a high-level conference at the end of the project to communicate and debate the results of the study.

This pilot project will investigate the benefits of introducing and – if appropriate – making available a forgery-proof European electronic document containing individuals' social security details, on which could be stored all the data needed to verify the bearer's employment status, such as details on his or her social security status and working hours, and which would be subject to strict data-protection rules, particularly where privacy-sensitive personal data is processed.

The measures covered will include:

— a report on best practices in Member States which have already implemented similar systems;

— devising a preparatory action, based on the report, to help introduce this document in specific sectors/countries;

— an impact assessment and cost-benefit analysis of the production of such an electronic document;

— a comparative analysis of the social security systems in the EU-28 which can serve as a basis for building knowledge about the significant variations between Member States with regard to economic structures, size and composition of social systems.

This pilot project could also cover the design of an EU-model electronic card providing relevant information for verifying the bearer's employment status, such as details of his or her social security status and working hours.

TITLE 04 — EMPLOYMENT, SOCIAL AFFAIRS AND INCLUSION

CHAPTER 04 03 — EMPLOYMENT, SOCIAL AFFAIRS AND INCLUSION *(cont'd)*

04 03 77 *(cont'd)*

04 03 77 19 *(cont'd)*

This preparatory action will contribute to overall Union policy for combating poverty and social exclusion, especially among disadvantaged groups such as migrants. In particular, it will tie in with the Commission communications entitled 'European Platform against Poverty and Social Exclusion' (COM(2010) 758 final) and 'Towards Social Investments for Growth and Cohesion' (COM(2013) 83 final) as well as with the European Social Fund Regulation of 17 December 2013 (Regulation No 1304/2013).

Objective

This preparatory action will contribute to the welfare and full social and economic integration of migrants in Europe (both European nationals and third country nationals), especially those in extremely difficult social and economic situations (unemployment, habitual exclusion, health problems, addictions and other forms of marginalisation) through development and testing of pilot integration centres in member states with different welfare systems and labour market configurations. Those centres will form part of the European Platform against Poverty and Social Exclusion and will strengthen migrants' skills and capacities and empower them to participate fully in employment and social life by providing an integrated package of activities and services.

Actions/measures to be funded

The measures covered will include:

— creation of pilot social integration centres, which will:

  — be established in urban and rural areas with severe integration problems in selected EU countries, in partnership with local social, public and economic stakeholders;

  — run workshops and full-time vocational training schemes, job coaching schemes and apprenticeships that meet local community needs in areas such as care services, green area upkeep services, professional cleaning services and building construction services;

  — serve as one-stop shops for marginalised migrants looking for assistance with all legal and community-related issues (social assistance, job advice, financial incentives);

  — create favourable environments and local partnerships for the development of social entrepreneurship.

The pilot centres will assist with trial arrangements for the future creation of local centres for social and economic integration in all Members States as part of the European Platform against Poverty and Social Exclusion. The aim of local centres will be twofold: (1) to activate and empower migrants in order to improve their chances of re-entry into the mainstream economy and full integration in the host communities and society; (2) to assist local authorities, social partners and civil society organisations in removing barriers, supporting mobility and fostering social and economic inclusion of marginalised migrants.

Remarks

This pilot project aims to carry out studies on the consequences of reductions in welfare benefits (family allowance, long-term unemployment benefit, supplementary sickness benefit, social integration payment) in terms of increased poverty and gender inequalities.

Legal basis

Pilot project within the meaning of Article 54(2) of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1).

Remarks

This appropriation is intended to cover the EGF so as to enable the Union to demonstrate solidarity towards, and to support workers made redundant and self-employed persons whose activity has ceased as a result of major structural changes in world patterns due to globalisation, as a result of the continuation of the global financial and economic crisis addressed in Regulation (EC) No 546/2009 of the European Parliament and of the Council of 18 June 2009 amending Regulation (EC) No 1927/2006 on establishing the European Globalisation Adjustment Fund (OJ L 167, 29.6.2009, p. 26), or as a result of a new global financial and economic crisis and to provide financial support for their rapid reintegration into sustainable employment.

The actions undertaken by the EGF should be complementary to those of the European Social Fund and there must be no double funding from these instruments. EGF-supported actions or measures should aim to ensure that the largest possible number of beneficiaries participating in these actions, including a gender-sensitive approach, find sustainable employment as soon as possible before the final report is due.

The rules for entering the appropriations in this reserve and for mobilising the EGF are laid down in point 13 of the Interinstitutional Agreement of 2 December 2013 between the European Parliament, the Council and the Commission on budgetary discipline, on cooperation in budgetary matters and on sound financial management (OJ C 373, 20.12.2013, p. 1).

Legal basis

Regulation (EU) No 1309/2013 of the European Parliament and of the Council of 17 December 2013 on the European Globalisation Adjustment Fund (2014-2020) and repealing Regulation (EC) No 1927/2006 (OJ L 347, 20.12.2013, p. 855), and in particular Article 1 thereof.

Remarks

This appropriation is intended to cover the EGF so as to enable the Union to provide time-limited and targeted support for workers made redundant as a result of major structural changes in world trade patterns due to globalisation where these redundancies have a significant adverse impact on the regional or local economy. It is applicable to all applications submitted up to 31 December 2013. For applications submitted between 1 May 2009 and 31 December 2011, it may also be used to provide support to workers made redundant as a direct result of the global financial and economic crisis.

The actions undertaken by the EGF should be complementary to those of the European Social Fund. There must be no double funding from these instruments.

The rules for entering the appropriations in this reserve and for mobilising the EGF are laid down in point 13 of the Interinstitutional Agreement of 2 December 2013 between the European Parliament, the Council and the Commission on budgetary discipline, on cooperation in budgetary matters and on sound financial management (OJ C 373, 20.12.2013, p. 1).

Remarks

Under the Instrument for Pre-accession Assistance (IPA II), this appropriation will address the following specific objectives in the Western Balkans:

— support for political reforms,

— strengthening of the ability of the beneficiaries listed in Annex I of Regulation (EU) No 231/2014 at all levels to fulfil the obligations stemming from Union membership in the area of political reforms by supporting progressive alignment with and adoption, implementation and enforcement of the Union *acquis*.

Any income from financial contributions from Member States and third countries, including in both cases their public agencies, entities or natural persons to certain external aid projects or programmes financed by the Union and managed by the Commission on their behalf, may give rise to the provision of additional appropriations. Such contributions under Article 6 3 3 of the statement of revenue constitute assigned revenue under Article 21(2)(b) of the Financial Regulation. The amounts entered on the line for administrative support expenditure will be determined, without prejudice to Article 187(7) of the Financial Regulation, by the contribution agreement for each operational programme with an average not exceeding 4 % of the contributions for the corresponding programme for each chapter.

Remarks

Article 174 TFEU sets out the Union's objective of economic, social and territorial cohesion while Article 175 specifies the role of the Structural Funds in achieving this objective and makes provisions for the adoption of specific actions outside the Structural Funds.

Article 80 of the Financial Regulation provides for financial corrections in the event of expenditure incurred in breach of applicable law.

Articles 56 and 57 of Regulation (EU) No 223/2014 on criteria for financial corrections by the Commission provide for specific rules on financial corrections applicable to the FEAD.

Any revenue from the financial corrections carried out on that basis is entered in Item 6 5 0 0 of the statement of revenue and constitutes assigned revenue in accordance with Article 21(3)(c) of the Financial Regulation.

Article 177 of the Financial Regulation lays down the conditions for the repayment in full, or in part, of pre-financing payments in respect of a given operation.

Article 44 of Regulation (EU) No 223/2014 provides for specific rules on repayment of pre-financing applicable to the FEAD.

Pre-financing amounts repaid shall constitute internal assigned revenue in accordance with Article 21(4) of the Financial Regulation and shall be entered in Item 6 1 5 0 or 6 1 5 7.

Article 19 of Regulation (EU, Euratom) No 1311/2013 lays down the conditions for the revision of MFF in order to transfer to subsequent years, in excess of the corresponding expenditure ceilings, allocations not used in 2014, in the event of the adoption after 1 January 2014 of new rules or programmes.

Remarks

The Fund for European Aid to the Most Deprived (FEAD) replaces the European Union's Food Distribution Programme for the Most Deprived Persons of the Community, which was discontinued at the end of 2013.

To ensure continuity between the two programmes, expenditure shall be eligible for a support from a FEAD operational programme if it is incurred by a beneficiary and paid between 1 December 2013 and 31 December 2023.

FEAD shall promote social cohesion, enhance social inclusion and therefore ultimately contribute to the objective of eradicating poverty in the Union by contributing to achieving the poverty reduction target of at least 20 million of the number of persons at risk of poverty and social exclusion in accordance with the Europe 2020 strategy, whilst complementing the Structural Funds. Since the proportion of women at risk of poverty or social exclusion is higher than is the case for men, FEAD will take a gender-sensitive approach by adapting measures to the groups actually at risk, including women and the elderly. It shall contribute to achieving the specific objective of alleviating and eradicating the worst forms of poverty, by providing non-financial assistance to the most deprived persons by food and/or basic material assistance, and social inclusion activities aiming at the social integration of the most deprived persons.

This objective and the results of the implementation of the Fund shall be qualitatively and quantitatively assessed.

FEAD shall complement and shall not replace or reduce sustainable national poverty eradication and social inclusion policies, which remain the responsibility of Member States.

Remarks

This appropriation is intended to cover:

— expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts for the mutual benefit of the Commission and beneficiaries,

— expenditure on external staff in Union delegations (contract agents, local agents or seconded national experts) for the purposes of devolved programme management in the Union delegations in third countries or for internalisation of tasks of phased-out technical assistance offices, as well as the additional logistical and infrastructure cost, such as cost of training, meetings, missions, information technology and telecommunications and of renting directly caused by the presence in the delegation of the external staff remunerated from the appropriations entered in this item,

— expenditure on studies, meetings of experts, information systems, awareness-raising, training, preparation and exchange of lessons learnt and best practices, as well as publications activities and any other administrative or technical assistance directly linked to the achievement of the objective of the programme,

— research activities on relevant issues and the dissemination thereof,

— expenditure related to the provision of information and communication actions, including the development of communication strategies and corporate communication of the political priorities of the Union.

Any income from financial contributions from Member States and third countries, including in both cases their public agencies, entities or natural persons to certain external aid projects or programmes financed by the Union and managed by the Commission on their behalf, may give rise to the provision of additional appropriations. Such contributions under Article 6 3 3 of the statement of revenue constitute assigned revenue under Article 21(2)(b) of the Financial Regulation. The amounts entered on the line for administrative support expenditure will be determined, without prejudice to Article 187(7) of the Financial Regulation, by the contribution agreement for each operational programme with an average not exceeding 4 % of the contributions for the corresponding programme for each chapter.

This appropriation covers administrative expenditure under Chapter 05 05.

05 03 10 *(cont'd)*

The reserve is to be established by applying at the beginning of each year a reduction to agricultural direct aids (Chapter 05 03) with the financial discipline mechanisms in accordance with Articles 25 and 26 of Regulation (EU) No 1306/2013 as well as Article 8 of Regulation (EU) No 1307/2013. When the Commission considers the reserve needs to be called on, in accordance with the relevant legislative act, it shall present to the European Parliament and the Council a proposal for a transfer from the reserve to the corresponding budget lines financing the measure deemed necessary. Any Commission proposal for a transfer to draw on the reserve must be preceded by an examination of the scope for reallocating appropriations. By the end of the financial year, any amount of the reserve not made available for crisis measures shall be reimbursed proportionally as agricultural direct aids to the budget lines from which the reduction was made. Any reimbursement will be done under Article 05 03 09 from appropriations carried over from the previous financial year.

Transfers calling on the reserve and transfer back from the reserve to agricultural direct aids shall be made in accordance with the Financial Regulation.

Remarks

This appropriation is intended to cover sums recovered by the Member States that cannot be considered to constitute an irregularity or negligence under Article 32 of Regulation (EC) No 1290/2005. These sums will be booked as corrections regarding expenditure previously financed from Items 05 04 01 01 to 05 04 01 13 and cannot be reused by the Member States.

It is also intended to cover the payment of outstanding amounts declared by Member States subsequent to the application of Article 39(3) of Regulation (EC) No 1290/2005.

05 04 02 Rural development financed by the EAGGF Guidance Section — Completion of earlier programmes

Remarks

Article 39 of Regulation (EC) No 1260/1999 provides for financial corrections, any revenue from which is entered in Item 6 5 0 0 of the statement of revenue. That revenue may give rise to the provision of additional appropriations, in accordance with Articles 21 and 177 of the Financial Regulation, in specific instances where they are necessary to cover risks of cancellation or of reductions in corrections previously decided upon.

The following legal basis applies to all items of this article unless otherwise stated.

Legal basis

The measures may take the form of:

— annual work programmes submitted, in particular, by farmers' or rural development organisations, consumers' associations and environmental protection associations,

— specific measures submitted, in particular, by the public authorities of the Member States, the media and universities,

— activities implemented at the Commission's initiative,

— activities for the promotion of family farming.

Part of this appropriation is intended to finance information in schools, at points of sale and at other consumer contact points on the high-quality, food-safety, environmental and animal-welfare standards that European farmers have to meet, as compared with those required in third countries. It should highlight the important contribution made by the common agricultural policy in achieving these high standards and include explanations of the various quality schemes in force, such as denominations of origin and geographical indications.

Part of this appropriation is intended to finance an information campaign to consumers on causes and consequences of waste in food and advice on ways of reducing it, as well as the promotion of benchmarking practices within the different sectors of the food chain.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action. This appropriation is intended to cover the cost of a preparatory action for a third Union programme for the conservation and sustainable use of plant and animal genetic resources in agriculture. Previous programmes based on Council Regulation (EC) No 1476/94 and Council Regulation (EC) No 870/2004 were completed in 2010. First evaluations of projects suggest that there is need for further actions in order to enhance the conservation of genetic diversity and sustainable use of genetic resources within agriculture, contribute to quality products and local food chains; and to support cooperation and exchange of knowledge between researchers, farmers, breeders and networks of engaged citizens and NGOs, involving the end-users and raising consumer awareness in this field.

Building upon the preparatory work of the European Commission in 2013, the preparatory action shall provide support for Europe-wide interlinking projects and activities in conservation and sustainable use of genetic resources in the framework of upcoming rural development programmes. It shall contribute to delivering the elements for a third Union genetic resources programme, specifically on the following questions:

— how to improve communication between Member States and their authorities on best practices and harmonisation of efforts in conservation and sustainable use of genetic resources,

— how to enhance networking between key stakeholders including farmers, researchers, gene banks, NGOs and end-users, and to enhance marketing opportunities in the context of quality schemes and short food chains,

— how to improve the exchange of knowledge and research in enhancing genetic diversity within agricultural systems,

— how to adapt breeding methods and legislation to the need for the conservation of genetic diversity and sustainable use of genetic resources,

— how to contribute to the successful implementation of rural development measures through actions in the field of genetic diversity in agriculture,

05 08 77 *(cont'd)*

05 08 77 10 *(cont'd)*

The project is supposed to bring together and promote cross-border agribusiness expertise in rural areas and to form agribusiness competence regions — so-called 'agropols', which will offer a sustainable economic perspective to those areas. The Germany-Netherlands cross border region (at least 4 661 German micro and small enterprises in agriculture and horticulture (SMEs); enterprises in industry; service companies, education and science institutions; administrations; chambers of industry and commerce, chambers of agriculture and associations) as a pioneer for other European agrarian regions illustrates how the ongoing challenges of structural change in agriculture and increasing competition in the agricultural sector through cross-sector development into an agropol can be successfully addressed:

— scientific adaptation of the approach of sectoral economic development for an agropol,

— composing a strategic plan for developing a common European Agrobusiness-Food-Region,

— mobilisation of the stakeholder, particularly administration and economy, for the common aim,

— cooperation becomes successful by the common approach: resource conservation and efficiency / developing a master plan are main focal points of the project. The project thereby also contributes towards surmounting global challenges such as climate change, scarcity of raw materials and natural resources as well as food security. Ecologically and economically effective industry and agriculture is supported, balanced rural development is promoted,

— presentation of the transferability to other European regions.

It is expected, that the project will support the European 2020 Strategy and the flagship initiatives 'Agenda for new Skills and Jobs', 'Resource-efficient Europe', 'Industrial competitiveness' and ETP 2020.

Remarks

This appropriation is intended to finance the participation of the Union at the universal Expo 'Feeding the Planet: Energy for Life', to be held in Milan in 2015.

The appropriations are intended to cover the baseline costs for the Union participation within the Italian Pavilion (rental of space, stand erection and decoration, running costs) as well as for the preparatory and initial stages of a basic scientific programme for the EXPO 2015 involving the compilation of baseline data for policy support purposes. The cost for organising events and exhibitions (e.g. reimbursement of expert costs, exhibition materials, etc.) will be covered by appropriations of the relevant specific programmes according to the policy area concerned.

Remarks

These remarks are applicable to all the budget lines in this chapter.

This appropriation will be used for the Horizon 2020 — the framework programme for research and innovation which covers the 2014 to 2020 period.

Horizon 2020 shall play a central role in the implementation of the Europe 2020 flagship initiative 'Innovation Union' and other flagship initiatives, notably 'Resource-efficient Europe', 'An industrial policy for the globalisation era', and 'A digital agenda for Europe', as well as in the development and functioning of the European Research Area (ERA). Horizon 2020 shall contribute to building an economy based on knowledge and innovation across the whole Union by leveraging sufficient additional research, development and innovation funding.

It will be carried out in order to pursue the general objectives set out in Article 179 of the Treaty on the Functioning of the European Union, in order to contribute to the creation of a society of knowledge, based on the European Research Area, i.e. supporting transnational cooperation at all levels throughout the Union, taking the dynamism, creativity and the excellence of European research to the limits of knowledge, strengthening human resources for research and for technology in Europe, quantitatively and qualitatively and research and innovation capacities in the whole of Europe and ensuring optimum use thereof.

CHAPTER 05 09 — HORIZON 2020 — RESEARCH AND INNOVATION RELATED TO AGRICULTURE *(cont'd)*

Also entered against these articles and items are the costs of high-level scientific and technological meetings, conferences, workshops and seminars of European interest organised by the Commission, the funding of high-level scientific and technological analyses and evaluations carried out on behalf of the Union to investigate new areas of research suitable for Union action, inter alia, in the context of the European Research Area, and measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

This appropriation will be used in accordance with Regulation (EU) No 1290/2013 of the European Parliament and of the Council of 11 December 2013 laying down the rules for participation and dissemination in 'Horizon 2020 — the framework programme for research and innovation (2014-2020)' and repealing Regulation (EC) No 1906/2006 (OJ L 347, 20.12.2013, p. 81).

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this chapter. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

The possibility of third countries or institutes from third countries taking part in European cooperation in the field of scientific and technical research is envisaged for some of these projects. Any financial contribution entered in Items 6 0 1 3 and 6 0 1 5 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Any revenue from States taking part in the European cooperation in the field of scientific and technical research entered in Item 6 0 1 6 of the of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Any revenue from the contributions from candidate countries and, if applicable, the western Balkan potential candidate countries for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

Any revenue from the contributions by outside bodies to Union activities entered in Item 6 0 3 3 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Additional appropriations will be provided under Item 05 09 50 01.

Administrative appropriations of this chapter will be provided under Article 05 01 05.

05 09 03 Societal challenges

Remarks

This priority of Horizon 2020 responds directly to the policy priorities and societal challenges identified in the Europe 2020 strategy. Those activities will be implemented using a challenge-based approach which brings together resources and knowledge across different fields, technologies and disciplines. The activities will cover the full cycle from research to market, with a new focus on innovation-related activities such as piloting, demonstration, test beds, support for public procurement, design, end-user driven innovation, social innovation and market take-up of innovations. The activities will support directly the corresponding sectoral policy competences at Union level.

Remarks

This activity will focus on developing more sustainable and productive agriculture and forestry systems, while at the same time developing services, concepts and policies for thriving rural livelihoods. In addition, emphasis will be placed on healthy and safe foods for all as well as competitive food processing methods that use fewer resources and produce fewer by-products. In parallel, efforts will be made on sustainably exploiting aquatic living resources (e.g. sustainable and environmentally friendly fisheries). Low carbon, resource-efficient, sustainable and competitive European bio-based industries will also be promoted.

Remarks

This appropriation constitutes the subsidy to cover administrative expenditure on staff and operating expenditure by the Executive Agency for Small and Medium-sized Enterprises as a result of its participation in the management of the Connecting Europe Facility programme, in the completion of the projects financed under the 2000-2006 and the 2007-2013 Marco Polo programmes.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Any revenue from the contributions from candidate countries and, if applicable, the western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations, according to the same ratio as between the amount authorised for expenditure on administrative management and the total appropriations entered for the programme, in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

Any revenue from contributions from third parties entered in Item 6 0 3 3 of the statement of revenue will give rise to the provision of additional appropriations to be entered in this Item in accordance with the Financial Regulation.

The establishment plan of the Executive Agency is set out in Annex 'Staff' to this section.

Remarks

The objective of 'Removing bottlenecks and bridging missing links' refers to Article 4(2)(a) of Regulation (EU) No 1316/2013. This objective will be implemented through calls for proposals under the annual and multiannual work programmes constituting financing decisions within the meaning of Article 84 of the Financial Regulation, of the core network transport projects and Union transport corridors, which are defined in the annexes to the Connecting Europe Facility and TEN-T guidelines. The implementation of this objective is expected to be measured through new and improved cross-border connections and removed bottlenecks, which have benefitted from the Connecting Europe Facility.

Legal basis

Regulation (EU) No 1316/2013 of the European Parliament and of the Council of 11 December 2013 establishing the Connecting Europe Facility, amending Regulation (EU) No 913/2010 and repealing Regulations (EC) No 680/2007 and (EC) No 67/2010 (OJ L 348, 20.12.2013, p. 129), and in particular Article 4(2)(a) thereof.

Remarks

The objective of 'Ensuring sustainable and efficient transport in the long run' refers to Article 4(2)(b) of Regulation (EU) No 1316/2013. This objective will be implemented through calls for proposals under the annual and multiannual work programmes constituting the financing decisions within the meaning of Article 84 of the Financial Regulation.

In the 2014-2020 period, a follow-up of the Marco Polo programme will be implemented by the Connecting Europe Facility within the framework of the revised TEN-T guidelines. In accordance with Article 32 of Regulation (EU) No 1315/2013 of the European Parliament and of the Council of 11 December 2013 on Union guidelines for the development of the trans-European transport network and repealing Decision No 661/2010/EU (OJ L 348, 20.12.2013, p. 1), it will introduce a new approach in support of freight transport services in the Union (indicative budget EUR 70-140 million per year).

Legal basis

Regulation (EU) No 1316/2013 of the European Parliament and of the Council of 11 December 2013 establishing the Connecting Europe Facility, amending Regulation (EU) No 913/2010 and repealing Regulations (EC) No 680/2007 and (EC) No 67/2010 (OJ L 348, 20.12.2013, p. 129), and in particular Article 4(2)(b) thereof.

Remarks

The objective of 'Optimising the integration and interconnection of transport modes and enhancing the interoperability, safety and security of transport' refers to Article 4(2)(c) of Regulation (EU) No 1316/2013.

This objective will be implemented through calls for proposals under the annual and multiannual work programmes constituting financing decisions within the meaning of Article 84 of the Financial Regulation.

The achievement of this objective shall be measured by the number of inland and maritime ports and airports connected to the railway network, by the number of improved multimodal logistics platforms, by the number of improved connections through motorways of the sea and by the number of supply points in alternative sources of energy on the core network.

In accordance with Article 5(1)(a) of Regulation (EU) No 1316/2013, an amount of EUR 11 305 500 000 in current prices should be transferred from the Cohesion Fund to be spent in line with that Regulation exclusively in Member States eligible for funding from the Cohesion Fund.

In accordance with Article 11, this objective will be implemented through calls for proposals under the annual and multiannual work programmes, which are opened exclusively for the Member States eligible for financing under the Cohesion Fund. These annual and multiannual work programmes constitute financing decisions in the meaning of Article 84 of the Financial Regulation.

In accordance with Article 2(7) and Article 5(2), up to 1 % of the financial envelope shall cover expenses pertaining to 'programme support actions'.

Remarks

This objective of 'Creating an environment more conducive to private investment for transport infrastructure projects' aims to implement the projects of common interests through the financial instruments, based on an *ex ante* assessment as required by Article 224 of Delegated Regulation (EU) No 1268/2012. In accordance with Article 21(4) of Regulation (EU) No 1316/2013, from 10 % to 20 % of the financial envelope for CEF transport shall be available for innovative financing instruments such as the Project Bonds Instrument, the Loan Guarantee Instrument and other instruments such as joint ventures and the equity instruments to combine public and private financial resources to accelerate infrastructure investments in Europe. The financial instruments are intended to facilitate access to private financing and thus to accelerate or to make possible financing of the TEN-T projects eligible under the TEN-T guidelines and Regulation (EU) No 1316/2013. The financial instruments are intended to be established as 'debt' or 'equity' frameworks and they should address specific market failures and provide appropriate financing solutions. They are intended to be implemented as direct management by the entrusted entities, within the meaning of the Financial Regulation or jointly with the entrusted entities. The entrusted entities must be accredited to provide guarantees to the Commission on the protection of the Union financial interests in line with the requirements of the Financial Regulation.

Any repayment from financial instruments pursuant to Article 140(6) of the Financial Regulation, including capital repayments, guarantees released, and repayment of the principal of loans, paid back to the Commission and entered in Item 6 3 4 1 of the statement of revenues may give rise to the provision of additional appropriations in accordance with Article 21(3)(i) of the Financial Regulation.

CHAPTER 06 02 — EUROPEAN TRANSPORT POLICY *(cont'd)*

06 02 05 *(cont'd)*

Remarks

This appropriation is intended to cover expenditure on studies and meetings of experts directly linked to the achievement of the objective of the programme or measures coming under this item, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts.

It is intended to cover expenditure on information and communication, conferences and events promoting activities in the transport sector as well as electronic and paper publications directly linked to the achievement of the objective of transport policy, as well as safety and protection of transport users.

This appropriation is also intended to cover expenditure incurred by the Commission for collecting and processing information of all kinds needed for the analysis, definition, promotion, monitoring, evaluation and implementation of the Union's common transport policy, for all transport modes (road, rail, air, sea and inland waterways) and for all transport sectors (transport safety, internal market of transport with its implementation rules, optimisation of transport network, passengers' rights and protection in all transport modes, the use of alternative fuels in all transport modes, urban mobility, as well as for all other sectors related to transport). The main endorsed actions and objectives are intended to support the Union's common transport policy, including extension to third countries, technical assistance for all transport modes and sectors, specific training, definition of rules of transport safety, simplification of administrative procedures, the use of ICT technologies, promotion of the common transport policy including establishment and implementation of trans-European network orientation endorsed by the Treaty on the Functioning of the European Union as well as strengthening passengers' rights and protection in all transport modes and to improve the application and enforcement of existing Regulations on passenger rights, in particular through awareness-raising activities about the content of those Regulations, targeted at both the transport industry as well as the travelling public.

Maritime transport and logistics

This appropriation is intended to cover monitoring, evaluation and revision (impact assessment) of Union maritime safety legislation.

These activities should promote and support intermodal barrier-free mobility for persons with reduced mobility.

In connection with Regulation (EC) No 261/2004 of the European Parliament and of the Council of 11 February 2004 establishing common rules on compensation and assistance to passengers in the event of denied boarding and of cancellation or long delay of flights (OJ L 46, 17.2.2004, p. 1), the Commission needs to develop additional measures to make enforcement of the Regulation more efficient.

The implementation of Regulation (EC) No 1371/2007 of the European Parliament and of the Council of 23 October 2007 on rail passengers' rights and obligations (OJ L 315, 3.12.2007, p. 14) requires specific implementation action due to legal reporting requirements of the Commission and due to the complex interaction of regional, national and international (COTIF) administrative structures involved in the implementation.

The implementation of Regulation (EU) No 1177/2010 of the European Parliament and of the Council of 24 November 2010 concerning the rights of passengers when travelling by sea and inland waterway (OJ L 334, 17.12.2010, p. 1), which entered into force on 18 December 2012, and Regulation (EU) No 181/2011 of the European Parliament and of the Council of 16 February 2011 concerning the rights of passengers in bus and coach travel (OJ L 55, 28.2.2011, p. 1), which entered into force on 1 March 2013, requires specific implementation action in order to ensure the correct application and enforcement of these Regulations in the Member States and the compliance by Member States with their legal reporting obligations towards the Commission.

COMMISSION
TITLE 06 — MOBILITY AND TRANSPORT

CHAPTER 06 02 — EUROPEAN TRANSPORT POLICY *(cont'd)*

06 02 05 *(cont'd)*

As an important implementation support measure the Commission is conducting targeted actions covering all Member States to raise public awareness on passenger rights.

These actions and objectives could be supported at different levels (local, regional, national, European and international), for all transport modes and sectors and related to transport, as well as in technical, technological, regulatory, informative, environmental, climatic and political fields and for sustainable development.

Air transport has long been one of the sectors in which the consumer authorities receive most complaints in the Union. The increase in the number of commercial transactions performed electronically (using the internet or a mobile telephone) has merely resulted in more breaches of Union consumer legislation.

One of the main complaints by Union consumers is that there are no effective means of redress at airports themselves, particularly when disputes arise as a result of failure on the part of airlines and other service providers to meet their obligations. Union consumers and air transport authorities therefore need to work together to secure an immediate improvement in passenger support and information facilities at airports and, at the same time, step up co-regulation in the sector.

Road safety

The Commission communication of 20 July 2010 entitled 'Towards a European road safety area: policy orientations on road safety 2011-2020' (COM (2010) 389 final) presents seven objectives: road user education, enforcement of traffic rules, safe infrastructure, safe vehicles, use of modern technology, post-injury emergency responses and a special focus on vulnerable road users. Work continues on the Commission's proposal, on the new Union driving licences, on the Commission proposal of a roadworthiness package, on the deployment of intelligent transport systems and in-vehicle safety systems and the launch of work towards a strategy on serious road traffic injuries. The Commission's road safety work also includes the management of rules relating to dangerous goods, the maintenance of a European database on road accidents (CARE), the follow-up on the infrastructure management and tunnel safety directives and on various aspects of vulnerable road user safety. The implementation of the Policy Orientations 2011-2020 would also require specific implementation action for the exchange of good practices, road safety campaigns, calls of proposals and development of the road safety observatory.

This appropriation is intended to cover expenditure on public events such as the annual European Road Safety Day and similar awareness-raising and citizen interaction initiatives.

It is also intended to establish efficient cross-border cooperation between Member States concerning the enforcement of road safety related traffic offences.

Land transport

The main activities in the land transport area concern the better implementation, review or planning for new initiatives.

Single European Sky

The full implementation of the Single European Sky (four basic Regulations (EC) No 549/2004, (EC) No 550/2004, (EC) No 551/2004 and (EC) No 552/2004, and more than 20 implementing rules) is a key priority to improve the performance of the air navigation services in terms of safety, cost efficiency of the air navigation service provision, reduction of air traffic flow delays and environmental performance, and hence of air transport in Europe.

CHAPTER 06 02 — EUROPEAN TRANSPORT POLICY *(cont'd)*

06 02 05 *(cont'd)*

The extension of the Single European Sky legislation to the south-east States though the Multilateral Agreement on the Establishment of a European Common Aviation Area (ECAA) is an important step for the achievement of the neighbouring policy. Remarks

This appropriation is intended to cover expenditure incurred by the Commission for collecting and processing information of all kinds needed for the analysis, definition, promotion, monitoring, evaluation and implementation of the rules and measures required to improve the security of inland, air and sea transport, including extension to third countries, technical assistance and specific training.

The main objectives are to develop and apply security rules in the field of transport and in particular:

— measures to prevent malicious acts in the transport sector,

— approximation of legislation, technical standards and administrative monitoring practices relating to transport security,

— definition of common indicators, methods and security objectives for the transport sector and collection of the data necessary for such definition,

— monitoring of measures taken on transport security by the Member States, in all modes,

— international coordination on transport security,

— promoting research into transport security.

This appropriation is intended in particular to cover expenditure on the establishment and operation of a corps of inspectors to check compliance with the requirements of Union security legislation of airports, ports and port facilities in the Member States, including extension to third countries, and of ships flying the flag of a Member State. This expenditure includes the subsistence allowances and travel expenses of the Commission inspectors and the expenses of inspectors from the Member States, borne in accordance with the provisions laid down in that legislation. The costs of training inspectors, of preparatory meetings and of the supplies needed for inspections must, in particular, be added to that expenditure.

Remarks

This appropriation is intended to cover payments in respect of commitments remaining to be settled from previous years.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Any revenue from the contributions from candidate countries and, if applicable, the western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

In September 2011, the Commission issued a staff working paper on a 'sustainable waterborne transport toolbox' describing possible measures to minimise the compliance costs for the industry in view of the proposed new sulphur limits on sulphur content of marine fuels. A focus area for the medium to long term is the implementation of clean ship technology and alternative fuels. LNG is seen as a promising solution to comply with this Regulation and to respond to ship-generated air pollution in general.

Despite its excellent safety record, LNG is perceived as a potential danger by the general public. Action is needed to gain a comprehensive overview and analysis of potential risks and dangers for LNG storage, bunkering and handling (ports and ships). This will also include a generic risk analysis of LNG, i.e. as regards chemical properties, plus the development, in close cooperation with all concerned stakeholders, of information and media material aimed at explaining the risks/advantages of LNG for shipping.

The aim is also to obtain an overview of market developments as regards the introduction of LNG-fuelled ships or 'LNG ready' ships, as well as LNG fuel provision infrastructure (on-shore or by bunker barges) in the Union.

Remarks

The aim of this pilot project is to analyse the main problems concerning rail rolling stock interoperability in the Union and to provide, in consultation with rail stakeholders (shippers, infrastructure managers, rail undertakings, freight companies, economic operators), solutions to increase availability of interoperable/multimodal rail rolling stock, including by optimising market demand, proposing regulatory measures and identifying market needs for new types of rolling stock, containers, etc.

Background

In its White Paper entitled 'Roadmap to a Single European Transport Area — towards a competitive and resource-efficient transport system', adopted on 28 March 2011, the Commission announced its vision for the establishment of a single European railway area, with the aim of creating an internal railway market where European railway undertakings can provide services free from unnecessary technical and administrative barriers.

Significant legislative progress has been made, with the opening up of the rail freight market and Regulation (EU) No 913/2010 of the European Parliament and of the Council of 22 September 2010 concerning a European rail network for competitive freight (OJ L 276, 20/10/2010, p. 22). These corridors are a governance instrument that will provide more freight availability and capacity for fluid cross-border operation. The new TEN-T guidelines and Regulation (EU) No 1316/2013 of the European Parliament and of the Council of 11 December 2013 establishing the Connecting Europe Facility, amending Regulation (EU) No 913/2010 and repealing Regulations (EC) No 680/2007 and (EC) No 67/2010 (OJ L 348, 20.12.2013, p. 129) will also contribute by providing Union financial support to address major infrastructure needs in the rail sector (i.e. missing links, bottlenecks, new traffic management systems, etc.), making Union rail corridors a reality and encouraging more operators to shift to rail.

While these significant steps will provide, in the near future, solutions for infrastructure interoperability — signalling, track gauge, traffic management systems, electrification, etc. — there are still a number of concerns to be addressed in order to make the single European railway area a reality.

Gauge remains a major hurdle in this respect. For some areas in Europe, gauge restrictions are a major obstacle to promoting rail freight which the measures referred to above might not remove. For some countries with a very narrow gauge, the hard infrastructure approach might be too expensive. For other Union areas, although there are technological solutions (i.e. low wagons) to some gauge constraints, there is also a lack of low rolling stock despite the demand for it.

This pilot project will look to non-infrastructure solutions to overcome problems involving mainly but not exclusively gauge restrictions in main freight corridors and routes and identify and propose solutions to rolling-stock market failures.

It could focus on:

— analysing availability of interoperable/multimodal rolling stock on routes with major gauge restrictions,

— analysing market demand for low wagons and the used rolling-stock market,

— possible new technological solutions for rolling stock both to address gauge restrictions and also to increase freight use by new types of container or new wagons and loading solutions that could increase rail freight attractiveness for economic operators,

— identifying rolling stock R & D needs to overcome gauge constraints.

The pilot project will identify best practices and will help to identify, for the Parliament and the Commission, regulatory changes, financing and research needs, possible areas of cooperation with existing freight governing structures (rail freight corridor working group, corridor coordinators, etc.).

Remarks

Although the Commission gathers and publishes a large volume of transport-related figures and relevant statistics, general aviation has not been covered. This preparatory action will produce significant data on general aviation in Europe, such as passenger kilometres, workforce, turnover and economic output. As the European Aviation Safety Agency will continue to bring forward new regulations for this sector over the coming years, having a complete database could provide added value for better regulation.

This preparatory action is in line with the European Parliament resolution of 3 February 2009 on an Agenda for Sustainable Future in General and Business Aviation (OJ C 67 E, 18.3.2010, p. 5), which highlights 'a lack of data and statistical information on general and business aviation' (recital C) and calls on the Commission to 'develop and implement a systematic approach to the gathering and sharing of international and European data' (paragraph 27).

The preparatory action also takes into account the Commission communication entitled 'An Agenda for Sustainable Future in General and Business Aviation' (COM(2007) 869 final), which calls for 'development at the European level of the basic set of objective and coherent data'.

CHAPTER 06 02 — EUROPEAN TRANSPORT POLICY *(cont'd)*

The preparatory action will aim to collect the most important data on general aviation in Europe, including but not limited to passenger kilometres (available and flown), number of flights with a shorter distance than 500 km, workforce, turnover, economic output, environmental effect (including data on climate-relevant emissions), direct and indirect impact on related industries, safety issues, taxation (including number and percentage of tickets exempted from VAT and quantity and percentage of the kerosene used that is exempted from taxation) as well as social and economic impacts. The preparatory action will also aim to gather information on ground handling services for general aviation and the legal (including social) framework for the provision of those services.

Remarks

These remarks are applicable to all the budget lines in this chapter.

This appropriation is intended to be used for Horizon 2020 — the framework programme for research and innovation, which covers the 2014 to 2020 period.

Horizon 2020 shall play a central role in the implementation of the Europe 2020 flagship initiative 'Innovation Union' and other flagship initiatives, notably 'Resource-efficient Europe', 'An industrial policy for the globalisation era', and 'A digital agenda for Europe', as well as in the development and functioning of the European Research Area (ERA). Horizon 2020 shall contribute to building an economy based on knowledge and innovation across the whole Union by leveraging sufficient additional research, development and innovation funding. The programme will be carried out in order to pursue the general objectives described in Article 179 of the Treaty on the Functioning of the European Union, in order to contribute to the creation of a society of knowledge, based on the European Research Area, i.e. supporting transnational cooperation at all levels throughout the Union, taking the dynamism, creativity and the excellence of European research to the limits of knowledge, strengthening human resources for research and for technology in Europe, quantitatively and qualitatively and research and innovation capacities in the whole of Europe and ensuring optimum use thereof.

Also entered against these articles and items are the costs of high-level scientific and technological meetings, conferences, workshops and seminars of European interest organised by the Commission, the funding of high-level scientific and technological analyses and evaluations carried out on behalf of the Union to investigate new areas of research suitable for Union action, inter alia, in the context of the European Research Area, and measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

This appropriation is intended to be used in accordance with Regulation (EU) No 1290/2013 of the European Parliament and of the Council of 11 December 2013 laying down the rules for participation and dissemination in 'Horizon 2020 — the Framework Programme for Research and Innovation (2014-2020)' and repealing Regulation (EC) No 1906/2006 (OJ L 347, 20.12.2013, p. 81).

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this chapter. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

CHAPTER 06 03 — HORIZON 2020 — RESEARCH AND INNOVATION RELATED TO TRANSPORT *(cont'd)*

The possibility of third countries or institutes from third countries taking part in European cooperation in the field of scientific and technical research is envisaged for some of these projects. Any financial contribution will be entered in Items 6 0 1 3 and 6 0 1 5 of the statement of revenue and may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Revenue from States taking part in the European Cooperation in the field of scientific and technical research will be entered in Item 6 0 1 6 of the of the statement of revenue and may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Any revenue from the contributions from candidate countries and, if applicable, the western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

Any revenue from the contribution by outside bodies to Union activities will be entered in Item 6 0 3 3 of the statement of revenue and may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Additional appropriations will be made available under Item 06 03 50 01.

Administrative appropriations of this chapter will be provided under Article 06 01 05.

06 03 03 Societal challenges

Remarks

This priority of Horizon 2020 responds directly to the policy priorities and societal challenges identified in the Europe 2020 strategy. Those activities will be implemented using a challenge-based approach which brings together resources and knowledge across different fields, technologies and disciplines. The activities will cover the full cycle from research to market, with a new focus on innovation-related activities such as piloting, demonstration, test beds, support for public procurement, design, end-user driven innovation, social innovation and market take-up of innovations. The activities will support directly the corresponding sectoral policy competences at Union level.

Funding will be focused on the following challenges:

— smart, green and integrated transport,

— innovation and research, particularly in the areas of behavioural change, modal shift, accessibility for all, integration (interconnectivity, intermodality, interoperability) and sustainability (climate change, gas and noise emission reduction), which are of crucial importance for the transport and tourism sectors.

Remarks

This appropriation is intended to cover research and innovation actions that should substantially contribute to shifting transport into a new era of smart mobility. Actions under this item should support the development and take-up of the necessary solutions for all transport modes, drastically reducing transport emissions that are harmful to the environment, lowering the dependence of transport on fossil fuels, and hence reducing transport impact on biodiversity and preserve natural resources. This is expected to be achieved by investing in specific activities, particularly in the form of large public-private partnerships, such as making aircraft, trains, vehicles and vessels cleaner and quieter, developing smart equipment, infrastructure and services and improving transport and mobility in urban areas.

Research and Innovation carried under this item is expected to make important contributions to optimise performance and efficiency in the face of growing demands for mobility. Actions under this item will also focus on substantially reducing traffic congestion, substantially improving the mobility of people and freight, developing and applying new concepts of freight transport and logistics and reducing accident rates and fatal casualties and improving security. Actions under this item are indeed intended to contribute to making Europe the safest region for aviation and to move towards the target of zero fatalities in road transport by 2050.

Research and innovation is expected to play a significant role in achieving global leadership for the European transport industry, staying ahead in new technologies and reducing the costs of existing manufacturing processes, therefore contributing to growth and highly skilled jobs in the European transport industry. In this context, actions to develop the next generation of transport means and explore entirely new transport concepts are expected to be developed and covered by this appropriation.

Socioeconomic research and forward-looking activities for policymaking will also be covered by this appropriation: actions to support policy analysis and development including on socioeconomic aspects of transport are necessary to promote innovation and meet the challenges raised by transport.

Remarks

This appropriation is intended to cover the Agency's staff, administrative and operating expenditure for the activities related to the implementation of the biocides legislation.

The Agency must inform the European Parliament and the Council about transfers of appropriations between operational and administrative expenditure.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

The establishment plan of the European Chemicals Agency is set out in Annex 'Staff' to this section.

The Union contribution for 2015 amounts to a total of EUR 5 789 000. An amount of EUR 314 875 coming from the recovery of surplus is added to the amount of EUR 5 474 125 entered in the budget.

Remarks

This appropriation is intended to cover the Agency's staff, administrative and operating expenditure.

The mission of the Agency is to provide the Union and the Member States with objective, reliable and comparable information on the environment at European level, thus enabling them to take the requisite measures to protect the environment, to assess the results of such measures and to inform the public.

COMMISSION
TITLE 07 — ENVIRONMENT

CHAPTER 07 02 — ENVIRONMENTAL POLICY AT UNION AND INTERNATIONAL LEVEL *(cont'd)*

07 02 06 *(cont'd)*

The Agency must inform the European Parliament and the Council about transfers of appropriations between operational and administrative expenditure.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

Any revenue from the Swiss Confederation's contribution to participation in Union programmes entered in Item 6 0 3 3 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

The amounts repaid in accordance with Article 16 of Commission Regulation (EC, Euratom) No 2343/2002 constitute assigned revenue (Article 21(3)(c) of the Financial Regulation) to be charged to Item 6 6 0 0 of the general statement of revenue.

The establishment plan of the European Environment Agency is set out in Annex 'Staff' to this section.

The Union contribution for 2015 amounts to a total of EUR 36 309 240. An amount of EUR 1 422 874 coming from the recovery of surplus is added to the amount of EUR 34 886 366 entered in the budget.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

The pilot project aims at boosting the recycling of electric and electronic waste in the Balkan region. It insists on the need to develop environmentally friendly infrastructure which also provides economic and social benefits to local economies. These benefits can translate into profit for local communities through the creation of jobs in a more sustainable way and for the industry with the recycling centre providing better access to raw materials both for the region and for the EU. The project will be a step forward in the process of strengthening regional cohesion and cooperation in the Balkan region as well as an important source of secondary raw materials for EU industries, thus advancing the long-term EU goal of improving its resource-efficient use of materials, its higher independence on the import of some raw materials from third countries, and the transition to a circular economy.

Legal basis

Pilot project within the meaning of Article 54(2) of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1).

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

Recycling of waste is an important pillar of the Resource Efficiency agenda. Yet high quality recycling in Europe is limited and actually only well developed in a few Member States, therefore a huge potential of recoverable resources is currently neglected. Whereas there is a strong focus in Europe on municipal solid waste ('MSW'), this is only a small fraction of all available waste. Dry mixed wastes such as commercial and industrial waste, bulky household waste and construction and demolition waste ('C&DW') contain far more resources which can even be easier extracted than materials out of (wet) MSW. Of these types of waste, C&DW is very significant, due to its volume (it comprises one third of all waste in the EU) and the target currently set for it in Directive 2008/98/EC of the European Parliament and of the Council of 19 November 2008 on waste and repealing certain Directives (OJ L 312, 22.11.2008, p. 3) (Waste Framework Directive) (70 % recycling).

Development of C&DW recycling (and indeed of the recycling of any type of waste) follows a certain 'generic' path, as shown by the history of well performing countries. This means that general mechanisms for recycling can be identified and best practices can be described. Based on some 30 years of recycling in a few Member States, templates and guidelines should be made available for those Member States where recycling is still in its infancy. It is necessary to stimulate recycling in Europe by the transfer of knowledge and expertise.

Important elements of recycling are for instance good control of waste flows and quality assurance. Recycling industry and authorities in a number of Member States have developed tools for this, for instance a system called Tracemat (tracing materials) and quality assurance schemes including environmental testing and certification.

The recycling of mixed dry wastes needs to be developed. Valuable materials such as wood and plastics can be recovered and made fit for new use. Recycling plants could also be used to treat MSW if the dry fraction is source separated. Building up such sorting capacity is an option in Member States to find a right balance between recycling and incineration.

Goal

The pilot project aims at boosting recycling in Member States, specifically concerning C&DW and related to that of dry mixed wastes, by implementing efficient transfer of knowledge and expertise. It will also assist Member States in reaching the targets under Directive 2008/98/EC. The key success factor is that the recycling industry itself is involved. Its experts are acknowledged to be the best carriers of such expertise and knowledge. Specifically the project aims at initiating, on an appropriate basis, recycling of C&DW in three (regions in) Member States. Historical experience will serve as an example for Member States where this type of recycling has not taken off. As for other dry mixed wastes the success cases will be analysed and blueprints for other Member States how to get there will be developed. In one (region in a) Member State such recycling will be initiated.

A key issue of the project is to demonstrate the successful implementation of first steps to recycling of C&DW in selected regions in Europe. For this to happen it is required that stakeholders in these regions agree to an implementation plan. This plan describes goals to be achieved and actions to be taken. Those actions for most part will reflect the best practices developed on the basis of experiences in well performing Member States. Stakeholders agree to the actions and parties are assigned to each action. Key issues are the reliable tracing of wastes and quality control of recycled products.

Remarks

This pilot project will initiate public dialogue on environmental protection in the context of the TTIP. The dialogue will involve all stakeholders, including representatives of governments, environmental experts and civil society. It will focus on the principles of state regulation of legitimate public policy objectives, helping to formulate a common approach to handling such policy objectives in the light of existing and future investment protection schemes. Such a dialogue is essential for public understanding of both the need for state regulation in those areas and the need to ensure that all stakeholders are treated fairly and may expect proportionate and predictable legislation to be passed.

Part of the appropriation will be spent on conducting objective SWOT analyses of the TTIP on the basis of which public awareness of the real benefits and drawbacks can be increased.

Remarks

This pilot project will contribute to further development of market-based instruments (MBI) in the field of environmental policy by making civil society organisations better able to participate in EU policy-making on green public procurement (GPP), the reduction of harmful subsidies and eco-taxation. Currently there is insufficient EU-level capacity in these fields and little coordination of reform efforts in Member States and at EU level. Greater involvement of civil society experts in the design and implementation of public procurement policies, the reduction of harmful subsidies and eco-taxation would improve the uptake of such policies in the Member States. Networking between civil society and public authorities interested in GPP, the reduction of harmful subsidies and eco-taxation would be a way of boosting EU civil society capacity and drawing on experience in Member States through the exchange of best practices and greater participation in the EU decision-making process.

TITLE 08

RESEARCH AND INNOVATION

Remarks

These remarks apply to all the budget lines in this title.

Research and innovation activities under this title will contribute to three main research programmes, i.e. Horizon 2020, Euratom and the programme for the ITER project. It will also cover research programmes of the research fund for coal and steel.

It will be carried out in order to pursue the general objectives set out in Article 179 of the Treaty on the Functioning of the European Union, in order to contribute to the creation of a society of knowledge, based on the European Research Area, i.e. supporting transnational cooperation at all levels throughout the Union, taking the dynamism, creativity and the excellence of European research to the limits of knowledge, strengthening human resources for research and for technology in Europe, quantitatively and qualitatively, and research and innovation capacities in the whole of Europe and ensuring optimum use thereof.

Particular account will be taken of the need to step up efforts to enhance the participation and role of women in science and research.

Also entered against these articles and items are the costs of high-level scientific and technological meetings, conferences, workshops and seminars of European interest organised by the Commission, the funding of high-level scientific and technological analyses and evaluations carried out on behalf of the Union to investigate new areas of research suitable for Union action, inter alia, in the context of the European Research Area, and measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

These appropriations also cover administrative expenditure, including expenditure on staff, whether covered by the Staff Regulations or not, information, publications, administrative and technical operation, and certain other expenditure items relating to internal infrastructure linked with the achievement of the objective of the measure of which they form an integral part, including the action and initiatives necessary for preparation and monitoring of the Union's strategy on research, technological development and demonstration (RTD).

Revenue resulting from cooperation agreements between the European Atomic Energy Community and Switzerland or the multilateral European Fusion Development Agreement (EFDA) will be entered in Items 6 0 1 1 and 6 0 1 2 of the statement of revenue and may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

The possibility of third countries or institutes from third countries taking part in European cooperation in the field of scientific and technical research is envisaged for some of these projects. Any financial contribution will be entered in Items 6 0 1 3 and 6 0 1 5 of the statement of revenue and may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Any revenue from States taking part in the European cooperation in the field of scientific and technical research will be entered in Item 6 0 1 6 of the statement of revenue and may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

COMMISSION
TITLE 08 — RESEARCH AND INNOVATION

Any revenue from the contribution by outside bodies to Union activities will be entered in Item 6 0 3 3 of the statement of revenue and may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Additional appropriations will be made available under Items 08 02 50 01, 08 03 50 01 and 08 04 50 01.

Administrative appropriations of this title will be provided under Article 08 01 05.

Remarks

This appropriation covers expenditure relating to officials and temporary staff implementing research and innovation programmes — Horizon 2020, occupying posts on the authorised establishment plans engaged in indirect action under the non-nuclear programmes, including staff posted in Union delegations.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Any revenue from the contributions from candidate countries and, if applicable, the western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

Remarks

These budgetary remarks are applicable to all the budget lines in this chapter.

This appropriation will be used for Horizon 2020 —the framework programme for research and innovation, which covers the 2014-2020 period and brings together all existing Union research and innovation funding, including the framework programme for research, the innovation related activities of the competitiveness and innovation framework programme and the European Institute of Innovation and Technology (EIT). The programme shall play a central role in the implementation of the Europe 2020 flagship initiative 'Innovation Union' and other flagship initiatives, notably 'A digital agenda for Europe' 'Resource-efficient Europe' and 'An industrial policy for the globalisation era', as well as in the development and functioning of the European Research Area (ERA). Horizon 2020 shall contribute to building an economy based on knowledge and innovation across the whole Union by leveraging sufficient additional research, development and innovation funding.

This appropriation will be used in accordance with the Regulation (EU) No 1290/2013 of the European Parliament and of the Council of 11 December 2013 laying down the rules for the participation and dissemination in 'Horizon 2020 — the Framework Programme for Research and Innovation (2014-2020)' and repealing Regulation (EC) No 1906/2006 (OJ L 347, 20.12.2013, p. 81).

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this chapter. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

CHAPTER 08 02 — HORIZON 2020 — RESEARCH *(cont'd)*

Any revenue from the contributions from candidate countries and, if applicable, the western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

08 02 01 Excellent science

Remarks

This priority of Horizon 2020 aims to reinforce and extend excellence in the Union's science base and ensure a steady stream of world-class research to secure the Union's long-term competitiveness. It will support the best ideas, develop talent within the Union, provide researchers with access to priority research infrastructure, and make the Union an attractive location for the world's best researchers. Research actions to be funded will be determined according to the need and opportunities of science, without pre-determined thematic priorities. The research agenda will be set in close liaison with the scientific community and research will be funded on the basis of excellence.

Remarks

The fundamental activity of the European Research Council (ERC) shall be to provide attractive long-term funding to support excellent investigators and their research teams to pursue ground-breaking, high-gain/high-risk research. Particular priority shall be given to assisting excellent starting researchers to make the transition to independence by providing adequate support at the critical stage, when they are setting up or consolidating their own research team or programme. The ERC shall also give support, as necessary, to emerging new ways of working in the scientific world with the potential to create breakthrough results and facilitate exploration of the commercial and social innovation potential of the research which it funds.

Remarks

Activities under the 'Future and emerging technologies' (FET) specific objective shall support fundamental science and technology research exploring new future technologies by challenging current paradigms and venturing into unknown areas. In addition, FET activities shall address a number of promising exploratory research themes with the potential to generate a critical mass of inter-related projects that, together, make up a broad and multifaceted exploration of the themes and build a European pool of knowledge. Finally, FET activities shall support ambitious large-scale, science-driven research aiming to achieve a scientific breakthrough. Such activities will benefit from the alignment of European and national agendas.

Remarks

Research infrastructures activity will ensure the implementation and operation of the ESFRI (European Strategy Forum for Research Infrastructure) and other world-class research infrastructures, including the development of regional partner facilities, for 2020 and beyond. In addition, the integration of and access to national research infrastructures and the development, deployment and operation of e-infrastructures will be ensured. The activity will also encourage research infrastructures to act as early adopters of technology, promote research and development (R&D) partnerships with industry, facilitate industrial use of research infrastructures and stimulate the creation of innovation clusters.

08 02 02 ***Industrial leadership***

Remarks

This priority of Horizon 2020 aims to make the Union a more attractive location to invest in research and innovation, by promoting activities where businesses set the agenda as well as at accelerating the development of new technologies which will underpin future businesses and economic growth. It will provide major investment in key industrial technologies, maximise the growth potential of Union companies by providing them with adequate levels of finance and help innovative SMEs to grow into world-leading companies.

Remarks

Leadership in enabling and industrial technologies shall provide dedicated support for research, development and demonstration on nanotechnology, advanced materials, biotechnology and advanced manufacturing and processing. Emphasis will be placed on interactions and convergence across and between the different technologies. In addition, emphasis shall be on R & D, large-scale pilots and demonstration activities, test beds and living labs, prototyping and product validation in pilot lines. Activities shall be designed to boost industrial competitiveness by stimulating industry, and in particular SMEs, to make more research and innovation investment.

Remarks

The aim of this activity is to help companies and other types of organisation engaged in research and innovation (R&I) to gain easier access, via financial instruments, to loans, guarantees, counter-guarantees and hybrid, mezzanine and equity finance. Debt and equity facilities will be run in a demand-driven manner, though the priorities of particular sectors or of other Union programmes will be targeted if top-up funding is made available. The focus is on attracting private investments into R&I. The European Investment Bank (EIB) and the European Investment Fund (EIF) will play an important role, as entrusted entities, in implementing each financial instrument facility on behalf of and in partnership with the Commission. Part of this appropriation will be used to reinforce, in the form of paid-in capital, the EIF's capital base.

Remarks

To support the participation of SMEs in Horizon 2020 a dedicated market-oriented instrument will be introduced, which will target all types of innovative SMEs that wish to develop, grow and internationalise. In addition, support will be provided to research intensive SMEs in transnational research projects and to women-led start-ups. Activities enhancing the innovation capacity of SMEs and improving the framework conditions for innovation will also be supported.

In accordance with Regulation (EU) No 1291/2013, support will be provided to innovation in SMEs through the implementation of an SME instrument under a single management system and implemented in a bottom-up manner. In accordance with Annex II of that Regulation within the target of allocating a minimum of 20 % of the total combined budgets for the specific objective 'Leadership in enabling and industrial technologies' and the priority 'Societal challenges' for SMEs, a minimum of 5 % of those combined budgets will be initially allocated to the dedicated SME instrument. A minimum of 7 % of the total budgets of the specific objective 'Leadership in enabling and industrial technologies' and the priority 'Societal challenges' will be allocated to the dedicated SME instrument averaged over the duration of Horizon 2020.

08 02 03 Societal challenges

Remarks

This priority of Horizon 2020 responds directly to the policy priorities and societal challenges identified in the Europe 2020 strategy. Those activities will be implemented using a challenge-based approach which brings together resources and knowledge across different fields, technologies and disciplines. The activities will cover the full cycle from research to market, with a new focus on innovation-related activities such as piloting, demonstration, test beds, support for public procurement, design, end-user driven innovation, social innovation and market take-up of innovations. The activities will support directly the corresponding sectoral policy competences at Union level and take a gender-sensitive approach while aiming for balanced participation of men and women.

Remarks

Lifelong health and well-being for all, high-quality and economically sustainable health and care systems, and opportunities for new jobs and growth in the health sector and its related industries are the aims of this activity. To that respect activities will focus on effective health promotion and disease prevention (e.g. understanding the determinants of health, developing better preventive vaccines). Particular attention will be paid to gender- and age-related health specificities. In addition, emphasis will be placed on managing, treating and curing disease, disability and reduced functionality (e.g. by transferring knowledge to clinical practice and scalable innovation actions, better use of health data, independent and assisted living). Furthermore, efforts will be made to improve decision-making in prevention and treatment provision, identify and support the dissemination of best practice in the healthcare sector, and support integrated care and the uptake of technological, organisational and social innovations empowering in particular older persons as well as disabled persons to remain active and independent. Finally, activities will be based on a gender-sensitive approach that recognises, amongst other things, the position of women in both the informal and the formal care sector.

This activity will focus on developing more sustainable and productive agriculture and forestry systems, while at the same time developing services, concepts and policies for thriving rural livelihoods. In addition, emphasis will be placed on healthy and safe foods for all as well as competitive food processing methods that use fewer resources and produce fewer by-products. In parallel, efforts will be made on sustainably exploiting aquatic living resources (e.g. sustainable and environmentally friendly fisheries). Low carbon, resource efficient, sustainable and competitive European bio-based industries will also be promoted.

Efforts to ensure a secure, clean and efficient energy supply will focus on reducing the Union's energy consumption and carbon footprint (for example through affordable systems and components incorporating smart technologies) and securing a low-cost, low-carbon electricity supply (for example through research, development and full-scale demonstration of innovative renewables and carbon capture and storage technologies). There will be a special focus on alternative fuels and mobile energy sources and on developing a single, smart European electricity grid. Activities will also focus on multidisciplinary research for energy technologies and joint implementation of pan-European research programmes and world-class facilities. Furthermore, tools, methods and models for robust and transparent policy support will be developed and market uptake of energy innovation will be promoted. 85 % of the budget appropriations will be allocated to the renewable and end-use energy efficiency policy areas, including smart grids, energy storage and smart cities and communities from 2014 onwards.

In acknowledgment of the essential role of end-user energy efficiency and renewable energy for furthering energy security in the Union, market uptake measures will be supported through an 'Intelligent energy Europe III' programme to build capacity, improve governance and overcome market barriers so that energy efficiency and renewable energy solutions can be rolled out. Part of the appropriations in the overall energy challenge budget will therefore be spent on market uptake activities for existing renewable and energy efficiency technologies within the programme, carried out by a dedicated management structure, and will include support for sustainable energy policy implementation, capacity building and mobilisation of financing for investment, in line with what has been done to date.

Remarks

Under this activity emphasis will be placed on resource-efficient transport (e.g. accelerating the development and deployment of a new generation of electric and other low or zero emission aircraft, vehicles and vessels) as well as on better mobility with less congestion and more safety and security (e.g. promoting integrated door-to-door transport and logistics). The focus will also be on reinforcing the competitiveness and performance of European transport manufacturing industries and related services, by, for instance, developing the next generation of innovative transport means and preparing the ground for the following one. Activities aiming at improving the understanding of transport-related socioeconomic trends and prospects, and at providing policymakers with evidence-based data and analyses will also be supported.

Remarks

The main focus of this activity is to achieve a resource-efficient and climate change resilient economy and a sustainable supply of raw materials in order to meet the needs of a growing global population within the sustainable limits of the planet's natural resources. To that respect emphasis will be placed on fighting and adapting to climate change, on sustainably managing natural resources and ecosystems and on enabling the transition towards a green economy through eco-innovation. Comprehensive and sustained global environmental observation and information systems will also be developed.

Remarks

The aim of this activity is to contribute to making European societies more inclusive, innovative and reflective, by promoting smart, sustainable and inclusive growth. Actions will support coordinated policymaking through the development of evidence, tools, forward-looking activities and pilots to increase transnational efficiency and economic impact of research and innovation policies and achieve a well-functioning European Research Area and Innovation Union. Actions will also aim at closing the innovation divide, ensuring societal engagement in research and innovation and fostering gender balance in research teams, promoting coherent and effective cooperation with third countries and developing an understanding of Europe's intellectual basis: its history and the many European and non-European influences, as an inspiration for our lives today.

Part of this appropriation is intended to be used for operations carried out by the Confederation of European Senior Expert Services (CESES) and its member associations, including technical assistance, advisory services and training in selected public and private sector enterprises and institutions. Accordingly, Union authorising officers are encouraged to make full use of the possibilities offered by the Financial Regulation, including CESES contributions-in-kind to Union projects.

Remarks

The aim of those activities is to fully exploit the potential of Europe's talent pool and to ensure that the benefits of an innovation-led economy are both maximised and widely distributed across the Union in accordance with the principle of excellence. By nurturing and connecting pools of excellence, the activities proposed will contribute to strengthening the European Research Area.

The activities will focus on teaming of excellent research institutions and low-performing RDI regions aiming at the creation of new (or significant upgrade of existing) centres of excellence in low performing RDI Member States and regions, twinning of research institutions, establishing 'ERA Chairs', a Policy Support Facility to improve the design, implementation, and evaluation of national/regional research and innovation policies, supporting access to international networks for excellent researchers and innovators who lack sufficient involvement in European and international networks and strengthening the administrative and operational capacity of transnational networks of national contact points, including through training.

The Bio-based Industries Initiative (BBI) is a new joint technology initiative (JTI) between the Commission and the bio-based industries, covering a broad range of sectors, from agriculture to biotechnologies or forestry. Its objective is to foster the development of a strong and globally competitive bio-based industry in Europe and it will focus on three main areas: feedstock, biorefineries and the development of markets for bio-based products.

BBI JTI shall contribute to the implementation of Horizon 2020, and in particular the specific objective 'Food security, sustainable agriculture and forestry, marine, maritime and inland water research and the bioeconomy' of the priority 'Societal challenges' and the 'Key enabling technologies' component of the specific objective 'Leadership in enabling and industrial technologies'.

Clean Sky 2's objective is to improve the environmental impact of European aeronautical technologies through advanced research and full-scale demonstration in green technology for air transport, thus contributing to the future international competitiveness of the aeronautical sector. The technical activity is developed through different technical areas and aims at building full scale demonstrators in all flying segments.

The Fuel Cells and Hydrogen 2 Joint Undertaking (FCH 2 JU), a public private partnership between the Commission, the industry and the Research Grouping, will build up on the results of its predecessor, set up under FP7. FCH 2 JU's objective is to tackle a series of obstacles to the commercialisation of fuel cells and hydrogen technologies by reducing the cost of FCH systems, increasing their efficiency and demonstrating their feasibility, thus paving the way for a strong, sustainable and globally competitive fuel cells and hydrogen sector in the Union. This budget line is intended to cover the operational costs of the FCH 2 JU.

FCH 2JU shall contribute to the implementation of Horizon 2020, and in particular the specific objectives 'Secure, clean and efficient energy' and 'Smart, green and integrated transport' of the priority 'Societal challenges'.

Remarks

Ongoing discussions on the post-2015 global development framework have viewed universal health coverage (UHC) as a fundamental enabler for ending extreme poverty by 2030 and a crucial factor in completing the unfinished agenda of the health-related Millennium Development Goals (MDGs) — notably MDGs 4, 5 and 6 on improving maternal health, reducing child mortality, and combating HIV and AIDS, malaria and tuberculosis respectively.

It is also important to include neglected tropical diseases (NTDs) in the new development framework, in addition to the MDG 6 diseases and in line with the corresponding roadmap from the WHO (http://whqlibdoc.who.int/hq/2012/WHO_HTM_NTD_2012.1_eng.pdf) and other prominent expert organisations.

Objectives

This project will produce a study that quantifies the role of poverty-related and neglected diseases (PRND) R & D in contributing to UHC and improving the health situation in low- and middle-income countries. The study will:

— track Union investment in PRND R & D and assess how corresponding technologies are being translated into a resource for UHC,

— examine how the correlation between PRND R & D and UHC can be improved with regard to the post-2015 global development framework and develop recommendations for R & D indicators that help advance the impact of UHC.

Developing essential medicines for PRNDs that are safe, effective, affordable, accessible and of assured quality contributes to achieving UHC, and adequately investing in UHC is an effective way of guaranteeing that available services and products are also accessible and of a suitable standard of quality. This correlation will play a crucial role in the post-2015 global development framework, not only for ensuring healthy lives, but also for helping to reduce poverty.

Remarks

The aim of this two-stage preparatory action is to identify the barriers that impede the development of a truly optimised single European transport system and to propose a set of actions which, collectively, can help to accelerate progress. The action fully supports Union and Commission initiatives. It will:

— inform future policy development and research and innovation programmes, at both Union and national level,

— address one of the seven challenges on which Horizon 2020 is based, namely 'Smart, green and integrated transport',

— contribute to implementation of EU2020 flagship initiatives such as 'increasing accessibility and clean transport' and 'promoting innovation and excellence'.

The examination stage will:

— identify stakeholders (industry, research, administrations, regulators and civil society), and their opinions, needs and expectations,

— describe the current state of the system: public policy (at all levels); industry structures; market and regulatory conditions; mechanisms for stakeholder collaboration; transport programmes,

— look at similar issues in other world regions and identify lessons to be learned,

— identify opportunities to improve Europe's transport system as a whole and barriers preventing this.

The roadmap stage will suggest actions, endorsed by a cross-section of stakeholders, which can accelerate progress towards an optimised transport system. It will examine:

— what, if any, new organisation(s) might help, without simply duplicating existing structures,

CHAPTER 08 02 — HORIZON 2020 — RESEARCH *(cont'd)*

08 02 77 *(cont'd)*

08 02 77 04 *(cont'd)*

— how to develop a stronger 'whole system' mindset at all levels,

— ways to encourage existing initiatives to pay more attention to their interactions with the rest of the system,

— potential policy initiatives at Union, Member State and local levels.

The end result will be an in-depth analysis of the opportunities for and barriers to achieving a fully optimised transport system across Europe, plus committed stakeholders from all sectors.

CHAPTER 08 03 — EURATOM PROGRAMME — INDIRECT ACTIONS *(cont'd)*

Remarks

The Euratom research and training programme (2014-2018) ('Euratom programme') complements Horizon 2020 in the field of nuclear research and training. Its general objective is to pursue nuclear research and training activities with an emphasis on continually improving nuclear safety and radiation protection, notably to contribute to the long-term decarbonisation of the energy system in a safe, efficient and secure way. By supporting this research, the Euratom programme shall reinforce outcomes under the three priorities of Horizon 2020: excellent science, industrial leadership, and societal challenges.

The indirect actions of the Euratom programme are focused on two areas: nuclear fission, safety and radiation protection, and fusion research and development programme.

Any revenue from the contributions from candidate countries and, if applicable, the western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

08 03 01 Operational expenditure for the Euratom Programme

Remarks

The scope of the Euratom programme for indirect actions includes nuclear fission safety and radiation protection as well as the fusion research and development which aim to ensure the success of the ITER project while enabling Europe to reap its benefits. It will reinforce outcomes under the three priorities of Horizon 2020: excellent science, industrial leadership and societal challenges.

Remarks

The Euratom activity in the field of fusion will support common research activities undertaken by the fusion stakeholders involved in the implementation of the tasks derived from the fusion roadmap. In addition, it will support joint activities to develop and qualify materials for a demonstration power plant as well as to address reactor operation issues and develop and demonstrate all relevant technologies for a fusion demonstration power plant. The activity will also implement or support knowledge management and technology transfer from the research co-funded by this programme to industry, exploiting all innovative aspects of the research. Furthermore, the activity will support the construction, refurbishment, use and continued availability of key research infrastructures under the Euratom programme.

Remarks

The Euratom activity in the field of nuclear fission will provide support to joint research activities concerning the safe operation of reactor systems in use or which may be used in the future in the Union. It will also contribute to the development of solutions for the management of ultimate nuclear waste. In addition, the activity will support joint and/or coordinated research activities, placing emphasis on the risks from low doses from industrial, medical or environmental exposure. Furthermore, Euratom fission will promote joint training and mobility activities between research centres and industry as well as between different Member and Associated States while it will provide support for maintaining multidisciplinary nuclear competences.

TITLE 08 — RESEARCH AND INNOVATION

CHAPTER 08 03 — EURATOM PROGRAMME — INDIRECT ACTIONS *(cont'd)*

08 03 51 *(cont'd)*

Fusion research, which includes activities that range from basic research to technology development, construction of major projects and training and education activities. It offers the prospect of an almost limitless supply of clean energy, with ITER being the crucial next step in the progress towards this ultimate goal. The realisation of the ITER project therefore lies at the heart of the present Union strategy. It must be accompanied by a strong and focused European research and development programme on fusion to prepare for the exploitation of ITER and to develop the technologies and knowledge base that will be needed during ITER operation and beyond.

Fission research, which aims to establish a sound scientific and technical basis in order to accelerate practical developments for the safer management of long-lived radioactive waste, to promote safer, more resource-efficient and cost-effective nuclear energy and to ensure a robust and socially acceptable system of protection of man and the environment against the effects of radiation.

Remarks

The ITER project aims to demonstrate fusion as a viable and sustainable source of energy by building and operating an experimental fusion reactor as a major step towards the creation of prototype reactors for fusion power stations that are safe, sustainable, environmentally responsible, and economically viable. It will contribute to the Europe 2020 strategy and in particular to its Innovation Union flagship initiative as the mobilisation of European high-tech industries, which are involved in the construction of ITER, should provide the Union with a global competitive advantage in this promising sector.

The project brings together seven parties: the European Union, China, India, Japan, South Korea, Russia, and the United States.

Former Article 08 04 01 (in part)

The European Joint Undertaking for ITER and the Development of Fusion for Energy provides the contribution of the European Atomic Energy Community (Euratom) to the joint implementation of the international ITER project. ITER, a major experimental facility which will demonstrate the scientific and technical feasibility of fusion power, will be followed by the construction of a demonstration fusion power plant (DEMO).

This Joint Undertaking has the following tasks:

— to provide the contribution of Euratom to the ITER International Fusion Energy Organisation,

— to provide the contribution of Euratom to broader approach activities with Japan for the rapid realisation of fusion energy,

— to prepare and coordinate a programme of activities in preparation for the construction of a demonstration fusion reactor and related facilities.

Remarks

The Research Fund for Coal and Steel funds every year innovative projects to enhance the safety, efficiency and competitive edge of the Union coal and steel industries. It was created in 2002 to build on the successes of the European Coal and Steel Community. The distribution of the budgets between coal (27,2 %) and steel (72,8 %) is defined in Council Decision 2003/76/EC of 1 February 2003 establishing the measures necessary for the implementation of the Protocol, annexed to the Treaty establishing the European Community, on the financial consequences of the expiry of the ECSC Treaty and on the Research Fund for Coal and Steel (OJ L 29, 5.2.2003, p. 22).

Remarks

The coal research programme activity aims to reduce the total costs of mining production, improve the quality of the products and reduce the costs of using coal. Research projects shall also aim to achieve scientific and technological progress with a view to gaining a better understanding of the behaviour and control of deposits in relation to rock pressure, gas emissions, the risk of explosion, ventilation and all other factors affecting mining operations. Research projects with these objectives shall present the prospect of results applicable in the short or medium term to a substantial part of Union production.

Remarks

This appropriation is intended to cover expenditure on a set of measures designed to:

— coordinate a better regulatory framework for competition, investment and growth over the entire range of issues in the e-communications field: economic analysis, impact assessment, policy development, regulatory compliance,

— carry out and review the Union's policy on electronic communication networks and services with a view to launching initiatives designed to meet the challenges in this dynamically evolving sector (convergence of electronic communication with audiovisual and content delivery),

— facilitate the implementation of the Digital Agenda for Europe, in actions related to broadband targets through regulation, policy and public financial assistance, including coordination with cohesion policy in the areas relevant to electronic communications networks and services,

— develop policies and coordination measures which will ensure that Member States implement their national broadband plans with reference to the fixed and mobile infrastructure and their possible convergence, including coherence and economic efficiency of public interventions at Union and Member State levels,

— develop policy and legislation with a particular focus on issues related to access and authorisation of e-communications networks and services notably interoperability, interconnection, civil works, independence of regulators and new measures to strengthen the single market,

— facilitate the monitoring and implementation of relevant legislation in all Member States,

— provide coordination of infringement proceedings, and input to relevant State aid matters,

— develop policy and legislation with a particular focus on issues related to retail and consumer issues notably net neutrality, switching, roaming, demand and use stimulation and universal service,

— develop and implement consistent market-based regulations to be applied by national regulatory authorities and to respond to individual notifications from those authorities, notably regarding relevant markets, competition and appropriate regulatory intervention, in particular for next generation access networks,

— develop policies across the board which will ensure that Member States manage all uses of spectrum, including the different internal market realms such as e-communications, broadband internet and innovation,

CHAPTER 09 02 — REGULATORY FRAMEWORK FOR THE DIGITAL AGENDA FOR EUROPE *(cont'd)*

09 02 01 *(cont'd)*

— promote and monitor the implementation of the regulatory framework for communication services (including the mechanism provided for in Article 7 of Directive 2002/21/EC of the European Parliament and of the Council of 7 March 2002 on a common regulatory framework for electronic communications networks and services (Framework Directive) (OJ L 108, 24.4.2002, p. 33),

— enable third countries to pursue a policy of opening up their markets to the same extent as in the Union,

— promote and monitor the implementation of the radio spectrum policy programme (Decision No 243/2012/EU of the European Parliament and of the Council of 14 March 2012 establishing a multiannual radio spectrum policy programme (OJ L 81, 21.3.2012, p. 7)).

The specific objectives of these measures are:

— the formulation of a Union policy and strategy in the field of communication services and networks (including convergence between electronic communications and audiovisual environments, aspects related to the internet, etc.),

— the development of radio spectrum policy in the Union,

— the development of activities in the mobile and satellite communications sector, particularly as regards frequencies, and demand stimulation,

— an analysis of the situation and the legislation adopted in these areas, as well as State aid decisions,

— an analysis of the financial state of play and investment intensities in the sector,

— the coordination of these policies and initiatives as regards the international environment (e.g. WRC, CEPT, etc.),

— the development of activities and initiatives in relation to the Digital Agenda for Europe,

— the development of activities and initiatives in relation to Cohesion Policy,

— the development and maintenance of the database in relation to the radio spectrum policy programme and other actions related to monitoring and the implementation of the programme.

These measures consist, inter alia, in preparing analyses and progress reports, consulting stakeholders and the public, preparing communications, legislative proposals and monitoring the application of legislation, and translations of notifications and consultations under Article 7 of the Directive 2002/21/EC.

This appropriation is intended to cover, in particular, contracts for analysis and expert reports, specific studies, evaluation reports, coordination activities, grants and the part-financing of certain measures.

In addition, this appropriation is also intended to cover expenditure on meetings of experts, communication events, membership fees, information and publications directly linked to the achievement of the objectives of the policy or measures coming under this article, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts.

Remarks

This appropriation is intended to cover the staff and administrative expenditure of the European Union Agency for Network and Information Security (Titles 1 and 2), and operational expenditure relating to the work programme only (Title 3).

The Agency was set up to enhance the capability of the Union, the Member States and, as a consequence, the business community to prevent, address and respond to network and information security problems. In order to achieve this goal, the Agency will be developing a high level of expertise and stimulating broad cooperation between actors from the public and private sectors.

The Agency's aim is to provide assistance and to deliver advice to the Commission and the Member States on issues related to network and information security falling within its competencies and to assist the Commission, where called upon, in the technical preparatory work for updating and developing Union legislation in the field of network and information security.

The Agency must inform the European Parliament and the Council about transfers of appropriations between operational and administrative expenditure.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

The amounts repaid in accordance with Article 16 of Commission Regulation (EC, Euratom) No 2343/2002 constitute assigned revenue (Article 21(3)(c) of the Financial Regulation) to be charged to Item 6 6 0 0 of the general statement of revenue.

Pursuant to Article 208 of the Financial Regulation and the corresponding Articles of the framework Financial Regulation for each of the bodies set up by the Communities, the role of the European Parliament and the Council has been strengthened.

Remarks

This appropriation is intended to cover the Office's staff and administrative expenditure (Titles 1 and 2), and operational expenditure relating to the work programme only (Title 3).

BEREC acts as a specialised and independent expert advisory body assisting the Commission and the national regulatory authorities in the implementation of the Union regulatory framework for electronic communications in order to promote a consistent regulatory approach across the Union. BEREC is neither a Union body nor has legal personality.

The Office is established as a Union body with legal personality, providing BEREC with professional and administrative support in carrying out the tasks conferred on it by Regulation (EC) No 1211/2009.

The Office must inform the European Parliament and the Council about transfers of appropriations between operational and administrative expenditure.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

The amounts repaid in accordance with Article 16 of Commission Regulation (EC, Euratom) No 2343/2002 constitute assigned revenue (Article 21(3)(c) of the Financial Regulation) to be charged to Item 6 6 0 0 of the general statement of revenue.

Remarks

This preparatory action follows on from 2013's successful pilot project. The proposed European Centre for Press and Media Freedom is a logical extension of the Charter of Fundamental Rights of the European Union and the European Charter on Freedom of the Press, acting as a single European-level 'drop-in centre' for journalistic organisations, individuals and media actors alleging violations of those charters. It will be the sole centre in Europe that monitors and documents any such violations. It will also sound the alarm in acute cases, for instance by organising support from foreign colleagues for journalists who need help. The centre will benefit from input from a wide range of sources, including academic centres, regional partners all over Europe and various journalistic organisations.

The centre will cover all Member States and the candidate countries.

This will complement existing actions supported by the Union budget. More specifically, the centre will be the practical hands-on counterpart of the academically oriented Centre for Media Pluralism and Media Freedom based at the European University Institute in Florence. It will, furthermore, benefit from the momentum created by the High Level Group on Media Freedom and Pluralism set up by the Commission and by the European Parliament's resolution of 21 May 2013 on the EU Charter: standard settings for media freedom across the EU.

Legal basis

Preparatory action within the meaning of Article 54(2) of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1).

Remarks

This preparatory action follows on from the pilot project financed in 2013 and 2014 by the European Parliament, the main purpose of which was to test and apply the Media Pluralism Monitor (MPM) developed in 2009 at the request of the Commission by a consortium of European universities.

The MPM pilot project is currently being carried out by the Centre for Media Pluralism and Media Freedom (CMPF) at the Robert Schuman Centre for Advanced Studies/European University Institute, an academic centre established in 2011 by the Commission as part of the Union's ongoing efforts to improve the protection of media pluralism and media freedom in Europe and to assess what action needs to be taken at European or national level to further those objectives. Under the pilot project, the CMPF is testing a streamlined version of the 2009 MPM on a representative sample of nine Member States: Belgium, Bulgaria, Denmark, Estonia, France, Greece, Hungary, Italy and the United Kingdom. Those countries were selected on the basis of objective criteria so as to ensure the highest degree of neutrality and to allow broad implementation in different circumstances.

COMMISSION
TITLE 09 — COMMUNICATIONS NETWORKS, CONTENT AND TECHNOLOGY

CHAPTER 09 04 — HORIZON 2020 *(cont'd)*

Remarks

These remarks are applicable to all the budget lines in this chapter.

This appropriation will be used for Horizon 2020 — the framework programme for research and innovation, which covers the 2014-2020 period.

Horizon 2020 shall play a central role in the implementation of the Europe 2020 flagship initiative 'Innovation Union' and other flagship initiatives, notably 'Resource-efficient Europe', 'An industrial policy for the globalisation era', and 'A digital agenda for Europe', as well as in the development and functioning of the European Research Area (ERA). Horizon 2020 shall contribute to building an economy based on knowledge and innovation across the whole Union by leveraging sufficient additional research, development and innovation funding.

It will be carried out in order to pursue the general objectives set out in Article 179 of the Treaty on the Functioning of the European Union, in order to contribute to the creation of a society of knowledge, based on the European Research Area, i.e. supporting transnational cooperation at all levels throughout the Union, taking the dynamism, creativity and the excellence of European research to the limits of knowledge, strengthening human resources for research and for technology in Europe, quantitatively and qualitatively, and research and innovation capacities in the whole of the Union and ensuring optimum use thereof.

Also entered against these articles and items are the costs of high-level scientific and technological meetings, conferences, workshops and seminars of European interest organised by the Commission, the funding of high-level scientific and technological analyses and evaluations carried out on behalf of the Union to investigate new areas of research suitable for Union action, inter alia, in the context of the European Research Area, and measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

This appropriation will be used in accordance with Regulation (EU) No 1290/2013 of the European Parliament and of the Council of 11 December 2013 laying down the rules for the participation and dissemination in 'Horizon 2020 — the Framework Programme for Research and Innovation (2014-2020)' and repealing Regulation (EC) No 1906/2006 (OJ L 347, 20.12.2013, p. 81).

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this chapter. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

The possibility of third countries or institutes from third countries taking part in European cooperation in the field of scientific and technical research is envisaged for some of these projects. Any financial contribution entered in Items 6 0 1 3 and 6 0 1 5 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Any revenue from States taking part in the European Cooperation in the field of Scientific and Technical Research will be entered in Item 6 0 1 6 of the of the statement of revenue and may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Any revenue from the contributions from candidate countries and, if applicable, the western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

CHAPTER 09 04 — HORIZON 2020 *(cont'd)*

Any revenue from the contributions by outside bodies to Union activities entered in Item 6 0 3 3 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Additional appropriations will be provided under Item 09 04 50 01.

Administrative appropriations of this chapter will be provided under Article 09 01 05.

09 04 01 Excellent science

Remarks

This priority of Horizon 2020 aims to reinforce and extend excellence in the Union's science base and ensure a steady stream of world-class research to secure the Union's long-term competitiveness. It will support the best ideas, develop talent within the Union, provide researchers with access to priority research infrastructure, and make the Union an attractive location for the world's best researchers. Research actions to be funded will be determined according to the need and opportunities of science, without predetermined thematic priorities. The research agenda will be set in close liaison with the scientific community and research will be funded on the basis of excellence.

Remarks

The specific objective is to foster radically new technologies by exploring novel and high-risk ideas building on scientific foundations. By providing flexible support to goal-oriented and interdisciplinary collaborative research on various scales and by adopting innovative research practices, the aim is to identify and seize opportunities of long-term benefit for citizens, the economy and society.

Activities under the 'Future and Emerging Technologies' specific objective shall address the entire spectrum of science-driven innovation: from bottom-up, small-scale early explorations of embryonic and fragile ideas to building new research and innovation communities around transformative emerging research areas and large and federated research initiatives built around a research agenda aiming to achieve ambitious and visionary goals.

Activities cover collaboration, networking actions and national programme coordination initiatives. Also entered in this item are the costs of independent experts assisting in proposal evaluations and project reviews, the costs of events, meetings, conferences, workshops and seminars of European interest organised by the Commission, the costs of studies, analyses and evaluations, the costs of monitoring and evaluation of the specific programme and of the framework programmes and the costs of measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

Remarks

The specific objective is to endow Europe with world-class research infrastructure which is accessible to all researchers in Europe and beyond and fully exploit their potential for scientific advance and innovation.

Activities will focus on development, deployment and operation of e-infrastructure. In addition, activities for innovation, strengthening human resources for research infrastructure, policy development and international cooperation are foreseen.

An integrated and service-driven approach will be taken to deliver e-infrastructures that respond to the needs of European science, industry and society in terms of development and deployment of integrated e-infrastructure services for a wide range of research communities (de-siloing). Maximising coordination and synergies with e-infrastructure development at national level and expanding e-infrastructure beyond science as such, to the science-industry-society triangle.

Activities cover collaboration, networking actions and national programme coordination initiatives. Also entered in this item are the costs of independent experts assisting in proposal evaluations and project reviews, the costs of events, meetings, conferences, workshops and seminars of European interest organised by the Commission, the costs of studies, analyses and evaluations, the costs of monitoring and evaluation of the specific programme and of the framework programmes and the costs of measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

09 04 02 Industrial leadership

Remarks

This priority of Horizon 2020 aims to make the Union a more attractive location to invest in research and innovation, by promoting activities where businesses set the agenda as well as at accelerating the development of new technologies which will underpin future businesses and economic growth. It will provide major investment in key industrial technologies, maximise the growth potential of Union companies by providing them with adequate levels of finance and help innovative SMEs to grow into world-leading companies.

Remarks

The specific objective is to maintain and build global leadership in enabling technologies, which underpin competitiveness across a range of existing and emerging industries and sectors. In line with the Digital Agenda for Europe, the specific objective of ICT research and innovation is to enable Europe to develop and exploit the opportunities brought by ICT progress for the benefits of its citizens, businesses and scientific communities.

ICT underpins innovation and competitiveness across a broad range of private and public markets and sectors, and enables scientific progress in all disciplines. Over the next decade, the transformative impact of digital technologies, ICT components, infrastructures and services will be increasingly visible in all areas of life.

Activities will strengthen the Union's scientific and technology base and insure its global leadership in ICTs, help drive and stimulate innovation through ICT use and ensure that ICT progress is rapidly transformed into benefits for Europe's citizens, businesses, industry and governments. The activities under the 'Leadership in information and communications technology' specific objective will be primarily based on research and innovation agendas defined by industry and business, together with the research community and will have a strong focus on leveraging private sector investment.

09 04 03 ***Societal challenges***

Remarks

This priority of Horizon 2020 responds directly to the policy priorities and societal challenges identified in the Europe 2020 strategy. Those activities will be implemented using a challenge-based approach which brings together resources and knowledge across different fields, technologies and disciplines. The activities will cover the full cycle from research to market, with a new focus on innovation-related activities such as piloting, demonstration, test-beds, support for public procurement, design, end-user driven innovation, social innovation and market take-up of innovations. The activities will support directly the corresponding sectoral policy competences at Union level.

Remarks

The vision of the eHealth Action Plan 2012-2020 is to utilise and develop e-health to address several of the most pressing health and health systems challenges of the first half of the twenty-first century, namely:

— to improve chronic disease and multimorbidity (multiple concurrent disease) management and to strengthen effective prevention and health promotion practices,

CHAPTER 09 04 — HORIZON 2020 *(cont'd)*

09 04 03 *(cont'd)*

09 04 03 01 *(cont'd)*

— to increase the sustainability and efficiency of health systems by unlocking innovation, enhancing patient-/citizen-centric care and citizen empowerment and encouraging organisational changes,

— to foster cross-border healthcare, health security, solidarity, universality and equity,

— to improve legal and market conditions for developing e-health products and services.

ICT-based products and services have demonstrated their capacity to help address these major challenges in the form of personalised health, telehealth and telecare solutions, service robotics for health and care, support for prolonged active and independent living and home-based care. It is also a major new growth opportunity as large new markets for ICT-based products and services emerge to address health, demographic change and well-being.

Activities will cover development and exploitation of ICT for health, well-being and ageing well solutions. This will build on the emergence of underpinning technologies arising out of ICT in LEIT such as micro-nano systems, embedded systems, robotics, Internet of the future and cloud technologies. It will also build on further development of security- and privacy-enhancing technologies.

The ambient assisted living research and development joint programme will also be supported to contribute to market availability and exploitation of ICT-based products and services and the ICT innovation and pilot projects will be further supported in response to the European Innovation Partnership on Active and Health Ageing and the eHealth 2020 action plan.

Activities cover collaboration, networking actions and national programme coordination initiatives. Also entered in this item are the costs of independent experts assisting in proposal evaluations and project reviews, the costs of events, meetings, conferences, workshops and seminars of European interest organised by the Commission, the costs of studies, analyses and evaluations, the costs of monitoring and evaluation of the specific programme and of the framework programmes and the costs of measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

Part of this appropriation is intended to be used for operations carried out by the Confederation of European Senior Expert Services — CESES — and its member associations, including technical assistance, advisory services and training in selected public and private sector enterprises and institutions. For that to be achieved, Union authorising officers are encouraged to make full use of the possibilities offered by the new Financial Regulation, including CESES contributions in kind to Union projects.

Remarks

The specific objective is to foster inclusive, innovative and reflective European societies in a context of unprecedented transformations and growing global interdependencies.

Activities will cover four main areas: ICT-enabled public sector innovation, understanding and preserving Europe's intellectual basis, learning and inclusion.

ICT-enabled public sector innovation refers to the use of ICT for the creation and implementation of new processes, products, services and methods of delivery which result in significant improvements in the efficiency, effectiveness and quality of public services. The future public administrations should be digital and cross-border by default. Activities cover fostering efficient, open and citizen-centric public services, involving the public sector as an agent for innovation and change as well as cross-border innovation measures or seamless delivery of public services.

The aim of the second challenge is 'to contribute to an understanding of Europe's intellectual basis: its history and the many European and non-European influences; as an inspiration for our lives today'.

The aim of the third challenge is to support the widespread adoption of ICT in schools and for training in Europe.

The fourth challenge is to get the elderly (aged 65 and above), the unemployed and low educated, migrants, people in need of care, people living in remote or poorer areas, persons with disabilities, and the homeless to fully participate in society. Activities focus on empowering them with the necessary digital skills and providing them with access to digital technologies.

Activities cover collaboration, networking actions and national programme coordination initiatives. Also entered in this item are the costs of independent experts assisting in proposal evaluations and project reviews, the costs of events, meetings, conferences, workshops and seminars of European interest organised by the Commission, the costs of studies, analyses and evaluations, the costs of monitoring and evaluation of the specific programme and of the framework programmes and the costs of measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

New item

The specific objective is to secure societies, protecting freedom and security of the Union and its citizens.

The integrated portfolio of activities will develop solutions to protect our society and economy against accidental or man-made disruptions of the information and communication technologies our society and economy depends on; providing solutions for end-to-end secure ICT systems, services and applications; safeguarding the human right of privacy in the digital society; providing the incentives for the industry to supply secure ICT; stimulating the uptake of secure ICT. The aim is to ensure cyber security, trust and privacy in the Digital Single Market, whilst at the same time improving the competitiveness of the Union's security, ICT and service industries. Another objective is to increase users' trust in their participation in the digital society, and overcome citizens' concern with the disclosure of their personal information online because of security issues (e.g. internet usage for banking or purchases).

Activities cover collaboration, networking actions and national programme coordination initiatives. Also entered in this item are the costs of independent experts assisting in proposal evaluations and project reviews, the costs of events, meetings, conferences, workshops and seminars of European interest organised by the Commission, the costs of studies, analyses and evaluations, the costs of monitoring and evaluation of the specific programme and of the framework programmes and the costs of measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

At a time when unemployment among the new generations is alarming, Europe must become an innovation-driven society in order to get back on the growth path. For this purpose, it is necessary to create new technologies and to reinvent the ways Union citizens can acquire, transfer and co-construct knowledge. Higher education and research are rapidly evolving. Creating new knowledge technologies requires training teachers, students and researchers alike as well as any individual who needs to adapt to new market demands. Given the ever-growing flow of data, a capacity is needed to empower Union citizens to access content and to learn anywhere and anytime in an open collaborative learning ecosystem. Many endeavours, such as citizen science, scientific discovery games and massive open online courses (MOOCs), show that — like many other sectors — education and research are rapidly evolving. Europe can only catch up and take the lead provided it invests in the next generation of tools and in the coming generations of individuals willing to reinvent learning, teaching and research tools.

The initiative 'Opening up education' proposed by the Commission aims at creating the basis for a stronger exploitation of ICT in education. The goal is to make access to education easier and increase efficiencies in learning through sharing and opening content to all individuals. While this initiative aims at making content available, there is still a need for mapping and certifying the knowledge acquired.

CHAPTER 09 04 — HORIZON 2020 *(cont'd)*

09 04 77 *(cont'd)*

09 04 77 01 *(cont'd)*

Given the current youth unemployment that coexists with a lack of skilled workers in many Members States, the Union clearly lacks an essential component to fill this knowledge gap. The interests and the current knowledge of individuals should be matched not only with the most-demanded labour market skills but also with the possible learning roadmaps that can help them acquire the required knowledge and skills.

In order to fully exploit the potential of this new type of learning system for the labour market, methods are needed that are able to validate the quality of their learning. Consequently, a mechanism has to be found that allows individuals to assess their competencies (create their individual knowledge map), the knowledge required on the labour market and the learning path that can link the two, hence providing the right content to each individual. Only by doing so, can it be assured that the right content is available to the right target group of individuals. In order to be able to track the learning path, a validation of the acquired knowledge, possible through online certificates or badges must be made available.

This type of social and technological innovations can benefit all citizens regardless of their level of resources, the languages they speak, their age, their health or their cultural capital. Such a project will thus contribute to bridging the knowledge gap and reducing unemployment by helping especially the young currently unemployed to maximise their learning and find new career opportunities.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

This pilot project proposal aims at testing well-being and healthcare service applications in open access FTTH networks. The future delivery of well-being and healthcare services is to rely on FTTH-based solutions, and the realisation of a full-scale high-speed e-health solution would contribute in achieving one of the targets of the Digital Agenda for Europe.

The project will explore, identify and test new and existing e-health applications to improve profitability and usability of services. The project aims, for instance, to evaluate patient empowerment and ability of well-being and healthcare professionals to share digital patient information. Open access FTTH networks have the potential to carry out a range of e-health solutions, e.g. personal health information management, patient in-home monitoring, sending X-rays from the central hospital to the rural area medical centre, and tele-physiotherapy.

CHAPTER 09 04 — HORIZON 2020 *(cont'd)*

09 04 77 *(cont'd)*

09 04 77 02 *(cont'd)*

The project is to be implemented in rural regions with long distances and with already existing cooperative-based FTTH networks that operate in a real open access principle. Such network exists for instance in Southern Ostrobothnia. Being distant from the physical service providers and having demographic challenges, rural areas should be especially targeted when providing electronic well-being and healthcare solutions in the future.

FTTH is the most advanced technology to support specific well-being and healthcare service applications with fast symmetric connections and low latencies, notably by providing high speeds both downstream and upstream. Most importantly, the open access model enables all service providers to offer their services in the same fibre for free. This fair competition is considered to improve the promotion of services, value for money and accessibility.

This pilot project is unique and not redundant or in conflict with any national or Union programmes. The deployment of broadband networks is not the focus of this pilot project, and therefore it is not overlapping with the existing national or Union programmes of deployment of broadband in Member States.

The duration of this pilot project is two years.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

The pilot project aims to accelerate the full use of Europe's intellectual capital to the benefit of citizens, entrepreneurs and scientists through new media tools.

The aim is to develop an e-infrastructure based on the concepts of social networks, to promote direct communication between researchers, businesses and media within the European Research Area (ERA).

Beginning from the strategic areas around the priority 'Societal challenges', as outlined in Europe 2020 strategy, the pilot project will support the creation of virtual clusters on these key themes creating a direct way for open dialogue between science and society.

CHAPTER 09 04 — HORIZON 2020 *(cont'd)*

09 04 77 *(cont'd)*

09 04 77 03 *(cont'd)*

The pilot project will promote active interaction between science, citizens and policymakers through the involvement of European media and social media, in order to support participation of citizens in research agenda setting, ongoing research processes, as well as in discussions on the results and impacts of research for society, policy and further research.

The objectives of the pilot project are:

— to develop a reliable, non-profit e-infrastructure (similar to social networks) as basic tool to promote stronger communication and dialogue across disciplines, sectors and borders,

— to integrate identity security of researchers and other actors to ensure a reliable and secure environment,

— to connect to existing research databases ensuring a single access point to research results from all countries and disciplines (interoperability) connecting also to existing European initiatives,

— to create virtual clusters on the topics of the 'societal challenges' that bring together researchers, industry, media and policymakers to enhance collaborations on these key themes, starting from the existing European collaborations and creating an easy and useful tool to facilitate dialogue and collaborations,

— to create a direct dialogue between these virtual clusters (see fourth indent) and citizens through the connection to leading European media.

The project intends to respond to some of the needs and concerns outlined in the Digital Agenda for Europe and Horizon 2020.

Current issues that the project will address: recent ICT developments have shown how the power of social networks and e-infrastructures can help harness the potential of networks.

In fact the problems of the existing online environment for research e-infrastructures are:

— size: the majority of existing networks are too small to go beyond the specific field and research group (according to Commission statistics, the average size of an online network of researchers is around 100 users). A large interoperable network is needed that allows researchers and other stakeholders to find the information they are looking for across sectors and disciplines with a familiar tool,

— reach: traditionally, networks bring together users within the same field and sector. In order to unlock the innovation capacity of Europe, the creation of transdisciplinary (inter-sectorial and inter-disciplinary) connections needs to be made easier,

— reliability: one of the major reasons why big networks in research have not been successful is that existing relations are still based on personal connection and the identities on online networks are not trusted. In order to really foster transdisciplinary connections, a system is needed where the identity verification creates a secure environment for all users engaged,

— trust: a pivotal aspect for any network is trust. Based on market studies a European social network/e-infrastructure would need to be developed in collaboration with the different stakeholders, be non-profit and have a clear IP policy developed together with researchers.

DIRECT RESEARCH

Remarks

These remarks apply to all the budget lines in the 'Direct research' policy area (with the exception of Chapter 10 05).

These appropriations are intended to cover expenditure relating to:

— staff occupying posts on the authorised establishment plan of the Joint Research Centre (JRC) and external personnel implementing the Research and Innovation programmes,

— staff-related costs such as missions, training, medical services and recruitment,

— operation and functioning of the JRC institutes, administrative support, safety and security of the sites, IT related expenditure, non-recurrent costs and major research infrastructures,

— research and support activities including exploratory research, scientific and technical equipment, subcontracting of services, etc.,

— research and scientific support tasks relating to activities entrusted to the JRC within the framework of its participation on a competitive basis in support of the Union's policies and on behalf of outside bodies.

In accordance with Article 21 of the Financial Regulation, any revenue entered in Items 6 2 2 4 and 6 2 2 5 of the statement of revenue may give rise to the provision of additional appropriations.

Miscellaneous revenue may give rise to the provision of additional appropriations to be used in Chapters 10 02, 10 03 or 10 04 or Article 10 01 05, depending on their purpose.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

The possibility of third countries or organisations from third countries taking part in European cooperation in the field of scientific and technical research is envisaged for some of these projects. Any financial contribution will be entered in Item 6 0 1 3 of the statement of revenue and may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

The additional appropriations will be provided under Items 10 02 50 01 and 10 03 50 01.

Remarks

This appropriation is intended to cover expenditure relating to officials and temporary staff occupying posts on the authorised establishment plan of the Joint Research Centre implementing research and innovation programmes — Horizon 2020, and in particular:

— direct action, consisting of research activities, scientific and technical support activities, and exploratory research activities undertaken in the establishments of the Joint Research Centre,

— indirect action, consisting of programmes implemented as part of the Joint Research Centre's activities conducted on a competitive basis.

Staff costs comprise the basic salary, allowances, miscellaneous indemnities and contributions based on the statutory provisions, including expenses related to the entry into service, change in the place of employment and termination of service.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

This appropriation will be used for Horizon 2020 — the Framework Programme for research and innovation which covers the 2014-2020 period.

CHAPTER 10 02 — HORIZON 2020 — DIRECT ACTIONS OF THE JOINT RESEARCH CENTRE (JRC) IN SUPPORT OF UNION POLICIES *(cont'd)*

Horizon 2020 shall play a central role in the delivery of the Europe 2020 strategy for smart, sustainable and inclusive growth ('Europe 2020 strategy') by providing a common strategic framework for the Union's funding of excellent research and innovation, thus acting as a vehicle for leveraging private and public investment, creating new job opportunities and ensuring Europe's long-term sustainability, growth, economic development, social inclusion and industrial competitiveness, as well as addressing societal challenges across the Union.

This appropriation is intended to be used in accordance with Regulation (EU) No 1290/2013 of the European Parliament and of the Council of 11 December 2013 laying down the rules for participation and dissemination in 'Horizon 2020 — the Framework Programme for Research and Innovation (2014-2020)' and repealing Regulation (EC) No 1906/2006 (OJ L 347, 20.12.2013, p. 81).

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this chapter. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Remarks

This appropriation is intended to cover the scientific and technical support and research activities carried out by the Joint Research Centre in accordance with Part VI of the Specific Programme Implementing Horizon 2020 'Non-nuclear direct actions of the Joint Research Centre (JRC)', in order to provide customer-driven scientific and technical support to Union policies. The JRC shall focus on:

— excellent science: the JRC will carry out research to enhance the scientific evidence base for policy making and to examine emerging fields of science and technology, including through an exploratory research programme,

— industrial leadership: the JRC will contribute to competitiveness in the Union through support to the standardisation process and standards with pre-normative research, development of reference materials and measurements, and harmonisation of methodologies in five focal areas (energy; transport; the flagship initiative 'Digital Agenda for Europe'; security and safety; consumer protection). It will carry out safety assessments of new technologies in areas such as energy and transport and health and consumer protection. It will contribute to facilitating the use, standardisation and validation of space technologies and data, in particular to tackle societal challenges,

— societal challenges: the JRC will carry out research on the following themes: health, demographic change and well-being; food security, sustainable agriculture and forestry, marine, maritime and inland water research and the bio-economy; secure, clean and efficient energy; smart, green and integrated transport; climate action, environment, resource efficiency and raw materials; Europe in a changing world — inclusive, innovative and reflective societies; secure societies — protecting freedom and security of Europe and its citizens.

CHAPTER 10 02 — HORIZON 2020 — DIRECT ACTIONS OF THE JOINT RESEARCH CENTRE (JRC) IN SUPPORT OF UNION POLICIES *(cont'd)*

10 02 01 *(cont'd)*

This appropriation covers specific expenditure relating to research and support activities, including the purchase of scientific and technical equipment, subcontracting of scientific and technical services, access to information, acquisition of consumables, etc. This includes expenditure on scientific infrastructure directly incurred for the projects concerned.

It also covers expenditure of any type concerning research and scientific support tasks relating to activities under this article entrusted to the Joint Research Centre within the framework of its participation on a competitive basis in support of the Union policies and on behalf of outside bodies.

In accordance with Article 21 and Article 183(2) of the Financial Regulation, any revenue entered in Items 6 2 2 3 and 6 2 2 6 of the statement of revenue may give rise to the provision of additional appropriations.

Remarks

The Research and Training Programme on European Atomic Energy Community (2014-2018) (Euratom Programme) is an integral part of Horizon 2020, the Framework Programme for Research and Innovation. The Euratom Programme will strengthen the research and innovation framework in the nuclear field and coordinate Member States' research efforts, thereby avoiding duplication, retaining critical mass in key areas, and ensuring public funding is used in an optimal way.

COMMISSION
TITLE 10 — DIRECT RESEARCH

CHAPTER 10 03 — EURATOM PROGRAMME — DIRECT ACTIONS *(cont'd)*

This appropriation will be used in accordance with Regulation (EU) No 1290/2013 of the European Parliament and of the Council of 11 December 2013 laying down the rules for participation and dissemination in 'Horizon 2020 — the Framework Programme for Research and Innovation (2014-2020)' and repealing Regulation (EC) No 1906/2006 (OJ L 347, 20.12.2013, p. 81).

The general objective of the Euratom Programme is to pursue nuclear research and training activities with an emphasis on continuous improvement of nuclear safety, security and radiation protection, in particular to potentially contribute to the long-term decarbonisation of the energy system in a safe, efficient and secure way. It will cover both RTD indirect actions on the fusion research and development, nuclear fission, safety and radiation protection research activities, as well as the JRC direct actions in nuclear security and safety. The JRC will provide independent customer-driven scientific and technological support for the implementation and monitoring of Community policies, in particular in the field of nuclear safety and security research and training. By achieving these objectives, the Euratom Programme will reinforce outcomes under the three priorities of the Horizon 2020 Framework Programme: excellent science, industrial leadership and societal challenges. These objectives are clearly linked to those of the Europe 2020 and Energy 2020 strategies and the creation and operation of the European Research Area.

Remarks

This appropriation is intended to cover the scientific and technical support and research activities carried out by the Joint Research Centre to implement the Research and Training Programme of the European Atomic Energy Community (2014-2018). Direct actions under the Euratom Programme shall have the following specific objectives:

— to improve nuclear safety including: nuclear reactor and fuel safety, waste management, including final geological disposal as well as partitioning and transmutation; decommissioning, and emergency preparedness,

— to improve nuclear security including: nuclear safeguards, non-proliferation, combating illicit trafficking, and nuclear forensics,

— to increase excellence in the nuclear science base for standardisation,

— to foster knowledge management, education and training,

— to support the policy of the Union on nuclear safety and security.

This appropriation also addresses the activities necessary for implementing safeguards pursuant to Chapter 7 of Title II of the Euratom Treaty and the obligations arising from the Non-Proliferation Treaty and implementation of the Commission's programme to support the International Atomic Energy Agency (IAEA).

It covers specific expenditure relating to research and support activities, including the purchase of scientific and technical equipment, subcontracting of scientific and technical services, access to information, acquisition of consumables, etc. This includes expenditure on scientific infrastructure directly incurred for the projects concerned.

CHAPTER 10 03 — EURATOM PROGRAMME — DIRECT ACTIONS *(cont'd)*

10 03 01 *(cont'd)*

This appropriation also covers expenditure of any type concerning research and scientific support tasks relating to activities under this article entrusted to the Joint Research Centre within the framework of its participation on a competitive basis in support of Union policies and on behalf of outside bodies.

In accordance with Article 21 and Article 183(2) of the Financial Regulation, any revenue entered in Items 6 2 2 3 and 6 2 2 6 of the statement of revenue may give rise to the provision of additional appropriations.

Remarks

This article is intended to receive the appropriations required for expenditure specific to the various tasks performed on behalf of outside bodies. It includes research and supply of services under contract to third parties, such as industry, national or regional authorities, as well as contracts in the context of Member States' research programmes. This may cover the following:

— the provision of supplies, services and work carried out in general against payment, including certified reference materials,

— the operation of facilities for the benefit of Member States, including the irradiation for outside bodies in the high-flux reactor (HFR) at the Petten establishment of the Joint Research Centre,

— the performance of research activities and the provision of services additional to the specific research programmes, including the industrial clubs for which the partners from industry must pay an enrolment fee and annual subscriptions,

Remarks

This appropriation is intended to cover part of expenses of any kind incurred during the implementation of the high flux reactor (HFR) supplementary programme.

The scientific and technical objectives of the supplementary programme are the following:

— to provide a safe, steady and reliable neutron flux for experimental purposes,

— to perform research and development on: material and fuel science for the improvement of the safety of existing nuclear and future reactors (both fission and fusion); radioisotopes for medical applications, reactor ageing and life management, and on waste management,

— to act as a training facility hosting doctoral and post-doctoral fellows in performing their research activities through national or European programmes.

In accordance with Article 21 of the Financial Regulation, this item will, in the course of the financial year, be provided with additional appropriations within the limits of the revenue from the Member States concerned (currently the Netherlands, Belgium and France) to be entered in Item 6 2 2 1 of the statement of revenue.

Legal basis

It may, in particular, be used to cover:

— expenditure incurred on external personnel at headquarters (contract agents, seconded national experts or agency staff) up to EUR 850 000, including support expenditure (representation expenses, training, meetings, missions relating to the external personnel financed under this line) required for the implementation of the EMFF and the completion of measures under its predecessor the European Fisheries Fund (EFF) relating to technical assistance,

— expenditure on external personnel (contract staff, local staff or seconded national experts) in the Union's delegations in third countries, as well as additional logistical and infrastructure costs, such as the cost of training, meetings, missions and renting of accommodation directly resulting from the presence in delegations of external personnel remunerated from the appropriations entered in this item,

— expenditure on mission by third country delegations attending meetings to negotiate fisheries agreements and joint committees,

— expenditure on studies, evaluation measures and audits, meetings of experts and the participation of stakeholders in ad hoc meetings, seminars and conferences pertaining to major topics, information and publications in the field of maritime affairs and fisheries,

— expenditure on information technology (IT) covering both equipment and services,

— participation of scientific experts in meetings of Regional Fisheries Management Organisations,

— any other expenditure on non-operational technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts.

This appropriation may also cover expenditure for preparatory, monitoring, administrative and technical support, evaluation, audit and inspection measures related to fisheries market intervention previously financed under the common agricultural policy in accordance with Article 5(a) to (d) of Regulation (EC) No 1290/2005.

COMMISSION
TITLE 11 — MARITIME AFFAIRS AND FISHERIES

CHAPTER 11 06 — EUROPEAN MARITIME AND FISHERIES FUND (EMFF) *(cont'd)*

Remarks

Article 39 of Regulation (EC) No 1260/1999 provides for financial corrections, any revenue from which is entered in Item 6 5 0 0 of the statement of revenue. That revenue may give rise to the provision of additional appropriations, in accordance with Article 21 of the Financial Regulation, in specific instances where they are necessary to cover risks of cancellation or of reductions in corrections previously decided upon.

Regulation (EC) No 1260/1999 determines the conditions for repayment of an advance without having the effect of reducing the contribution from the Structural Funds towards the assistance concerned. Any revenue from the repayment of advances entered in Item 6 1 5 7 of the statement of revenue will give rise to the provision of additional appropriations in accordance with Articles 21 and 178 of the Financial Regulation.

Article 80 of the Financial Regulation provides for financial corrections in the event of expenditure incurred in breach of applicable law.

Articles 85, 144 and 145 of Regulation (EU) No 1303/2013 on criteria for financial corrections by the Commission provide for specific rules on financial corrections applicable to the EMFF.

Any revenue from the financial corrections carried out on that basis is entered in Item 6 5 0 0 of the statement of revenue and constitutes assigned revenue in accordance with Article 21(3)(c) of the Financial Regulation.

Article 177 of the Financial Regulation lays down the conditions for the repayment in full, or in part, of pre-financing payments in respect of a given operation.

Pre-financing amounts repaid shall constitute internal assigned revenue in accordance with Article 21(4) of the Financial Regulation and shall be entered in Item 6 1 5 0 or 6 1 5 7.

Measures to combat fraud are funded under Article 24 02 01.

Remarks

This appropriation is intended to cover the financing of the commitments remaining to be settled from earlier programming periods relating to EFF technical assistance measures as provided for in Article 46 of Regulation (EC) No 1198/2006. The technical assistance measures include studies, evaluations, measures aimed at the partners, measures to disseminate information, installation, operation and interconnection of computerised systems for the management, monitoring, audit, inspection and evaluation, improvements in evaluation methods and the exchange of information on practices in this field and the establishment of trans-national and Union networks of actors in the sustainable development of coastal fishing zones.

Technical assistance covers preparatory, monitoring, audit, evaluation, supervision and management measures required to implement the EFF.

This appropriation may, in particular, be used to cover:

— support expenditure (representation expenses, training, meetings, missions),

— information and publishing expenditure,

— expenditure on information technology and telecommunications,

— contracts for the provision of services,

— support for networking and exchange of best practices.

Remarks

This appropriation is intended to cover the financing of the commitments remaining to be settled relating to the operational programmes of the European Fisheries Fund (EFF) convergence objective for the 2007-2013 programming period.

Actions financed under this article should take into account the need to maintain a stable and enduring balance between the capacity of the fishing fleets and the resources available, and the need to promote a safety culture within fishing.

This appropriation is also intended to cover the financing of the commitments remaining to be settled from earlier programming periods relating to the financing of actions to improve fishing gear selectivity.

Remarks

This appropriation is intended to cover the Union's voluntary contributions to international organisations active in the field of fisheries and the law of the sea. It may in particular finance:

— preparatory work on new sustainable fisheries agreements,

— contributions and registration fees for meetings of international fisheries organisations in which the Union has observer status (Article 217 of the Treaty on the Functioning of the European Union), i.e. the International Whaling Commission (IWC), and the Organisation for Economic Cooperation and Development (OECD),

— support for the follow-up and implementation of some regional projects, in particular by contributing to specific joint international control and inspection activities. This appropriation should also cover surveillance programmes to be negotiated in West Africa and the Western Pacific,

— financial contributions to preparations for new international fisheries organisations which are of interest to the Union,

— financial contributions to scientific work carried out by international fisheries organisations which is of special interest to the Union,

— financial contributions to any activity (including working, informal or extraordinary meetings of contracting parties) which upholds the interests of the Union in international organisations and strengthens cooperation with its partners in these organisations. In this connection, when the presence of representatives of third countries in negotiations and meetings within international forums and organisations becomes necessary for the Union interests, the EMFF shall bear the costs of their participation,

— grants to regional bodies in which coastal states are involved in the subregion concerned,

— grants to international fisheries organisations activities which are of interest to the Union.

Remarks

This appropriation is intended to finance the following activities under the action plan for closer dialogue with the fishing industry and those affected by the common fisheries policy and the integrated maritime policy:

— grants to (Regional) Advisory Councils (following the adoption of Regulation (EU) No 1380/2013, existing Regional Advisory Councils (RACs) will be transformed in Advisory Councils (ACs) and new ones will be created) to cover operational costs as well as interpretation and translation costs of (R)AC meetings,

— the implementation of measures to provide documentation about and explain the common fisheries policy aimed at the fishing industry and those affected by the common fisheries policy, as well as the integrated maritime policy.

The Commission will continue supporting the functioning of the ACs with a financial contribution. It will participate in meetings when appropriate and analyse the recommendations issued by the ACs which may provide an input when drafting legislation. Through the consultation of stakeholders in the (R)ACs, the involvement of people working in fisheries and other interest groups in the common fisheries policy process will be strengthened, so that greater account of specific regional characteristics is taken.

Part of the appropriation is earmarked also for information and communication activities linked to the common fisheries policy and the integrated maritime policy as well as for communication activities addressed to the interested parties. Efforts will continue to be made to inform the stakeholders and the specialised media in the new Member States as well as in the candidate countries about the common fisheries policy and the integrated maritime policy.

Any revenue may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Remarks

This appropriation is intended to cover the costs for the development and dissemination of market intelligence for fishery and aquaculture products. Specific actions include, inter alia:

— the full operation of the Market Observatory,

— gathering, analysing and disseminating economic knowledge and understanding of the Union market for fishery and aquaculture products along the supply chain, taking into account the international context,

— regular price surveys along the Union supply chain for fishery and aquaculture products and the conduct of analyses on market trends,

— provision of ad-hoc market studies and a methodology for price formation surveys,

— facilitating access to available data on fishery and aquaculture products collected pursuant to the Union legislation,

— making market information available to the adequate level to stakeholders.

Remarks

This appropriation is intended to cover EMFF technical assistance measures as provided for in Article 92 of Regulation (EU) No 508/2014.

Technical assistance covers preparatory, monitoring, audit, evaluation, supervision and management measures required to implement the EMFF.

It may, in particular, be used to cover:

— studies, evaluations and expert reports,

— actions to disseminate information, support networking, carry out communication activities, raise awareness and promote cooperation and exchange of experience, including with third countries,

— the installation, operation and interconnection of computerised systems for management, monitoring, audit, control and evaluation,

— actions to improve evaluation methods and the exchange of information on evaluation practices,

— actions related to audit,

— the establishment of trans-national and Union networks of actors in the sustainable development of coastal fishing zones.

Commercial designations fall within the remit of each Member State's national authorities; a single instrument should be put in place to give European consumers guarantees that the various designations are transparent and coherent, and to make it easier to verify the information concerned.

The purpose of a pilot project would be to set up:

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

It is intended to be used to:

— assess the feasibility for making the best possible use of active fishing vessels which need to be decommissioned from the Union fleet and of fishermen's experience and practical know-how to benefit both of the fishermen themselves and society at large,

— test under close to real-life conditions the technical and economic viability of redeploying — from fishing to maritime activities — individuals who have been active in the sector as crew members and who can no longer make their living from fishing and possess maritime experience and knowledge at risk of being lost in case alternative sources of income are sought in land-based activities,

— test under close to real-life conditions the feasibility of converting fishing vessels into vessels operating as a platform for a number of environmental and maritime activities outside fishing, in particular collecting marine litter,

— identify under close to real-life conditions the necessary operating costs of a vessel operating under such conditions and the potential sources of funding; however, any such funding should be limited to supporting the start-up of activities that are self-sustaining in the long term,

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

This appropriation is intended to finance support measures for small-scale fishing which will help coordinate actions and channel funds from other instruments, with a view to dealing with the specific problems in this part of the fisheries sector.

The pilot project involves:

— analysing the Union's small-scale fishing sector,

— identifying the Union instruments and funding sources that could be used by this sector,

— establishing the uses to which the instruments, actions, measures and funding available are being put by the small-scale fishing sector,

— analysing the extent to which existing instruments can meet the needs of the small-scale fishing sector and, on the basis of that analysis, proposing any adjustments that may be necessary,

— supporting fishermen's groups, professional organisations and NGOs associated with small-scale fishing, with a view to their coordination, preparation and participation in advisory councils.

The intention is to lay the foundations for an Union support programme for small-scale inshore fishing and artisanal fishing which will help coordinate actions and channel funds from other instruments, with a view to dealing with the specific problems in this sector of the fishing industry.

Objectives

Fishing communities in the outermost regions (ORs) are facing unique and atypical challenges. In response to those challenges, new fishing techniques have developed separately in different ORs. This pilot project will, by involving local fishing communities and stakeholders, explore the feasibility of transferring new fishing techniques from OR to OR.

The main objective is to encourage and share best practices, which may involve new low-environmental-impact fishing techniques, and promote offshore experimental fishing.

By doing this it may be possible to identify viable alternatives which allow the small-scale fishing sector to move its inshore fishing effort offshore, thus reducing fishing pressure on coastal resources. This may allow fishermen in ORs to maintain traditional fishing activities while moving to more environment-friendly and economically viable techniques.

This will also improve the supply to local markets of good-quality fish produced in situ, resulting in associated benefits for the tourism sector, and reduce the need for imports.

Specifications

The fishing practices to be developed in one or more ORs must be new to the region concerned. They could, however, be mature in another region but never have been introduced in the ORs in question. Exchange of good fishing practice among operators is key to success.

Fishing practices must have a low environmental impact, in that the techniques themselves must be environment-friendly and the fishing operations must be small in scale.

The project will involve an initial feasibility study, exchanges of views among experts from different regions and fishing trials involving scientific experts. The expected deliverable is a report detailing the technical aspects of the innovative fishing practices concerned, together with the yields obtained in the experimental trials. This will facilitate the transition towards viable alternative fishing practices for the ORs' small-scale fleets.

The report will also assess the potential investment needed (for example, in new gears) and assess the economic viability for fishermen to use the innovative fishing practices. As appropriate, synergies with the European Maritime and Fisheries Fund may be included in this assessment.

CHAPTER 11 06 — EUROPEAN MARITIME AND FISHERIES FUND (EMFF) *(cont'd)*

11 06 77 *(cont'd)*

11 06 77 09 *(cont'd)*

Explanation

All this points to the need to find fish further offshore or in new resources. In some ORs, such as the Azores and Madeira, offshore fishing is well developed and targeted at deep-water resources and, to some extent, large migratory fish, mainly using hook-and-line techniques with a very low environmental impact. In other ORs, particularly French ORs, techniques have been developed to fish for large migratory fish with anchored fish aggregating devices (FADs). Although some trials have been carried out, fishing for deep-water resources in French ORs has yet to be properly developed, and the know-how of the experts from the Azores and Madeira would be beneficial there. Similarly, while fishing over anchored FADs is well developed in French ORs, it is not in the Portuguese and Spanish ORs. Exchanges of fishing practices and experimental trials could be the starting point for adapting these techniques and using them more widely.

