COMMISSION REGULATION (EU) 2016/1002

of 17 June 2016

amending Annexes II, III and V to Regulation (EC) No 396/2005 of the European Parliament and of the Council as regards maximum residue levels for AMTT, diquat, dodine, glufosinate and tritosulfuron in or on certain products

(Text with EEA relevance)

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EC) No 396/2005 of the European Parliament and of the Council of 23 February 2005 on maximum residue levels of pesticides in or on food and feed of plant and animal origin and amending Council Directive 91/414/EEC ⁽¹⁾, and in particular Article 14(1)(a), Article 18(1)(b) and Article 49(2) thereof,

Whereas:

- (1) For diquat, maximum residue levels (MRLs) were set in Annex II and Part B of Annex III to Regulation (EC) No 396/2005. For dodine, glufosinate and tritosulfuron maximum residue levels (MRLs) were set in Part A of Annex III to Regulation (EC) No 396/2005.
- (2) For diquat, the European Food Safety Authority, hereinafter 'the Authority', submitted a reasoned opinion on the existing MRLs in accordance with Article 12(2) of Regulation (EC) No 396/2005 in conjunction with Article 12(1) thereof ⁽²⁾. It identified concerning the MRLs for barley, maize and wheat a risk for consumers. It is therefore appropriate to lower these MRLs. It concluded that concerning the MRLs for all other products, some information was not available and that further consideration by risk managers was required. As there is no risk for consumers, the MRLs for those products should be set in Annex II to Regulation (EC) No 396/2005 at the existing level or the level identified by the Authority. These MRLs will be reviewed; the review will take into account the information available within two years from the publication of this Regulation.
- (3) For dodine, the Authority submitted a reasoned opinion on the existing MRLs in accordance with Article 12(1) of Regulation (EC) No 396/2005 ⁽³⁾. It concluded that concerning the MRLs for products of animal origin some information was not available and that further consideration by risk managers was required. As there is no risk for consumers, the MRLs for those products should be set in Annex II to Regulation (EC) No 396/2005 at the existing level or the level identified by the Authority. These MRLs will be reviewed; the review will take into account the information available within two years from the publication of this Regulation. The Authority concluded that concerning the MRLs for blueberries, cranberries, currants, gooseberries and celeries no information was available and that further consideration by risk managers was required. The MRLs for these products should be set at the specific limit of determination.

- (4) For glufosinate, the Authority submitted a reasoned opinion on the existing MRLs in accordance with Article 12(2) of Regulation (EC) No 396/2005 in conjunction with Article 12(1) thereof ⁽¹⁾. It concluded that concerning the MRLs for blueberries, gooseberries, cress, land cress, rocket, red mustard and baby leaf crops some information was not available and that further consideration by risk managers was required. As there is no risk for consumers, the MRLs for those products should be set in Annex II to Regulation (EC) No 396/2005 at the existing level or the level identified by the Authority. These MRLs will be reviewed; the review will take into account the information available within two years from the publication of this Regulation. The Authority concluded that concerning the MRLs for sweet corn, Brussels sprouts, head cabbage, Chinese cabbage, kale, kohlrabi, cardoons, celeries, fennel, leek and rhubarb no information was available and that further consideration by risk managers was required. The MRLs for these products should be set at the specific limit of determination. Taking into account additional information on the appropriate variability factor provided by Hungary after publication of the reasoned opinion and as there is no risk for consumers, the MRL for potatoes should be set in Annex II to Regulation (EC) No 396/2005 at the existing level.
- (5) For tritosulfuron, the Authority submitted a reasoned opinion on the existing MRLs in accordance with Article 12(1) of Regulation (EC) No 396/2005 ⁽²⁾. It proposed to set two distinct residue definitions, one for tritosulfuron and the other for its metabolite AMTT, in view of their different toxicological properties. It recommended keeping the existing MRLs for tritosulfuron. As regards the metabolite AMTT, the Authority recommended setting all MRLs at the relevant limit of determination (LOD). Analytical methods to achieve the lowest possible LOD need to be developed for AMTT. Once those methods are available, the levels set by this Regulation may be reviewed at any stage.
- (6) As regards products on which the use of the plant protection product concerned is not authorised, and for which no import tolerances or Codex maximum residue limits (CXLs) exist, MRLs should be set at the specific limit of determination or the default MRL should apply, as provided for in Article 18(1)(b) of Regulation (EC) No 396/2005.
- (7) The Commission consulted the European Union reference laboratories for residues of pesticides as regards the need to adapt certain limits of determination. As regards several substances, those laboratories concluded that for certain commodities technical development requires the setting of specific limits of determination.
- (8) Based on the reasoned opinions of the Authority and taking into account the factors relevant to the matter under consideration, the appropriate modifications to the MRLs fulfil the requirements of Article 14(2) of Regulation (EC) No 396/2005.
- (9) Through the World Trade Organisation, the trading partners of the Union were consulted on the new MRLs and their comments have been taken into account.
- (10) Regulation (EC) No 396/2005 should therefore be amended accordingly.
- (11) In order to allow for the normal marketing, processing and consumption of products, this Regulation should provide for a transitional arrangement for products which have been produced before the modification of the MRLs and for which information shows that a high level of consumer protection is maintained. Because a risk to consumers cannot be excluded at the current MRLs, the values for diquat of 0,02 mg/kg for barley, maize and wheat should apply to all products from the date of application of this Regulation.
- (12) A reasonable period should be allowed to elapse before the modified MRLs become applicable in order to permit Member States, third countries and food business operators to prepare themselves to meet the new requirements which will result from the modification of the MRLs.
- (13) The measures provided for in this Regulation are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,