COMMISSION
TITLE 12 — INTERNAL MARKET AND SERVICES

CHAPTER 12 02 — A SINGLE MARKET POLICY AND FREE MOVEMENT OF SERVICES *(cont'd)*

12 02 01 *(cont'd)*

Remarks

This appropriation is intended to cover expenditure arising in connection with measures contributing to the completion of the internal market and its operation and development, and measures contributing, in particular, to:

— greater proximity to citizens and businesses, including the development and strengthening of dialogue with citizens and businesses: via measures intended to make the operation of the internal market more effective, and to ensure that citizens and businesses are able to gain access to the most extensive rights and opportunities, resulting from the opening up and deepening of the internal market without borders and are able to exercise those rights and opportunities in full; and via monitoring and evaluation measures relating to the practical exercise by citizens and businesses of their rights and opportunities with a view to identifying and facilitating the removal of any obstacles which may be preventing them from exercising those rights in full,

— implementing and monitoring the provisions governing public contracts with a view to ensuring their optimum operation and that tenders are genuinely open, including the awareness-raising and training of the various parties to these contracts; the introduction and use of new technologies in the various fields of operation of these contracts; the continuous adaptation of the legislative and regulatory framework in the light of developments arising from these contracts, particularly the globalisation of markets and existing or future international agreements,

— improvement, through the European business test panel (EBTP), of the legal environment for citizens and businesses, for which promotion activities, awareness-raising and training actions could be envisaged; fostering cooperation, development and coordination of legislation in the field of company law and assistance with the creation of European limited companies and European economic interest groupings,

— strengthening administrative cooperation through, inter alia, the Internal Market Information System (IMI), the deepening of knowledge of internal market legislation in the Member States and its sound application by them, and support for administrative cooperation between the authorities responsible for implementing legislation relating to the internal market with a view to achieving the Lisbon strategic goals as set out in the annual policy strategy,

— the setting-up of a system that can effectively and efficiently deal with problems faced by citizens or businesses, arising from the misapplication of internal market legislation by a public administration in another Member State; production of feedback information through the Solvit system by means of an online database system which is accessible to all coordination centres and which will also be made accessible to citizens and businesses; support for the initiative through training measures, promotion campaigns and targeted actions with a particular focus on the new Member States,

— interactive policymaking, in so far as it concerns the completion, development and operation of the internal market, makes up part of the Commission's governance and of the regulatory policy initiatives to better respond to the demands of citizens, consumers and businesses. The appropriations entered under this article will also cover training, awareness-raising and network actions to the benefit of such participants with a view to making Union policymaking on the internal market more comprehensive and effective, and as part of the process of assessing the actual impact of internal market policies (or the lack of them) on the ground,

— a comprehensive review of regulations with a view to making necessary changes and producing an overall analysis of the effectiveness of the measures taken with a view to the sound operation of the internal market and the evaluation of the overall impact of the internal market on businesses and the economy, including the purchase of data and access by Commission departments to external databases, as well as targeted actions aimed at improving understanding of the functioning of the internal market and rewarding active participation in fostering the functioning of the internal market,

CHAPTER 12 02 — A SINGLE MARKET POLICY AND FREE MOVEMENT OF SERVICES *(cont'd)*

12 02 01 *(cont'd)*

— guaranteeing the completion and management of the internal market, especially in the fields of pensions, free movement of services, recognition of professional qualifications, and intellectual and industrial property: the development of proposals for putting in place a Union patent,

— broadening the strategy regarding the development of statistics on service sectors and statistical development projects in cooperation with Eurostat and the Organisation for Economic Cooperation and Development (OECD),

— monitoring the effects of removing obstacles to the internal market for services,

— the development of a unified area for security and defence, with action working towards the coordination of public procurement procedures for these products at Union level; appropriations may cover devising studies and awareness-raising measures regarding the application of the legislation adopted,

— strengthening and developing financial and capital markets and financial services provided to businesses and private individuals; adapting the market framework especially as regards the monitoring and regulation of the activities of operators and of transactions, so as to take account of changes at Union and global levels, of the reality of the euro and of new financial instruments, by putting forward new initiatives intended to consolidate, and provide a detailed analysis of, the results of the first Financial Services Action Plan,

— improvement of payment systems and retail financial services in the internal market; reduction in the cost of, and time needed for, such transactions, taking into account the internal market dimension; development of the technical aspects so as to establish one or more payment systems on the basis of the follow-up in respect of Commission communications; carrying out studies in this area,

— developing and strengthening the external aspects of the directives applicable in respect of financial institutions, the mutual recognition of financial instruments vis-à-vis third countries, international negotiations and assistance for third countries in establishing a market economy,

— implementing the many measures put forward in the Action Plan on company law and corporate governance which could lead to studies on a number of targeted subjects, with a view to drawing up the necessary legislative proposals,

— analysis of the effect of measures in place as part of the follow-up to the progressive liberalisation of postal services, coordination of Union policies on postal services with regard to international systems and in particular with regard to participants in Universal Postal Union (UPU) activities; cooperation with central and eastern European countries; practical implications of the application of the General Agreement on Trade (GATS) provisions to the postal sector and overlap with UPU regulations,

— implementing the law of the Union and international provisions in the field of money laundering, including participation in intergovernmental or ad hoc measures in this field; contributions relating to Commission participation as a member of the Financial Action Task Force (FATF) on money laundering created under the OECD,

— active participation in meetings held by international associations such as the International Association of Insurance Supervisors (IAIS/AICA) and the International Organisation of Securities Commission (IOSCO); this also comprises expenses related to the Commission's participation as a member of the group,

— development of evaluations and impact studies on the various aspects of the policies covered by this chapter for the purpose of devising new measures or revising existing measures relating to them,

— creation and maintenance of systems directly linked to putting into place and monitoring policies launched within the framework of the internal market for services,

COMMISSION

CHAPTER 12 02 — A SINGLE MARKET POLICY AND FREE MOVEMENT OF SERVICES *(cont'd)*

12 02 01 *(cont'd)*

— support of activities which seek to contribute to the achievement of the Union's policy objectives by enhancing supervisory convergence and cooperation, and in the field of financial reporting, both inside and outside the Union.

In order to achieve these objectives, this appropriation covers the costs of consultation, studies, surveys, evaluations, participation, production and the development of publicity, awareness-raising and training materials (printed matter, audiovisual material, assessments, computer tools, the collection and dissemination of information, information and advice measures for citizens and businesses).

Part of this appropriation is intended to cover expenditure incurred by the Commission for ensuring the effective functioning of the European Observatory on Infringements of Intellectual Property Rights.

This appropriation is also intended to cover setting up a central coordination body assisting the Member States with market surveillance cooperation, building on existing structures and experience. This coordination body would support the cooperation, pooling of know-how and sharing of best practices between Member States to ensure the same high level of market surveillance throughout the Union, in accordance with Regulation (EC) No 765/2008 of the European Parliament and of the Council of 9 July 2008 setting out the requirements for accreditation and market surveillance relating to the marketing of products (OJ L 218, 13.8.2008, p. 30). To this end, regular joint training for representatives of national market surveillance authorities from all Member States will be organised, focusing on relevant practical aspects of market surveillance such as follow-up of complaints, monitoring accidents, verifying that corrective action has been taken, follow-up of scientific and technical knowledge concerning safety issues and coordination with customs authorities. Furthermore, exchanges of national officials and joint visit programmes will foster the exchange of experience between Member States. In addition, comparative data on the resources dedicated to market surveillance in the different Member States will be collected and discussed at the appropriate level with national authorities. The aim is to create awareness about the need to have adequate resources to guarantee efficient, comprehensive and consistent market surveillance throughout the internal market, and contribute to the upcoming revision of the Union product safety rules, particularly those concerning market surveillance, and the preparation of the follow-up to the Customs 2013 programme.

This appropriation is intended to cover expenditure on studies, surveys, meetings of experts, information activities and publications directly linked to the achievement of the objective of the programme or measures coming under this article, and any other expenditure on technical and administrative assistance.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Remarks

This appropriation is intended to cover expenditure arising in connection with measures for the management and development of Solvit and for the implementation of the single market assistance services action plan.

The Solvit system has proved to be one of the most effective out-of-court dispute settlement mechanisms.

It can effectively and efficiently deal with problems faced by citizens or businesses, arising as a result of the misapplication of internal market legislation by a public administration in another Member State. Furthermore, the Solvit system is able to produce feedback information by using an online database system which is accessible to all coordination centres and to which citizens and businesses can directly submit their problems.

However, Solvit, like many other public assistance services relating to Union issues, is still not widely known among potential users of the system. At the same time citizens and businesses are often very confused about the right address for their requests for information, assistance or problem solving. To remedy this, the Commission has announced, as part of the single market review, that it will endeavour to create a single web-based access point guiding citizens and businesses to the right service. In October 2010 the Commission launched a new website, Your Europe, which provides citizens and businesses with information, and refers them directly to relevant services such as Solvit in the event that they need help. Your Europe, together with the Europe Direct call centre, represents the single contact point for the Solvit system. The Commission is to inform the competent committee of the European Parliament in a yearly report about the frequency of use of the contact point and possible measures to further improve it.

Member States should be urged to take appropriate measures to notify their citizens about the existence of the single contact point.

Moreover, in the Commission's action plan of 8 May 2008 on an integrated approach for providing single market assistance services to citizens and businesses, a range of actions was proposed to increase cooperation between the existing assistance services so that they can offer a better, faster and more streamlined overall service to citizens and businesses.

Promotion of all these services also needs to take place in a more coordinated way to avoid citizens and businesses being confused by too many brand names.

Additionally, the Commission is to inform the competent committee of the European Parliament about the concrete measures which have been undertaken in this field.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

The Single Market Forum should be an annual event held preferably in the Member State which holds the Presidency of the Council of the Union. It could be preceded by a number of regional content-oriented preparatory events organised jointly by the Commission, the European Parliament and the Member State which holds the Presidency of the Council of the Union. This event should be an important platform for the exchange of best practice between stakeholders, informing citizens about their rights in the single market and examining the state of the single market. It should bring together representatives of citizen, business and consumer organisations as well as representatives of the Member States and the Union's institutions in order to establish a clear commitment to transpose, apply and enforce single market legislation. This should be a platform for discussing the Commission's legislative proposals in the area of the single market and for presenting citizens', businesses' and other stakeholders' expectations with regard to future legislative proposals. The aim of this event should also be to tackle incorrect transposition, misapplication and non-enforcement of single market legislation by improving coordination and governance of the single market. A steering committee should be created, comprised of Members of the European Parliament and representatives of the Commission and the Presidency-in-Office of the Council of the Union at the time of the event, which should work out the organisational arrangements for the Single Market Forum.

Remarks

The financial and economic crisis has significantly shaken the confidence of consumers, retail investors and SMEs in the legislative and regulatory framework that is meant to protect them from failings in the financial system. Therefore, it is more essential than ever that the concerns of end-users and other non-industry stakeholders should be taken into account in designing initiatives that aim to restore citizens' confidence in the soundness of the financial sector and in the ability of financial integration to deliver concrete benefits to them.

This preparatory action, which follows on from a successful pilot project, aims to enhance the capacity of civil society organisations to participate in Union policymaking in the area of financial services, with a view to providing policymakers with a counterweight to financial services sector lobbies, and to inform the wider public of the issues at stake in the regulation of financial markets for consumers, end-users, retail investors and other non-industry stakeholders.

Remarks

This appropriation is intended to fund stepped-up support measures for traditional retailing, with a view to revitalising and modernising it. The pilot project will help to coordinate measures and channel funding from various sources in order to address the sector's problems more effectively.

The pilot project will involve:

(1) defining the features of the traditional trading sector and identifying the constraints and threats currently facing it;

(2) proposing solutions to foster revitalisation and modernisation of the sector;

(3) identifying Union instruments and funding directly or indirectly usable by the sector;

(4) establishing the uses to which the instruments, actions, measures and funding available are being put by the sector;

(5) analysing the extent to which existing instruments meet the needs of the traditional retailing sector and, on the basis of that analysis, proposing any adjustments that may be necessary;

(6) implementing the proposals referred to in point (2);

(7) analysing the results and assessing the feasibility of a possible future Union programme of support for traditional retailing.

Remarks

This appropriation is intended to cover expenditure arising in connection with the programme to support specific activities in the field of financial services, financial reporting and auditing.

The general objective of this programme is to improve the conditions for the functioning of the internal market by supporting the operations, activities or actions of certain bodies in the fields of financial services, financial reporting and auditing.

Union funding is vital in order to ensure the efficient and effective supervision of the internal market in financial services, particularly in view of the recent financial crisis.

Activities such as developing or providing input to the development of standards, applying, assessing or monitoring standards or overseeing standard-setting processes in support of the implementation of Union policies in the field of financial reporting and auditing are covered by the programme.

It is the continuation of the Community programme to support specific activities in the field of financial services, financial reporting and auditing as established by Decision No 716/2009/EC of the European Parliament and of the Council of 16 September 2009 establishing a Community programme to support specific activities in the field of financial services, financial reporting and auditing (OJ L 253, 25.9.2009, p. 8).

Remarks

Having regard to the Treaty on the Functioning of the European Union, and in particular Article 114 thereof, as well as to the European Supervisory Authority (European Banking Authority), established by Regulation (EU) No 1093/2010, the European Supervisory Authority is to form part of a European System of Financial Supervision (ESFS). The main objective of the ESFS is to ensure that the rules applicable to the financial sector are adequately implemented to preserve financial stability and to ensure confidence in the financial system as a whole and sufficient protection for the customers of financial services.

This appropriation is intended to cover the Authority's staff and administrative expenditure (Titles 1 and 2), and operational expenditure relating to the work programme (Title 3).

The Authority must inform the European Parliament and the Council about transfers of appropriations between operational and administrative expenditure.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

The amounts repaid in accordance with Article 20 of Commission Delegated Regulation (EU) No 1271/2013 of 30 September 2013 on the framework financial regulation of the bodies referred to in Article 208 of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council (OJ L 328, 7.12.2013, p. 42) constitute assigned revenue (Article 21(3)(c) of the Financial Regulation) to be charged to Item 6 6 0 0 of the general statement of revenue.

The establishment plan of the European Banking Authority is set out in the 'Staff' Annex to this section.

New article

The Single Resolution Board ('the Board') was established by Regulation (EU) No 806/2014. The Board will carry out specified tasks concerning the preparation for the resolution of banks and their actual resolution where they are failing or likely to fail.

This appropriation is intended to finance the administrative expenditures of the Board during its first months of operation in 2015, which are mainly composed of recruitment and staff expenditures, building and information technology costs and the first operational expenditures.

This financing provided by the Union budget will be reimbursed once the first annual contributions due by the banks to cover the administrative expenditures of the Board will have been collected by the Board, after which the Board is expected to become fully self-financed by its own revenues.

Remarks

This appropriation is intended to cover technical assistance measures for the Instrument for Pre-Accession Assistance:

— expenditure linked to the preparation, appraisal, approval, follow-up, control, audit and evaluation of multiannual programmes and/or individual operations and projects under IPA regional development component. These actions may include technical assistance contracts, studies, short-term expertise, meetings, exchange of experience, networking, information and publicity and awareness creation events, training activities and publications directly linked to the achievement of the objective of the programme and any other support measures carried out at the level of the Commission central services or the delegations in the beneficiary countries,

— expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts for the benefit of beneficiary countries and the Commission,

— installation, operation and interconnection of computerised systems for management, inspection and evaluation,

— improvements in evaluation methods and the exchange of information on practices in this field.

This appropriation is also intended to support administrative learning and cooperation with non-governmental organisations and social partners.

Remarks

Article 175 of the Treaty on the Functioning of the European Union provides that the objectives of economic, social and territorial cohesion set out in Article 174 shall be supported by the action it takes through the Structural Funds, which includes the European Regional Development Fund (ERDF). In accordance with Article 176, the ERDF is intended to help redress the main regional imbalances in the Union. The tasks, priority objectives and the organisation of the Structural Funds are defined in accordance with Article 177.

Article 80 of the Financial Regulation provides for financial corrections in the event of expenditure incurred in breach of applicable law.

Article 39 of Regulation (EC) No 1260/1999, Articles 100 and 102 of Regulation (EC) No 1083/2006 and Articles 85, 144 and 145 of Regulation (EU) No 1303/2013 on criteria for financial corrections by the Commission provide for specific rules on financial corrections applicable to the ERDF.

Any revenue from the financial corrections carried out on that basis is entered in Item 6 5 0 0 of the statement of revenue and constitutes assigned revenue in accordance with Article 21(3)(c) of the Financial Regulation.

Article 177 of the Financial Regulation lays down the conditions for the repayment in full, or in part, of pre-financing payments in respect of a given operation.

Article 82 of Regulation (EC) No 1083/2006 provides for specific rules on repayment of pre-financing applicable to the ERDF.

Pre-financing amounts repaid shall constitute internal assigned revenue in accordance with Article 21(4) of the Financial Regulation and shall be entered in Item 6 1 5 0 or 6 1 5 7.

Measures to combat fraud are funded from Article 24 02 01.

Remarks

This appropriation is intended to cover the financing of commitments remaining to be settled from the 2000-2006 period for the special programme for peace and reconciliation in Northern Ireland and the border counties of Ireland. The special programme for peace and reconciliation was continued, in accordance with the decisions of the Berlin European Council, mentioned below, to provide EUR 500 000 000 (1999 prices) for the new period of validity of the programme (2000 to 2004). Following the request in the conclusions of the Brussels European Council of 17 and 18 June 2004, an additional EUR 105 000 000, to be allocated in 2005 and 2006, was added to align operations under the programme with the other programmes under the Structural Funds that came to an end in 2006.

COMMISSION
TITLE 13 — REGIONAL AND URBAN POLICY

CHAPTER 13 03 — EUROPEAN REGIONAL DEVELOPMENT FUND AND OTHER REGIONAL OPERATIONS *(cont'd)*

13 03 08 *(cont'd)*

Remarks

This appropriation is intended to cover the ERDF commitments for the innovative measures and technical assistance remaining to be settled from the 2000-2006 programming period as provided for in Articles 22 and 23 of Regulation (EC) No 1260/1999. The innovative measures include studies, pilot projects and exchanges of experience. They were intended in particular to bring about a qualitative improvement in Structural Fund measures. Technical assistance covers preparatory, monitoring, evaluation, supervision and management measures required for implementation the ERDF. The appropriation may, in particular, be used to meet:

— support expenditure (representation expenses, training, meetings, missions),

— information and publishing expenditure,

— expenditure on information technology and telecommunications,

— contracts for the provision of services and studies,

— grants.

This appropriation is also intended to fund measures taken by partners in preparation for the 2007-2013 programming period.

Legal basis