COMMISSION REGULATION (EU) 2016/1003**of 17 June 2016****amending Annexes II and III to Regulation (EC) No 396/2005 of the European Parliament and of the Council as regards maximum residue levels for abamectin, acequinocyl, acetamiprid, benzovindiflupyr, bromoxynil, fludioxonil, fluopicolide, fosetyl, mepiquat, proquinazid, propamocarb, prohexadione and tebuconazole in or on certain products****(Text with EEA relevance)**

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EC) No 396/2005 of the European Parliament and of the Council of 23 February 2005 on maximum residue levels of pesticides in or on food and feed of plant and animal origin and amending Council Directive 91/414/EEC ⁽¹⁾, and in particular Article 14(1)(a) and Article 16(1)(a) thereof,

Whereas:

- (1) For abamectin, acetamiprid, bromoxynil, fludioxonil, propamocarb, prohexadione and tebuconazole, maximum residue levels (MRLs) were set in Annex II to Regulation (EC) No 396/2005. For acequinocyl, fluopicolide, fosetyl, mepiquat and proquinazid, MRLs were set in Part A of Annex III to that Regulation. For benzovindiflupyr, no specific MRLs were set nor was that substance included in Annex IV to that Regulation, so the default value of 0,01 mg/kg laid down in Article 18(1)(b) thereof applies.
- (2) In the context of a procedure for the authorisation of the use of a plant protection product containing the active substance abamectin on pome fruits, cucurbits with edible peel, Chinese cabbage, 'lettuces and salad plants' of code 0251000, spinaches, beans and peas with pods and celery, an application was submitted in accordance with Article 6(1) of Regulation (EC) No 396/2005 for modification of the existing MRLs.
- (3) As regards acequinocyl, such an application was submitted for cherries and plums. As regards acetamiprid, such an application was submitted for leafy brassica. As regards bromoxynil, such an application was submitted for chives. As regards fluopicolide, such an application was submitted for blackberries, spinaches and purslanes. As regards fosetyl, such an application was submitted for blackberries, celeriacs and Florence fennels. As regards mepiquat, such an application was submitted for cultivated fungi. As regards propamocarb, such an application was submitted for celeriacs, purslanes, chards, celery leaves and Florence fennels. As regards proquinazid, such an application was submitted for currants and gooseberries. As regards tebuconazole, such an application was submitted for rye and wheat.
- (4) In accordance with Article 6(2) and (4) of Regulation (EC) No 396/2005 an application was submitted for fludioxonil used on pineapples and prohexadione used on cherries. The applicant claims that the authorised uses of those substances on such crops in the United States lead to residues exceeding the MRLs contained in Regulation (EC) No 396/2005 and that higher MRLs are necessary to avoid trade barriers for the importation of those crops.
- (5) In accordance with Article 8 of Regulation (EC) No 396/2005, those applications were evaluated by the Member States concerned and the evaluation reports were forwarded to the Commission.

⁽¹⁾ OJ L 70, 16.3.2005, p. 1.

- (6) The European Food Safety Authority, hereinafter 'the Authority', assessed the applications and the evaluation reports, examining in particular the risks to the consumer and, where relevant, to animals and gave reasoned opinions on the proposed MRLs ⁽¹⁾. It forwarded those opinions to the Commission and the Member States and made them available to the public.
- (7) The Authority concluded in its reasoned opinion that, as regards the use of abamectin on 'lettuces and salad plants' and spinaches, the submitted data were not sufficient to set new MRLs. The existing MRLs should therefore be kept.
- (8) As regards fosetyl on blackberries, the Authority recommended setting an MRL value of 100 mg/kg. In accordance with the existing Union guidelines on extrapolation of MRLs, it is appropriate to set that MRL also for raspberries.
- (9) As regards mepiquat, recent monitoring data show that residues occur on untreated cultivated fungi at a level higher than the limit of determination. Such residues result from a cross-contamination with straw lawfully treated with mepiquat. The Authority proposed three different MRLs for those products, to be considered by the risk managers, which were based on the approaches recommended by the Food and Agriculture Organisation of the United Nations (FAO) respectively for the setting of MRLs in spices and of extraneous MRLs ⁽²⁾. As there is no risk to consumers, the MRL for those products should be set in Annex III to Regulation (EC) No 396/2005 at the level corresponding to the 99th percentile of all the sample results. This MRL is set as temporary valid until 31 December 2018. After this date the MRL will be 0,02* mg/kg unless further modified by a Regulation in light of new information provided by 30 April 2018 at the latest.
- (10) As regards all other applications, the Authority concluded that all requirements with respect to data were met and that the modifications to the MRLs requested by the applicants were acceptable with regard to consumer safety on the basis of a consumer exposure assessment for 27 specific European consumer groups. It took into account the most recent information on the toxicological properties of the substances. Neither the lifetime exposure to these substances via consumption of all food products that may contain them, nor the short-term exposure due to high consumption of the relevant products showed that there is a risk that the acceptable daily intake or the acute reference dose is exceeded.

- (11) For benzovindiflupyr, the Authority submitted a conclusion on the peer review of the pesticide risk assessment of the active substance ⁽¹⁾. In that framework, it recommended to set MRLs covering both the representative uses according to GAPs in the Union and import tolerance requests from Brazil. The Commission consulted the European Union reference laboratories on the appropriate limits of determination.
- (12) Based on the reasoned opinions and the conclusion of the Authority and taking into account the factors relevant to the matter under consideration, the appropriate modifications to the MRLs fulfil the requirements of Article 14(2) of Regulation (EC) No 396/2005.
- (13) Regulation (EC) No 396/2005 should therefore be amended accordingly.
- (14) The measures provided for in this Regulation are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,

HAS ADOPTED THIS REGULATION:
