BUDGETS

Definitive adoption (EU, Euratom) 2017/292 of the European Union's general budget for the financial year 2017 1

EN

Acts whose titles are printed in light type are those relating to day-to-day management of agricultural matters, and are generally valid for a limited period.

The titles of all other acts are printed in bold type and preceded by an asterisk.

All amounts in this budget document are expressed in euro unless otherwise indicated.

Any revenue provided for in Article 21(2) and (3) of the Financial Regulation, entered in Titles 5 and 6 of the statement of revenue, may lead to additional appropriations being entered on the headings which bore the initial expenditure giving rise to the corresponding revenue.

Figures for outturn refer to all authorised appropriations, including budget appropriations, additional appropriations and earmarked revenue.

Budgetary remarks are only executable insofar as they do not modify or extend the scope of an existing legal base, impinge on the administrative autonomy of institutions and can be covered by available resources (as indicated in the annex to the executability letter dated 28 October 2015).

A. INTRODUCTION AND FINANCING OF THE GENERAL BUDGET

INTRODUCTION

The general budget of the Union is the instrument which sets out and authorises the total amount of revenue and expenditure deemed necessary for the European Union and the European Atomic Energy Community for each year.

The budget is established and implemented in compliance with the principles of unity, budgetary accuracy, annuality, equilibrium, unit of account, universality, specification, sound financial management and transparency.

— The *principle of unity* and the *principle of budgetary accuracy* mean that all revenue and expenditure of the Union when it is charged to the budget must be incorporated in a single document.

— The *principle of annuality* means that the budget is adopted for one budgetary year at a time and that both commitment and payment appropriations for the current budgetary year must, in principle, be used in the course of the year.

— The *principle of equilibrium* means that forecasts of revenue for the budgetary year must be equal to payment appropriations for that year; borrowing to cover any budget deficit which may arise is not compatible with the own resources system and will not be authorised.

— In accordance with the *principle of unit of account*, the budget is drawn up and implemented in euros and the accounts shall be presented in euros.

— The *principle of universality* means that total revenue is to cover total payment appropriations with the exception of a limited number of revenue items which are assigned to particular items of expenditure. Revenue and expenditure are entered in full in the budget without any adjustment against each other.

— The *principle of specification* means that each appropriation must have a given purpose and be assigned to a specific objective in order to prevent any confusion between appropriations.

— The *principle of sound financial management* is defined by reference to the principles of economy, efficiency and effectiveness.

— The budget is established in compliance with the *principle of transparency*, ensuring sound information on the implementation of the budget and the accounts.

The budget presents appropriations and resources by purpose (activity-based budgeting), with a view to enhancing transparency in the management of the budget with reference to the objectives of sound financial management and in particular efficiency and effectiveness.

The expenditure authorised by the present budget totals EUR 157 857 787 116 in commitment appropriations and EUR 134 490 371 363 in payment appropriations, representing a variation rate of + 1,66 % and of – 1,57 % respectively by comparison with the 2016 budget.

Budgetary revenue totals EUR 134 490 371 363. The uniform rate of call for the VAT resource is 0,30 % (except for Germany, Netherlands and Sweden for which the rate of call for the period 2014-2020 has been fixed at 0,15 %) whilst that for the GNI resource is 0,6077 %. Traditional own resources (customs duties and sugar levies) account for 15,96 % of the financing of the budget for 2017. The VAT resource accounts for 12,34 % and the GNI resource for 69,63 %. Other revenue for this financial year is estimated at EUR 2 772 392 898.

The own resources needed to finance the 2017 budget account for 0,85 % of the total GNI.

The tables below set out step by step the method used to calculate the financing of the 2017 budget.

FINANCING OF THE GENERAL BUDGET

Appropriations to be covered during the financial year 2017 pursuant to Article 1 of Council Decision 2014/335/EU, Euratom of 26 May 2014 on the system of own resources of the European Union

TABLE 5

Correction of budgetary imbalances for the United Kingdom for the year 2016 pursuant to Article 4 of Decision 2014/335/EU, Euratom (Chapter 1 5)

Description	Coefficient [1] (%)	Amount
1. United Kingdom's share (in %) of notional uncapped VAT base	18,0 077	
2. United Kingdom's share (in %) of enlargement-adjusted total allocated expenditure	7,2 983	
3. (1) – (2)	10,7 095	
4. Total allocated expenditure		**129 383 323 229**
5. Enlargement related expenditure [2]		34 414 600 712
6. Enlargement-adjusted total allocated expenditure = (4) – (5)		94 968 722 517
7. United Kingdom's correction original amount = (3) × (6) × 0,66		6 712 622 123
8. United Kingdom's advantage [3]		1 524 007 149
9. Core United Kingdom's correction = (7) – (8)		5 188 614 974
10. Windfall gains deriving from traditional own resources [4]		– 49 835 714
11. Correction for the United Kingdom = (9) – (10)		5 238 450 688

[1] Rounded percentages.

[2] The amount of enlargement-related expenditure corresponds to total allocated expenditure in 13 Member States (that have acceded to the EU after 30 April 2004), except for agricultural direct payments and market-related expenditure as well as that part of rural development expenditure originating from the EAGGF, Guarantee Section.

[3] The 'UK advantage' corresponds to the effects arising for the United Kingdom from the changeover to capped VAT and the introduction of the GNP/GNI-based own resource.

[4] These windfall gains correspond to the net gains of the United Kingdom resulting from the increase — from 10 to 20 % as of 1 January 2014 — in the percentage of traditional own resources retained by Member States to cover the collection costs of traditional own resources (TOR).

OWN RESOURCES

CHAPTER 1 1 — LEVIES AND OTHER DUTIES PROVIDED FOR UNDER THE COMMON ORGANISATION OF THE MARKETS IN SUGAR (POINT (A) OF ARTICLE 2(1) OF DECISION 2014/335/EU, EURATOM)

1 1 0 Production levies related to the marketing year 2005/2006 and previous years

Financial year 2017	Financial year 2016	Financial year 2015
p.m.	p.m.	– 3 457 652,14

Remarks

The common organisation of the market in the sugar sector provided that sugar, isoglucose and inulin syrup producers had to pay basic and B production levies. These levies were intended to cover market support expenditure. At present amounts entered under this article are a consequence of the revision of past established levies. Levies for the marketing years 2007/2008 and following years are entered under Article 1 1 7 of this chapter as a 'production charge'.

Figures are net of collection costs.

Legal basis

Council Regulation (EC) No 1260/2001 of 19 June 2001 on the common organisation of the markets in the sugar sector (OJ L 178, 30.6.2001, p. 1).

Council Decision 2007/436/EC, Euratom of 7 June 2007 on the system of the European Communities' own resources (OJ L 163, 23.6.2007, p. 17), and in particular point (a) of Article 2(1) thereof.

Council Regulation (EU) No 1360/2013 of 2 December 2013 fixing the production levies in the sugar sector for the 2001/2002, 2002/2003, 2003/2004, 2004/2005 and 2005/2006 marketing years, the coefficient required for calculating the additional levy for the 2001/2002 and 2004/2005 marketing years and the amount to be paid by sugar manufacturers to beet sellers in respect of the difference between the maximum levy and the levy to be charged for the 2002/2003, 2003/2004 and 2005/2006 marketing years (OJ L 343, 19.12.2013, p. 2).

Remarks

This article is intended for the recording of income charged by new Member States in the event of non-elimination of sugar stocks considered surplus within the meaning of Commission Regulation (EC) No 60/2004 of 14 January 2004 laying down transitional measures in the sugar sector by reason of the accession of the Czech Republic, Estonia, Cyprus, Latvia, Lithuania, Hungary, Malta, Poland, Slovenia and Slovakia (OJ L 9, 15.1.2004, p. 8).

It is also intended to record revenue from the outstanding sugar storage levies as Council Regulation (EC) No 1260/2001 of 19 June 2001 on the common organisation of the markets in the sugar sector (OJ L 178, 30.6.2001, p. 1) abolished the storage levy.

This article also covers the outstanding amounts due pursuant to Article 5 of Commission Regulation (EEC) No 65/82 of 13 January 1982 laying down detailed rules for carrying forward sugar to the following marketing year (OJ L 9, 14.1.1982, p. 14) when the obligation to store sugar carried forward is not complied with, and the amounts due in accordance with Council Regulation (EEC) No 1789/81 of 30 June 1981 laying down general rules concerning the system of minimum stocks in the sugar sector (OJ L 177, 1.7.1981, p. 39) when the general rules concerning the system of minimum stocks in the sugar sector are not complied with.

Figures are net of collection costs.

Remarks

The assignment of customs duties as own resources to the financing of common expenditure is the logical consequence of the free movement of goods within the Union. This article may comprise levies, premiums, additional or compensatory amounts, additional amounts or factors, Common Customs Tariff duties and other duties established or to be established by the institutions of the European Union in respect of trade with third countries and customs duties on products under the expired Treaty establishing the European Coal and Steel Community.

Figures are net of collection costs.

Legal basis

Council Decision 2014/335/EU, Euratom of 26 May 2014 on the system of own resources of the European Union (OJ L 168, 7.6.2014, p. 105), and in particular point (a) of Article 2(1) thereof.

CHAPTER 1 4 — OWN RESOURCES BASED ON GROSS NATIONAL INCOME PURSUANT TO POINT (C) OF ARTICLE 2(1) OF DECISION 2014/335/EU, EURATOM

1 4 0 Own resources based on gross national income pursuant to point (c) of Article 2(1) of Decision 2014/335/EU, Euratom

Financial year 2017	Financial year 2016	Financial year 2015
93 652 040 715	97 149 435 272	94 008 966 506,53

Remarks

The GNI-based resource is an 'additional' resource, providing the revenue required to cover expenditure in excess of the amount yielded by traditional own resources, VAT-based payments and other revenue in any particular year. By implication, the GNI-based resource ensures that the general budget of the Union is always balanced *ex ante*.

The GNI call rate is determined by the additional revenue needed to finance the budgeted expenditure not covered by the other resources (VAT-based payments, traditional own resources and other revenue). Thus a call rate is applied to the GNI of each of the Member States.

The rate to be applied to the Member States' gross national income for this financial year is 0,6077 %.

CHAPTER 1 5 — CORRECTION OF BUDGETARY IMBALANCES

1 5 0 Correction of budgetary imbalances granted to the United Kingdom in accordance with Articles 4 and 5 of Decision 2014/335/EU, Euratom

Financial year 2017	Financial year 2016	Financial year 2015
0,—	0,—	– 270 185 340,24

Remarks

The budgetary imbalance correction mechanism in favour of the United Kingdom (UK correction) was introduced by the European Council in Fontainebleau in June 1984 and the resulting own resources decision of 1985. The purpose of the mechanism is to reduce the UK budgetary imbalance through a reduction in its payments to the Union.

Legal basis

Council Decision 2014/335/EU, Euratom of 26 May 2014 on the system of own resources of the European Union (OJ L 168, 7.6.2014, p. 105), and in particular Articles 4 and 5 thereof.

Financial year 2017	Financial year 2016	Financial year 2015
p.m.	1 349 116 814	1 434 557 707,74

Remarks

In accordance with Article 18 of the Financial Regulation, the balance from each financial year, whether surplus or deficit, is entered as revenue or expenditure in the budget of the subsequent financial year.

The relevant estimates of such revenue or expenditure are entered in the budget during the budgetary procedure and, where appropriate, in a letter of amendment submitted pursuant to Article 39 of the Financial Regulation. They are drawn up in accordance with the principles set out in Article 1(1) of Regulation (EU, Euratom) No 608/2014.

After the closure of the accounts for each financial year, any discrepancy in relation to the estimates is entered in the budget for the following financial year through an amending budget that must be presented by the Commission within 15 days following the submission of the provisional accounts.

A deficit is entered in Article 27 02 01 of the statement of expenditure in Section III 'Commission'.

Legal basis

Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1), and in particular Article 18 thereof.

Council Regulation (EU, Euratom) No 608/2014 of 26 May 2014 laying down implementing measures for the system of own resources of the European Union (OJ L 168, 7.6.2014, p. 29).

Remarks

Under Article 7(1) of Regulation (EEC, Euratom) No 1553/89, Member States are to send the Commission a statement of the total amount of the VAT resources base for the previous calendar year before 31 July.

Each Member State is debited with an amount calculated on the basis of that statement according to Union rules and credited with the 12 payments actually made during the previous financial year.

Any corrections to the abovementioned statements resulting from Commission controls in accordance with Article 9 of Regulation (EEC, Euratom) No 1553/89 or/and any changes to the GNI of previous financial years that have an effect on the capping of the 'VAT' base will lead to adjustments of the 'VAT' balances.

The Commission shall inform the Member States of the amounts resulting from this calculation before 1 February of the year following that in which the data for the adjustments was supplied.

Legal basis

Council Regulation (EEC, Euratom) No 1553/89 of 29 May 1989 on the definitive uniform arrangements for the collection of own resources accruing from value added tax (OJ L 155, 7.6.1989, p. 9).

Council Regulation (EU, Euratom) No 609/2014 of 26 May 2014 on the methods and procedure for making available the traditional, VAT and GNI-based own resources and on the measures to meet cash requirements (OJ L 168, 7.6.2014, p. 39), and in particular Article 10b thereof.

Remarks

On the basis of figures for aggregate gross national income and its components from the preceding year, supplied by the Member States in accordance with Article 2(2) of Regulation (EC, Euratom) No 1287/2003, each Member State shall be debited with an amount calculated according to Union rules and credited with the 12 payments made during that previous financial year.

Any changes to the gross national product/gross national income of previous financial years pursuant to Article 2(2) of Regulation (EC, Euratom) No 1287/2003, subject to Articles 4 and 5 thereof, gives rise for each Member State concerned to an adjustment to the balance established pursuant to Article 10b(4) of Regulation (EU, Euratom) No 609/2014.

The Commission shall inform the Member States of the amounts resulting from this calculation before 1 February of the year following that in which the data for the adjustments was supplied.

Legal basis

CHAPTER 3 3 — NETTING OF ADJUSTMENTS TO THE VAT AND GNI-BASED OWN RESOURCES FOR PREVIOUS FINANCIAL YEARS

3 3 0 Netting of adjustments to the VAT and GNI-based own resources for previous financial years

Financial year 2017	Financial year 2016	Financial year 2015
p.m.	p.m.	

Remarks

Result of the calculation for the netting of adjustments to the VAT and GNI-based resources of previous financial years.

This calculation is the product of multiplying the total amounts of the adjustments referred to in Article 10b(1) to (4) of Regulation (EU, Euratom) No 609/2014, with the exception of particular adjustments pursuant to points (b) and (c) of Article 10b(2) of that Regulation, by the percentage that the GNI of that Member State represents of the GNI of all Member States, as applicable on 15 January to the budget in force for the year following that in which the data for the adjustments was supplied.

The Commission shall inform the Member States of the amounts resulting from this calculation before 1 February of the year following that in which the data for the adjustments was supplied.

Legal basis

Council Decision 2014/335/EU, Euratom of 26 May 2014 on the system of own resources of the European Union (OJ L 168, 7.6.2014, p. 105).

Financial year 2017	Financial year 2016	Financial year 2015
p.m.	p.m.	– 7 041 092,78

Remarks

Article 3 of the Protocol on the position of Denmark and Article 5 of the Protocol on the position of the United Kingdom and Ireland, annexed to the Treaty on European Union and the Treaty on the Functioning of the European Union, grant full exemption to these Member States from supporting the financial consequences of some specific policies in the area of freedom, security and justice, with the exception of the related administrative costs. They can therefore obtain an adjustment to the own resources paid for each year in which they do not participate.

Each Member State's contribution to the adjustment mechanism is calculated by applying to the budget expenditure resulting from this operation or policy the scale of the aggregate gross national income and its components from the preceding year, supplied by the Member States in accordance with Article 2(2) of Council Regulation (EC, Euratom) No 1287/2003 of 15 July 2003 on the harmonisation of gross national income at market prices (OJ L 181, 19.7.2003, p. 1).

The Commission works out each Member State's balance and informs it in time for that Member State to enter its balance in the account referred to in Article 9(1) of Regulation (EU, Euratom) No 609/2014 on the first working day of December, in accordance with Article 11 of that Regulation.

Legal basis

Council Regulation (EU, Euratom) No 609/2014 of 26 May 2014 on the methods and procedure for making available the traditional, VAT and GNI-based own resources and on the measures to meet cash requirements (OJ L 168, 7.6.2014, p. 39), and in particular Article 11 thereof.

Protocol on the position of Denmark, annexed to the Treaty on European Union and to the Treaty on the Functioning of the European Union, and in particular Article 3 thereof, and Protocol on the position of the United Kingdom and Ireland in respect of the area of freedom, security and justice, annexed to the Treaty on European Union and to the Treaty on the Functioning of the European Union, and in particular Article 5 thereof.

5 2 2 Interest yielded by pre-financing

Financial year 2017	Financial year 2016	Financial year 2015
40 000 000	40 000 000	13 329 281,22

Remarks

This article is intended to record revenue from the interest yielded by pre-financing.

In accordance with point (d) of Article 21(3) of the Financial Regulation, this revenue may be used to provide additional appropriations on the lines which bore the initial expenditure giving rise to the corresponding revenue.

Interest generated by pre-financing payments made from the budget shall not be due to the Union except as otherwise provided for in the delegation agreements, with the exception of those agreements concluded with third countries or the bodies they have designated. In cases in which it is provided for, such interest shall be reused for the corresponding action, deducted from payment requests in accordance with point (c) of the first subparagraph of Article 23(1) of the Financial Regulation, or recovered.

Delegated Regulation (EU) No 1268/2012 also lays down provisions regarding the accounting of interest yielded on pre-financing.

CHAPTER 5 2 — REVENUE FROM INVESTMENTS OR LOANS GRANTED, BANK AND OTHER INTEREST *(cont'd)*

5 2 3 Revenue generated on trust accounts — Assigned revenue

Financial year 2017	Financial year 2016	Financial year 2015
p.m.	p.m.	220 876,60

Remarks

This article is intended to record interest and other revenue generated on trust accounts.

The trust accounts are kept on behalf of the Union by international financial institutions (European Investment Fund, European Investment Bank, Council of Europe Development Bank/Kreditanstalt für Wiederaufbau, European Bank for Reconstruction and Development) managing Union programmes and the amounts paid in by the Union remain on the account until they are made available to the beneficiaries under the single programme, such as small and medium-sized enterprises or institutions managing projects in accession countries.

In accordance with Article 21(4) of the Financial Regulation, interest generated by trust accounts used for Union programmes are used to provide additional appropriations on the lines which bore the initial expenditure giving rise to the corresponding revenue.

Legal basis

Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1), and in particular Article 21(4) thereof.

Commission Delegated Regulation (EU) No 1268/2012 of 29 October 2012 on the rules of application of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council on the financial rules applicable to the general budget of the Union (OJ L 362, 31.12.2012, p. 1).

CHAPTER 6 1 — REPAYMENT OF MISCELLANEOUS EXPENDITURE

6 1 1 Repayment of expenditure incurred on behalf of one or more Member States

6 1 1 3 Revenue from the investments provided for in Article 4 of Decision 2003/76/EC — Assigned revenue

Financial year 2017	Financial year 2016	Financial year 2015
p.m.	p.m.	53 222 776,22

Remarks

Decision 2003/76/EC stipulates that the Commission is entrusted with winding up the financial operations of the European Coal and Steel Community which are still in progress upon expiry of the ECSC Treaty.

Pursuant to Article 4 of that Decision, net revenue from the investment of available assets will constitute revenue in the general budget of the European Union earmarked for a specific purpose, namely financing research projects in sectors related to the coal and steel industry by the Research Fund for Coal and Steel.

The net revenue available for financing research projects in year n + 2 appears in the balance sheet of the ECSC in liquidation for year n, and after the liquidation process has been completed will appear as assets in the balance sheet of the Coal and Steel Research Fund. This financing mechanism took effect in 2003. Revenue coming from 2015 will be used for research in 2017. In order to reduce as far as possible the fluctuations that movements in the financial markets could cause in the financing of research, a smoothing arrangement is applied. The amount of net revenue expected to be available for research in 2017 comes to EUR 42 100 000.

In accordance with Article 4 of Decision 2003/76/EC, 72,8 % of the fund's appropriations will be for the steel-related sector and 27,2 % for the coal-related sector.

In accordance with Article 21 and Article 181(2) of the Financial Regulation, revenue will be used to provide additional appropriations under Chapter 08 05 of the statement of expenditure in Section III 'Commission'.

Legal basis

Council Decision 2003/76/EC of 1 February 2003 establishing the measures necessary for the implementation of the Protocol, annexed to the Treaty establishing the European Community, on the financial consequences of the expiry of the ECSC Treaty and on the Research Fund for Coal and Steel (OJ L 29, 5.2.2003, p. 22).

DEFAULT INTEREST AND FINES

CHAPTER 7 0 — DEFAULT INTEREST AND INTEREST ON FINES

7 0 0 Default interest

7 0 0 0 Default interest in respect of own resources made available by the Member States

Financial year 2017	Financial year 2016	Financial year 2015
5 000 000	5 000 000	22 566 266,97

Remarks

Any delay by a Member State in making the entry in the account opened in the name of the Commission referred to in Article 9(1) of Regulation (EU, Euratom) No 609/2014 gives rise to the payment of interest by the Member State concerned. However the recovery of amounts of interest below EUR 500 shall be waived.

For the VAT and GNI-based own resources, interest shall be payable only in relation to delays in entering amounts referred in Article 12(2) of Regulation (EU, Euratom) No 609/2014.

In the case of Member States belonging to the Economic and Monetary Union, the interest rate shall be equal to the rate as published in the Official Journal of the European Union, C series, which the European Central Bank applied to its main refinancing operations on the first day of the month in which the due date fell, or 0 per cent, whichever is higher, increased by 2,5 percentage points. This rate shall be increased by 0,25 of a percentage point for each month of delay.

In the case of Member States not belonging to the Economic and Monetary Union, the interest rate shall be equal to the rate applied on the first day of the month in question by the central banks for their main refinancing operations, or 0 per cent, whichever is higher, increased by 2,5 percentage points. For the Member States for which the central bank rate is not available, the interest rate shall be equal to the most equivalent rate applied on the first day of the month in question on the Member State's money market, or 0 per cent, whichever is higher, increased by 2,5 percentage points. This rate shall be increased by 0,25 of a percentage point for each month of delay.

The total increase shall not exceed 16 percentage points. The increased rate shall be applied to the entire period of delay.

CHAPTER 8 1 — LOANS GRANTED BY THE COMMISSION

8 1 0 ***Capital repayments and interest in respect of special loans and risk capital granted in the framework of financial cooperation with Mediterranean third countries***

Financial year 2017	Financial year 2016	Financial year 2015
p.m.	p.m.	36 735 192,12

Remarks

This article is intended to record capital repayments and interest payments on special loans and risk capital granted from the appropriations in Chapters 22 02 and 22 04 of the statement of expenditure in Section III 'Commission' to Mediterranean third countries.

It also comprises capital repayments and interest payments on special loans and risk capital granted to certain Mediterranean Member States which, however, represent a very small proportion of the overall amount. These loans/risk capital were granted at a time those countries had not yet joined the Union.

The revenue obtained normally exceeds the amounts forecast in the budget because of the interest payments on special loans which may still be disbursed during the preceding financial year as well as during the current financial year. The interest on special loans and risk capital is charged from the moment the loans are disbursed; interest on special loans is paid in six-monthly instalments and interest on risk capital generally in annual instalments.

This article may accommodate, in accordance with Article 21 of the Financial Regulation, assigned revenue which is used to provide additional appropriations to finance expenditure to which this revenue is assigned.

Legal basis

For the legal basis, see remarks for Chapters 22 02 and 22 04 of the statement of expenditure in Section III 'Commission'.

TITLE 2

BUILDINGS, FURNITURE, EQUIPMENT AND MISCELLANEOUS OPERATING EXPENDITURE

Remarks

Since risk cover has been revoked by insurance companies, the risk of industrial conflicts and terrorist attacks for the European Parliament buildings needs to be covered through the general budget of the European Union.

The appropriations of this title accordingly cover all expenses in connection with damage resulting from industrial conflicts and terrorist attacks.

Appropriations 2017	Appropriations 2016	Outturn 2015
250 000	250 000	103 180,83

Remarks

This appropriation is intended to cover:

— expenditure committed for promoting relations between the European Parliament and national parliaments. It relates to parliamentary relations other than those covered by Chapters 1 0 and 3 0, exchanges of information and documentation, and assistance in the analysis and management of that information, including exchanges with the European Centre for Parliamentary Research and Documentation (ECPRD),

— funding of cooperation programmes and training schemes for officials of the aforementioned parliaments and, in general, activities to strengthen their parliamentary capacities.

Training schemes include study visits to the European Parliament in Brussels, Luxembourg and Strasbourg; the appropriation is intended to cover all or part of the expenditure incurred by participants, in particular travelling costs, travel expenses, accommodation and daily allowances,

— cooperation measures, including those linked to legislative work, and measures linked to documentation, analysis and information and making the www.ipex.eu domain secure, including those carried out by the ECPRD.

This appropriation aims at financing the cooperation between the European Parliament and national parliaments in the parliamentary scrutiny of the CFSP/CSDP, in accordance with the Treaty on European Union and the Treaty on the Functioning of the European Union, and in particular Articles 9 and 10 of Protocol No 1 on the role of national parliaments in the European Union.

Remarks

To cover the Members' needs and in order to communicate properly the work of the European Parliament, it needs a well-equipped media centre, which could be also used for different purposes outside the plenary sessions. The appropriations under this item therefore intend to support the upgrading of technical equipment and media facilities given the increased media interest, the growing importance of social media and Members' additional needs; and to further develop a closer cooperation between the European Parliament, ARTE, local universities and schools in view to establish an European media Hub for example to train young journalists, outside the ordinary plenary sessions.

(1) Of which three ad personam promotions (three AD 14 to AD 15) granted in exceptional cases to deserving officials.

(2) Notional reserve for officials seconded in the interests of the service not included in the total.

(3) Including one temporary AD 12 post for the Director of the Authority for European Parties and European Political Foundations.

(4) The interinstitutional agreement signed on 5 February 2014 between the European Parliament, the Committee of the Regions and the European Economic and Social Committee provides for the transfer of up to 80 new posts (60 AD and 20 AST) from those committees to the European Parliament. This operation will be carried out gradually, starting in the autumn of 2014, and the inclusion in Parliament's establishment plan of the posts in question (already carried out in 2014) will be offset by the abolition of a corresponding number of posts in the two committees' establishment plans.

COMMISSION

CHAPTER 5 2 — REVENUE FROM INVESTMENTS OR LOANS GRANTED, BANK AND OTHER INTEREST *(cont'd)*

5 2 2 *(cont'd)*

In accordance with point (d) of Article 21(3) of the Financial Regulation, this revenue may be used to provide additional appropriations on the lines which bore the initial expenditure giving rise to the corresponding revenue.

Interest generated by pre-financing payments made from the budget shall not be due to the Union except as otherwise provided for in the delegation agreements, with the exception of those agreements concluded with third countries or the bodies they have designated. In cases in which it is provided for, such interest shall either be reused for the corresponding action, deducted from payment requests in accordance with point (c) of the first subparagraph of Article 23(1) of the Financial Regulation or recovered.

Delegated Regulation (EU) No 1268/2012 also lays down provisions regarding the accounting of interest yielded on pre-financing.

Legal basis

Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1), and in particular Article 8(4) and point (d) of Article 21(3) thereof.

Commission Delegated Regulation (EU) No 1268/2012 of 29 October 2012 on the rules of application of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council on the financial rules applicable to the general budget of the Union (OJ L 362, 31.12.2012, p. 1).

5 2 3 ***Revenue generated on trust accounts — Assigned revenue***

Financial year 2017	Financial year 2016	Financial year 2015
p.m.	p.m.	220 876,60

Remarks

This article is intended to record interest and other revenue generated on trust accounts.

The trust accounts are kept on behalf of the Union by international financial institutions (European Investment Fund, European Investment Bank, Council of Europe Development Bank/Kreditanstalt für Wiederaufbau, European Bank for Reconstruction and Development) managing Union programmes and the amounts paid in by the Union remain on the account until they are made available to the beneficiaries under the single programme, such as small and medium-sized enterprises or institutions managing projects in accession countries.

In accordance with Article 21(4) of the Financial Regulation, interest generated by trust accounts used for Union programmes is used to provide additional appropriations on the lines which bore the initial expenditure giving rise to the corresponding revenue.

Legal basis

Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1), and in particular Article 21(4) thereof.

CHAPTER 6 1 — REPAYMENT OF MISCELLANEOUS EXPENDITURE

6 1 1 Repayment of expenditure incurred on behalf of one or more Member States

6 1 1 3 Revenue from the investments provided for in Article 4 of Decision 2003/76/EC — Assigned revenue

Financial year 2017	Financial year 2016	Financial year 2015
p.m.	p.m.	53 222 776,22

Remarks

Decision 2003/76/EC stipulates that the Commission is entrusted with winding up the financial operations of the European Coal and Steel Community (ECSC) which are still in progress upon expiry of the ECSC Treaty.

Pursuant to Article 4 of that Decision, net revenue from the investment of available assets will constitute revenue in the general budget of the European Union earmarked for a specific purpose, namely financing research projects in sectors related to the coal and steel industry by the Research Fund for Coal and Steel.

The net revenue available for financing research projects in year n + 2 appears in the balance sheet of the ECSC in liquidation for year n, and after the liquidation process has been completed will appear as assets in the balance sheet of the Coal and Steel Research Fund. This financing mechanism took effect in 2003. Revenue coming from 2015 will be used for research in 2017. In order to reduce as far as possible the fluctuations that movements in the financial markets could cause in the financing of research, a smoothing arrangement is applied. The amount of net revenue expected to be available for research in 2017 comes to EUR 42 100 000.

In accordance with Article 4 of Decision 2003/76/EC, 72,8 % of the fund's appropriations will be for the steel-related sector and 27,2 % for the coal-related sector.

In accordance with Article 21 and Article 181(2) of the Financial Regulation, revenue will be used to provide additional appropriations under Chapter 08 05 of the statement of expenditure in this section.

Legal basis

Council Decision 2003/76/EC of 1 February 2003 establishing the measures necessary for the implementation of the Protocol, annexed to the Treaty establishing the European Community, on the financial consequences of the expiry of the ECSC Treaty and on the Research Fund for Coal and Steel (OJ L 29, 5.2.2003, p. 22).

CHAPTER 7 0 — DEFAULT INTEREST AND INTEREST ON FINES

7 0 0 Default interest

7 0 0 0 Default interest in respect of own resources made available by the Member States

Financial year 2017	Financial year 2016	Financial year 2015
5 000 000	5 000 000	22 566 265,07

Remarks

Any delay by a Member State in making the entry in the account opened in the name of the Commission referred to in Article 9(1) of Regulation (EU, Euratom) No 609/2014 gives rise to the payment of interest by the Member State concerned. However the recovery of amounts of interest below EUR 500 shall be waived.

For the VAT and GNI-based own resources, interest shall be payable only in relation to delays in entering amounts referred in Article 12(2) of Regulation (EU, Euratom) No 609/2014.

In the case of Member States belonging to the Economic and Monetary Union, the interest rate shall be equal to the rate as published in the *Official Journal of the European Union*, C series, which the European Central Bank applied to its main refinancing operations on the first day of the month in which the due date fell, or 0 per cent, whichever is higher, increased by 2,5 percentage points. This rate shall be increased by 0,25 of a percentage point for each month of delay.

In the case of Member States not belonging to the Economic and Monetary Union, the interest rate shall be equal to the rate applied on the first day of the month in question by the central banks for their main refinancing operations, or 0 per cent, whichever is higher, increased by 2,5 percentage points. For the Member States for which the central bank rate is not available, the interest rate shall be equal to the most equivalent rate applied on the first day of the month in question on the Member State's money market, or 0 per cent, whichever is higher, increased by 2,5 percentage points. This rate shall be increased by 0,25 of a percentage point for each month of delay.

The total increase shall not exceed 16 percentage points. The increased rate shall be applied to the entire period of delay.

Financial year 2017	Financial year 2016	Financial year 2015
p.m.	p.m.	36 735 192,12

Remarks

This article is intended to record capital repayments and interest payments on special loans and risk capital granted from the appropriations in Chapters 22 02 and 22 04 of the statement of expenditure in this section to Mediterranean third countries.

It also comprises capital repayments and interest payments on special loans and risk capital granted to certain Mediterranean Member States which, however, represent a very small proportion of the overall amount. These loans/risk capital were granted at a time the countries had not yet joined the Union.

The revenue obtained normally exceeds the amounts forecast in the budget because of the interest payments on special loans which may still be disbursed during the preceding financial year as well as during the current financial year. The interest on special loans and risk capital is charged from the moment the loans are disbursed; interest on special loans is paid in six-monthly instalments and interest on risk capital generally in annual instalments.

This article may accommodate, in accordance with Article 21 of the Financial Regulation, assigned revenue which is used to provide additional appropriations to finance expenditure to which this revenue is assigned.

Missions:

— travel expenses, including ancillary costs relating to tickets and reservations, daily subsistence allowances and additional or exceptional expenditure incurred in connection with missions by Commission staff covered by the Staff Regulations and by national or international experts or officials seconded to Commission departments (refunds of mission expenses paid for the account of other Union institutions or bodies and for third parties will constitute assigned expenditure). Where the option is available, the Commission will use airlines covered by collective bargaining agreements and complying with the relevant ILO conventions.

Representation expenses:

— reimbursement of the costs incurred by persons officially representing the Commission (reimbursement is not possible for expenses incurred in the performance of representation duties vis-à-vis staff of the Commission or other Union institutions).

Meetings of experts:

— reimbursement of the costs incurred for the functioning of the expert groups established or convened by the Commission: travel, subsistence and incidental expenses of experts participating in study groups and working parties, and the cost of organising such meetings where they are not covered by the existing infrastructure in the headquarters of the institutions or external offices (experts are reimbursed on the basis of decisions made by the Commission).

Conferences:

— expenditure relating to conferences, congresses and meetings organised by the Commission in support of its various policies, and expenditure for running a network for financial control organisations and bodies, including an annual meeting between such organisations and the members of the European Parliament's Committee on Budgetary Control, as requested in paragraph 88 of European Parliament resolution of 27 April 2006 with comments forming an integral part of the decision on the discharge for implementation of the European Union general budget for the financial year 2004, Section III — Commission (OJ L 340, 6.12.2006, p. 5),

— expenditure relating to conferences, seminars, meetings, training courses and practical in-house training for officials of the Member States who manage or monitor operations financed by the Union funds or operations to collect revenue that constitutes Union own resources or cooperate in the Union statistics system, and expenditure of the same type for officials from the countries of central and eastern Europe managing or monitoring operations financed under Union programmes,

— expenditure on training third-country officials who carry out management or control duties with a direct bearing on protecting the Union's financial interest,

— the cost of the Commission's participation in conferences, congresses and meetings,

— conference enrolment fees, excluding training expenses,

XX 01 02 *(cont'd)*

XX 01 02 11 *(cont'd)*

— subscriptions to trade and scientific associations,

— the cost of refreshments and food served on special occasions during internal meetings.

Meetings of Committees:

— travel, subsistence and incidental expenses of experts participating in committees set up by the Treaty and by European Parliament and Council Regulations or Council Regulations, and the cost of organising such meetings where they are not covered by the existing infrastructure (in the headquarters of the institutions or external offices) (experts are reimbursed on the basis of decisions made by the Commission).

Studies and consultations:

— expenditure on specialised studies and consultations contracted out to highly qualified experts (individuals or firms) if the Commission does not have suitable staff available to carry out such studies,

— the purchase of studies already carried out or subscriptions with specialist research institutions.

Information and management systems:

— the development and maintenance under contract of management and information systems,

— the acquisition and maintenance of complete (turnkey) information and management systems in the field of administrative management (staff, budget, finance, accounts, etc.),

— studies, documentation and training linked to those systems and project management,

— the acquisition of skills and expertise in the area of information technology for all departments: quality, security, technology, development methodology, information technology management, etc.,

— technical support for those systems, and the technical work needed to ensure that they operate satisfactorily.

Further training and management training:

— expenditure on general training designed to improve the skills of the staff and the performance and efficiency of the Commission:

  — fees for experts employed to identify training needs, design, develop and hold courses and evaluate and monitor results,

  — fees for consultants in various fields, in particular organisational methods, management, strategy, quality assurance and personnel management,

CHAPTER 01 02 — ECONOMIC AND MONETARY UNION *(cont'd)*

01 02 01 *(cont'd)*

Remarks

This appropriation is intended to cover the cost of carrying out the Joint Harmonised EU Programme of Business and Consumer Surveys in the Member States and candidate countries. The programme was initiated by a Commission Decision in November 1961 and was modified through subsequent Council and Commission decisions. It was last approved through Commission Decision C(97) 2241 of 15 July 1997 and presented in the Commission communication COM(2006) 379 final on 12 July 2006 (OJ C 245, 12.10.2006, p. 5).

This appropriation is also intended to cover the cost of studies, workshops, conferences, analyses, evaluations, publications, technical assistance, the purchase and maintenance of databases and software and the part-financing and support of measures relating to:

— fiscal policy including monitoring of fiscal positions,

— assessment of transposition and application by the Member States of the new Union fiscal governance framework supporting the functioning of the economic and monetary union (EMU),

— economic monitoring, analysis of the combination of measures and coordination of economic policies,

— the external aspects of the EMU,

— macroeconomic developments in the euro area,

— monitoring structural reforms and improving the operation of markets in the EMU and in the Union,

— coordination with financial institutions and analysis and development of financial markets, and borrowing and lending operations involving Member States,

— the facility providing financial assistance for Member States' balance of payments and the European financial stabilisation mechanism,

— cooperation with economic operators and decision-makers in the abovementioned fields,

— expanding the EMU,

— purchase of equipment, software development, maintenance and related training for the protection of the euro against counterfeiting.

This appropriation is also intended to cover the funding of priority information measures on Union policies on all aspects of the rules and functioning of EMU, as well as on the benefits of closer policy coordination and structural reforms, and to address information needs of key stakeholders and citizens, in relation to the EMU.

CHAPTER 01 02 — ECONOMIC AND MONETARY UNION *(cont'd)*

01 02 01 *(cont'd)*

This measure is designed to be an effective channel of communication and dialogue between the citizens of the Union and the Union institutions, and to take account of specific national and regional characteristics, where appropriate in cooperation with the Member State authorities. Emphasis will also be placed on preparing citizens for the introduction of the euro in Member States planning for its introduction.

It includes:

— the development of communication activities at central level (brochures, leaflets, newsletters, website design, development and maintenance, social media, exhibitions, stands, conferences, seminars, audiovisual products, opinion polls, surveys, studies, promotional material, twinning programmes, training etc.), and similar activities at the national and regional level implemented in cooperation with the Commission's representations,

— partnership agreements with Member States that wish to provide information about the euro or the EMU,

— cooperation and networking with Member States in the appropriate forums,

— communication initiatives in third countries, in particular to point out the international role of the euro and the value of financial integration.

The Commission, when implementing this article, should take duly into account the outcomes of the meetings of the Interinstitutional Group on Information (IGI).

The implementation of the Commission's communication strategy takes place in close coordination with the Member States and the European Parliament.

The Commission adopts a strategy and an annual work plan drawing on the orientations set out in its Communication of 11 August 2004 (COM(2004) 552 final) and it reports regularly to the relevant committee of the European Parliament on the implementation of the programme and on planning for the coming year.

This appropriation is also intended to cover or to temporarily pre-finance costs incurred by the Union in concluding and carrying out operations linked with the borrowing and lending operations for macro-financial assistance, Euratom, balance of payment and European financial stabilisation mechanism.

Any revenue entered in Article 5 5 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with point (a) of Article 21(3) of the Financial Regulation.

Legal basis

Task resulting from the Commission's prerogatives at institutional level, as provided for in Article 54(2) of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1).

Remarks

The European Union guarantee is for borrowings raised on the capital markets or from financial institutions. The amount in principal of loans which may then be granted to the Member States is limited to EUR 50 000 000 000.

This article constitutes the structure for the guarantee provided by the Union. It will enable the Commission to service the debt should debtors default.

In order to honour its obligations, the Commission may draw on its cash resources to service the debt provisionally. In this case, Article 12 of Council Regulation (EC, Euratom) No 1150/2000 of 22 May 2000 implementing Decision 2007/436/EC, Euratom on the system of the European Communities own resources (OJ L 130, 31.5.2000, p. 1) applies.

A specific annex to this part of the statement of expenditure in this section gives a summary of borrowing-and-lending operations guaranteed by the general budget, including debt management, in respect of capital and interest.

Legal basis

Council Regulation (EC) No 332/2002 of 18 February 2002 establishing a facility providing medium-term financial assistance for Member States' balances of payments (OJ L 53, 23.2.2002, p. 1).

Remarks

Article 122(2) of the Treaty on the Functioning of the European Union provides for the possibility of granting Union financial assistance to a Member State in difficulties or seriously threatened with severe difficulties caused by exceptional occurrences beyond its control.

The guarantee provided by the Union is for borrowings raised on the capital markets or from financial institutions.

In accordance with Article 2(2) of Regulation (EU) No 407/2010, the outstanding amount of loans and credit lines granted to Member States under this stabilisation mechanism is to be limited to the margin available under the Union's own resources for payment appropriations.

This article constitutes the structure for the guarantee provided by the Union. It will enable the Commission to service the debt should debtors default.

In order to honour its obligations, the Commission may draw on its cash resources to service the debt provisionally. Article 12 of Council Regulation (EC, Euratom) No 1150/2000 of 22 May 2000 implementing Decision 2007/436/EC, Euratom on the system of the European Communities own resources (OJ L 130, 31.5.2000, p. 1) applies.

This support will aim to enhance the capacity of Member States to implement reforms and to strengthen their public institutions. It should be focused in particular on fiscal, structural and institutional reforms that have been identified as priorities in the course of the Union's regular cycle of macroeconomic surveillance, in the course of an economic adjustment programme, during enhanced surveillance, or during post-programme surveillance. It will be delivered by the Commission upon request of the Member State concerned and is open to all Member States.

This appropriation may be used to cover the implementation of technical assistance programmes and projects by national and international public organisations with strong expertise in capacity development and institution building as well as by private sector actors. It may also be used to cover expenditure related to the preparatory phases of such programmes and projects (programming, identification and formulation) as well as monitoring, evaluation, audit and control during and after implementation. It may also cover the costs of short-term technical assistance, twinning-type arrangements between public authorities as well as support expenditure for such activities (training, meetings, seminars, studies).

Legal basis

Preparatory action within the meaning of Article 54(2) of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1).

Remarks

Macro-financial assistance ('MFA') is a form of financial aid extended by the Union to partner countries experiencing a balance of payments crisis. MFA is designed for countries geographically, economically and politically close to the Union. These include candidate and potential candidate countries, countries covered by the European Neighbourhood Policy and, in certain circumstances, other third countries. In principle, MFA is only available to countries benefiting from an International Monetary Fund programme.

CHAPTER 01 03 — INTERNATIONAL ECONOMIC AND FINANCIAL AFFAIRS *(cont'd)*

01 03 02 *(cont'd)*

MFA is exceptional in nature and is mobilised on a case-by-case basis to help countries dealing with serious balance-of-payments difficulties. Its objective is to restore a sustainable external financial situation, while encouraging economic adjustments and structural reforms.

While MFA can take the form of medium/long-term loans or grants, or a combination of these, this article only covers the grant element of MFA operations.

Appropriations under this article will also be used to cover costs incurred in relation to MFA operations, and in particular: (i) costs incurred to conduct operational assessments in the beneficiary countries to obtain reasonable assurances on the functioning of administrative procedures and financial circuits, (ii) costs related to the implementation of the 'Better Regulation' guidelines, in particular for ex-post evaluations of MFA operations, and (iii) costs to cover comitology requirements.

The Commission will inform the budgetary authority regularly of the macro-financial situation of the beneficiary countries and will report extensively on the implementation of MFA on a yearly basis.

Any revenue entered in Article 5 5 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with point (a) of Article 21(3) of the Financial Regulation.

Remarks

Pursuant to Council Decision of 8 March 1977, the Union guarantees loans made by the European Investment Bank (EIB) in the context of the Union's financial commitments in respect of the Mediterranean countries.

That decision was the basis for a contract of guarantee between the European Economic Community and the EIB signed in Brussels on 30 October 1978 and in Luxembourg on 10 November 1978, setting up a comprehensive guarantee, equal to 75 % of all the funds available for loan operations in the following countries: Malta, Tunisia, Algeria, Morocco, Portugal (Financial Protocol, emergency aid), Turkey, Cyprus, Syria, Israel, Jordan, Egypt, former Yugoslavia and Lebanon.

CHAPTER 01 03 — INTERNATIONAL ECONOMIC AND FINANCIAL AFFAIRS *(cont'd)*

01 03 05 *(cont'd)*

Decision 90/62/EEC was the basis for a contract of guarantee between the European Economic Community and the EIB signed in Brussels on 24 April 1990 and in Luxembourg on 14 May 1990 as regards Hungary and Poland and for the extension of that contract to cover Czechoslovakia, Romania and Bulgaria, signed in Brussels and in Luxembourg on 31 July 1991.

Decision 93/696/EC was the basis for a contract of guarantee between the European Community and the EIB signed in Brussels on 22 July 1994 and in Luxembourg on 12 August 1994.

Pursuant to Decisions 93/115/EEC and 96/723/EC, the Union guarantees loans which may be made individually by the EIB in countries of Latin America and Asia with which the European Community has concluded cooperation agreements. Decision 93/115/EEC was the basis for a contract of guarantee between the European Community and the EIB signed in Brussels on 4 November 1993 and in Luxembourg on 17 November 1993. Decision 96/723/EC was the basis for a contract of guarantee between the European Community and the EIB signed in Brussels on 18 March 1997 and in Luxembourg on 26 March 1997.

Pursuant to Decision 95/207/EC, the Union guarantees loans which may be made individually by the EIB in South Africa. Decision 95/207/EC was the basis for a contract of guarantee between the European Community and the EIB signed in Brussels on 4 October 1995 and in Luxembourg on 16 October 1995.

Decision 97/256/EC was the basis for a contract of guarantee between the European Community and the EIB signed in Brussels on 25 July 1997 and in Luxembourg on 29 July 1997 setting up a guarantee restricted to 70 % of the aggregate amount of the appropriations opened, plus all related sums. The overall ceiling of the appropriations opened is equivalent to EUR 7 105 000 000.

Decision 2000/24/EC was the basis for a contract of guarantee between the European Community and the EIB signed in Brussels on 24 January 2000 and in Luxembourg on 17 January 2000, last restated in 2005, setting up a guarantee restricted to 65 % of the aggregate amount of the appropriations opened, plus all related sums. The overall ceiling of the appropriations made available is equivalent to EUR 19 460 000 000. The EIB is invited to aim to cover the commercial risk on 30 % of its lending from non-sovereign guarantees. This percentage is to be increased whenever possible, in so far as the market allows.

Decision 2001/777/EC was the basis for a contract of guarantee between the European Community and the EIB signed in Brussels on 6 May 2002 and in Luxembourg on 7 May 2002 setting up a guarantee at 100 % against losses under a special lending action for selected environment projects in the Baltic Sea basin of Russia under the Northern Dimension. The overall ceiling is EUR 100 000 000.

Decision 2005/48/EC was the basis for a contract of guarantee between the European Community and the EIB signed in Luxembourg on 9 December 2005 and in Brussels on 21 December 2005 setting up a guarantee at 100 % against losses under loans for certain types of projects in Russia, Ukraine, Moldova and Belarus. The overall ceiling is EUR 500 000 000. It covers a period ending on 31 January 2007. At the end of this period, the loans granted by the EIB not having attained the overall amounts referred to above, the period was automatically extended by six months.

TITLE 01 — ECONOMIC AND FINANCIAL AFFAIRS

CHAPTER 01 03 — INTERNATIONAL ECONOMIC AND FINANCIAL AFFAIRS *(cont'd)*

01 03 05 *(cont'd)*

Decision 2006/1016/EC was the basis for a contract of guarantee between the European Community and the EIB signed in Luxembourg on 1 August 2007 and in Brussels on 29 August 2007 setting up a guarantee restricted to 65 % of the aggregate amount of credits disbursed and guarantees provided in respect of EIB financing operations, less amounts reimbursed, plus all related sums. The overall ceiling of the appropriations made available for all countries under the Decision is equivalent to EUR 27 800 000 000 and covers the period beginning on 1 February 2007 and ending on 31 December 2013 with a possible extension of six months. That Decision has been replaced by Decision No 633/2009/EC.

Decision No 633/2009/EC was the basis for an amendment, signed on 28 October 2009, to the contract of guarantee between the European Community and the EIB which was signed in Luxembourg on 1 August 2007 and in Brussels on 29 August 2007. The Union guarantee is restricted to 65 % of the aggregate amount of credits disbursed and guarantees. The maximum ceiling of the EIB financing operations, less amounts cancelled, shall not exceed EUR 27 800 000 000, broken down in a basic ceiling of EUR 25 800 000 000 and an optional mandate of EUR 2 000 000 000. It covers a period ending on 31 October 2011.

Decision No 1080/2011/EU was the basis for a contract of guarantee between the European Union and the EIB signed in Luxembourg and in Brussels on 22 November 2011. The Union guarantee is restricted to 65 % of the aggregate amount of credits disbursed and guarantees less amounts reimbursed, plus all related amounts. The maximum ceiling of the EIB financing operations, less amounts cancelled, shall not exceed EUR 29 484 000 000, broken down into a general mandate of EUR 27 484 000 000 and a Climate Change mandate of EUR 2 000 000 000. It covers a period beginning on 1 February 2007 and ending on 31 December 2013 with an extension until the entry into force of a new decision.

Decision No 466/2014/EU was the basis for a contract of guarantee between the European Union and the EIB signed in Luxembourg on 22 July 2014 and in Brussels on 25 July 2014. The Union guarantee is restricted to 65 % of the aggregate amount disbursed and guaranteed under EIB financing operations, less amounts reimbursed, plus all related amounts. The maximum ceiling of the EIB financing operations under the Union guarantee, less amounts cancelled, shall not exceed EUR 30 000 000 000, broken down into a fixed ceiling of EUR 27 000 000 000 and an optional mandate of EUR 3 000 000 000. The European Parliament and the Council shall decide in accordance with the ordinary legislative procedure on the activation in whole or in part of the optional mandate. The Union guarantee covers EIB financing operations signed during the period beginning on 25 July 2014 and ending on 31 December 2020 with an extension of six months if the European Parliament and the Council have not adopted a new decision granting the Union guarantee to the EIB against losses under its financing operations outside the Union before the end of 2020.

In order to honour its obligations, the Commission may draw on its cash resources to service the debt provisionally. In this case, Article 12 of Council Regulation (EC, Euratom) No 1150/2000 of 22 May 2000 implementing Decision 2007/436/EC, Euratom on the system of the European Communities own resources (OJ L 130, 31.5.2000, p. 1) applies.

This article constitutes the structure for the guarantee provided by the Union. It will enable the Commission, if necessary, to service the debt (repayment of principal, interest and other costs) should a debtor default on the loans granted by the EIB.

Remarks

The European Investment Fund (EIF) implements the SME window of the European Fund for Strategic Investments, which supports loan and equity financing of SMEs and mid-caps. The EIF is entitled to receive management fees for the implementation of the SME window. As provided for in Regulation (EU) 2015/1017, fees due to the EIF shall be primarily met by revenues from the resources in the EFSI guarantee fund and the European Fund for Strategic Investments. However, to the extent that those revenues are not sufficient to cover the fees due to the EIF, those fees shall be covered by the general budget of the Union.

Remarks

This appropriation is intended to cover payments in respect of commitments remaining to be settled from previous years.

Even though the end of the commitment period has been reached, the facilities have to be operated for several years during which time payments will be needed for investments and in order to honour guarantee obligations. Therefore reporting and monitoring requirements will continue until the end of the facility periods.

In order to honour its obligations, the Commission may draw on its cash resources to service the debt provisionally. In this case, Article 12 of Council Regulation (EC, Euratom) No 1150/2000 of 22 May 2000 implementing Decision 2007/436/EC, Euratom on the system of the European Communities own resources (OJ L 130, 31.5.2000, p. 1) applies.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget of the Union.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates, for participating in Union programmes and entered in Item 6 0 3 1 of the statement of revenue, may give rise to the provision of additional appropriations in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation.

Any revenues and repayments generated on Trust Accounts entered in Article 5 2 3 of the statement of revenue will be returned to the general budget of the Union or transferred to the succeeding financial instruments under the Union equity instruments for research and innovation under Horizon 2020 or the Equity Facility for Growth under COSME, as the case may be, in accordance with the Financial Regulation and Regulations (EU) No 1287/2013 and (EU) No 1290/2013.

Remarks

This appropriation is intended to cover expenditure on studies, meetings of experts, information and publications directly linked to the achievement of the objective of the programme or measures coming under this item, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. By way of information, those amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations, according to the same ratio as between the amount authorised for expenditure on administrative management and the total appropriations entered for the programme in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation.

Any revenue from contributions from third parties entered in Item 6 0 3 3 of the statement of revenue will give rise to the provision of additional appropriations to be entered in this Item in accordance with the Financial Regulation.

Remarks

This appropriation is intended to cover the Agency's expenditure on staff and administration incurred as a result of the Agency's role in the management of measures forming part of the Competitiveness of Enterprises and small and medium-sized enterprises programme (COSME).

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. By way of information, those amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations, according to the same ratio as between the amount authorised for expenditure on administrative management and the total appropriations entered for the programme in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation.

Any revenue from contributions from third parties entered in Item 6 0 3 3 of the statement of revenue will give rise to the provision of additional appropriations to be entered in this Item in accordance with the Financial Regulation.

The establishment plan of the Agency is set out in Annex 'Staff' to this section.

Remarks

This appropriation is intended to strengthen the competitiveness of enterprises, in particular that of small and medium-sized enterprises (SMEs), and to encourage entrepreneurship and foster the creation and growth of SMEs.

The implemented measures will include:

— networks bringing together a variety of stakeholders,

— market replication projects,

— policy analyses, development and coordination with participating countries,

— studies on gender-related discrimination linked to female entrepreneurship and implementation of policies to foster female entrepreneurship,

— information sharing, dissemination, awareness raising and advisory services to increase SME's competitiveness and help them participate in the Single Market and beyond,

— support to joint actions of Member States or regions, as well as other measures under the COSME programme.

CHAPTER 02 02 — COMPETITIVENESS OF ENTERPRISES AND SMALL AND MEDIUM-SIZED ENTERPRISES (COSME) *(cont'd)*

02 02 01 *(cont'd)*

The Union will provide support to activities such as the Enterprise Europe Network and entrepreneurship promotion. It will also support projects concerned with the first applications or market replication of techniques, practices or products (e.g. new business concepts for consumer goods) of Union relevance that have already been technically demonstrated with success but, owing to residual risk, have not yet significantly penetrated the market. Those projects will be designed to promote wider use within the participating countries and facilitate market uptake.

Projects will also seek to improve the framework conditions including through capacity building in clusters and other business networks notably with regard to support SME internationalisation in order to ensure that Union enterprises are competitive and sustainable, including in the tourism sector, by supporting coherence and consistency in implementation, as well as informed policy-making at Union level. In addition, projects will be put in place to support the implementation of the Small Business Act for Europe. Support actions, directly linked to the achievement of these objectives are also considered for funding: meetings, studies, information and publications, participation in study groups, conferences, workshops.

In relation to gender equality, projects to promote the position of female entrepreneurs will receive particular attention in order to help overcome gender-based hurdles women may face and to attain an equal representation of male and female entrepreneurs throughout the EU.

Sustainable tourism activities will receive a special focus with initial priority given to soft mobility, cycling networks, eco-tourism and nature protection. Accessibility for all, particularly for people with reduced mobility and for socially disadvantaged people is also of high importance in this context.

The Union will coordinate, promote and support actions for sustainable tourism, such as:

— preservation of long-term sustainable tourism resources through protection of natural, cultural, historical and industrial heritage,

— coordination and support for access to sustainable tourism information and services for less-advantaged citizens living in poverty, as well as for persons with reduced mobility,

— cross-border coordination of European cycling networks, together with rail and long-distance bus information and services.

The Erasmus for Entrepreneurs programme aims to encourage European entrepreneurship, the sharing of knowledge and best practices, and the creation of valuable networks and partnerships.

Due to the currently difficult economic situation it is indispensable to support European enterprises, in particular young innovative start-ups and female entrepreneurs, and to foster entrepreneurship by assigning enough funds to programmes like the programme for the competitiveness of enterprises and small and medium-sized enterprises (COSME). It is particularly important to provide support and incentives for the most modern and innovative sectors, such as the sharing economy and the digital economy. The Union needs to provide support for young entrepreneurs in these sectors and to develop and introduce instruments that will allow innovative start-ups to compete with non-EU rivals on world markets.

COMMISSION

CHAPTER 02 02 — COMPETITIVENESS OF ENTERPRISES AND SMALL AND MEDIUM-SIZED ENTERPRISES (COSME) *(cont'd)*

02 02 01 *(cont'd)*

In particular the programme 'Erasmus for young entrepreneurs' has been very successful, efficient and effective in contributing successfully to fighting unemployment and supporting robust start-ups across Europe. With regard to under-representation of women among entrepreneurs, special attention should be paid to involving young female entrepreneurs in the programme in order to encourage them to pursue their entrepreneurial career and to gain experience in how to overcome gender-specific hurdles they may face.

The financial means for the 'Erasmus for young Entrepreneurs' programme must be increased in particular due to the following reasons:

— the programme helps fostering European entrepreneurship, the sharing of knowledge and best-practices as well as the creation of valuable networks and partnerships,

— the programme is very successful and has shown an increasing number of participants over the last years which is expected to increase further,

— the programme effectively tackles the problem of youth unemployment as it helps young people without work to become self-employed and existing SME to create jobs by expanding and/or internationalising their business,

— the number of applications exceeds by far the possibilities the Commission can fulfil with the financial means currently available.

Part of this appropriation, within the 2016 COSME action 'Migrant Entrepreneurs Labs' will be allocated to national business support systems for migrant entrepreneurs and their informal networks. This should be done through information and networking events/platforms organised by mainstream business support organisations and targeted at migrant entrepreneurs. The aim will be to better inform migrant entrepreneurs about the support systems in the host country, connect informal and mainstream networks and draw attention to the migrant entrepreneurs' specific needs and problems.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, those amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Remarks

This appropriation is to be used to improve access to finance SMEs, including companies of female entrepreneurs in the form of equity and debt, in their start-up, growth and transfer phase.

A loan guarantee facility (LGF) shall provide counter-guarantees, direct guarantees and other risk sharing arrangements for debt financing which shall reduce the particular difficulties that viable SMEs face in accessing finance either due to their perceived higher risk or their lack of sufficient available collateral and for securitisation of SME debt finance portfolios.

An equity facility for growth (EFG) shall allow investments in risk capital funds which invest in SMEs in the expansion and growth stage, whilst taking a gender-sensitive and non-discriminatory approach, and in particular in those operating cross-borders. The possibility shall exist to invest in early stage funds in conjunction with the equity facility for RDI under Horizon 2020. In cases of joint investments in multi-stage funds, investments will be provided on a pro-rata basis from the EFG of COSME and the equity facility for RDI under Horizon 2020. Support from the EFG shall be (a) either directly by the European Investment Fund (EIF) or other entities entrusted with the implementation on behalf of the Commission or (b) by funds-of-funds or investment vehicles investing across borders.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, those amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Any repayment from financial instruments pursuant to Article 140(6) of the Financial Regulation, including capital repayments, guarantees released, and repayment of the principal of loans, paid back to the Commission and entered in Item 6341 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Articles 21(3)(i) of the Financial Regulation.

The Unesco logo is world-famous; it is a guarantee of the special cultural relevance of a site, but it is also a hook for attracting new tourism flows. Cooperation with Unesco, a specialised UN organisation, could be essential for enhancing international cooperation with the UN and developing a regional strategy for the promotion of European sites on the Unesco list. A map of emblematic Unesco sites grouped by theme (e.g. mediaeval towns, underwater heritage, Greek/Roman archaeological sites) or telling a story which pulls together their common strands will help to promote cultural tourism in both domestic and long-haul markets. Different communication tools can be developed on the basis of a European map of Unesco sites. This preparatory action will further explore the relationship between tourism and culture.

The 2015 budget allocation (EUR 1 500 000) has been used for the take-off phase. This phase consists in: (a) designing four Unesco Heritage Routes in Europe, each consisting of five to seven individual destinations; (b) getting key stakeholders to commit to developing and promoting these heritage routes; (c) defining marketing and communication strategies for each route; (d) developing an interactive online platform for communication, promotion and knowledge sharing (which may secure National Geographic support); and (e) developing one map guide and mobile application per route.

This appropriation will be used by Unesco to co-finance specific actions for the further development of the routes already selected and to co-finance promotional campaigns targeting the largest source markets for Unesco-related products (China, North America and Europe). Co-financed actions might focus on synergies between tourism, culture and creative industries. During this second phase, Unesco will proactively seek other donors to ensure the continuation of this initiative when Union funding ends.

This pilot project will explore the implementation of a cloud-based integration and synergy platform for Europe's manufacturers. An initial implementation will target inventory levels for critical and non-critical resources.

It is known that the pooling and dynamic redistribution of inventory for critical and non-critical manufacturing resources can drastically reduce the working capital required by manufacturers and lower their costs. The pilot project will investigate whether a transparent and intuitive cloud-based platform can build trust between manufacturers in order for them to pool resources and create a sharing economy. The overall reduction of working capital and inventory holding costs will free up resources that can be invested in an innovation funnel to make manufacturers more profitable or support growth. The objective is to present a first viable sharing platform which will lead to better integration and cooperation between manufacturers in Europe, thus driving economic growth.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

Today the European Union is being tested by a variety of structural changes affecting the whole economy; hence, tourism cannot escape them.

One of the most pressing problems Europe is facing is the lack of jobs and opportunities for young people. In November 2014, more than 5 million young people in Europe were unemployed. That means that one in four people under the age of 25 is looking for a job.

The tourism sector has long been known for recruiting young people. Statistics show that in the European Union alone, tourism provides more than 20 million jobs through more than two million companies. Furthermore, given its influence on the economy, tourism has a great impact on growth and employment. These are precisely the areas that require substantial strengthening in the Union after the economic crisis.

CHAPTER 02 02 — COMPETITIVENESS OF ENTERPRISES AND SMALL AND MEDIUM-SIZED ENTERPRISES (COSME) *(cont'd)*

02 02 77 *(cont'd)*

02 02 77 23 *(cont'd)*

Union institutions and national governments can facilitate and support job creation, as has been seen with the deployment of the Youth Initiative Guarantee. However, only private companies and actors can create jobs or training opportunities. The tourism industry, which has many private actors (hotels, cafés, restaurants, etc.), has a unique role in helping to resolve Europe's jobs crisis and contributing to its recovery.

For instance, an interesting paradox is that countries with the highest youth unemployment rates — Greece, Spain, Italy, and Portugal — are among the most popular tourist destinations in Europe. Thus, the tourism industry is very well positioned to contribute proactively to the institutions' efforts to tackle the issue of youth unemployment.

The tourism industry also has to be involved in and take responsibility for addressing social problems, in this case youth unemployment, by supporting the public sector's efforts to create opportunities for young people. In order to achieve this goal, a special partnership on tourism (SPOT) should be established between European-level decision making and representatives of the tourism sector.

Under SPOT, a new public-private partnership should be devised to facilitate the uptake of high quality jobs, apprenticeships and traineeship positions in the tourism industry across the EU, with a particular focus on small and medium-sized businesses.

This could involve all types of companies, supply chains, trade unions, education providers, European/national/regional tourism associations, authorities and agencies, business organisations and youth associations.

This initiative could raise awareness of the importance of the tourism sector for the Union economy. It could also incentivise Union decision-makers to recognise its potential and to develop a specific industrial policy in the future that supports the further development and growth of the sector.

Moreover, such a partnership will harness the dynamism of European youth, so young people are not left without hope or opportunity and can look with confidence to a brighter future by having the chance to enter the job market.

Last but not least, it is important to stress that this is also in the best interests of the tourism sector. If Europe is to remain the world's number one tourist destination, the industry needs to prepare the next generation by building up a high-quality, sustainable labour supply with advance ITC skills and experience in hosting tourists with different expectations and priorities, especially from third countries. This will enable more growth and keep the sector attractive.

The pilot project has the following main objectives:

— to conduct research into the importance of the tourism industry for the European economy and its employment levels (need to recognise it and raise public awareness),

— to boost, strengthen and develop the employability of young people by:

  — pledging to create new positions for young people (jobs, apprenticeships and traineeship) in the tourism industry,

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

Europe is the world's number one tourism destination, with a 52 % market share. Furthermore, tourism is a major socio-economic activity in the European Union, with a wide-ranging impact on economic growth, employment and social development and can be a powerful tool in fighting economic decline and unemployment.

Nevertheless the tourism sector is facing a series of challenges that could be addressed by both tourism businesses and public stakeholders. One of those challenges is increasing competition from emerging destinations.

That is why there is a need to promote Europe as a single tourist destination and strengthen its competitive image in long-haul markets. An inclusive holistic approach therefore needs to be taken in order to establish a clear brand image.

This pilot project will develop a strategically coordinated series of actions to establish a long-term strategy for the promotion of Destination Europe. Union destinations must have a specific approach for each market in order to include the European brand in global packages using new communication tools.

In order to increase the number of tourists in the Union and maintain Europe's position as the world's number one tourist destination, the Commission should encourage investment in tourist infrastructures and regional development and increase efforts to market 'Destination Europe Brand' in cooperation with the Member States.

The pilot project has the following main objectives:

— introduce a clear brand image and ensure Europe's visibility in major third countries: for instance, organise four large-scale industry round tables in Europe (London and/or Brussels), Asia, North America and Latin America,

— strengthen public-private partnerships: build on existing good relationships with trade bodies and cooperation with major international stakeholders and organisations, such as the European Parliament, the Commission, the Chinese National Tourism Administration (CNTA), the European Tourism Association (ETOA), the US Travel Association, BRAZTOA, JATA, major companies' CEOs, etc.,

— gather input and knowledge from the industry on a wide range of topics: devise a SWOT model of the European tourism industry and define critical success factors:

Strengths — which products are really driving bookings for Europe and what interesting trends are beginning to emerge?*Weaknesses* — which factors are limiting bookings of European vacations (consumer perception, safety concerns, currency fluctuation, hotel and air capacity, price, visas, etc.)?*Opportunities* — to strengthen or widen Europe's product offerings, in particular to support a stronger pan-European offer and awareness of lesser-known destinations and cultural routes.*Threats* — competitor analysis to gain insight into the value proposition that other destinations have where Europe has an opportunity to directly compete for business.*Critical success factors* — what do Destination Europe's brand and strategy need to do to achieve positive results for Europe in the coming years, and what role can the industry play in ensuring that the brand is adopted and promoted, ensuring the strategy's success?

— develop cooperative marketing tools and strategies:

  — online and offline marketing campaigns to raise awareness of Destination Europe, built around stakeholder round tables (cooperative marketing together with main private tourism companies),

  — collaboration with main global media partners (CNN, BBC, Financial Times, etc.),

  — participation in tourism fairs and in other major national and international events (youth festivals, sport events, food fairs),

— raise political awareness of the importance of inbound tourism for the European economy and gain the support of policy makers at all levels in order to overcome the disadvantages affecting the European tourism industry.

Commitment appropriations were allocated to this pilot project for the first year under the 2016 budget.

The objectives of the pilot project are:

— to increase the visibility of Europe as a tourist destination and support the promotion of European and transnational tourism products in targeted third-country markets through joint public-private partnerships,

— to increase flows of visitors from selected target third countries to Europe.

Legal basis

Pilot project within the meaning of Article 54(2) of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1).

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

Knowledge and skills are crucial not only for the personal welfare of each citizen, but also for sustainable development and economic growth. It is therefore important to offer a perspective to people coming from countries in economic and social crisis, especially young people, so that they have an opportunity to create added value not only for themselves, but also for the general public.

It is therefore important to empower young migrants and refugees to gain access to knowledge and to develop skills they are able to use and leverage on when going back to their home countries.

This way they are not only able to build a solid livelihood but may possibly become entrepreneurs, build up their own businesses and create employment.

The core of this initiative will be targeted mentoring programmes from different organisations, such as civil protection and community services, as well as companies (including local suppliers). Elements of a dual-training system would help beneficiaries to identify the specific needs of organisations or companies on the ground.

The legal situation regarding the waiting period for taking up an economic activity differs considerably from Member State to Member State. To make the pilot project a success, it will therefore also be necessary to conduct a review of the current national legal frameworks and to identify best practices which could be promoted in order to speed up procedures, so that young migrants can take advantage of the proposed programmes as soon as possible upon arrival.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

The aim of this pilot project is to finance start-ups in the sharing economy. It will help them develop their ideas, covering at least a part of the initial costs and possibly providing a financial guarantee for the most ambitious and risky proposals. Given the small scale and the lower cost of this type of initiative, even with a relatively limited allocation of Union money, the project should be able to kick-start a good number of small companies that could eventually grow to compete in the sector.

Specific objectives:

— identify which sectors are going to benefit from a sharing economy approach,

— define new legislative instruments to regulate the sharing economy, avoiding any weakening of its innovative potential,

— conduct a specific census of the sharing economy in Europe, sharing best practices between Member States and relevant business associations,

— offer financial support and economic guarantees to promising companies, even if their proposals are too risky to be funded by regular banking institutions,

— define a sharing economy model in line with European values that is mindful of the rights of consumers and of the workers involved.

Proposed actions:

— work with local companies and associations in order to create a European network of sharing-economy companies,

— establish scholarships and forms of financial support specifically for researchers and young entrepreneurs wishing to focus their work on the sharing-economy-related fields.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

In the Union, two groups currently affected by unemployment have huge potential: young people and graduates. These groups could create jobs in the Union by working in cooperatives which they also own, but to do so they need guidance and support in the form of labour market training.

Worker cooperatives are an economically feasible way to start up as an entrepreneur, and given the communality and the shared opportunities and obligations involved, they are a low-risk way for participants to both work in and own part of a company at the same time. Participants will establish new worker cooperatives, combining individuals' special skills and knowledge to their shared benefit and advantage. Those cooperatives have a good chance of offering sustainable jobs to their owners/employees, as they have a competitive advantage over most other kinds of companies because of their low overheads. The pilot project is to be launched in the three Member States with the most experience in this field.

The main objective is to help reduce youth unemployment by establishing best practice in this area for the whole of Europe. The pilot project will involve:

— preliminary actions and set-up in the three countries (first year),

— development and delivery of training courses (first and second years),

— follow-up and setting up of cooperatives with target groups (second year),

— expert evaluation of legal business barriers (third year, if the pilot project continues as a preparatory action),

— evaluation of outcomes (third year, if the pilot project continues as a preparatory action), and

— outcome report, to include proposals for any follow-on operational activities (third year, if the pilot project continues as a preparatory action).

Remarks

Tourism is Europe's third-largest industry. The Union travel and tourism sector employs almost 25 million people (directly and indirectly) and visitor generate EUR 351 billion per year. The tourism industry generates 9,7 % of total EU-28 GDP, a figure which is forecast to rise to 10,4 % by 2025.

Last year more than 455 million tourists came to the Union. Tourism is part of daily life; it is part and parcel of European values. In view of recent crises, and at a time when there is an increasing threat of global terrorism, there is a greater need for tourism, which is an industry that promotes peace.

For the sustainable development and protection of this highly economically important sector, closer co-operation is required between the European Institutions and Member State governments, as well as maximum citizen involvement.

There are already two programmes, namely the European Capital of Culture and the European Capital of Sport. The evaluations made of the European Capital of Culture programme, as well as public consultation on its future after 2019, have revealed that it has become one of the most ambitious cultural initiatives in Europe and one of the most appreciated by European citizens. That programme has generated economic growth in the majority of the cities involved. In 2013 in Marseille (France) there were close to 11 million tourists, while Pécs (Hungary) recorded a 27 % increase in hotel room occupancy. Above all, the programme has created communities and the majority of the cities involved have found a new basis for their development plans. This has also created growth in the regions in which the cities are located.

02 02 77 *(cont'd)*

02 02 77 29 *(cont'd)*

It is crucial to uphold those values and disseminate them as widely as possible. A 'European Capital of Tourism' could be an excellent vehicle for that. Such a programme would aim to:

promote the rich tourism offering of European countries; increase a sentiment of shared local tourism-related values; strengthen tourism-generated development in cities, their surroundings and their regions; enhance the image of cities that are awarded this title and ultimately raise the profile of their regions.

It would also be important for cities holding the title to seek to promote social inclusion and equal opportunities and to do their utmost to ensure the broadest possible involvement of all the components of civil society in the preparation and implementation of tourism-related programmes, with special attention being paid to young people and marginalised and disadvantaged groups.

The award of the title should be based on a specially created tourism-related programme, which should have a strong European dimension. That tourism development programme should be part of a long-term strategy having a sustainable impact on local economic, cultural and social development.

Because of the strong regional dimension of tourism, it is crucial, alongside the title 'European Capital of Tourism', for it to be possible to give awards to cities and regions that have reached unique, innovation based results in the tourism sector.

Accordingly, a 'European Tourism Award' could be given by an independent board of experts in different categories (for example: sustainable tourism, digital tourism, health tourism) established by the European Parliament, the Commission and the Committee of Regions. In this process the network of tourism stakeholders which created the Tourism Manifesto for Growth and Jobs, with the support of civil society organisations, could be an excellent partner.

The general aim of the preparatory action is to:

— give local tourism its own profile, and strengthen links between cities and their regions;

— establish the 'European Capital of Tourism' within the existing institutional framework alongside the Cultural and Sport Capital programmes with their effective operating methods; identify common values, harness potential synergies and avoid duplication;

— increase the attractiveness of cities and regions, which can lead to economic growth and job creation.

The operational objectives are:

— to make a maximum of three 'European Capital of Tourism' awards a year;

— to lay down conditions and categories for the 'European Tourism Award';

— to involve Member States on a voluntary basis at the outset and initiate a structural dialogue with the Council;

— to establish the professional body, the preparatory committee to assess the bids, in co-operation with the European Parliament, the Commission and the Committee of Regions;

ALECO is a pilot project for a one-way mobility scheme for young Union entrepreneurs with a maximum duration of one to six months in selected third countries. The aim is for ALECO to become an integral part of Erasmus for Young Entrepreneurs (EYE), mainly upgrading the programme in terms of geographical scope and exposure to successful entrepreneurial models. The pilot project will use the existing EYE infrastructure, including support office, intermediary organisations and IT tools.

Up to 200 young entrepreneurs from Member States are expected to participate. The target group will be selected from entrepreneur profiles upon application and assessment. Eligibility criteria: 1. Future entrepreneurs showcasing ready-to-implement business plans and a binding commitment to start up a firm; 2. Entrepreneurs who have started a business in the last three years, alone or in partnership; 3. Entrepreneurs who have taken advantage of EYE exchanges and showcase progress in their business.

Hosting countries may include the USA, Israel, Canada, Singapore, Japan, China and South Korea.

The pilot project is supported by Eurochambres, the European Youth Forum, Junior Achievement, Knowledge 4 Innovation and European Democrat Students.

02 03 01 *(cont'd)*

Remarks

This appropriation is intended to cover expenditure arising in connection with measures contributing to the completion of the internal market and its operation and development:

— measures intended to make the operation of the internal market more effective and to ensure that citizens and businesses have access to the most extensive rights and opportunities resulting from the opening up and deepening of the internal market without borders and are able to exercise those rights and take advantage of those opportunities in full; and monitoring and evaluation measures relating to the practical exercise by citizens and businesses of their rights and opportunities with a view to identifying and facilitating the removal of any obstacles which may be preventing them from exercising those rights in full,

— approximation of standards and introduction of an information system for technical standards and regulations, examination of the rules notified by Member States, EFTA States and Turkey and translation of the draft technical regulations,

— financing of administrative and technical coordination and of cooperation between the notified bodies, grants in support of the European Technical Approval Organisation (EOTA), and of projects of Union interest undertaken by outside bodies,

— application of Union legislation on medical devices, cosmetics, foodstuffs, textile products, chemicals, classification and labelling of substances and mixtures, cars and safety, toys, legal metrology, pre-packaging and the quality of the environment, aerosol dispensers, and information and publicity measures for greater awareness of Union legislation,

— a comprehensive review of regulations with a view to making necessary changes and producing an overall analysis of the effectiveness of the measures taken to further the sound operation of the internal market and an evaluation of the overall impact of the internal market on businesses and the economy, including the purchase of data and access by Commission departments to external databases, as well as targeted actions aimed at improving understanding of the functioning of the internal market and rewarding active participation in fostering its functioning,

— greater sectorial approximation in the fields of application of the 'new approach' directives, especially the extension of the 'new approach' to other sectors,

— implementation of the strategic programme on the internal market and market monitoring, and measures implementing Regulation (EC) No 765/2008, both for the infrastructures and market surveillance, and Regulation (EC) No 764/2008, for procedures relating to the application of certain national technical rules to products lawfully marketed in another Member State,

— participation in the negotiation of agreements on mutual recognition and, under European agreements, support for the associate countries to allow them to adopt the *acquis* of the Union,

— implementation measures for Regulation (EC) No 1907/2006, especially those resulting from the REACH review (communication COM(2013) 49 final),

— implementation and monitoring of the provisions in the area of public procurement especially in relation to the transposition of the Directives 2014/23/EU, 2014/24/EU and 2014/25/EU,

— actions related to the implementation of Directive 2014/60/EU,

— implementing and monitoring the provisions governing public contracts with a view to ensuring their optimum operation and that tenders are genuinely open, including the awareness-raising and training of the various parties to these contracts; the introduction and use of new technologies in the various fields of operation of these contracts; the continuous adaptation of the legislative and regulatory framework in the light of developments arising from these contracts, particularly the globalisation of markets and existing or future international agreements,

— strengthening administrative cooperation through, inter alia, the Internal Market Information System (IMI), the deepening of knowledge of internal market legislation in the Member States and its sound application by them, and support for administrative cooperation between the authorities responsible for implementing legislation relating to the internal market with a view to achieving the Lisbon strategic goals as set out in the annual policy strategy,

— guaranteeing the completion and management of the internal market, especially in the fields of free movement of services, recognition of professional qualifications, and intellectual and industrial property, in particular the development of proposals for establishing a Union patent,

— analysis of the effects of removing obstacles to the internal market for services and of the effects of measures in place as part of the follow-up to the progressive liberalisation of postal services, coordination of Union policies on postal services with regard to international systems and in particular with regard to participants in Universal Postal Union (UPU) activities, cooperation with central and eastern European countries, as well as analysis of practical implications of the application of the General Agreement on Trade in Services (GATS) provisions to the postal sector and overlap with UPU regulations,

— actions related to the implementation of EU Action Plan for the Circular Economy.

This appropriation is also intended to cover expenditure on consultations, studies, evaluations, meetings of experts, information and publications directly linked to the achievement of the objective of the programme or measures coming under this article, as maintenance, updating and development of informatics systems related to technical regulations or linked to putting into place and monitoring policies launched within the framework of the internal market, and any other expenditure on technical and administrative assistance not involving public authority tasks.

Remarks

In accordance with the general aim of maintaining the proper functioning of the internal market and the competitiveness of European industry, in particular through the mutual recognition of standards and the establishment of European standards in suitable cases, this appropriation is intended to cover:

— financial obligations arising from contracts to be signed with the European standardisation organisations (such as ETSI, CEN and Cenelec), for the development of standards,

— checking and certifying conformity with the standards, and demonstration projects,

— contract expenditure for the execution of the programme and projects indicated above. The contracts in question cover the following: research, association, evaluation, technical operations, coordination, scholarships, grants, training and mobility of scientific staff, participation in international agreements and participation in expenditure on equipment,

— improving the performance of standards bodies,

— promoting quality in standardisation, and the verification thereof,

— supporting the transposition of European standards into national standards, particularly by having them translated,

— measures relating to information, promotion and profile-raising of standardisation and the promotion of European interests in international standardisation,

— secretarial services for the technical committees,

— technical projects in the field of tests for compliance with the standards,

— examination of the compliance of draft standards to the relevant mandates,

— programmes of cooperation with and assistance to third countries,

— carrying out the work needed to apply international information technology standards uniformly throughout the Union,

— specifying methods of certification and laying down technical methods of certification,

— encouraging use of these standards in public procurement contracts,

Remarks

This appropriation is intended to cover the costs of the functioning and activities of European non-governmental and non-profit organisations representing the interests of SMEs and consumers, as well as environmental and social interests, in standardisation activities.

Such representation in the standardisation process at European level forms part of the statutory objectives of such organisations, and they have been mandated by national non-profit organisations in at least two thirds of the Member States to represent those interests.

Contributions to such European organisations have previously been covered by the Competitiveness and Innovation Programme, the consumer policy and the Financial Instrument for the environment, LIFE+. In Regulation (EU) No 1025/2012 the actions in the field of standardisation financed by specific programmes have been brought together in a single legal act.

Remarks

This appropriation is intended to cover the Agency's staff and administrative expenditure (Titles 1 and 2), and operational expenditure in connection with the work programme (Title 3).

The Agency must inform the European Parliament and the Council about transfers of appropriations between operational and administrative expenditure.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this Item. By way of information, those amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Remarks

The scope of the pilot project is to collect, publish and communicate through experts the best practices available in the area of cross-border parcel delivery services, based on successful implementation by all market participants, with the aim of helping all Member States to reach a common level of delivery efficiency and tackle disparities, while at the same time potential areas for further actions could also be identified where the customer satisfaction level should be further addressed.

The project could encompass four steps: (1) a comprehensive assessment of the needs of users of e-commerce-related (cross-border) parcel delivery services; (2) an assessment of the extent to which existing delivery industry practices meet these needs; (3) identification of good industry practice in this field; (4) a gap analysis identifying areas where additional innovation and service improvements are needed to satisfy existing and emerging consumer needs.

Report from the Commission to the European Parliament and the Council of 17 November 2015 on the application of the Postal Services Directive (Directive 97/67/EC as amended by Directive 2002/39/EC and 2008/6/EC) (COM(2015) 568 final).

As stated by Vice-President Andrus Ansip, in charge of the Digital Single Market Strategy, regarding parcel delivery the Commission will:

(1) take action to improve regulatory oversight while supporting innovation and ensuring a level playing field for operators;

(2) address the issue of price transparency, including prices for small shipments. This action should mainly support consumers and small businesses. A comprehensive assessment of the situation will be carried out after two years to see if further action is needed.

Remarks

The pilot project on space technologies will primarily test partnership arrangements with industry to identify priorities for competitiveness. This will prepare the ground for a public-private partnership (Joint Technology Initiative or similar) in space technologies and an associated roadmap through a structured dialogue with industry.

The pilot project will focus on two themes which are not addressed by current programmes: innovative materials for space equipment and cleaner space through deorbiting.

CHAPTER 02 03 — INTERNAL MARKET FOR GOODS AND SERVICES *(cont'd)*

02 03 77 *(cont'd)*

02 03 77 06 *(cont'd)*

The specific area of materials for space equipment is critical for a European space sector currently suffering from dependency in some critical materials areas. In order to support a reduction in dependency as regards materials supply and a sustainable REACH-compliant competitive space sector, two major topics could be addressed by developing innovative materials for space equipment: composite supply source for critical space equipment and non-dependency with regard to materials and processes. The market for carbon-based raw materials suffers from under-capacity, and the space sector, because it is a low-volume customer, suffers the most. Supply sources for composite raw materials are still highly concentrated in the US and Japan. The drive for non-dependency with regard to materials and processes should aim at promoting European sources for critical materials and processes affected by dependency issues and/or the REACH Regulation.

Innovative materials for space equipment would also provide a deorbiting solution by allowing the development of appropriate technology to ensure that satellites are removed at the end of their mission life.

The Earth orbit needs to be in good condition in order to enable manned and unmanned operations in space in the future. The Union should start to take the steps necessary for limiting the growth of orbiting debris.

The three main areas for technological development could be:

(1) end-of-life deorbiting solutions (propulsion);

(2) trajectory and controlled re-entry (design and modelling);

(3) design for demise (controlled break-up on re-entry). Establishing a long-term deorbiting scheme through a pilot project could also make a significant environmental contribution.

The aim is to achieve sustainable long-term replacement solutions for materials through innovation, and identifying solutions for space debris is critical for industry.

Remarks

These remarks are applicable to all the budget lines in this chapter.

This appropriation will be used for the Horizon 2020 — the Framework Programme for Research and Innovation which covers the 2014 to 2020 period, and for the completion of the previous research programmes (Seventh Framework Programme and preceding framework programmes) and the Competitiveness and Innovation Framework Programme (CIP).

Horizon 2020 shall play a central role in the implementation of the Europe 2020 flagship initiative 'Innovation Union' and other flagship initiatives, notably 'Resource efficient Europe', 'An industrial policy for the globalisation era', and 'A digital agenda for Europe', as well as in the development and functioning of the European Research Area. Horizon 2020 shall contribute to building an economy based on knowledge and innovation across the whole Union by leveraging sufficient additional research, development and innovation funding. It will be carried out in order to pursue the general objectives set out in Article 179 of the Treaty on the Functioning of the European Union, in order to contribute to the creation of a society of knowledge, based on the European Research Area, i.e. supporting transnational cooperation at all levels throughout the Union, taking the dynamism, creativity and the excellence of European research to the limits of knowledge, strengthening human resources for research and for technology in Europe, quantitatively and qualitatively and research and innovation capacities in the whole of Europe and ensuring optimum use thereof.

CHAPTER 02 04 — HORIZON 2020 — RESEARCH RELATING TO ENTERPRISES *(cont'd)*

In Horizon 2020, gender equality is addressed as a cross-cutting issue in order to rectify imbalances between women and men and to integrate a gender dimension in research and innovation content. Particular account will be taken of the need to step up efforts to enhance the participation at all levels, including decision making, of women in research and innovation.

Also entered against these articles and items are the costs of high-level scientific and technological meetings, conferences, workshops and seminars of European interest organised by the Commission, the funding of high-level scientific and technological analyses and evaluations carried out on behalf of the Union to investigate new areas of research suitable for Union action, inter alia, in the context of the European Research Area, and measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

This appropriation will be used in accordance with Regulation (EU) No 1290/2013 of the European Parliament and of the Council of 11 December 2013 laying down the rules for participation and dissemination in 'Horizon 2020 — the Framework Programme for Research and Innovation (2014-2020)' and repealing Regulation (EC) No 1906/2006 (OJ L 347, 20.12.2013, p. 81).

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this chapter. By way of information, those amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

The possibility of third countries or institutes from third countries taking part in European cooperation in the field of scientific and technical research is envisaged for some of these projects. Any financial contribution entered in Items 6 0 1 3 and 6 0 1 5 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Any revenue from States taking part in the European cooperation in the field of scientific and technical research entered in Item 6 0 1 6 of the of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation.

Any revenue from the contributions by outside bodies to Union activities entered in Item 6 0 3 3 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Additional appropriations will be provided under Item 02 04 50 01.

Administrative appropriations of this chapter will be provided under Article 02 01 05.

02 04 02 Industrial leadership

Remarks

This priority of Horizon 2020 aims at making Europe a more attractive location to invest in research and innovation, by promoting activities where businesses set the agenda as well as at accelerating the development of new technologies which will underpin future businesses and economic growth. It will provide major investment in key industrial technologies, maximise the growth potential of European companies by providing them with adequate levels of finance and help innovative SMEs to grow into world-leading companies.

Remarks

The aim of this appropriation is to foster a competitive and innovative space industry and research community to develop and exploit space infrastructure to meet future Union policy and societal needs. The lines of activities are: enabling European competitiveness, non-dependence and innovation of the European space sector, enabling advances in space technologies, enabling exploitation of space data and enabling European research in support of international space partnerships.

Remarks

The aim of this appropriation is to help remedy market deficiencies in accessing risk finance for research and innovation. In particular, the equity facility will target investments in risk capital funds which make early stage investments. It shall enable equity investments in, amongst others, seed capital funds, cross-border seed funds, business angel co-investment vehicles and early-stage venture capital funds. The equity facility, which will be demand-driven, shall use a portfolio approach, where venture capital funds and other comparable intermediaries select the firms in which to invest. Special attention should be paid to encouraging female entrepreneurs to participate in such schemes.

Any repayment from financial instruments pursuant to Article 140(6) of the Financial Regulation, including capital repayments, guarantees released, and repayment of the principal of loans, paid back to the Commission and entered in Item 6 3 4 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21(3)(i) of the Financial Regulation.

Remarks

The aim of this appropriation is to:

— provide financing to the Enterprise Europe Network established under the COSME programme for their reinforced services linked to Horizon 2020. The support provided under the budget line is limited to services enhancing the innovation management capacity of SMEs, in particular of beneficiaries of the SME instrument,

— support the implementation and complementing the SME specific measures across Horizon 2020, notably to enhance effectiveness and efficiency of the innovation services provided to SMEs. Activities may include awareness raising, information and dissemination, training and mobility activities, networking and exchange of best practices, developing high quality innovation support mechanisms and services with strong Union added value for SMEs (e.g. intellectual property and innovation management, knowledge transfer), as well as assisting SMEs to connect to research and innovation partners across the Union,

— support market-driven innovation in view of enhancing the innovation capacity of firms by improving the framework conditions for innovation as well as tackling the specific barriers preventing the growth of innovative firms.

02 04 03 ***Societal challenges***

Remarks

This priority of Horizon 2020 responds directly to the policy priorities and societal challenges identified in the Europe 2020 strategy. Those activities will be implemented using a challenge-based approach which brings together resources and knowledge across different fields, technologies and disciplines. The activities will cover the full cycle from research to market, with a new focus on innovation-related activities such as piloting, demonstration, test-beds, support for public procurement, design, end-user driven innovation, social innovation and market take-up of innovations. The activities will support directly the corresponding sectoral policy competences at Union level.

Remarks

The aim of this appropriation will be to support secure supply of raw materials in order to meet the needs of Union society within the sustainable limits of the planet's natural resources. Activities will target the improvement of the knowledge base on raw materials and the development of innovative solutions for the cost-effective and environmentally friendly exploration, extraction, processing, recycling and recovery of raw materials and for their substitution by economically attractive alternatives.

Support will also be provided for tackling barriers impeding the deployment of circular-economy such as recovery of raw materials from different waste streams.

New item

Europe faces today an increasingly deteriorating security situation with the emergence of new or existing threats; the financial crisis has put constant pressure on national defence budgets and since 2006, the budget spent on Defence R&D in Europe decreased by 30 %. In this context, Member States and public opinion look to the Union for greater involvement in security and defence.

The main objective of the preparatory action is to prepare and test a mechanism of cooperation with the European Defence Agency with a view to prepare, organise and deliver a variety of defence research, technology and development activities. The final aim of these activities is to improve the competitiveness and innovation in the European defence industry and to stimulate growth and job creation. It needs to produce visible and timely results for the decision making in view of the discussion of a possible defence research programme within the next Multiannual Financial Framework.

02 04 77 03 *(cont'd)*

The preparatory action will be implemented by work programmes, mainly through calls for proposals for research projects. The management of the action shall be delegated to the European Defence Agency.

In 2017 focus would lie on a large scale demonstration project which should yield timely the most tangible result: a first experimental development of new, innovative defence technology. This demonstration project should be complemented with a number of research projects, inter alia, on critical defence technologies as well as future disruptive technologies, and support activities to improve, e.g., on standardisation and interoperability. The precise scope of the topics will include inter alia consultation with the Member States and the defence-related R&D stakeholders.

Any revenue from contributions from third countries entered in Item 6 0 3 3 of the statement of revenue will give rise to the provision of additional appropriations to be entered in this Item in accordance with the Financial Regulation.

Remarks

The aim of this appropriation is to:

— enable operations of Copernicus services, tailored to the needs of users,

— contribute to ensure access to data of the observation infrastructure necessary to operate Copernicus services,

— create opportunities for increased private sector usage of information sources, thereby facilitating innovation by value-adding service providers.

This appropriation will, in particular, fund the set-up, the establishment and operation of the six services mentioned in the Copernicus Regulation and the related activities.

This appropriation may also fund cross-cutting activities among the services or their articulation and co-ordination, as well as for the in-situ co-ordination, user uptake and training and communication.

The budget envelope will be managed either directly by the Commission services or indirectly via delegation agreements with Union agencies and international organisations, or any entity eligible under Article 58 of the Financial Regulation.

When the Commission manages the budget directly, it may entrust the Joint Research Centre (JRC) with scientific and technical support tasks. The funding of these tasks may be entered into the JRC's indirect budget under point (c) of Article 183(2) and Article 183(6) of the Financial Regulation.

CHAPTER 02 06 — EUROPEAN EARTH OBSERVATION PROGRAMME *(cont'd)*

02 06 01 *(cont'd)*

In addition, in support of competiveness and growth, this appropriation may also fund data dissemination and the incubation of new businesses by supporting more robust and innovative IT structures in Europe.

Copernicus services will facilitate access to key data required in policy formulation at Union, national, regional and local level in fields such as agriculture, forest monitoring, water management, transport, urban planning, climate change and many others. This appropriation covers mainly the implementation of delegation agreements for the Copernicus programme, pursuant to Article 58 of the Financial Regulation.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, those amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget. Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Any revenue from contributions from third parties entered in Item 6 0 3 3 of the statement of revenue will give rise to the provision of additional appropriations to be entered in this Item in accordance with the Financial Regulation.

Remarks

The aim of this appropriation is to:

— build an autonomous Union's Earth observation capacity by funding the space infrastructure and favouring the European industry in that regard, namely in the construction and launch of satellites,

— contribute to the availability of the observation capacity necessary to enable the Copernicus services, in particular through the operations of the ground segment of the space infrastructure,

CHAPTER 02 06 — EUROPEAN EARTH OBSERVATION PROGRAMME *(cont'd)*

02 06 02 *(cont'd)*

— create opportunities for increased private sector usage of information sources, thereby facilitating innovation by value-adding service providers.

The development of a European space infrastructure has a key role in enhancing competitiveness and innovation, and requires consistent public intervention to sustain the industrial effort.

This appropriation will fund the development and construction of satellites, as well as their operation. The data and information obtained through the space infrastructure is subject to the free, full and open data policy, which will increase their availability and thereby boost the downstream market.

To supplement the data needed by users, this appropriation may also fund the acquisition of data from third parties and the access to contributing mission from Member States, as well as the dedicated dissemination platform (core ground segment) which will serve, in priority the operational services funded by Article 02 06 01.

The budget envelope will be managed either directly by the Commission services or indirectly via delegation agreements with Union agencies and international organisations, or any entity eligible under Article 58 of the Financial Regulation.

When the Commission manages the budget directly, it may entrust the Joint Research Centre (JRC) with scientific and technical support tasks. The funding of these tasks may be entered into the JRC's indirect budget under point (c) of Article 183(2) and Article 183(6) of the Financial Regulation.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. Remarks

In order to ensure that the rules on competition concerning agreements, decisions by associations of undertakings and concerted practices (Article 101 of the Treaty on the Functioning of the European Union), abuses of a dominant position (Article 102 of the Treaty on the Functioning of the European Union), aids granted by States (Articles 107 and 108 of the Treaty on the Functioning of the European Union) and concentrations between undertakings (Regulation (EC) No 139/2004) are enforced, the Commission is empowered to take decisions, to conduct investigations and to impose penalties or order recovery.

The Commission's decisions are subject to review by the Court of Justice of the European Union in accordance with the Treaty on the Functioning of the European Union.

As a prudential measure, it is appropriate to take into account the possibility of budgetary implications stemming from rulings of the Court of Justice of the European Union.

This appropriation is intended to cover any expenditure arising from damages awarded by the Court of Justice of the European Union to claimants and resulting from legal proceedings against the Commission's decisions in the field of competition.

Since a reasonable estimate of the financial impact on the general budget cannot be established beforehand, a token entry ('p.m.') appears in this article. If necessary, the Commission will propose to make available the appropriations related to actual needs by means of transfers or through a draft amending budget.

Remarks

This appropriation is intended to cover expenditure on studies, committees, meetings of experts, including meetings and other expenditure relating to the work of the European Platform to enhance cooperation in tackling undeclared work, conferences, information and publications directly linked to the achievement of the objectives of the programme or measures falling under this item, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations, according to the same ratio as between the amount authorised for expenditure on administrative management and the total appropriations entered for the programme, in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation.

Figures (Non-differentiated appropriations)

Appropriations 2017	Appropriations 2016	Outturn 2015
p.m.	p.m.	0,—

Remarks

This appropriation is intended to cover:

— expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts for the mutual benefit of the Commission and beneficiaries,

— expenditure on studies, meetings of experts, information and publications directly linked to the achievement of the objective of the Instrument for Pre-Accession Assistance.

Any income from financial contributions from Member States and third countries, including in both cases their public agencies, entities or natural persons to certain external aid projects or programmes financed by the Union and managed by the Commission on their behalf, may give rise to the provision of additional appropriations. Such contributions under Article 6 3 3 of the statement of revenue constitute assigned revenue under point (b) of Article 21(2) of the Financial Regulation. The amounts entered on the line for administrative support expenditure will be determined, without prejudice to Article 187(7) of the Financial Regulation, by the contribution agreement for each operational programme with an average not exceeding 4 % of the contributions for the corresponding programme for each chapter.

This appropriation covers administrative expenditure under Chapter 04 05.

Remarks

Article 175 of the Treaty on the Functioning of the European Union (TFEU) provides that the objectives of economic, social and territorial cohesion set out in Article 174 shall be supported by the action it takes through the Structural Funds, which includes the European Social Fund (ESF). The tasks, priority objectives and the organisation of the Structural Funds are defined in accordance with Article 177 TFEU.

Article 80 of the Financial Regulation provides for financial corrections in the event of expenditure incurred in breach of applicable law.

Article 39 of Regulation (EC) No 1260/1999, Articles 100 and 102 of Regulation (EC) No 1083/2006 and Articles 85, 144 and 145 of Regulation (EU) No 1303/2013 on criteria for financial corrections by the Commission provide for specific rules on financial corrections applicable to the ESF.

Any revenue from the financial corrections carried out on that basis is entered in Article 6 5 1, 6 5 2, 6 5 3 or 6 5 4 of the statement of revenue and constitutes assigned revenue in accordance with point (c) of Article 21(3) of the Financial Regulation.

Article 177 of the Financial Regulation lays down the conditions for the repayment in full, or in part, of pre-financing payments in respect of a given operation.

Article 82 of Regulation (EC) No 1083/2006 provides for specific rules on repayment of pre-financing amounts applicable to the ESF.

CHAPTER 04 02 — EUROPEAN SOCIAL FUND *(cont'd)*

Pre-financing amounts repaid shall constitute internal assigned revenue in accordance with Article 21(4) of the Financial Regulation and shall be entered in Item 6 1 5 0 or 6 1 5 7.

Measures to combat fraud are funded under Article 24 02 01.

Remarks

This appropriation is intended to cover the funding by the ESF of commitments remaining to be settled from the 2000-2006 programming period for innovative actions and technical assistance as provided for in Articles 22 and 23 of Regulation (EC) No 1260/1999. The innovative actions included studies, pilot projects and exchanges of experience. They were intended in particular to bring about a qualitative improvement in Structural Fund measures. Technical assistance covered preparatory, monitoring, evaluation, supervision and management measures required for implementation of the ESF. This appropriation was, in particular, used to cover:

— support expenditure (representation expenses, training, meetings and missions),

— information and publishing expenditure,

— expenditure on information technology and telecommunications,

— contracts for the provision of services and studies,

— grants.

Remarks

This appropriation is intended to cover commitments remaining to be settled for programmes under the ESF convergence objective in the 2007-2013 programming period. That objective is aimed at speeding up the convergence of the least developed Member States and regions by improving conditions for growth and employment.

This appropriation aims to reduce the economic, social and territorial disparities which have arisen, particularly in countries and regions whose development is lagging behind, in connection with the speeding-up of economic and social restructuring and population ageing.

In accordance with Article 105a(1) of Regulation (EC) No 1083/2006, as modified by point 7 of Annex III to the Treaty concerning the Accession of the Republic of Croatia to the European Union (OJ L 112, 24.4.2012), programmes and major projects which, on the date of accession of Croatia, have been approved under Regulation (EC) No 1085/2006 and the implementation of which has not been completed by that date, shall be considered to have been approved by the Commission under Regulation (EC) No 1083/2006, with the exception of the programmes approved under the components referred to in points (a) and (e) of Article 3(1) of Regulation (EC) No 1085/2006.

This appropriation is intended to cover commitments remaining to be settled from the 2007-2013 programming period for technical assistance measures as provided for in Articles 45 and 46 of Regulation (EC) No 1083/2006 and in Article 9 of Regulation (EC) No 1081/2006.

Technical assistance covers preparatory, monitoring, evaluation, supervision and management measures required for implementation of the ESF. This appropriation may, in particular, be used to cover:

— support expenditure (representation expenses, training, meetings and missions),

— information and publishing expenditure,

— expenditure on information technology and telecommunications,

— expenditure on support for accessibility for people with disabilities within technical assistance measures,

— expenditure on a high-level group to ensure the implementation of overarching principles such as equality between men and women, accessibility for people with disabilities and sustainable development,

— contracts for the provision of services and studies,

— grants.

This appropriation is also intended to support measures approved by the Commission in the context of the preparation of the 2014-2020 programming period.

Remarks

This appropriation is intended to cover ESF support under the Investment for growth and jobs goal in less developed regions in the 2014-2020 programming period. The catching-up process for these economically and socially lagging regions requires long-term sustained efforts. This category of regions concerns those regions whose GDP per capita is less than 75 % of the average GDP of the EU-27.

Promotion of equality between women and men horizontally and through specific actions should be part of the support provided by the ESF, in order to improve the employability of women and their participation in the labour market. Special attention should be paid to non-discrimination in the labour market, combating the feminisation of poverty, access to education and affordable childcare services.

Remarks

This appropriation is intended to cover ESF support under the Investment for growth and jobs goal in the 2014-2020 programming period in a new category of region ('transition regions') that replaces the 2007-2013 phasing-out and phasing-in system. This category of regions includes all regions with a GDP per capita is between 75 and 90 % of the average GDP of the EU-27.

Remarks

This appropriation is intended to cover ESF support under the Investment for growth and jobs goal in more developed regions in the 2014-2020 programming period. While interventions in the less developed regions will remain the priority for cohesion policy, this appropriation is thus intended to cover important challenges that concern all Member States such as global competition in the knowledge-based economy, the shift towards the low carbon economy and social polarisation exacerbated by the current economic climate. This category of regions concerns those regions whose GDP per capita is above 90 % of the average GDP of the EU-27.

Gender mainstreaming and gender equality specific actions should be part of the support provided by the ESF, in order to improve the employability of women and their participation in the labour market. Remarks

This appropriation is intended to provide additional support to measures against youth unemployment financed by the ESF. It represents the specific allocation to the Youth Employment Initiative under the Investment for growth and jobs goal in regions with a level of youth unemployment exceeding 25 % in 2012 or for Member States where the youth unemployment rate has increased by more than 30 % in 2012, regions that have a youth unemployment rate of more than 20 % in 2012 ('eligible regions'). The additional EUR 3 000 000 000 allocated to this line for the 2014-2020 period is intended to provide match funding to ESF interventions in the eligible regions. This appropriation is intended to finance the creation of decent jobs.

While promoting gender equality, special attention should be paid to the situation of young women who can face gender-specific obstacles to get a good quality offer of employment, continued education, an apprenticeship or a traineeship.

This appropriation is to be used, amongst others, to support the establishment of educational structures combining non-formal education, language courses, democratic awareness and vocational training in the regions most affected by youth unemployment, both by state-actors and non-governmental organisations.

The margins available below the multiannual financial framework (MFF) ceilings for commitment appropriations for 2014-2017 will constitute a global MFF margin for commitments, to be made available over and above the ceilings established in the MFF for 2016-2020 for policy objectives related to growth and employment, in particular youth employment, as established in Council Regulation (EU, Euratom) No 1311/2013 of 2 December 2013 laying down the multiannual financial framework for the years 2014-2020 (OJ L 347, 20.12.2013, p. 884).

Remarks

This appropriation is intended to cover expenditure on preliminary consultation meetings between European trade union representatives with a view to helping them form their opinions and harmonise their positions regarding the development of Union policies.

This appropriation is also intended to cover the cost of studies, workshops, conferences, analyses, evaluations, publications, technical assistance, the purchase and maintenance of databases and software and the part-financing and support of measures relating to economic monitoring, analysis of the combination of measures and coordination of economic policies.

Legal basis

Task resulting from the Commission's prerogatives at institutional level, as provided for in Article 54(2) of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1).

Remarks

The objective of this activity is to promote geographic and professional mobility (including the coordination of social security schemes) of workers in Europe in order to overcome the obstacles to free movement of workers and to contribute to the establishment of a real labour market at European level. It can also be used to support the integration of regular migrant workers, including those from third countries, into European labour markets. Special attention should be paid to analysis with a view to removing the gender-specific barriers to professional mobility and gender-specific risks.

This appropriation is intended to cover actions supporting the monitoring of Union law through financing of a network of experts on free movement of workers and social security reporting regularly on the implementation of Union legal acts in the Member States and at Union level, and analysing and evaluating the major trends in legislation of the Member States with regard to the free movement of workers and coordination of social security systems. This appropriation is also intended to cover actions supporting governance of Union legal acts through meetings of the committees, actions for awareness raising and implementation and other specific technical support and the development of Electronic Exchange of Social Security Information (EESSI) system and its implementation.

This appropriation is intended to cover in particular:

— expenditure on studies, meetings of experts, information and publications directly linked to the achievement of the objectives of the programme or measures falling under this item, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts,

— the analysis and evaluation of the major trends in legislation of the Member States with regard to the free movement of workers, and coordination of social security systems, as well as the financing of networks of experts in those fields,

— the analysis and research on new policy developments in the domain of free movement of workers linked for example to the end of transitional periods and modernisation of social security coordination provisions,

— ensuring fair mobility by setting up additional information centres,

— support for the work of the Administrative Commission and its sub-groups and follow-up of the decisions taken, as well as support for the work of the Technical and Advisory Committees on free movement of workers,

— support for actions preparing for the application of the new regulations on social security, including transnational exchanges of experience and information and training initiatives developed at national level,

— the financing of actions aimed at providing a better service and raising public awareness, including measures aimed at identifying migrant workers' social security and employment problems, including the situation of people in precarious employment and women domestic workers and carers, and measures speeding up and simplifying administrative procedures, gender-sensitive analysis of the barriers to free movement of workers and lack of coordination of social security systems and their impact on people with disabilities, including adaptation of administrative procedures to new information-processing techniques, in order to improve the system for acquiring rights and the calculation and payment of benefits pursuant to Regulations (EEC) No 1408/71, (EEC) No 574/72, Regulation (EC) No 859/2003 as well as Regulation (EC) No 883/2004, its implementing Regulation (EC) No 987/2009, and Regulation (EU) No 1231/2010,

— the development of information and actions to make members of the public aware of their rights on free movement of workers and coordination of social security schemes,

— the support of the electronic exchange of social security information among Member States, with a view to facilitating the implementation of Regulation (EC) No 883/2004 and its implementing Regulation (EC) No 987/2009. This includes the maintenance of the central node of the EESSI system, testing system components, helpdesk activities, support for further development of the system and training.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Remarks

The objective of this activity is to promote better policy responses in the Member States to demographic and social challenges by producing and disseminating comparative information in the context of the implementation of the Europe 2020 strategy and the identification of future priorities for social policies, including gender-specific measures.

This appropriation is intended to cover actions promoting the development of comparative analysis and the exchange of views and experience at all relevant levels (regional, national, Union, international) regarding the social and demographic situation and the socio-economic trends in the Union, as well as the gender pay gap and discrimination against women in the workplace. This appropriation is also intended to cover actions supporting an Observatory of the Social Situation, the cooperation with relevant activities in Member States and with international organisations and the management of a technical support group for the European Alliance for Families.

This appropriation is intended to cover in particular expenditure on studies, meetings of experts, information and publications directly linked to the achievement of the objectives of the programme or measures falling under this item, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts.

This appropriation is intended to cover in particular expenditure on Commission reports (including an annual report on the social situation and a report on demographic change and its implications every 2 years, in accordance with Article 159 of the Treaty on the Functioning of the European Union (TFEU), as well as Commission reports on problems concerning the social situation (which can be requested by the European Parliament pursuant to Article 161 TFEU).

This appropriation is also intended to cover expenditure on analysis for the reporting referred to in TFEU, as well as for the dissemination of knowledge on major social and demographic challenges and ways of tackling them. In particular, the following activities can be pursued with due consideration of the gender aspect:

— analysis of the impact of population ageing in the context of a society for all ages, in terms of trends in care and social protection needs, behaviour and flanking policies, including research on elderly minorities or migrants and the situation of informal carers,

— analysis of the impact of demographic change on Union and Member State policies, measures and programmes, and formulation of recommendations for adjustments to economic and other policies, measures and programmes at Union and national levels in order to prevent the ageing of society from having a negative impact,

— analysis of the links between family units and demographic trends,

— analysis of trends in poverty, income and wealth distribution and their broader societal impact,

Remarks

The European Year for Active Ageing and Solidarity between Generations was intended to raise general awareness of the value of active ageing, to stimulate debate, to exchange information and to develop mutual learning between Member States and stakeholders at all levels, to offer a framework for commitment and concrete action to enable the Union, Member States and stakeholders at all levels to develop innovative solutions, policies and long-term strategies through specific activities and to pursue specific objectives relating to active ageing and intergenerational solidarity, and to promote activities which will help to combat age discrimination.

This appropriation was intended to cover at Union-level activities in line with the European Year's for Active Ageing and Solidarity between Generations objectives and to cover the costs relating to the organisation of the closing Union conference by the incumbent Presidency. Part of this appropriation was also intended to cover the costs relating to the evaluation of the European Year for Active Ageing and Solidarity between Generations.

Remarks

The general objective of the European Union Programme for Employment and Social Innovation (EaSI) is to contribute to the Europe 2020 strategy and the related headline targets for employment, education and poverty by providing financial support for the Union's objectives.

To achieve the general objectives of EaSI in terms of promoting a high level of employment, guaranteeing adequate social protection, combating social exclusion and poverty, improving working conditions and protecting workers' safety and health, the specific objectives of the Progress axis are to:

CHAPTER 04 03 — EMPLOYMENT, SOCIAL AFFAIRS AND INCLUSION *(cont'd)*

04 03 02 *(cont'd)*

04 03 02 01 *(cont'd)*

— develop and disseminate high-quality comparative analytical knowledge in order to ensure that Union employment and social policy and working conditions and occupational health and safety legislation are based on sound evidence and are relevant to needs, challenges and conditions in the individual Member States and the other participating countries,

— facilitate effective and inclusive information-sharing, mutual learning and dialogue on Union employment and social policy and working conditions and occupational health and safety legislation at Union, national and international level in order to assist the Member States and the other participating countries in developing their policies and in implementing Union law,

— provide policymakers with financial support to promote social and labour market policy reforms, build up the main actors' capacity to design and implement social experimentation, and make the relevant knowledge and expertise accessible,

— provide Union and national organisations with financial support to develop, promote and support the implementation of Union employment and social policy and working conditions and occupational health and safety legislation,

— raising awareness, exchanging good practice, disseminating information and promoting the debate on the key challenges and policy issues in relation to working conditions, gender equality, occupational health and safety and the reconciliation of work and family life and the ageing society, including among social partners,

— to encourage job creation, promote youth employment and fight poverty by promoting increased social convergence by means of Social Mark.

In addition support could be provided to actions related to the implementation of the common provisions of EaSI such as monitoring, evaluation, dissemination of results and communication. Article 16 of Regulation (EU) No 1296/2013 describes the types of actions which may be financed.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to provision of additional appropriations in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation.

Remarks

The general objective of the European Union Programme for Employment and Social Innovation (EaSI) is to contribute to the Europe 2020 strategy and the related headline targets for employment, education and poverty by providing financial support for the Union's objectives.

The EaSI is structured around three complementarity axes: Progress, EURES and Microfinance and Social Entrepreneurship.

To achieve the general objectives of EaSI in particular to promote workers' geographical mobility and boost employment opportunities by developing Union labour markets that are open and accessible to all, the specific objectives of the EURES axis are to:

— ensure that job vacancies and applications, and any related information as well as working conditions and rights are transparent for the potential applicants and the employers; this shall be achieved through their exchange and dissemination at transnational, interregional and cross-border level using standard interoperability forms,

— help ensure that European-level job vacancies and mobility options are advertised in parallel to national job vacancies and applications and not only after local or national options are exhausted,

— develop services for the recruitment and placing of workers in employment through the clearance of job vacancies and applications at European level; this shall cover all phases of placement, ranging from pre-recruitment preparation to post-placement assistance, including language skill development options, with a view to the applicant's successful integration into the labour market; such services shall include targeted mobility schemes to fill job vacancies where labour market shortcomings have been identified and/or help particular groups of workers such as young people,

CHAPTER 04 03 — EMPLOYMENT, SOCIAL AFFAIRS AND INCLUSION *(cont'd)*

04 03 02 *(cont'd)*

04 03 02 02 *(cont'd)*

— provide assistance for national and cross-border support activities organised by EURES partners,

— initial and further training of EURES advisers in the Member States,

— contacts between EURES advisers and cooperation between government employment services, including those of candidate countries,

— promotion of EURES among firms and the general public,

— development of special structures for cooperation and services in border regions pursuant to point (b) of Article 17(1) of Regulation (EEC) No 1612/68,

— measures to help remove mobility obstacles, particularly in the field of work-related social security.

This programme should also facilitate the matching and placement of apprentices and trainees as a critical element in helping the transition of young people from school to work, as already begun under the preparatory action 'Your first EURES job' and complemented by the Youth Employment Initiative. Companies, particularly small and medium-sized enterprises (SMEs), will be encouraged to recruit more young people, including by financial support.

Target groups:

— young people up to 30 years of age, regardless of their qualifications and work experience as the scheme is not exclusively tailored for labour market entrants,

— all legally established businesses, particularly SMEs, to assist with reducing the costs of international hiring that affect mostly smaller companies.

Eligible jobs under this part of the programme will offer young people apprenticeships, a first work experience or specialised jobs. The scheme will not support situations of job substitution or precarious employment, or in any circumstances be contrary to national labour law.

To be eligible for funding, jobs have also to comply with the following criteria:

— be located in a EURES member country other than the country of origin of the young job seeker (transnational vacancies),

— ensure a work placement for a minimum contractual period of 6 months.

Remarks

The general objective of the European Union Programme for Employment and Social Innovation (EaSI) is to contribute to the Europe 2020 strategy and the related headline targets for employment, education and poverty by providing financial support for the Union's objectives.

The EaSI is structured around three complementarity axes: Progress, EURES and Microfinance and Social Entrepreneurship.

To achieve the general objectives of EaSI in particular to promote employment and social inclusion by increasing the availability and accessibility of microfinance for vulnerable groups and micro-enterprises, and by increasing access to finance for social enterprises, the specific objectives of the Microfinance and Social Entrepreneurship axis are to:

— increase access to, and the availability of, microfinance for persons who have lost or are at risk of losing their jobs, or who have difficulty in entering or re-entering the labour market, persons at risk of social exclusion and vulnerable persons, including women wishing to start entrepreneurial careers, who are in a disadvantaged position with regard to access to the conventional credit market and who wish to start up or develop their own micro-enterprises; and for micro-enterprises, especially those which employ these persons as referred to,

— build up the institutional capacity of microcredit providers,

— support the development of social enterprises.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to provision of additional appropriations in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation.

Any repayment from financial instruments pursuant to Article 140(6) of the Financial Regulation, including capital repayments, guarantees released, and repayment of the principal of loans, paid back to the Commission and entered in Item 6 3 4 1 of the statement of revenues may give rise to the provision of additional appropriations in accordance with point (i) of Article 21(3) of the Financial Regulation.

Remarks

This appropriation is intended to cover the European Foundation for the Improvement of Living and Working Conditions (Eurofound) staff and administrative expenditure (Titles 1 and 2), and operational expenditure for the work programme (Title 3).

Eurofound must inform the European Parliament and the Council about transfers of appropriations between operational and administrative expenditure.

The Union contribution for 2017 amounts to a total of EUR 20 371 000. An amount of EUR 7 000 coming from the recovery of surplus is added to the amount of EUR 20 364 000 entered in the budget.

Part of this appropriation is intended for studies on working conditions and industrial relations in support of policies ensuring more and better jobs, making work more sustainable and strengthening social dialogue in Europe.

A further part of this appropriation is intended for studies and forward looking research on labour markets, and specifically the monitoring and anticipation of structural change, its impact on employment and management of the consequences.

The appropriation will also cover research and gathering of knowledge on living conditions and quality of life, with a particular focus on social policies and the role of public services in improving quality of life. Research into work-life balance, with a special focus on the situation of women, and combating precarious employment, where women are over-represented, should be also covered by the appropriation.

This appropriation is intended to cover the measures necessary to accomplish the Agency's tasks as defined in Regulation (EC) No 2062/94, and in particular:

— awareness-building and risk anticipation measures, with special emphasis on SMEs,

— operation of the European Risk Observatory based on examples of good practice collected from firms or specific branches of activity,

— preparation and provision of relevant tools for smaller companies to manage health and safety at work,

— operation of the network comprising the main component elements of the national information networks, including the national social partner's organisations, according to national legislation and/or practice, as well as the national focal points,

— also in collaboration with the International Labour Organization and other international organisations, organising exchanges of experience, information and good practices,

— integrating the candidate countries into these information networks and devising working tools which are geared to their specific situation,

— organising and running the European Campaign on Healthy Workplaces as well as the European Week on Health and Safety, focusing on specific risks and needs of users and final beneficiaries.

The Agency's establishment plan is set out in Annex 'Staff' to this section.

Legal basis

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

The aim of this preparatory action is to: strengthen the capacity of national minimum income networks to develop a strategy to act on the recommendations that have emerged from the pilot project as well as links with the Europe 2020 strategy by following up on the implementation of the relevant country-specific recommendations; further develop awareness raising in connection with minimum income schemes, focusing on coverage, adequacy and take-up; engage Union-level actors in further dialogue on minimum income schemes; and promote the common methodology for reference budgets (under preparation as part of another pilot project, 'Reference Budget Network') at local, national and Union level to ensure that minimum income support is adequate.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

This preparatory action will contribute to overall Union policy for combating poverty and social exclusion, especially among disadvantaged groups such as migrants. In particular, it will tie in with the Commission communications entitled 'European Platform against Poverty and Social Exclusion: A European framework for territorial and social cohesion' (COM(2010) 758 final) and 'Towards Social Investments for Growth and Cohesion — including implementing the European Social Fund 2014-2020' (COM(2013) 83 final) as well as with Regulation (EU) No 1304/2013 of the European Parliament and of the Council of 17 December 2013 on the European Social Fund and repealing Council Regulation (EC) No 1081/2006 (OJ L 347, 20.12.2013, p. 470).

Objective

This preparatory action will contribute to the welfare and full social and economic integration of migrants in Europe (both European nationals and third country nationals), especially those in extremely difficult social and economic situations (unemployment, habitual exclusion, health problems, addictions and other forms of marginalisation) through development and testing of pilot integration centres in member states with different welfare systems and labour market configurations. Those centres will form part of the European Platform against Poverty and Social Exclusion and will strengthen migrants' skills and capacities and empower them to participate fully in employment and social life by providing an integrated package of activities and services.

Actions/measures to be funded

The measures covered will include:

— creation of pilot social integration centres, which will:

  — be established in urban and rural areas with severe integration problems in selected Member States, in partnership with local social, public and economic stakeholders,

— run workshops and full-time vocational training schemes, job coaching schemes and apprenticeships that meet local community needs in areas such as care services, green area upkeep services, professional cleaning services and building construction services,

— serve as one-stop-shops for marginalised migrants looking for assistance with all legal and community-related issues (social assistance, job advice, financial incentives),

— create favourable environments and local partnerships for the development of social entrepreneurship.

The pilot centres will assist with trial arrangements for the future creation of local centres for social and economic integration in all Members States as part of the European Platform against Poverty and Social Exclusion. The aim of local centres will be twofold: (1) to activate and empower migrants in order to improve their chances of re-entry into the mainstream economy and full integration in the host communities and society; (2) to assist local authorities, social partners and civil society organisations in removing barriers, supporting mobility and fostering social and economic inclusion of marginalised migrants.

Despite public perceptions, labour mobility is low in the Union. High unemployment and low labour mobility within and between countries coexist with skill and labour shortages in some countries and regions. Well-performing labour markets are important for facilitating adjustment to shocks, allocating resources to best effect and dealing with potential ageing-related labour market shortages. Mobility within the Union can, in principle, help to remedy labour market shortages and imbalances. The over-35 age group also faces higher mobility barriers, and it is therefore important to put financial and/or other support specifically designed for this group to the test.

Reactivate is a mobility programme for adult traineeships and work trials lasting between 6 and 12 months in other Member States. It is targeted at unemployed citizens in the 35+ age group, including the long-term unemployed (LTU). This age group generally represents a population segment with strong skills based on work experience, whence the need for this programme.

In the light of the number of LTUs, Reactivate will test support tailor-made for them. In order to encourage employers to make job offers to unemployed persons from other Member States, Reactivate will test ways of engaging with employers and forms of financial and/or other support for employers.

Reactivate is intended as an extension of the successful EURES First Job programme, offering similar advantages for unemployed persons, in particular LTUs, over the age of 35. This project can build on EURES First Job as a sound mobility platform.

Reactivate will give unemployed persons, including LTUs, in this age group an unprecedented opportunity to acquire diversified knowledge and skills, to learn new languages, and to better understand the European internal market. All these advantages greatly militate in favour of a stronger European identity and diversity while increasing labour mobility and the employment rate.

Remarks

Inequalities are considered to be a cause of macroeconomic destabilisation and to reduce growth. Therefore European and national action to correct inequalities affecting children can be seen as a long-term policy for macroeconomic stabilisation and growth. Opening up opportunities can spur stronger economic performance and improve living standards.

Fighting poverty and social exclusion is one of the EU 2020 targets: to reduce by at least 20 million the number of people in or at risk of poverty and social exclusion. However, between 2008 and 2014, the number of people at risk of poverty or social exclusion in the EU-27 increased from 116 million to 121 million; almost every fourth person in the EU-27 is at risk of poverty or social exclusion. Amongst this group, child poverty is alarming. In 2014, more than 26 million children in the Union were at risk of poverty and more than nine million suffered from severe material deprivation. If no measures are taken to correct this situation, they will be at greater risk of failing in the education system (EU 2020 target for education) and will have the most difficulties in entering the labour market (EU 2020 target for employment). The child guarantee is an integrated approach to tackling child poverty, aiming at fully implementing the Commission's 'Investing in Children' recommendation, to ensure that every child in Europe at risk of poverty (including refugees) has access to free health care, free education, free childcare, decent housing and adequate nutrition. Covering these five areas of action through European and national action plans would ensure that the living conditions and opportunities of millions of children in Europe improve considerably and with a long-term perspective. The child guarantee is a key horizontal policy and should be regarded as an investment in the stability and prosperity of the Union, which is necessary for preserving the Union's growth potential.

To make the child guarantee a successful instrument in the fight against child poverty, Union financial support should be put in place to ensure a coordinated effort together with Member States towards common goals with binding indicators. The preparatory action will lay down the implementing framework for the child guarantee:

(1) selecting comparative measurable criteria to assign funds in accordance with the Commission's 'Investing in Children' recommendation;

(2) assessing existing national and Union interventions tackling multi-dimensional aspects of child poverty and mapping best practices;

(3) delineating the typology of programmes to be funded;

(4) establishing funding arrangements; and

(5) establishing governance mechanisms, including monitoring and evaluation.

This will be achieved through independent research work, consultations with partners (e.g. governmental institutions, NGOs, academia, the private sector and the European Network of Ombudspersons for Children) and technical workshops.

Remarks

This appropriation is intended to cover the EGF so as to enable the Union to demonstrate solidarity towards, and to support workers made redundant and self-employed persons whose activity has ceased as a result of major structural changes in world patterns due to globalisation, as a result of the continuation of the global financial and economic crisis addressed in Regulation (EC) No 546/2009 of the European Parliament and of the Council of 18 June 2009 amending Regulation (EC) No 1927/2006 on establishing the European Globalisation Adjustment Fund (OJ L 167, 29.6.2009, p. 26), or as a result of a new global financial and economic crisis and to provide financial support for their rapid reintegration into sustainable employment.

The actions undertaken by the EGF should be complementary to those of the European Social Fund and there must be no double funding from these instruments. EGF-supported actions or measures should aim to ensure that the largest possible number of beneficiaries participating in these actions find sustainable employment as soon as possible before the final report is due.

The rules for entering the appropriations in this reserve and for mobilising the EGF are laid down in point 13 of the Interinstitutional Agreement of 2 December 2013 between the European Parliament, the Council and the Commission on budgetary discipline, on cooperation in budgetary matters and on sound financial management (OJ C 373, 20.12.2013, p. 1).

Remarks

This appropriation is intended to cover the EGF so as to enable the Union to provide time-limited and targeted support for workers made redundant as a result of major structural changes in world trade patterns due to globalisation where these redundancies have a significant adverse impact on the regional or local economy. It is applicable to all applications submitted up to 31 December 2013. For applications submitted between 1 May 2009 and 31 December 2011, it may also be used to provide support to workers made redundant as a direct result of the global financial and economic crisis.

The actions undertaken by the EGF should be complementary to those of the European Social Fund. There must be no double funding from these instruments.

The rules for entering the appropriations in this reserve and for mobilising the EGF are laid down in point 13 of the Interinstitutional Agreement of 2 December 2013 between the European Parliament, the Council and the Commission on budgetary discipline, on cooperation in budgetary matters and on sound financial management (OJ C 373, 20.12.2013, p. 1).

Remarks

Under the Instrument for Pre-accession Assistance (IPA II), this appropriation will address the following specific objectives in Turkey:

— support for political reforms,

— strengthening of the ability of the beneficiaries listed in Annex I to Regulation (EU) No 231/2014 at all levels to fulfil the obligations stemming from Union membership in the area of political reforms by supporting progressive alignment with and adoption, implementation and enforcement of the Union *acquis*.

Any income from financial contributions from Member States and third countries, including in both cases their public agencies, entities or natural persons to certain external aid projects or programmes financed by the Union and managed by the Commission on their behalf, may give rise to the provision of additional appropriations. Such contributions under Article 6 3 3 of the statement of revenue constitute assigned revenue under point (b) of Article 21(2) of the Financial Regulation. The amounts entered on the line for administrative support expenditure will be determined, without prejudice to Article 187(7) of the Financial Regulation, by the contribution agreement for each operational programme with an average not exceeding 4 % of the contributions for the corresponding programme for each chapter.

Remarks

Article 174 of the Treaty on the Functioning of the European Union sets out the Union's objective of economic, social and territorial cohesion while Article 175 specifies the role of the Structural Funds in achieving this objective and makes provisions for the adoption of specific actions outside the Structural Funds.

Article 80 of the Financial Regulation provides for financial corrections in the event of expenditure incurred in breach of applicable law.

Articles 56 and 57 of Regulation (EU) No 223/2014 on criteria for financial corrections by the Commission provide for specific rules on financial corrections applicable to the Fund for European Aid to the Most Deprived (FEAD).

Any revenue from the financial corrections carried out on that basis is entered in Item 6 5 0 0 of the statement of revenue and constitutes assigned revenue in accordance with point (c) of Article 21(3) of the Financial Regulation.

Article 177 of the Financial Regulation lays down the conditions for the repayment in full, or in part, of pre-financing payments in respect of a given operation.

Article 44 of Regulation (EU) No 223/2014 provides for specific rules on repayment of pre-financing applicable to the FEAD.

Pre-financing amounts repaid shall constitute internal assigned revenue in accordance with Article 21(4) of the Financial Regulation and shall be entered in Item 6 1 5 0 or 6 1 5 7.

Article 19 of Regulation (EU, Euratom) No 1311/2013 lays down the conditions for the revision of the multiannual financial framework in order to transfer to subsequent years, in excess of the corresponding expenditure ceilings, allocations not used in 2014, in the event of the adoption after 1 January 2014 of new rules or programmes.

Legal basis

Treaty on the Functioning of the European Union, and in particular Articles 174 and 175 thereof.

CHAPTER 04 06 — FUND FOR EUROPEAN AID TO THE MOST DEPRIVED *(cont'd)*

Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1) and in particular Articles 21(3)(4), 80 and 177 thereof.

Council Regulation (EU, Euratom) No 1311/2013 of 2 December 2013 laying down the multiannual financial framework for the years 2014-2020 (OJ L 347, 20.12.2013, p. 884).

Regulation (EU) No 1303/2013 of the European Parliament and of the Council of 17 December 2013 laying down common provisions on the European Regional Development Fund, the European Social Fund, the Cohesion Fund, the European Agricultural Fund for Rural Development and the European Maritime and Fisheries Fund and laying down general provisions on the European Regional Development Fund, the European Social Fund, the Cohesion Fund and the European Maritime and Fisheries Fund and repealing Council Regulation (EC) No 1083/2006 (OJ L 347, 20.12.2013, p. 320).

Remarks

The Fund for European Aid to the Most Deprived (FEAD) replaces the European Union's Food Distribution Programme for the Most Deprived Persons of the Community, which was discontinued at the end of 2013.

To ensure continuity between the two programmes, expenditure shall be eligible for a support from a FEAD operational programme if it is incurred by a beneficiary and paid between 1 December 2013 and 31 December 2023.

FEAD shall promote social cohesion, enhance social inclusion and therefore ultimately contribute to the objective of eradicating poverty in the Union by contributing to achieving the poverty reduction target of at least 20 million of the number of persons at risk of poverty and social exclusion in accordance with the Europe 2020 strategy, whilst complementing the Structural Funds. Since the proportion of women at risk of poverty or social exclusion is higher than is the case for men, FEAD will take a gender-sensitive approach by adapting measures to the groups actually at risk, including women and the elderly. It shall contribute to achieving the specific objective of alleviating and eradicating the worst forms of poverty, by providing non-financial assistance to the most deprived persons by food and/or basic material assistance, and social inclusion activities aiming at the social integration of the most deprived persons.

CHAPTER 04 06 — FUND FOR EUROPEAN AID TO THE MOST DEPRIVED *(cont'd)*

04 06 01 *(cont'd)*

This objective and the results of the implementation of the Fund shall be qualitatively and quantitatively assessed.

FEAD shall complement and shall not replace or reduce sustainable national poverty eradication and social inclusion policies, which remain the responsibility of Member States.

The resources for the Fund available for budgetary commitment for the 2014-2020 period shall be EUR 3 395 684 880 in 2011 prices.

Poverty is a multidimensional problem and tackling it should become a primary goal. Greater emphasis needs to be placed on poverty in all strategies, as poverty is a complex problem with many causes. Most importantly, it also has a great impact not only on the present but also on the future. People who experience poverty, especially children, are at greater risk of not succeeding in later life and of being excluded from society.

Legal basis

Regulation (EU) No 1303/2013 of the European Parliament and of the Council of 17 December 2013 laying down common provisions on the European Regional Development Fund, the European Social Fund, the Cohesion Fund, the European Agricultural Fund for Rural Development and the European Maritime and Fisheries Fund and laying down general provisions on the European Regional Development Fund, the European Social Fund, the Cohesion Fund and the European Maritime and Fisheries Fund and repealing Council Regulation (EC) No 1083/2006 (OJ L 347, 20.12.2013, p. 320).

CHAPTER 05 02 — IMPROVING THE COMPETITIVENESS OF THE AGRICULTURAL SECTOR THROUGH INTERVENTIONS IN AGRICULTURAL MARKETS *(cont'd)*

Remarks

Any revenue entered in Article 6 7 0 of the general statement of revenue may give rise to the provision of additional appropriations on any line in this chapter in accordance with Articles 21 and 174 of the Financial Regulation.

In the framework of establishing the budgetary appropriations for this chapter, an amount of EUR 400 000 000 originating from Item 6 7 0 1 of the general statement of revenue was taken into account for Article 05 02 08, and in particular for Item 05 02 08 03.

The following legal basis applies to all articles and items of this chapter unless otherwise stated.

Legal basis

Council Regulation (EC) No 1234/2007 of 22 October 2007 establishing a common organisation of agricultural markets and on specific provisions for certain agricultural products (Single CMO Regulation) (OJ L 299, 16.11.2007, p. 1).

Regulation (EU) No 1306/2013 of the European Parliament and of the Council of 17 December 2013 on the financing, management and monitoring of the common agricultural policy and repealing Council Regulations (EEC) No 352/78, (EC) No 165/94, (EC) No 2799/98, (EC) No 814/2000, (EC) No 1290/2005 and (EC) No 485/2008 (OJ L 347, 20.12.2013, p. 549).

Regulation (EU) No 1308/2013 of the European Parliament and of the Council of 17 December 2013 establishing a common organisation of the markets in agricultural products and repealing Council Regulations (EEC) No 922/72, (EEC) No 234/79, (EC) No 1037/2001 and (EC) No 1234/2007 (OJ L 347, 20.12.2013, p. 671).

Council Regulation (EU) No 1370/2013 of 16 December 2013 determining measures on fixing certain aids and refunds related to the common organisation of the markets in agricultural products (OJ L 346, 20.12.2013, p. 12).

Remarks

This article does not include any fresh appropriations but is intended to accommodate the amounts that may be carried over in accordance with Article 169(3) of the Financial Regulation for reimbursement of the reduction of direct payments due to the application of financial discipline in the previous year. In accordance with Article 26(5) of Regulation (EU) No 1306/2013, Member States shall reimburse the final recipients who are subject, in the financial year to which the appropriations are carried over, to the application of financial discipline in accordance with Article 26(1) to (4) thereof.

Remarks

The appropriations of this reserve article are intended to cover expenditure for measures needed to cope with major crises affecting agricultural production or distribution.

The reserve is to be established by applying at the beginning of each year a reduction to direct payments (Chapter 05 03) with the financial discipline mechanisms in accordance with Articles 25 and 26 of Regulation (EU) No 1306/2013 as well as Article 8 of Regulation (EU) No 1307/2013. When the Commission considers the reserve needs to be called on, in accordance with the relevant legislative act, it shall present to the European Parliament and the Council a proposal for a transfer from the reserve to the corresponding budget lines financing the measure deemed necessary. Any Commission proposal for a transfer to draw on the reserve must be preceded by an examination of the scope for reallocating appropriations. By the end of the financial year, any amount of the reserve not made available for crisis measures shall be reimbursed to the final recipients of direct payments according to the provisions of Article 26 (5) of Regulation (EU) No 1306/2013. Any reimbursement will be done under Article 05 03 09 from appropriations carried over from the previous financial year.

Transfers calling on the reserve and transfer back from the reserve to direct payments shall be made in accordance with the Financial Regulation.

CHAPTER 05 04 — RURAL DEVELOPMENT *(cont'd)*

05 04 51 *(cont'd)*

This appropriation is intended to cover outstanding payments against commitments under the EAGGF Guidance Section for programming periods prior to 2000 related to the former objectives 1, 6, 5a, 5b and the Community initiatives.

This appropriation is also intended to cover the settlement of commitments entered into, in the course of earlier programming periods, in respect of innovative, preparatory, monitoring or evaluation measures, and any similar technical assistance measures provided for in the regulations concerned.

It also funds amounts outstanding from former multiannual measures, in particular those approved and implemented under the other regulations, mentioned below, which are not covered by the priority objectives of the Funds.

This appropriation will where applicable also be used to cover amounts payable in respect of the EAGGF Guidance Section for measures for which the corresponding commitment appropriations are neither available nor provided for in the programming for 2000 to 2006.

Article 39 of Regulation (EC) No 1260/1999 provides for financial corrections for which any revenue is entered in Item 6500 of the statement of revenue. That revenue may give rise to the provision of additional appropriations, in accordance with Articles 21 and 177 of the Financial Regulation, in specific instances where they are necessary to cover risks of cancellation or of reductions in corrections previously decided upon.

Remarks

Under the Instrument for Pre-accession Assistance (IPA II), this appropriation will address the following specific objectives in the Western Balkans:

— support for political reforms,

— strengthening of the ability of the beneficiaries listed in Annex I to Regulation (EU) No 231/2014 at all levels to fulfil the obligations stemming from Union membership in the area of political reforms by supporting progressive alignment with and adoption, implementation and enforcement of the Union *acquis*.

Any income from financial contributions from Member States and third countries, including in both cases their public agencies, entities or natural persons to certain external aid projects or programmes financed by the Union and managed by the Commission on their behalf, may give rise to the provision of additional appropriations. Such contributions under Article 6 3 3 of the statement of revenue constitute assigned revenue under point (b) of Article 21(2) of the Financial Regulation. The amounts entered on the line for administrative support expenditure will be determined, without prejudice to Article 187(7) of the Financial Regulation, by the contribution agreement for each operational programme with an average not exceeding 4 % of the contributions for the corresponding programme for each chapter.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

Rural depopulation presents common challenges across the Union and is particularly acute in Central and Eastern Europe. The smart eco-social village project develops models for a number of different types of 'smart village' in the Union, with a particular focus on the Visegrád group countries.

The project creates replicable, socially useful models, acts as an incentive by identifying successful practices, and provides support, using an ICT/online method.

The project focuses on developing growth and jobs in rural areas by:

— analysing common features of rural villages in the Union (with a particular focus on the Visegrád group countries): infrastructure, various resources, services, access to markets, Digital Single Market opportunities, urban-rural links, links to the bioeconomy and the circular economy (innovation, precision farming, environmental management, local renewable energies, supply chain, services, local food), opportunities for improving quality of life and employment, with due regard for the importance of women and young people;

— identifying and documenting best practices and effective programmes in rural areas of the Union, analysing sustainable environmental and village management in line with the above features. The project uses regional case studies, filming, ICT and documentation and identifies best practices;

— assessing case studies involving local administration, academics, local communities, the private sector and NGOs in rural areas;

— developing a number of eco-socially oriented and replicable models for smart villages, and providing operational IT support.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

Regulation (EU) No 1308/2013 establishing a common organisation of the market in agricultural products provides horizontal and sectorial crisis prevention and management measures in agriculture.

However, the regulation does not define or specify what is meant by 'crisis situation'. It is therefore essential to set up a typology of crisis situations.

The pilot project establishes a list of parameters to clarify and simplify implementation of crisis prevention and management measures in agriculture.

It also assesses the feasibility of setting up 'market watchers/observatories' whose role is to provide a basis for coping better with crisis situations and market volatility by providing early warning of the need to take counter-measures.

The main objective is to clarify the criteria for the activation of the instruments available to European farmers to cope with exposure to both natural disasters and market fluctuations, which have gradually become more common over the last few years.

Europe must give itself the wherewithal to manage crises in the agricultural sector more effectively.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

The disappearance of bees has an impact throughout the Union, causing a fall-off in pollination and posing a threat to biodiversity and public health. The Union must be able to tackle this problem by developing a genuine economic strategy from production to consumption, focusing on the entire honey production chain. Under national apiculture programmes, and measures such as technical assistance for beekeepers and beekeeper organisations and restocking of hives, applied research can be co-funded by the Union.

This pilot project combines the various Union strategies on innovation, social inclusion and job creation in order to establish linkage between them and a reoriented common agricultural policy and to support the gearing of agriculture more towards greater sustainability and practical research on breeding of a bee population that is resistant to Varroa in particular.

Methodology:

— implementation of a series of complementary and integrated actions, i.e. genetic selection (particularly Varroa resistance selection), breeding and conservation, training in apidology/sanitation (bee behaviour, veterinary and sanitary techniques);

— support for local swarms and queen reproduction/breeding farms;

— cooperation with relevant scientists and scientific institutes, in order to obtain maximum synergy (including with existing Union honey bee research programmes).

There is a great need for specific applied research, particularly on Varroa resistance selection, to save the honey bee, as well as for funding practical arrangements to give volunteers access to the results of fundamental research from apidology projects at Union-supported scientific institutes.

Know-how transfer and support for implementing this methodology and for relevant communication tools cannot be funded under any existing programme. A first European Apidology Training Centre would provide a basis for looking into the following issues: research, selection and conservation, repopulation and biodiversity.

Although the honeybee plays a very important role in agriculture, most beekeepers and breeders are volunteers. As regards pollination and honey production, there are professional beekeepers and small companies managing larger numbers of bee colonies. But these professionals often get their breeding material from breeding groups that are mainly organised by volunteers.

As a result, the beekeeping community has almost no budget for the application of findings from research into breeding Varroa-resistant bee lines through a Union-wide link-up between volunteers (beekeepers) and scientists. This pilot project seeks to bridge this practical gap in the FP7 programme SmartBees and national apiculture programmes.

As a consequence, the project focuses on a practical breeding programme with Varroa-resistant bee lines, targeted as deliverables, and is carried out in cooperation with major breeding groups and experienced bee-breeders located in a number of Member States. The methods used are based on established Varroa Sensitive Hygiene (VSH) trait and are coordinated, as far as the aspect of Varroa resistance breeding is concerned, by a dedicated organisation, thus anticipating efficient and effective Varroa-resistant bee line distribution. International cooperation with other applied research experts on Varroa resistance is considered to be of particular importance. The bee races of European honey bees — Carnica, Buckfast and Black Bee — are included in the project. After the project has been implemented for one year, an international workshop could be organised to present the results of the experiment.

The measurable value of this action is expected to be EUR 7 billion for the 2016-2020 period, i.e.:

— creation of 10 million hives in the Union, representing a business volume of over EUR 2 billion;

— purchase of equipment needed to keep a hive and produce honey, representing, for hive manufacturers and sellers, a business volume of more than EUR 3 billion;

— increase in honey production in the Union resulting from the creation of 10 million hives, replacing current annual imports (50% of demand) from third countries and representing a business volume of more than EUR 2 billion euros.

Stepping up pollination to the level required to sustain and expand agricultural production of the Union, with more and better products, will mean not only increased agricultural production, but also fewer subsides paid to farmers to offset productivity losses.

The creation of 30 000 jobs should in turn generate 30 000 associated jobs, making for a total of 60 000 jobs.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

This pilot project analyses:

— the incentives and disincentives for farmers to form and work together in producer organisations (POs);

— the governance arrangements, areas for cooperation and levels of concentration of supply which best allow POs to carry out their activities effectively and provide support to their members;

— the most effective financial and legal tools available under the common agricultural policy to support POs.

Remarks

This appropriation is intended to finance the participation of the Union at the universal Expo 'Feeding the Planet: Energy for Life', which was held in Milan in 2015.

The appropriations are intended to cover the baseline costs for the Union participation within the Italian Pavilion (rental of space, stand erection and decoration, running costs) as well as for the preparatory and initial stages of a basic scientific programme for the EXPO 2015 involving the compilation of baseline data for policy support purposes. The cost for organising events and exhibitions (e.g. reimbursement of expert costs, exhibition materials, etc.) will be covered by appropriations of the relevant specific programmes according to the policy area concerned.

Remarks

These remarks are applicable to all the budget lines in this chapter.

This appropriation will be used for the Horizon 2020 — the framework programme for research and innovation which covers the 2014 to 2020 period.

Horizon 2020 shall play a central role in the implementation of the Europe 2020 flagship initiative 'Innovation Union' and other flagship initiatives, notably 'Resource-efficient Europe', 'An industrial policy for the globalisation era', and 'A digital agenda for Europe', as well as in the development and functioning of the European Research Area (ERA). Horizon 2020 shall contribute to building an economy based on knowledge and innovation across the whole Union by leveraging sufficient additional research, development and innovation funding.

It will be carried out in order to pursue the general objectives set out in Article 179 of the Treaty on the Functioning of the European Union, in order to contribute to the creation of a society of knowledge, based on the European Research Area, i.e. supporting transnational cooperation at all levels throughout the Union, taking the dynamism, creativity and the excellence of European research to the limits of knowledge, strengthening human resources for research and for technology in Europe, quantitatively and qualitatively and research and innovation capacities in the whole of Europe and ensuring optimum use thereof.

CHAPTER 05 09 — HORIZON 2020 — RESEARCH AND INNOVATION RELATED TO AGRICULTURE *(cont'd)*

In Horizon 2020, gender equality is addressed as a cross-cutting issue in order to rectify imbalances between women and men and to integrate a gender dimension in research and innovation content. Particular account will be taken of the need to step up efforts to enhance the participation at all levels, including decision making, of women in research and innovation.

Also entered against these articles and items are the costs of high-level scientific and technological meetings, conferences, workshops and seminars of European interest organised by the Commission, the funding of high-level scientific and technological analyses and evaluations carried out on behalf of the Union to investigate new areas of research suitable for Union action, inter alia, in the context of the European Research Area, and measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

This appropriation will be used in accordance with Regulation (EU) No 1290/2013 of the European Parliament and of the Council of 11 December 2013 laying down the rules for participation and dissemination in 'Horizon 2020 — the framework programme for research and innovation (2014-2020)' and repealing Regulation (EC) No 1906/2006 (OJ L 347, 20.12.2013, p. 81).

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this chapter. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

The possibility of third countries or institutes from third countries taking part in European cooperation in the field of scientific and technical research is envisaged for some of these projects. Any financial contribution entered in Items 6 0 1 3 and 6 0 1 5 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Any revenue from States taking part in the European cooperation in the field of scientific and technical research entered in Item 6 0 1 6 of the of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Any revenue from the contributions from candidate countries and, if applicable, the western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation.

Any revenue from the contributions by outside bodies to Union activities entered in Item 6 0 3 3 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Administrative appropriations of this chapter will be provided under Article 05 01 05.

05 09 03 Societal challenges

Remarks

This priority of Horizon 2020 responds directly to the policy priorities and societal challenges identified in the Europe 2020 strategy. Those activities will be implemented using a challenge-based approach which brings together resources and knowledge across different fields, technologies and disciplines. The activities will cover the full cycle from research to market, with a new focus on innovation-related activities such as piloting, demonstration, test beds, support for public procurement, design, end-user driven innovation, social innovation and market take-up of innovations. The activities will support directly the corresponding sectoral policy competences at Union level.

Remarks

This activity focuses on developing more sustainable and productive agriculture and forestry systems, while at the same time developing services, concepts and policies for thriving rural livelihoods. In addition, emphasis is placed on healthy and safe foods for all as well as competitive food processing methods that use fewer resources and produce fewer by-products. In parallel, efforts are made on sustainably exploiting aquatic living resources (e.g. sustainable and environmentally friendly fisheries). Low carbon, resource-efficient, sustainable and competitive European bio-based industries are also promoted.

This appropriation will be used for agriculture-related research and innovation in order to secure sufficient supplies of safe and high-quality food and other bio-based products; research projects with direct participation by primary producers will be prioritised in order to maximise the practical applicability of results.

This appropriation is intended to cover the 'Programme support actions' (PSAs) defined in Article 2(7) and point (b) of Article 5(2) of Regulation (EU) No 1316/2013 of the European Parliament and of the Council of 11 December 2013 establishing the Connecting Europe Facility, amending Regulation (EU) No 913/2010 and repealing Regulations (EC) No 680/2007 and (EC) No 67/2010 (OJ L 348, 20.12.2013, p. 129), and directly related to the accompanying measures necessary for the implementation of the Connecting Europe Facility programme and trans-European transport network (TEN-T) guidelines. This includes expenditure on studies, meetings of experts, information and publications, software and databases supporting actions directly linked to the achievement of the objective of the Connecting Europe Facility.

Remarks

The objective of 'Removing bottlenecks and bridging missing links' refers to point (a) of Article 4(2) of Regulation (EU) No 1316/2013. This objective will be implemented through calls for proposals under the annual and multiannual work programmes constituting financing decisions within the meaning of Article 84 of the Financial Regulation, of the core network transport projects and Union transport corridors, which are defined in the annexes to CEF and TEN-T guidelines. The implementation of this objective is expected to be measured through new and improved cross-border connections and removed bottlenecks, which have benefitted from CEF.

Part of the appropriation will be used to support the Trans-European EuroVelo Cycling Network.

Remarks

The objective of 'Ensuring sustainable and efficient transport in the long run' refers to point (b) of Article 4(2) of Regulation (EU) No 1316/2013. This objective will be implemented through calls for proposals under the annual and multiannual work programmes constituting the financing decisions within the meaning of Article 84 of the Financial Regulation.

In the 2014-2020 period, a follow-up of the Marco Polo programme will be implemented by the Connecting Europe Facility within the framework of the revised TEN-T guidelines. In accordance with Article 32 of Regulation (EU) No 1315/2013 of the European Parliament and of the Council of 11 December 2013 on Union guidelines for the development of the trans-European transport network and repealing Decision No 661/2010/EU (OJ L 348, 20.12.2013, p. 1), it will introduce a new approach in support of freight transport services in the Union (indicative budget EUR 70-140 million per year). It is important to optimise the use of transport infrastructure by shifting cargo to more sustainable modes, including inland waterways, and increase the efficiency of multimodal services. Sustainable schemes for partial reimbursement of the cost of modal shift for trucks (eco-bonus) can also be supported.

Digital cargo pooling initiatives as well as shared mobility projects in rural and urban areas can be supported.

Remarks

The objective of 'Optimising the integration and interconnection of transport modes and enhancing the interoperability, safety and security of transport' refers to point (c) of Article 4(2) of Regulation (EU) No 1316/2013.

This objective will be implemented through calls for proposals under the annual and multiannual work programmes constituting financing decisions within the meaning of Article 84 of the Financial Regulation.

The achievement of this objective will be measured by the number of inland and maritime ports and airports connected to the railway network, by the number of improved multimodal logistics platforms, by the number of improved connections through motorways of the sea and by the number of supply points in alternative sources of energy on the core network.

The implementation of the Single European Sky policy and the deployment of Single European Sky Air Traffic Management Research (SESAR) are pursued under this objective.

Legal basis

Regulation (EU) No 1316/2013 of the European Parliament and of the Council of 11 December 2013 establishing the Connecting Europe Facility, amending Regulation (EU) No 913/2010 and repealing Regulations (EC) No 680/2007 and (EC) No 67/2010 (OJ L 348, 20.12.2013, p. 129), and in particular point (c) of Article 4(2) thereof.

Remarks

This appropriation is intended to cover the support from the Cohesion Fund under the 'Investment for growth and jobs' goal for transport infrastructure under CEF in accordance with Article 84(4) of Regulation (EU) No 1303/2013.

In accordance with point (a) of Article 5(1) of Regulation (EU) No 1316/2013, an amount of EUR 11 305 500 000 in current prices should be transferred from the Cohesion Fund to be spent in line with that Regulation exclusively in Member States eligible for funding from the Cohesion Fund.

In accordance with Article 11, this objective will be implemented through calls for proposals under the annual and multiannual work programmes, which are opened exclusively for the Member States eligible for financing under the Cohesion Fund. These annual and multiannual work programmes constitute financing decisions in the meaning of Article 84 of the Financial Regulation.

In accordance with Article 2(7) and Article 5(2), up to 1 % of the financial envelope will cover expenses pertaining to 'programme support actions'.

Legal basis

Regulation (EU) No 1303/2013 of the European Parliament and of the Council of 17 December 2013 laying down common provisions on the European Regional Development Fund, the European Social Fund, the Cohesion Fund, the European Agricultural Fund for Rural Development and the European Maritime and Fisheries Fund and laying down general provisions on the European Regional Development Fund, the European Social Fund, the Cohesion Fund and the European Maritime and Fisheries Fund and repealing Council Regulation (EC) No 1083/2006 (OJ L 347, 20.12.2013, p. 320).

Remarks

This objective of 'Creating an environment more conducive to private investment for transport infrastructure projects' aims to implement the projects of common interest through financial instruments, based on an *ex ante* assessment as required by Article 224 of Commission Delegated Regulation (EU) No 1268/2012 of 29 October 2012 on the rules of application of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council on the financial rules applicable to the general budget of the Union (OJ L 362, 31.12.2012, p. 1). In accordance with Article 21(4) of Regulation (EU) No 1316/2013, from 10 % to 20 % of the financial envelope for CEF transport will be available for innovative financing instruments such as the Project Bonds Instrument, the Loan Guarantee Instrument and other instruments such as joint ventures and the equity instruments to combine public and private financial resources to accelerate infrastructure investments in Europe. The financial instruments are intended to facilitate access to private financing and thus to accelerate or to make possible financing of the TEN-T projects eligible under the TEN-T guidelines and Regulation (EU) No 1316/2013. The financial instruments are intended to be established as 'debt' or 'equity' frameworks and they should address specific market failures and provide appropriate financing solutions. They are intended to be implemented as direct management by the entrusted entities, within the meaning of the Financial Regulation or jointly with the entrusted entities. The entrusted entities must be accredited to provide guarantees to the Commission on the protection of the Union financial interests in line with the requirements of the Financial Regulation.

Any repayment from financial instruments pursuant to Article 140(6) of the Financial Regulation, including capital repayments, guarantees released, and repayment of the principal of loans, paid back to the Commission and entered in Item 6 3 4 1 of the statement of revenues may give rise to the provision of additional appropriations in accordance with point (i) of Article 21(3) of the Financial Regulation.

Remarks

This appropriation is intended to cover the Agency's staff and administrative expenditure (Titles 1 and 2) and operational expenditure relating to the work programme (Title 3).

The Agency must inform the European Parliament and the Council about transfers of appropriations between operational and administrative expenditure.

The establishment plan of the Agency is set out in Annex 'Staff' to this section.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget of the Union.

The amounts repaid in accordance with Article 20 of Commission Delegated Regulation (EU) No 1271/2013 of 30 September 2013 on the framework financial regulation for the bodies referred to in Article 208 of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council (OJ L 328, 7.12.2013, p. 42) constitute assigned revenue (point (c) of Article 21(3) of the Financial Regulation) to be charged to Item 6 6 0 0 of the general statement of revenue.

The Union contribution for 2017 amounts to a total of EUR 35 985 000. An amount of EUR 1 801 000 coming from the recovery of surplus, is added to the amount of EUR 34 184 000 entered in the budget.

Remarks

This appropriation is intended to cover expenditure on studies and meetings of experts directly linked to the achievement of the objective of the programme or measures coming under this item, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts.

It is intended to cover expenditure on information and communication, conferences and events promoting activities in the transport sector as well as social media activities, audio-visual products, development of website and other IT tools, consultancy activities, electronic and paper publications directly linked to the achievement of the objective of transport policy, as well as safety and protection of transport users.

This appropriation is also intended to cover expenditure incurred by the Commission for collecting and processing information of all kinds needed for the analysis, definition, promotion, monitoring, evaluation and implementation of the Union's common transport policy, for all transport modes (road, rail, air, sea and inland waterways) and for all transport sectors (transport safety, internal market of transport with its implementation rules, optimisation of transport network, passengers' rights and protection in all transport modes, the use of alternative fuels in all transport modes, clean vehicles procurement and urban mobility, employment data, as well as for all other sectors related to transport). The main endorsed actions and objectives are intended to support the Union's common transport policy, including extension to third countries, technical assistance for all transport modes and sectors, specific training, definition of rules of transport safety, simplification of administrative procedures, the use of ICT technologies, the contribution to the standardisation process, and promotion of the common transport policy including establishment and implementation of trans-European network orientation endorsed by the Treaty on the Functioning of the European Union as well as strengthening passengers' rights and protection in all transport modes and to improve the application and enforcement of existing Regulations on passenger rights, in particular through awareness-raising activities about the content of those Regulations, targeted at both the transport industry as well as the travelling public.

Maritime transport and logistics

This appropriation is intended to cover the development and implementation of the Union's maritime transport strategy, in line with the objectives defined in the White Paper on the future of transport.

COMMISSION
TITLE 06 — MOBILITY AND TRANSPORT

CHAPTER 06 02 — EUROPEAN TRANSPORT POLICY *(cont'd)*

06 02 05 *(cont'd)*

This includes analyses of economic and technological developments, support of international negotiations, developing and interpreting cabotage rules, following complaints and infringements procedures, development and implementation of actions to promote short sea shipping, revision of Directive 2010/65/EU of the European Parliament and of the Council of 20 October 2010 on reporting formalities for ships arriving in and/or departing from ports of the Member States and repealing Directive 2002/6/EC (OJ L 283, 29.10.2010, p. 1) and administrative simplification and make use of ICT systems in the waterborne and logistic sector, as well as support of the sustainable development of the shipping sector.

This appropriation is intended to cover the development and implementation of a Union strategy for freight transport logistics, including the digital transport and logistics agenda, providing a framework and actions for interoperable multimodal transport information and management systems and related standardisation issues, administrative (European) single window(s) for multimodal transport, a single transport document and a multimodal liability regime.

This appropriation is also intended to cover the development of a reference framework on carbon footprint calculators, modal shift follow-up (former Marco Polo programme), supporting standardisation and harmonisation of equipment and combined transport.

Maritime safety

This appropriation is intended to cover monitoring, evaluation and revision (impact assessment) of Union legislation on maritime safety, protecting the maritime environment and promoting qualifications and working conditions for seafarers.

Passenger rights

This appropriation is intended to cover expenditure on monitoring, evaluation, revision and raising awareness actions of Union legislation on passenger rights.

In connection with Regulation (EC) No 261/2004, the Commission needs to develop additional measures to make enforcement of that Regulation more efficient. The implementation of Regulation (EC) No 1107/2006 and Council Regulation (EC) No 2027/97 of 9 October 1997 on air carrier liability in the event of accidents (OJ L 285, 17.10.1997, p. 1) needs also to be ensured.

The implementation of Regulation (EC) No 1371/2007 requires specific implementation action to ensure its correct application and enforcement in the Member States due to the complex interaction of regional, national and international (COTIF) administrative structures involved in the implementation.

The implementation of Regulation (EU) No 1177/2010 requires specific implementation actions to ensure its correct application and enforcement in the Member States and the compliance by Member States with their legal reporting obligations towards the Commission.

The implementation of Regulation (EU) No 181/2011 requires specific implementation actions in order to ensure its correct application and enforcement in the Member States and the compliance by Member States with their legal reporting obligations towards the Commission.

As an important implementation support measure the Commission conducts targeted actions covering some or all Member States to raise public awareness on passenger rights. Nearly one third of Union citizens are aware of their rights and obligations when buying a ticket to travel (31 %), although 59 % are said to be unaware of them (Eurobarometer on passenger rights 2014).

These actions and objectives could be supported at different levels (local, regional, national, European and international), for all transport modes and sectors and related to transport, as well as in technical, technological, regulatory, informative, environmental, climatic and political fields and for sustainable development.

CHAPTER 06 02 — EUROPEAN TRANSPORT POLICY *(cont'd)*

06 02 05 *(cont'd)*

Air transport has long been one of the sectors in which the consumer authorities receive most complaints in the Union. The increase in the number of commercial transactions performed electronically (using the internet or a mobile telephone) has merely resulted in more breaches of Union consumer legislation.

One of the main complaints by Union consumers is that there are no effective means of redress at airports themselves, particularly when disputes arise as a result of failure on the part of airlines and other service providers to meet their obligations. Union consumers and air transport authorities therefore need to work together to secure an immediate improvement in passenger support and information facilities at airports and, at the same time, step up co-regulation in the sector.

Road safety

The Commission communication of 20 July 2010 entitled 'Towards a European road safety area: policy orientations on road safety 2011-2020' (COM(2010) 389 final) presents seven objectives: road user education, enforcement of traffic rules, safe infrastructure, safe vehicles, use of modern technology, post-injury emergency responses and a special focus on vulnerable road users. Work continues on the Commission's proposal, on the new Union driving licences, and on the revision of the rules on qualification and training for professional drivers, on the follow-up to the Directives 2014/45/EU, 2014/46/EU and 2014/47/EU, and the work towards a strategy on serious road traffic injuries. The Commission's road safety work also includes the management of the European Road Safety Charter, the management of rules relating to dangerous goods, the maintenance of a European database on road accidents — Community Road Accident Database (CARE), the follow-up on the infrastructure management and tunnel safety directives and on various aspects of vulnerable road user safety. The implementation of the policy orientations 2011-2020 would also require specific implementation action for the exchange of good practices, road safety campaigns, calls for proposals and development of the road safety observatory; as well as the evaluations of options for making the road safety in the Union work more effectively and efficiently in the future.

This appropriation is also intended to cover expenditure on communication activities and on public events such as the annual European Road Safety Day and similar awareness-raising and citizen interaction initiatives.

It is also intended to establish efficient cross-border cooperation between Member States concerning the enforcement of road safety related traffic offences.

Land transport

The main activities in the land transport area concern the implementation and review of existing policies and the planning of new initiatives. Among others, this includes activities in areas such as road charging, rail related questions, market access, social rules (including their enforcement), technical rules and international aspects (land transport relations with third countries and international organisations dealing with land transport issues).

Ports and inland navigation

This appropriation is intended to cover development, monitoring, evaluation and revision (impact assessment) of Union legislation and policy on ports and inland navigation.

Single European Sky

The full implementation of the Single European Sky (four basic Regulations (EC) No 549/2004, (EC) No 550/2004, (EC) No 551/2004 and (EC) No 552/2004, and more than 20 implementing rules) is a key priority to improve the performance of the air navigation services in terms of safety, cost efficiency of the air navigation service provision, reduction of air traffic flow delays and environmental performance, and hence of air transport in Europe.

Implementing the Single European Sky and Single European Sky Air Traffic Management Research (SESAR), its technological pillar, are also priorities in the Union's Aviation Strategy adopted in 2015.

COMMISSION
TITLE 06 — MOBILITY AND TRANSPORT

CHAPTER 06 02 — EUROPEAN TRANSPORT POLICY *(cont'd)*

06 02 05 *(cont'd)*

The extension of the Single European Sky legislation to the South-East states though the Multilateral Agreement on the Establishment of a European Common Aviation Area (ECAA) is an important step for the achievement of the neighbouring policy. This action is based on Article 7 of Regulation (EC) No 549/2004.

In this context, promoting the Single European Sky and the initiatives that contribute to its timely implementation, as well as addressing its future development are also important activities for the Commission and are pursued under this article.

Aviation safety and environment

The uses of several legislative tools are important to ensure the safety of European Aviation and to ensure the achievement of an environmentally sustainable growth.

According to Articles 3 to 5 of Regulation (EC) No 2111/2005, the Commission may impose total bans or partial restrictions on air carriers from third countries coming to the Union. In that context and in accordance with Article 3(4) of Regulation (EC) No 473/2006, the Commission, the European Aviation Safety Agency (EASA) and experts from the Member States may carry out assessment missions to conduct on-the-spot checks and to identify safety deficiencies of the air carriers and the authorities responsible for their oversight. The cost of on-site assessment visits for national experts is either reimbursed by the Union or comes out of their own budget.

There is a clear need to complement these missions with more positive and preventive actions as well as with *ex post* technical cooperation to assist the countries concerned by the ban or restrictions to correct the deficiencies. In addition, the Commission and EASA have as their objective the promotion of the highest standards of aviation safety across the world.

In this context, the large-scale Union projects in the area of civil aviation cooperation managed by other Directorates-General (ELARG and DEVCO), which can only be implemented on a long-term basis, do not provide an immediate answer to short-term needs.

The objective of this initiative is therefore to complement the existing instruments by establishing a flexible tool to implement ad hoc preventive and assistance (corrective) actions in favour of the national authorities responsible for the oversight of air carriers affected by the Union ban within the Union. The actions envisaged are small-scale and short-term activities.

Since the framework service contract concluded between EASA and MOVE in 2009 proved to be an effective and efficient tool to carry out technical assistance, the contract with EASA was renewed for the period 2013-2016 and a new framework contract is under preparation for the period 2016-2020.

In addition, Regulation (EU) No 996/2010 provides for the establishment of a European Network of Civil Aviation Safety Investigation Authorities (Encasia). Encasia is required to develop actions in order to further improve the quality of investigations conducted by safety investigation authorities and to enhance accident prevention in the Union. According to that Regulation, the Commission is associated with Encasia's work and provides Encasia with the necessary support.

CHAPTER 06 02 — EUROPEAN TRANSPORT POLICY *(cont'd)*

06 02 05 *(cont'd)*

Moreover, the Commission has been cooperating with Eurocontrol since 2003 under the Memorandum of Cooperation related to support to the Single European Sky and other Union policies. The Commission adopted a new framework agreement MOVE/E2/2012/FV/397-3 on 19 December 2012. The aim of this framework agreement is to assist the Commission in preparing and implementing Union environmental policies in aviation. These policies cover noise and emissions (CO_2 or NO_x), where ICAO is developing standards for aircraft, which are quasi-automatically transposed into Union law by virtue of Article 6 of Regulation (EC) No 216/2008. In addition, the implementation and assessment of Union legislation requires the development of data and methods contributing to the overall European environmental assessment capacity. This fiche does not cover new activities but activities which used to be financed under the general envelope attributed to Eurocontrol.

Finally, the Memorandum of Cooperation covers areas of aviation for which both the Commission and International Civil Aviation Organisation (ICAO) have responsibilities (i.e. safety, environment, air traffic management and aviation security). This strengthened cooperation will ensure the indispensable participation in and contribution to ICAO initiatives in several key aviation policy areas which are being pursued at the global level. This includes the initiative to strengthen the safety of international aviation on a worldwide basis, or the development and implementation of measures with regard to the environmental impact of aviation which are acceptable worldwide. It aims to ensure that European interests (including of an industrial nature, for example in the area of the definition of worldwide technical standards) are better taken into consideration by ICAO. Through the agreement, ICAO will also be brought to accept, support and enhance the increasingly important role which regional organisations play in the current and future development of international aviation.

Urban mobility

The appropriation is intended to support the implementation of the 2013 'Urban mobility' package. This package aims to reinforce the support to European cities for tackling urban mobility challenges. To this end, the Commission will, among other actions, promote studies, conferences, campaigning actions (such as the European Mobility Week), and the establishment of platforms for the exchanges of information and best practices.

Use of alternative fuels in transport

The appropriation is intended to support the implementation of the strategy defined in the 'Clean power for transport' package (Communication from the Commission to the European Parliament, the Council, the European Economic and Social Committee and the Committee of the Regions 'Clean power for transport: a European alternative fuels strategy' (COM(2013) 17 final). The appropriation will also support the Commission with monitoring and assessing the implementation of national policy frameworks to be submitted by the Member States to comply with Article 3 of Directive 2014/94/EU, as well as with the preparation of the reports foreseen by Article 10 of that Directive. Activities in support of the follow-up of the decarbonisation strategy and alternative fuels action plan (adopted in July 2016) will also be covered.

Clean vehicles procurement

Full transposition of Directive 2009/33/EC was completed in November 2013. The results of the first report on the application of the Directive were published on 18 April 2013. An external evaluation aimed at providing policy recommendations was undertaken. The appropriation is intended to cover the reporting and review requirements established by Article 10 of Directive 2009/33/EC as well as other support actions (e.g. communication activities).

Legal basis

Task resulting from the Commission's prerogatives at institutional level, as provided for in Article 54(2) of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1).

Remarks

This appropriation is intended to cover expenditure incurred by the Commission for collecting and processing information of all kinds needed for the analysis, definition, promotion, monitoring, evaluation and implementation of the rules and measures required to improve the security of inland, air and sea transport, including extension to third countries, technical assistance and specific training.

CHAPTER 06 02 — EUROPEAN TRANSPORT POLICY *(cont'd)*

06 02 06 *(cont'd)*

The main objectives are to develop and apply security rules in the field of transport and in particular:

— measures to prevent malicious acts in the transport sector,

— approximation of legislation, technical standards and administrative monitoring practices relating to transport security,

— definition of common indicators, methods and security objectives for the transport sector and collection of the data necessary for such definition,

— monitoring of measures taken on transport security by the Member States, in all modes,

— international coordination on transport security,

— promoting research into transport security.

This appropriation is intended in particular to cover expenditure on the establishment and operation of a corps of inspectors to check compliance with the requirements of Union security legislation of airports, ports and port facilities in the Member States, including extension to third countries, and of ships flying the flag of a Member State. This expenditure includes the subsistence allowances and travel expenses of the Commission inspectors and the expenses of inspectors from the Member States, borne in accordance with the provisions laid down in that legislation. The costs of training inspectors, of preparatory meetings and of the supplies needed for inspections must, in particular, be added to that expenditure.

This appropriation is also intended to cover expenditure on information and communication, as well as electronic and paper publications directly linked to the achievement of the objective of transport policy, as well as safety and protection of transport users.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

The pilot project will involve a study assessing the scope for developing a Global Navigation Satellite System (GNSS) monitoring system in Europe for heavy commercial vehicles. The aim is to improve transport safety, traceability and compliance with rules and laws, and to ensure fair competition. The study will assess the best ways of using a GNSS monitoring system to improve the implementation of road transport legislation. Through real-time monitoring it will be possible to combat illegal practices in transport sector and illegal trafficking of goods and waste more effectively and to carry out real-time checks on all information regarding trucks and drivers.

On the basis of existing regulations and systems (digital tachographs monitoring working time and on-board weighing systems monitoring compliance with permissible weights), the study will involve, in stages:

(1) defining objectives by reviewing the legislation to be monitored by the system (for instance tracking/tracing of dangerous goods, cabotage rules), possible new upcoming legislation for HGVs (e.g. eCall, event data recorders), taking particular account of the results of the study 'Benefit and feasibility of a range of new technologies and unregulated measures in the fields of vehicle occupant safety and protection of vulnerable road users' published by the Commission in March 2015;

(2) defining the functional requirements for the applications listed in point (1);

CHAPTER 06 02 — EUROPEAN TRANSPORT POLICY *(cont'd)*

06 02 77 *(cont'd)*

(3) establishing a system architecture incorporating digital tachographs, and providing the technical requirements for all modules needed for the system;

(4) assessing the security mechanisms to avoid fraud and jamming;

(5) verifying the conditions for market introduction;

(6) assessing the acceptability of the project by the road transport industry through open consultation of the stakeholders on a steering group monitoring all project stages;

(7) assessing impacts for potential legislation with a view to making the system mandatory or 'strongly recommended'.

Studies have already been carried out by the Commission on the technical aspects of such an integrated on-board system (stages 1 and 3 above). This study will therefore focus essentially on the political aspects (stages 5 to 7) and go further into the technical issues (stages 1 to 4).

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

In order to be competitive the transport sector requires a highly skilled, competitive and well prepared and trained workforce. In a number of areas there is today a clear need for specialised workers, as the labour market is not providing enough incentives to fill some of the high specialised vacancies in this sector, while at the same time it is difficult to fill some vacancies for low-skilled jobs. In the maritime sector more and more seaman jobs are disappearing and it has become more and more difficult to attract Union workers to this sector, mostly because of the demanding working standards and poor conditions. In aviation, more and more pilots and cabin crew are leaving the Union and an increasing number are accepting working arrangements in the Union that fall well below the well-established standards in the sector.

CHAPTER 06 02 — EUROPEAN TRANSPORT POLICY *(cont'd)*

06 02 77 *(cont'd)*

06 02 77 09 *(cont'd)*

Furthermore, there is an urgent need to prepare for the imminent replacement of workers retiring in the transport sector.

Objectives:

— to prepare for this scenario and to provide the tools the Commission and the European Parliament and the Council require in order to identify urgent actions to avert an adverse impact on the labour market in this sector,

— to make transport professions more attractive, identify training and lifelong learning needs at Union level, costs and barriers to taking up employment in the transport sector, and propose appropriate measures,

— to provide a comprehensive picture of the needs of the transport sector in terms of employment and training in the coming years.

Proposed actions:

— to conduct a review of job profiles and educational and professional qualifications needed for the most in-demand positions and identify the main universities, learning centres and establishments providing training for highly specialised technical posts in this sector,

— to carry out a study to review the career development opportunities and career paths for new generations and identify, together with relevant authorities and stakeholders, including social partners, incentives to attract Union workers to the sector, and the scope for tying in with Union funding opportunities or support programmes such as the European Youth Initiative,

— to develop a web portal for the future workforce identifying the main career openings and career development opportunities and the relevant costs and including a job vacancy section. The platform will cover all transport modes and all stakeholders. It will include a tool for pooling experience and best practices. It will also include information about working conditions, career paths, etc. for each transport mode. Special attention will be paid to apprenticeships. The primary target audience will be young people.

The web platform will also include:

— a module on 'better enforcement' listing guidance material (at national and Union level) and information about the 'just culture' and the 'culture of compliance',

— a special gender-balance module addressing the issue of the very low proportion of female workers in the transport sector and paying special attention to urban transport,

— a special module on the work of social partners,

— a record, within the best practice pooling tool, of recent campaigns and details of their effectiveness,

CHAPTER 06 02 — EUROPEAN TRANSPORT POLICY *(cont'd)*

06 02 77 *(cont'd)*

06 02 77 09 *(cont'd)*

— statistical support for labour market analysis in the sector, including comparative analyses with other regions and an inventory of relevant studies and statistics (data available from Eurostat, the OECD, the European Institute for Gender Equality and other sources), as well as works in the field of the digital economy.

The pilot project will identify available tools (including funding) and possible future cost-effective actions for promoting transport jobs, including an assessment of possible effective incentives for good social practices in the transport sector (e.g. a social charter or social awards).

The pilot project could also incorporate into the platform ongoing Commission actions such as:

— mapping of key professions in the Union transport sector in which worker replacement will be a problem in the next few years,

— identifying areas of potential growth and potential human resources/expertise shortfalls.

TITLE 06 — MOBILITY AND TRANSPORT

CHAPTER 06 02 — EUROPEAN TRANSPORT POLICY *(cont'd)*

06 02 77 *(cont'd)*

06 02 77 10 *(cont'd)*

Port cities are facing huge challenges in reconciling competition and sustainable urban development. Those challenges include relocation of port functions, container transport, redevelopment of port-city interfaces and waterfronts and dialogue with city inhabitants. Tensions between city and port, tourism and industry, natural and built-up areas need to be addressed. Smart city and smart port city ambitions should be complementary. A knowledge- and ICT-based smart port city could work hand in hand with inland interfaces to further increase service efficiency and quality. Having regard to the motorways of the sea concept, this is in line with the Europe 2020 strategy and the revised White Paper of 28 March 2011 entitled 'Roadmap to a Single European Transport Area — Towards a competitive and resource efficient transport system' (COM(2011) 144 final).

Cities and ports are faced with the same problems and have the same opportunities, so there should be innovative solutions for: (a) reducing greenhouse gas emissions from ocean shipping and also from port operations; (b) developing the linkage with hinterland transport (rail, road, inland); (c) enhancing renewable energy use and improving energy efficiency; (d) promoting ICT use and interoperability; (e) strengthening the competitiveness of port cities, bearing in mind the strategic position of the outermost regions and the importance of connectivity between islands; and (f) promoting synergies between city and port.

These innovative actions should also have an impact on maritime and coastal tourism. Actions should also focus on port facilities and dialogue between port and city authorities for urban and port planning. Coastal and maritime tourism also has a role to play in the diversification of ports. This preparatory action will identify the benefits of smart port city development around Europe and take into consideration the full significance of ports. The action will also include initiatives to create a European smart port city network.

CHAPTER 06 02 — EUROPEAN TRANSPORT POLICY *(cont'd)*

06 02 77 *(cont'd)*

06 02 77 11 *(cont'd)*

For many years the Union has been supporting through grants the deployment of the ERTMS on railway lines and on board rail vehicles in order to increase interoperability within the single European rail area and maximise train operating safety. According to preliminary assessments, the ERTMS may also be able to increase capacity on existing rail lines. The European Coordinator for ERTMS presented in December 2014 an ERTMS work plan highlighting the current deployment of the ERTMS on rail networks and future needs. It is clear from that report that completion of the deployment of the ERTMS along the core network corridors will take more than 50 years and require substantial financial resources beyond the capacity of Union and Member States' budgets. The current Union policy of supporting the ERTMS through grants from the Union budget has proved limited in effectiveness and in scope. Involvement of private-sector financing is a useful option.

Taking stock of the limits of the current financing scheme, the Commission commissioned a study to develop tailor-made solutions for using innovative financing to support deployment of the ERTMS, in particular along nine core network corridors. This study looked at various options for the involvement of the private sector, but in order to test the business case for involving innovative financing to support the ERTMS, a European pilot project is needed as a follow-up to that study. In view of the preliminary analysis and the limited experience of the Commission and the EIB with private sector involvement in the deployment of the ERTMS, this pilot project will assess the feasibility of setting up a public-private joint undertaking to support the deployment of the ERTMS throughout the core network corridors, or at least along one corridor, using Union or EIB frameworks. The pilot project will assess the current regulatory, legal and financial feasibility of setting up such joint undertakings at corridor level, thus covering all Member States crossed by core network corridors. Moreover, the pilot project will assess the interest of private investors in particular for such a joint undertaking with Union backing, as well as the interest of ERTMS manufacturers, infrastructure managers and railway undertakings. Furthermore, this pilot project or a subsequent preparatory action could support the setting up of a joint undertaking responsible for supporting ERTMS deployment along one of the core network corridors. Should this prove successful, a new Union programme covering all corridors could be set up. The purpose of deploying along one corridor is to test the business case for a public-private joint undertaking which, while acting as a special-purpose vehicle, provides funding for infrastructure managers along the selected corridor to finance ERTMS deployment. Once deployment has been fully or mostly completed, railway undertakings will benefit from full interoperability along the corridor and could be charged a mark-up on their track access charges so as to repay the joint undertaking and its private shareholders. Railway undertakings are expected to pay the mark-up, since the commercial offer of faster transport for passengers and freight shippers could increase market appetite for rail services along the corridor. Rail services are expected to be faster and easier thanks to the full interoperability provided by the ERTMS.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

This preparatory action will demonstrate an AGS for RPAS (drones) flying below 150 metres (500 feet) above ground level. It will be set up by connecting the drone-controlling remote pilot station on the ground to a web-based platform. The web-based platform will display the position of the RPAS operation and will validate compliance with different national legislation, depending on the location of the operation. The platform can generate no-fly zones on the basis of aviation standards.

By connecting the web-based platform to the RPAS, users will not be able to operate RPAS in no-fly zones. No-fly zones can be generated, monitored and controlled by the authorities responsible. The information generated by the web-based platform can also be shared with all stakeholders in the European aviation network.

This action can provide a solution for the safe and secure integration of small drones into the existing aviation network, guaranteeing a level of safety equivalent to that in manned aviation and resulting in a win-win situation for all RPAS stakeholders. Privacy can be guaranteed by using no-fly zones for RPAS operations; and, more importantly, SMEs in the RPAS industries will be helped to create promising new job opportunities in Europe. The following RPAS services can be demonstrated by using a web-based platform: an AGS monitored and controlled by the authorities responsible, and a validation service checking the regulations applicable.

This platform could be accessible to various stakeholders, such as RPAS users, air navigation service providers, civil aviation authorities, police and emergency services, RPAS manufacturers and qualified entities. It will use existing aviation standards, be compliant with manned aviation rules and result in safer, more secure and standardised integration into the aviation network. In addition to those standards, the platform must be interoperable with all RPAS so as to open the European market for all RPAS manufacturers and all RPAS users. Finally, this RPAS air traffic management platform should be scalable for all Member States.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

The pilot project will assess new ways of sustainably financing public transport that are compatible, in particular, with eco-sustainability, digitisation and accessibility, in order to boost the economy and create new jobs. The Commission's objective is to encourage the use of public transport, thereby reducing congestion and environment- and health-harming emissions in urban areas, especially through alternative, cleaner fuels. Many studies show that ticket costs affect a small part of the total cost of services. Customers pay a lot of money in terms of taxes and ticketing. It is necessary to find new ways to finance public transport, evaluating new models that could significantly reduce or remove charges for the public, save public money and reduce atmospheric emissions. In addition, improved urban mobility would help to increase passenger numbers. More efficient mobility would also help businesses and would create more jobs. A good example of this is Tallinn in Estonia. The aim of the project is to identify and exchange best practices, assess new funding methods and look into the possibility of creating a European one-stop office to support municipalities that wish to implement the best sustainable financing systems and projects.

Former Item 08 02 77 04

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

The aim of this two-stage preparatory action is to identify the barriers that impede the development of a truly optimised single European transport system and to propose a set of actions which, collectively, can help to accelerate progress. The action fully supports Union and Commission initiatives. It will:

— inform future policy development and research and innovation programmes, at both Union and national level,

— address one of the seven challenges on which Horizon 2020 is based, namely 'Smart, green and integrated transport',

— contribute to implementation of Europe 2020 flagship initiatives such as 'Increasing accessibility and clean transport' and 'Promoting innovation and excellence'.

The examination stage will:

— identify stakeholders (industry, research, administrations, regulators and civil society), and their opinions, needs and expectations,

— describe the current state of the system: public policy (at all levels); industry structures; market and regulatory conditions; mechanisms for stakeholder collaboration; transport programmes,

— look at similar issues in other world regions and identify lessons to be learned,

— identify opportunities to improve European transport system as a whole and barriers preventing this.

The roadmap stage will suggest actions, endorsed by a cross-section of stakeholders, which can accelerate progress towards an optimised transport system. It will examine:

— what, if any, new organisation(s) might help, without simply duplicating existing structures,

— how to develop a stronger 'whole system' mindset at all levels,

— ways to encourage existing initiatives to pay more attention to their interactions with the rest of the system,

— potential policy initiatives at Union, Member State and local levels.

The end result will be an in-depth analysis of the opportunities for and barriers to achieving a fully optimised transport system across Europe, plus committed stakeholders from all sectors.

Context

Around 55 % of car journeys are less than five kilometres long. The average occupancy rate is low at around 1,3 persons per car. Those figures show that alternatives to the private car use are still underdeveloped and that there is a huge potential for a shift towards more sustainable modes.

Raising awareness is a first step towards developing alternatives to private car use. The aim is to encourage behavioural change, for instance for home-to-work and home-to-shop journeys. There are already a number of initiatives to change individual car use into non-motorised individual mobility, such as walking and cycling, including using electric bicycles (which has the potential to be the most reliable and fastest mode for distances up to 10 kilometres). But these initiatives, which are mostly used to target individual behaviours, could be speeded up by means of a collective approach.

Project

The pilot project is all about developing new tools to raise awareness at a collective level. There is a high potential for experimentation in public and private companies, local authorities and international conferences to use new tools to measure and set objectives for modal shift at a group level. These tools are called 'group-performance-based systems' using crowdsourcing and connected technologies. They allow better flexibility, team spirit and long-term coordination between people, and also provide statistics and mass data on behavioural change. The pilot project will develop and disseminate a new set of tools to limit the use of cars to what is strictly necessary.

Compliance with:

— the COP21 Agreement's main objective, which consists in '(...) holding the increase in the global average temperature to well below 2 °C above pre-industrial levels.';

— the White Paper of 28 March 2011 entitled 'Roadmap to a Single European Transport Area — Towards a competitive and resource efficient transport system' (COM(2011)144 final) containing ambitious targets for carbon reduction: 'By 2030, the goal for transport will be to reduce greenhouse gas (GHG) emissions to around 20 % below their 2008 level.';

— the European Parliament own-initiative report on sustainable urban mobility, which emphasises that the European Parliament 'is convinced that air pollution has a local, regional, national and cross-border dimension and requires action at all levels of governance; asks, therefore, for a strengthening of the multi-level governance approach where all actors take the responsibility for measures that can and should be taken at that very level';

Remarks

In rural areas in the Union there has been a large increase in projects developing shared mobility interconnected with public transport and non-motorised individual mobility. These are based on different conventional and digital tools (e.g. smartphone apps) and involve, for example, car sharing, car pooling, shared driving, hitchhiking, taxi sharing and flexible call buses. This development is a huge opportunity to give a boost to 'smart rural transport areas' (SMARTAs). The pilot project will improve knowledge and understanding of whether there is a need for a cross-border approach to SMARTAs, such as exchanges of best practice examples, interoperability, sustainable regional development, cohesion, research and development and innovation.

The pilot project has the potential to generate win-win situations, such as reducing CO_2 emissions (COP 21 agreement), better mobility connections in remote and rural areas for persons who cannot or do not want to own a car (young, elderly and socially disadvantaged people).

The eighth of the ten goals for a competitive and resource-efficient transport system set out in the White Paper of 28 March 2011 entitled 'Roadmap to a Single European Transport Area — Towards a competitive and resource efficient transport system' (COM(2011) 144 final) is to establish the framework for a European multimodal transport information, management and payment system by 2020.

Furthermore, initiative 22 in the White Paper (Seamless door-to-door mobility) involves defining 'the measures necessary for further integrating different passenger transport modes to provide seamless multimodal door-to-door travel'. Initiative 27 (Travel information) involves promoting 'awareness of the availability of alternatives to individual conventional transport (drive less, walk and cycle, car sharing, park and ride, intelligent ticketing, etc.)'.

Remarks

European air traffic management is handled by 28 Air Navigation Service Providers (ANSP) on the basis of ground national borders. The cost of airspace fragmentation has been put at EUR 4 billion a year. The pilot project will evaluate a new Union airspace architecture based only on traffic flow efficiency, direct routes and the most efficient number of control centres. This will take into account Single European Sky Air Traffic Management Research (SESAR)-related technology in order to establish the most efficient deployment locations.

Remarks

This pilot project will develop a digital platform for urban transport routes suitable for people with reduced mobility.

One in six people in Europe is affected by disability to some degree and with an ageing population the need for information about barrier-free transport options in cities will only grow with time. While municipalities and transport companies are working on making transport more accessible and harmonised across Europe, information regarding barrier-free mobility options is still not clearly communicated, and many of those affected still need to rely on privately organised transport options.

The proposal for a Directive of the European Parliament and of the Council on the approximation of the laws, regulations and administrative provisions of the Member States as regards the accessibility requirements for products and services (COM(2015) 615 final) (the European Accessibility Act) laid the groundwork for improving the life of people with disabilities. It aims to overcome the divergent, and often contradictory, national accessibility requirements which have created barriers for business and thus have prevented people with disabilities from benefiting from the potential of the internal market.

The pilot project will first support the collection of information about barrier-free mobility in urban areas and then link the information to a common online platform, which should ideally be accessible via a mobile app and similarly accessible information tools. This platform will, for example, take into account a more accurate walking speed and the accessibility of public transport options, of certain streets, and of existing specialised transport services.

One focus of the Act is to make transport more accessible for people with disabilities by harmonising Member State accessibility requirements. This pilot project will therefore build on this momentum by helping information about accessible transport to be better communicated to the target group. This should encourage transport companies to improve their accessibility standards more quickly and businesses to take advantage of the digital economy market opportunities offered by this still relatively untapped market.

Remarks

The increased migratory pressure on the Union has seriously affected both traffic security and road haulage industry security in a number of Member States in certain locations, such as Calais, where refugees are trying to get into trucks. It is necessary to react to this crisis and to provide safe parking points for trucks in order to prevent refugee deaths and safeguard truck drivers, as well as to help prevent material damage for hauliers.

The pilot project will cover expenditure on setting up secure and guarded parking areas for trucks along the major road transport routes through Europe to border locations, at points where traffic and truck security is affected by large numbers of refugees trying to climb into trucks to cross a border.

This appropriation will be in addition to the EUR 5 000 000 Commission Vice-President Frans Timmermans promised to the French authorities to deal with the refugee camps in Calais.

CHAPTER 06 03 — HORIZON 2020 — RESEARCH AND INNOVATION RELATED TO TRANSPORT *(cont'd)*

Remarks

These remarks are applicable to all the budget lines in this chapter.

These appropriations are intended to be used for Horizon 2020 — the framework programme for research and innovation, which covers the 2014 to 2020 period, and for the completion of the previous research programmes (seventh framework programme and preceding framework programmes).

Horizon 2020 will play a central role in the implementation of the Europe 2020 flagship initiative 'Innovation Union' and other flagship initiatives, notably 'Resource-efficient Europe', 'An industrial policy for the globalisation era', and 'A digital agenda for Europe', as well as in the development and functioning of the European Research Area. Horizon 2020 will contribute to building an economy based on knowledge and innovation across the whole Union by leveraging sufficient additional research, development and innovation funding. The programme will be carried out in order to pursue the general objectives described in Article 179 of the Treaty on the Functioning of the European Union, in order to contribute to the creation of a society of knowledge, based on the European research area, i.e. supporting transnational cooperation at all levels throughout the Union, taking the dynamism, creativity and the excellence of European research to the limits of knowledge, strengthening human resources for research and for technology in Europe, quantitatively and qualitatively and research and innovation capacities in the whole of Europe and ensuring optimum use thereof.

In Horizon 2020, gender equality is addressed as a cross-cutting issue in order to rectify imbalances between women and men and to integrate a gender dimension in research and innovation content. Particular account will be taken of the need to step up efforts to enhance the participation at all levels, including decision making, of women in research and innovation.

Also entered against these articles and items are the costs of high-level scientific and technological meetings, conferences, workshops and seminars of European interest organised by the Commission, the funding of high-level scientific and technological analyses and evaluations carried out on behalf of the Union to investigate new areas of research suitable for Union action, inter alia, in the context of the European research area, and measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

These appropriations are intended to be used in accordance with Regulation (EU) No 1290/2013 of the European Parliament and of the Council of 11 December 2013 laying down the rules for participation and dissemination in 'Horizon 2020 — the Framework Programme for Research and Innovation (2014-2020)' and repealing Regulation (EC) No 1906/2006 (OJ L 347, 20.12.2013, p. 81).

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this chapter. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget of the Union.

COMMISSION
TITLE 06 — MOBILITY AND TRANSPORT

CHAPTER 06 03 — HORIZON 2020 — RESEARCH AND INNOVATION RELATED TO TRANSPORT *(cont'd)*

The possibility of third countries or institutes from third countries taking part in European cooperation in the field of scientific and technical research is envisaged for some of these projects. Any financial contribution will be entered in Items 6 0 1 3 and 6 0 1 5 of the statement of revenue and may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Revenue from States taking part in the European cooperation in the field of scientific and technical research will be entered in Item 6 0 1 6 of the of the statement of revenue and may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation.

Any revenue from the contribution by outside bodies to Union activities will be entered in Item 6 0 3 3 of the statement of revenue and may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Additional appropriations will be made available under Item 06 03 50 01.

Administrative appropriations of this chapter will be provided under Article 06 01 05.

06 03 03 Societal challenges

Remarks

This priority of Horizon 2020 responds directly to the policy priorities and societal challenges identified in the Europe 2020 strategy. Those activities will be implemented using a challenge-based approach which brings together resources and knowledge across different fields, technologies and disciplines. The activities will cover the full cycle from research to market, with a new focus on innovation-related activities such as piloting, demonstration, test beds, support for public procurement, design, end-user driven innovation, social innovation and market take-up of innovations. The activities will support directly the corresponding sectoral policy competences at Union level.

Funding will be focused on the following challenges:

— smart, green and integrated transport,

— innovation and research, particularly in the areas of behavioural change, modal shift, accessibility for all, integration (interconnectivity, intermodality, interoperability) and sustainability (climate change, gas and noise emission reduction), which are of crucial importance for the transport and tourism sectors.

Remarks

This appropriation is intended to cover research and innovation actions that should substantially contribute to shifting transport into a new era of smart mobility. Actions under this item should support the development and take-up of the necessary solutions for all transport modes, drastically reducing transport emissions that are harmful to the environment, lowering the dependence of transport on fossil fuels, and hence reducing transport impact on biodiversity and preserve natural resources. This is expected to be achieved by investing in specific activities, particularly in the form of large public-private partnerships, such as making aircraft, trains, vehicles and vessels cleaner and quieter, developing smart equipment, infrastructure and services and improving transport and mobility in urban areas.

Research and innovation carried under this item is expected to make important contributions to optimise performance and efficiency in the face of growing demands for mobility. Actions under this item will also focus on substantially reducing traffic congestion, substantially improving the mobility of people and freight, developing and applying new concepts of freight transport and logistics and reducing accident rates and fatal casualties and improving security. Actions under this item are indeed intended to contribute to making Europe the safest region for aviation and to move towards the target of zero fatalities in road transport by 2050.

Research and innovation is expected to play a significant role in achieving global leadership for the European transport industry and contributing to the development of small and medium-sized enterprises, staying ahead in new technologies and reducing the costs of existing manufacturing processes, therefore contributing to economic growth and highly skilled jobs in the European transport industry. In this context, actions to develop the next generation of transport means and explore entirely new transport concepts are expected to be developed and covered by this appropriation.

Socioeconomic research and forward-looking activities for policymaking will also be covered by this appropriation: actions to support policy analysis and development including on socioeconomic aspects of transport are necessary to promote innovation and meet the challenges raised by transport.

Remarks

This appropriation is intended to cover the Agency's staff, administrative and operational expenditure.

The mission of the Agency is to provide the Union and the Member States with objective, reliable and comparable information on the environment at Union level, thus enabling them to take the requisite measures to protect the environment, to assess the results of such measures and to inform the public.

The Agency must inform the European Parliament and the Council about transfers of appropriations between operational and administrative expenditure.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation.

Any revenue from the Swiss Confederation's contribution to participation in Union programmes entered in Item 6 0 3 3 of the statement of revenue may give rise to the provision of additional appropriations in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation.

The amounts repaid in accordance with Article 20 of Commission Delegated Regulation (EU) No 1271/2013 constitute assigned revenue (point (c) of Article 21(3) of the Financial Regulation) to be charged to Item 6 6 0 0 of the general statement of revenue.The establishment plan of the European Environment Agency is set out in Annex 'Staff' to this section.

The Union contribution for 2017 amounts to a total of EUR 36 309 240. An amount of EUR 1 142 835 coming from the recovery of 2015 surplus is added to the amount of EUR 35 166 405 entered in the budget.

Moving towards a circular economy is at the heart of the resource efficiency agenda established under the Europe 2020 strategy for smart, sustainable and inclusive growth. The main ideas on how to do more with less are being taken further in the Union's Environment Action Programme to 2020. Resource efficiency and sustainability are crucial in order to achieve the Europe 2020 strategy targets, as well as to improve the Union's competitiveness and ensure energy security. This transboundary, transnational pilot project will cover all Member States. It is fully in line with the Commission communication entitled 'Towards a circular economy: A zero waste programme for Europe' (COM(2014) 398 final), as well as with the European Parliament resolution of 9 July 2015 on resource efficiency: moving towards a circular economy (Texts adopted, P8_TA(2015)0266).

CHAPTER 07 02 — ENVIRONMENTAL POLICY AT UNION AND INTERNATIONAL LEVEL *(cont'd)*

07 02 77 *(cont'd)*

07 02 77 30 *(cont'd)*

This pilot project has the following main objectives:

— to identify, analyse and foster all best innovative practices and existing networks for green solutions, thus facilitating knowledge transfer and exchanges of innovations in the circular economy,

— to develop capacity and innovation potential and provide in-depth analysis to empower researchers, industry, communities and individuals to tap into new and innovative opportunities in the green circular economy, thus meeting current and future societal challenges.

The project will last for 2 years and will focus on the following key activities:

— producing an analysis identifying all existing innovative practices and existing networks for solutions and setting up a unified European Green Circular Economy Network encompassing all potentially existing networks so as to facilitate knowledge transfer and exchange best practices and innovations, as well as more circular economic models. The network can also provide a platform for joint problem solving and direct access to vital resources, such as research, analytical tools, funding and technical expertise. It could serve as an e-learning facility for circular economy capacity development,

— capacity building, development of innovation potential and awareness raising with the aim of sharing challenges, opportunities and best innovative practices, organisation of at least two forums on the green circular economy per year, as well as one kick-off conference and one closing conference in Brussels. Structured around a series of training modules, the forums will encourage participants to actively reflect on how innovative solutions for switching to the circular economy can be adapted to their home countries. They will focus on sustainable consumption and more efficient and profitable production, using fewer raw materials, with less pollution and waste in the process, and more consumer needs fulfilled, with less energy, water or waste; better use of resources and less waste production of waste, circular economy solutions and green standards, as well as circular economy investments in innovation and research, and fiscal policy instruments,

— producing a study providing in-depth analysis and policy options for specific sectors, such as urban planning, sustainable buildings, waste and water management, trade, food sector, fiscal policy, etc., and identifying case studies that provide detailed information about innovative practices and approaches in promoting the green circular economy in the regions. It should suggest actions such as public investment in key areas, market-based instruments, and regulatory frameworks for Member States.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

Biodiversity loss is a major societal challenge. To preserve European biodiversity, the Union imposed the Council Directive 92/43/EEC of 21 May 1992 on the conservation of natural habitats and of wild fauna and flora (OJ L 206, 22.7.1992, p. 7) ('Habitats Directive'), the cornerstone of Europe's nature conservation policy. Annex IV to that directive lists 27 of 34 salamander species, which Member States are obliged to protect against factors threatening their survival. Very recently, a novel fungal pathogen, *Batrachochytrium salamandrivorans*, emerged in Europe, where it is currently causing massive declines in salamander populations across three Member States, threatening the survival of most European salamander species. This pilot project will assist Member States in meeting their obligations under the Habitats Directive. No opportunities are available under the Horizon 2020 programme to take such immediate action.

This pilot project will design sustainable mitigation measures to counteract the impact of the epidemic caused by the fungus *Batrachochytrium salamandrivorans*, in both the short and long terms, in a joint effort by the most relevant Member States (based on the current occurrence of the fungus and the most salamander-diverse countries, including but not limited to Belgium, the Netherlands, Germany, the United Kingdom, France, Spain, Portugal, Italy and Greece).

In the short term (first 2 years) the pilot project will determine the current distribution of the fungus in threatened salamander populations across Europe. To prevent the spread of the fungus, the pilot project will also be used to investigate different methods (protective value of barriers, dilution effect of temporary removal of part of the population during an outbreak) in- and ex-situ in a multi-Member-State collaborative effort. In the long term (3 years), proof of concepts for vaccination strategies (increasing the amphibians' resistance to the fungus) and bioaugmentation strategies (steering the environment towards conditions that limit the fungus' survival and impact on amphibians (e.g. Schmeller *et al.* 2014)) will be developed.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

There are a number of national and regional initiatives to enhance green infrastructure (GI) in the light of the Union's Green Infrastructure Strategy (May 2013) and in recognition of the role GI plays in implementing the Union's 2020 Biodiversity Strategy that requires restoration of at least 15 % of degraded ecosystems. One of the most effective ways of building urban GI is through urban planning, but planners require evidence-based assessment tools and best practices in GI to aid their decision-making. This pilot project will develop protocols for the establishment of dedicated region/city-specific GI assessment schemes to aid climate change mitigation in cities.

The aim of the project is therefore to develop protocols to promote the creation, management and governance of GI. A secondary aim is to examine GI's potential role as a catalyst for engagement in increasing urban resilience in a number of contexts (within communities and organisations) in different urban socio-economic, climatic and cultural settings.

The purpose of the pilot project is to compile existing data and if necessary carry out further studies on the environmental impact of wind turbines, in particular their impact on bat and bird populations and their migration routes. On the basis of the data gathered, guidelines will be drawn up for large-scale implementation and, possibly, to serve as the basis for legislative proposals, with a view to mitigating — and where appropriate offsetting — the impact identified.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

The Coordination of Information on the Environment (Corine) programme was set up by the Commission in 1991 with the principal aims of defining and protecting biotopes, combating environmental pollution, mapping the different types of land cover and preserving the natural environment. The database resulting from the programme was subsequently replaced by the European Union Nature Information System (EUNIS) database, which contains an inventory of European habitats (natural, near-natural, artificial, terrestrial and aquatic) and serves as the basis for Union nature legislation (Natura 2000).

However, that inventory does not include the species and habitats to be found in the French outermost regions (Martinique, Guadeloupe, French Guiana, Réunion and Mayotte), each of which has its own highly specific biological and ecological features and a very large proportion of endemic species.

The purpose of this pilot project is to use the same tools as the Corine Biotope and EUNIS programmes to compile an inventory of species and habitats and environmentally sensitive areas in these regions, which number among the world's biodiversity hotspots. A new common database of this kind is necessary in order to identify any gaps in knowledge and to take the action required in order to preserve the biotope of these regions, along the lines of that taken for the other Union regions.

Remarks

Action 5 of the EU Biodiversity Strategy urges Member States to map and assess the state of ecosystems and their services in their national territory. A Working Group on Mapping and Assessment of Ecosystems and their Services (MAES) was established in 2012, but a look at the MAES Digital Atlas clearly shows that ongoing efforts are mainly focused on continental Europe, with some mapping already produced for Macaronesia. This is in contrast with the biodiversity richness of the outermost regions (ORs) and overseas countries and territories (OCTs), which host, for instance, more endemic species than the entire European continent. Europe's overseas entities should therefore, in their own right and given the international commitments of the Union, be central to the MAES initiative. There are several reasons why this is not happening, including insufficiency of land cover/land use datasets, the logistical difficulties of working in small dispersed areas, the linguistic and political barriers and the scarceness of local human capacities.

The ecosystem profiles developed by BEST (voluntary scheme for Biodiversity and Ecosystem Services in the territories of the Union's outermost regions and overseas countries and territories) for all ORs and OCTs confirm the large gaps in biodiversity knowledge which are a major obstacle for the production of satisfactory mapping and assessment of ecosystems. Clearly, there is a need for the development of methodologies adapted to the realities of the Europe's overseas entities. They should make extensive use of local knowledge harnessed through the collaborative tools which NetBiome-CSA has made available and the network it has created.

This pilot project will involve policymakers, researchers and civil society in the development of methodologies for mapping and assessing the state of ecosystems and their services in ORs and OCTs. A coordinated and synergistic approach is advocated so as to turn the geographical, political and knowledge base fragmentation of these entities into assets, pooling resources and building robust participatory tools. The project will start by assessing the state of the art of the MAES exercise within the participating overseas entities, and by inventorying and substantiating the human and material capacities present in each of them. It can build on the inventory of species and habitats and the MAES experience planned under the pilot project entitled 'Inventory of species and habitats in the French outermost regions' adopted under the 2016 budget (Item 07 02 77 34). It will then choose as case studies a specific region and a particular contribution on which to focus the work of a dedicated team of local experts, policymakers and civil society members pooled from across the OR and OCTs.

In addition to producing a tangible contribution for the MAES exercise, this project will demonstrate the feasibility and the added value of a bottom-up approach, involving and empowering local actors. If successful, this project will allow testing and implementation of the MAES methodology in different regions of the world, providing methodologies and good practice guidelines and contributing to worldwide Union leadership in this area.

Remarks

This pilot project will provide financial support for the development of a new 'Network of European Green Cities' (comprising European Green Capital Winners and cities shortlisted for the award) in order to share their experiences, knowledge and expertise on sustainable urban development with other European cities. The network will promote environmental sustainability in European cities through a series of specific actions to help all cities – from 'greener' cities to those whose environmental performance is less advanced – to take further steps towards genuine sustainability.

Each year since 2010, the Union has awarded the title of European Green Capital to a city in the Union which has a consistent record of achieving high environmental standards, is committed to ongoing and ambitious goals for further environmental improvement and sustainable development, and can act as a role model to inspire other cities and promote best practices for all other European cities. While winning cities take some action throughout the year to promote the concept of the green city, their budget and scope for Europe-wide dissemination is very limited.

The idea of this project is to draw on the wide range of lessons learnt from all the previous applicants considered worthy of consideration for the award and to consolidate these valuable experiences and communicate them to other cities, so that they might be inspired by such actions and understand what was involved in putting them in place. In effect this will be about enhancing the impact of the European Green Capital Award in the long term and to achieve spill-over effects for the benefit of entire regions and countries.

This project will go beyond simply organising the exchange of examples of good practice (although this is an important element of it) and will also seek to develop a specific set of tool kits and education materials that different types of city administration wishing to take steps towards becoming more sustainable could use. These tools will be combined with strategically targeted seminars, workshops and/or conferences, aimed at maximising the environmental benefits of the work (i.e. based on an analysis of where in the Union such experience could most usefully be disseminated to greatest effect). The pilot project will also need to provide the necessary appropriations to finance the setting up and running of the network.

As a starting point the cities to be invited to join the 'Network of European Green Cities' will be:

(a) former winners of the award: Stockholm (2010); Hamburg (2011); Vitoria-Gastiez (2012); Nantes (2013); Copenhagen (2014); Bristol (2015); Ljubljana (2016); and Essen (2017);

(b) former runners-up: Amsterdam, Freiburg, Münster, Oslo, Barcelona, Malmö, Nuremberg, Reykjavik, Frankfurt, Brussels, Glasgow, Nijmegen, 's-Hertogenbosch and Umeå.

All future winners and runners-up will be invited to join. Management of the network's membership will be handled by the Commission.

Remarks

One of the most critical urban air quality issues in Europe, particularly in Central and Eastern Europe, is the frequent incidence of high levels of respirable particulate matter (PM10/PM2,5), far above Union limit values. Direct links have been established between exposure to high concentrations of particulate matter and premature cardiovascular and respiratory deaths, as well as increased sickness, such as childhood respiratory diseases. Air pollution as a whole, as well as particulate matter (PM) as a separate component of the air pollution mix, were recently classified as carcinogenic. Furthermore, the specific hazard associated with particulate matter is generally linked to the presence of toxic metals and hundreds of carcinogenic, mutagenic or toxic organic compounds.

Conventional sources of primary particulate matter such as engine exhausts and industrial processes are reasonably well regulated by now and, except for a few super-emitters, contribute relatively little to urban air pollution. In winter, however, when most breaches of air quality standards occur, burning of solid waste in households represents a substantial source of hazardous particulate matter not only in cities but also in small settlements. Earlier analyses seem to estimate that about one third of solid waste is burned in households. Possibly many tons of tyres, clothes, construction waste, paints and litter may end up in residential stoves. Waste burning generates super-emission of PM in residential areas, potentially exposing many people to very high concentrations of extremely hazardous particulate matter. Soot loaded with lead, mercury, cadmium and other toxic metals, pesticides, hydrochloric acid, isocyanates and polycyclic aromatic hydrocarbons are emitted in large amounts causing adverse acute and chronic health effects in sensitive individuals.

This issue is especially critical in poverty-stricken districts and regions, but due to the nature of atmospheric pollution it affects vast areas under unfavourable meteorological conditions. Severe loss of GDP is anticipated due to the impact of solid waste smoke on the health of large populations, including associated loss in labour productivity as well as health care costs. The problem is expected to become more severe by increasing energy poverty in many parts of Europe. Effective measures are needed to assess the magnitude of the problem and reduce its impact.

The major objectives of the project are the following:

(1) to carry out scientific research to determine the magnitude and source contribution of residential solid waste burning to particulate pollution in different regions of Central, Eastern and Southern Europe;

(2) to distinguish waste burning practice in urban and rural areas and its effects on local air quality;

(3) to identify the predominant source types of solid waste burned by regions (agricultural, waste from (coal) mining, clothing, construction waste, tyre, etc.);

(4) to map hotspots in the regions where residential waste burning is of particular concern;

(5) to assess the relation between poverty and residential solid waste burning, to survey public awareness on the issue;

(6) to raise public awareness by specific campaigns (messages, scope, etc.) and identify potential measures to address this issue, including effective legislation control and enforcement.

Key words: Air pollution, particulate matter (PM), air quality standards, limit exceedance, solid waste burning, households, residential stoves, smoke, health hazard, heavy metals, carcinogenic compounds, toxicity, public awareness, energy poverty, poverty-stricken regions, GDP loss, mitigation, legislation, improvement of air quality

Remarks

The objective of this pilot project is to put in place a tool for evaluation of pesticide exposure in the environment with the help of bees and bee products. This approach combines environmental contaminant monitoring with animal health and food safety and security.

Honey bees come into contact with diverse environmental matrices due to their biological needs and behaviour. As a result of their foraging behaviour bees cover large areas (up to 15 km radius). Numerous plants are visited every day to collect nectar, secretions from sap-feeding insects, pollen and water, while plant gums are collected for propolis production. While flying they also come into contact with airborne particles, which stick to their body hairs, or substances diluted in the air. Scattered studies have been performed using bees and beekeeping products as biological 'monitoring instruments' to measure environmental quality. Various levels of environmental monitoring with honey bees have already been described, differing in their degree of complexity and sensitivity.

Concerned about honey bee colony losses, beekeepers and scientists in specific areas of Europe started analysing the pesticide content of bees and bee products. The results are often the same: bees are exposed to a wide variety of contaminants simultaneously and consecutively. Surprisingly, on many occasions the pesticides detected were not authorised, while in others they were found in natural areas away from the sources of contamination.

This pilot project is a citizens' science project in which beekeepers from several countries in Europe will collect weekly pollen samples during two beekeeping seasons. Pollen and pesticide analyses will serve to establish the botanical origin and contamination of the samples, respectively. Analytical data will be put in a geospatial context, aiming to understand the possible sources of both bee food and contaminants. In specific cases, fresh honey samples may be collected in order to understand possible contamination of honeydew. In addition, in specific cases a field survey may be carried out among farmers operating in the area with a radius of 3 km around the sampled apiary in order to know in depth the agricultural practices performed. Analysis will screen for both authorised and non-authorised pesticide and veterinary products, which will allow evaluation of the implementation of Union legislation in terms of pesticide application. The project would last 30 months, to include two years of sampling to cover data fluctuations.

Remarks

The four main large carnivore species in Europe - brown bear, wolf, Eurasian lynx and wolverine - are among the most challenging groups of species in conservation terms. The Commission has made significant efforts to understand both their biological needs and the conflicts between stakeholders. There is a wide range of conflict mitigation experience available, ranging from local knowledge of traditional animal husbandry and hunting practices to the latest in high-tech research, including from projects applied locally and co-funded by the Union LIFE programme. In 2012, a prioritising exercise involving multiple experts and stakeholders allowed the establishment of cross-cutting and species-specific 'key actions' for each large carnivore population. In summer 2014, the EU Platform on Coexistence between People and Large Carnivores was established to allow farmers, herders, conservationists, hunters, landowners and scientists to exchange ideas and best practices. The mission of the platform is 'to promote ways and means to minimise, and wherever possible, find solutions to, conflicts between human interests and the presence of large carnivore species, by exchanging knowledge and by working together in an open-ended, constructive and mutually respectful way.'

The Union-level platform faces a serious challenge in transmitting the good practices discussed to, and cooperation with, the stakeholders coexisting with large carnivores on the ground. Its members lack the resources to engage fully in communicating with their own members or to travel to regional meetings. In order to tackle the main coexistence problems at their sources, similar groupings are needed locally. At the same time, making the link to the Union level and improving communication both vertically and horizontally between governance levels in order to effectively transmit information is essential. The objective of this project will therefore be to establish several pilot local or regional groupings of stakeholders based on the model of the EU platform. Experience from other regional platforms, e.g. established through LIFE projects, will be built upon.

CHAPTER 07 02 — ENVIRONMENTAL POLICY AT UNION AND INTERNATIONAL LEVEL *(cont'd)*

07 02 77 *(cont'd)*

07 02 77 39 *(cont'd)*

Methods and requirements

— Select two areas in Europe for the pilot studies where there are serious conflicts involving coexistence between humans and large carnivores and where few solutions have been tested.

— Establish a regional Platform on Coexistence between People and Large Carnivores involving a grouping of stakeholders representing the main interest groups active in the area, referencing the EU platform's agreement as a starting point and taking into account experience of other regional platforms.

— Using the 'Key actions for large carnivore populations in Europe' as a basis, carry out a prioritisation exercise with stakeholders to establish which key actions have the greatest potential to be implemented in which locations. The focus will be on actions relating to conflict resolution, communication, reducing socio-economic problems and establishing win-win socio-economic benefits in line with the objectives of the Union Nature Directives and the EU 2020 biodiversity strategy.

— Support the implementation of two or three actions (funded through the pilot project).

In order to drive forward the action, a key beneficiary will be responsible for coordinating the action, taking steps to identify and establish local platforms and managing interaction between the Union and regional platforms. The key beneficiary will manage a budget for each regional platform to encourage stakeholder participation, support individual members on study trips or attending regional meetings and funding the key actions decided upon by the regional platform. Ensuring appropriate mediation, including in the selection of platform members, will also be important.

CHAPTER 07 02 — ENVIRONMENTAL POLICY AT UNION AND INTERNATIONAL LEVEL *(cont'd)*

Remarks

The Commission recently conducted a fitness check on the BHD to evaluate them in accordance with five criteria: effectiveness, efficiency, coherence, relevance, and Union added value. The evaluation revealed that key barriers to BHD performance relate to insufficient implementation, poor integration and conflicts with other policies and economic sectors, and insufficient cooperation among relevant stakeholders and organisations. Knowledge gaps and insufficient access to information have been identified as significant problems by stakeholders in implementation, including in relation to the effectiveness and efficiency of site and species permitting under the directives. Additionally, the collation and analysis of case studies, tools and recommendations for improving the BHD's implementation was beyond the scope of the fitness check.

The pilot project will fill that gap and help improve BHD implementation through systematically collecting and analysing the knowledge, evidence, tools and principles that can help improve BHD performance.

In view of the vast experience gained by scientists and other knowledge-holders across the Union, an effective way forward is therefore to conduct a systematic review and meta-analysis, and to develop a comprehensive set of guidelines for better implementation. Current approaches to do so could be complemented by having the scientific community co-produce the necessary knowledge base as a cost-effective way to maximise comprehensiveness, geographical representation and quality.

The pilot project will focus on conducting such a systematic review and developing the first steps towards a preparatory action to implement the proposed improvements. Key elements of the review will be:

(a) to generate a comprehensive database of peer-reviewed publications and other knowledge across all Member States, collecting and organising tools, principles, guidelines, recommendations and case-study experiences indicating how to improve BHD implementation. The database will build on, and extend, the existing literature database already collected during the fitness check and will include categorisation based on scale, geography and policy relevance;

(b) to assess how:

— effectiveness could be enhanced in terms of planning, management and monitoring;

— cost-efficiency could be improved by reducing conflicts and improving use of existing funds;

— other Union policies affect BHD implementation and where improvements can be made with a view to reducing conflicts and increasing policy integration;

— enforcement mechanisms and administration can be improved to maximise the Union's role in effective implementation of the BHD;

(c) to conduct workshops to collate knowledge, discuss options, interpret the application of the evidence, create evidence-based guidance and identify future knowledge needs (five workshops totalling at least 100 participants);

CHAPTER 07 02 — ENVIRONMENTAL POLICY AT UNION AND INTERNATIONAL LEVEL *(cont'd)*

07 02 77 *(cont'd)*

07 02 77 40 *(cont'd)*

(d) to conduct a robust meta-analysis of the outcomes, including a quantitative comparison of the cost-effectiveness and cost-efficiency of different policy instruments;

(e) to generate a set of carefully regionalised, scale-sensitive, non-prescriptive recommendations;

(f) to open the recommendations for discussion and a peer review by the scientific community in order to maximise outcome quality and transparency, and subsequently enhance cooperation with all relevant stakeholders.

Remarks

Animal testing is used in Europe for four different purposes: basic research, applied research, toxicology and teaching.

Directive 2010/63/EU lays down a European framework for the protection of animals used for scientific purposes, making it a legal requirement to comply with the 3R principle (replacement, reduction, refinement).

As is set out in recital 28 of that Directive, the welfare of the animals used in procedures is highly dependent on the quality and professional competence of the personnel supervising procedures, as well as of those performing procedures or supervising those taking care of the animals on a daily basis. It is therefore imperative that, as regards animal welfare issues, the personnel responsible for those tasks in Member States should be properly informed, trained and proficient and that they should have access to all relevant information, tools and know-how needed to be able to make use of alternatives to animal testing.

One of the main obstacles to developing and using alternatives is the lack of linkage and of information pooling between scientific domains, thus preventing existing methods from being taken forward and used by animal testers.

COMMISSION
TITLE 07 — ENVIRONMENT

CHAPTER 07 02 — ENVIRONMENTAL POLICY AT UNION AND INTERNATIONAL LEVEL *(cont'd)*

07 02 77 *(cont'd)*

07 02 77 41 *(cont'd)*

The purpose of the project is to promote the use of alternatives to animal testing in the Union. Additional resources need to be marshalled and better coordinated in order to foster greater use of alternatives, with a view initially to reducing the number of animals used and, ultimately, to ending the practice altogether.

In expanding the remit and resources of existing bodies (e.g. ECVAM), the pilot project seeks to improve information and knowledge exchange between the scientific community, Union agencies, national authorities and users of animal testing in Member States, reflecting the policy approach taken by the Union in introducing Directive 2010/63/EU.

It aims actively to promote existing alternatives to animal testing, facilitate validation of new alternative methods, organise information campaigns, foster exchanges of information, knowledge and best practices between scientists and authorities in Member States on existing methods, on how to use them and on what is needed to develop new methods or improve existing ones.

In expanding the remit and resources of the Education and Training Platform for Laboratory Animal Science (ETPLAS), the pilot project also seeks to offer specific training courses, including on-line courses, not only for scientists, depending on their area of work (e.g. basic research or toxicology), doctors and veterinarians, but also for industry stakeholders.

The pilot project should also provide a forum for discussion and proposals, with a view to encouraging and optimising scientific research in order to develop alternatives, establish linkage between the Union regulatory set-up and national set-ups, and move towards making alternative methods in the Union more effective.

It should have a pivotal role to play in implementing current legislation and in realising the objective, shared by the Commission, of ultimately replacing animal testing by alternative methods.

RESEARCH AND INNOVATION

Remarks

These remarks apply to all the budget lines in this title.

Research and innovation activities under this title will contribute to two main research programmes, i.e. Horizon 2020 and Euratom. It will also cover research programmes of the research fund for coal and steel.

It will be carried out in order to pursue the general objectives set out in Article 179 of the Treaty on the Functioning of the European Union, in order to contribute to the creation of a society of knowledge, based on the European Research Area, i.e. supporting transnational cooperation at all levels throughout the Union, taking the dynamism, creativity and the excellence of European research to the limits of knowledge, strengthening human resources for research and for technology in Europe, quantitatively and qualitatively, and research and innovation capacities in the whole of Europe and ensuring optimum use thereof.

In Horizon 2020, gender equality is addressed as a cross-cutting issue in order to rectify imbalances between women and men and to integrate a gender dimension in research and innovation content. Particular account will be taken of the need to step up efforts to enhance the participation at all levels, including decision making, of women in research and innovation.

Also entered against these articles and items are the costs of high-level scientific and technological meetings, conferences, workshops and seminars of European interest organised by the Commission, the funding of high-level scientific and technological analyses and evaluations carried out on behalf of the Union to investigate new areas of research suitable for Union action, inter alia, in the context of the European Research Area, and measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

These appropriations are also intended to cover administrative expenditure, including expenditure on staff, whether covered by the Staff Regulations or not, information, publications, administrative and technical operation, and certain other expenditure items relating to internal infrastructure linked with the achievement of the objective of the measure of which they form an integral part, including the action and initiatives necessary for preparation and monitoring of the Union's strategy on research, technological development and demonstration (RTD).

Revenue resulting from cooperation agreements between the European Atomic Energy Community and Switzerland or the multilateral European Fusion Development Agreement (EFDA) will be entered in Items 6 0 1 1 and 6 0 1 2 of the statement of revenue and may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

The possibility of third countries or institutes from third countries taking part in European cooperation in the field of scientific and technical research is envisaged for some of these projects. Any financial contribution will be entered in Items 6 0 1 3 and 6 0 1 5 of the statement of revenue and may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Any revenue from States taking part in the European cooperation in the field of scientific and technical research will be entered in Item 6 0 1 6 of the statement of revenue and may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

COMMISSION
TITLE 08 — RESEARCH AND INNOVATION

Any revenue from the contribution by outside bodies to Union activities will be entered in Item 6 0 3 3 of the statement of revenue and may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Additional appropriations will be made available under Items 08 02 50 01, 08 03 50 01 and 08 04 50 01.

Administrative appropriations of this title will be provided under Article 08 01 05.

Remarks

This appropriation is intended to cover the operating costs of the Executive Agency for Small and Medium-sized Enterprises incurred as a result of the Agency's role in the management of Horizon 2020 — the Framework Programme for Research and Innovation (2014-2020) and the Seventh Framework Programme of the European Community for research, technological development and demonstration activities (2007-2013).

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

The establishment plan of the Executive Agency is set out in Annex 'Staff' to this section.

Legal basis

CHAPTER 08 02 — HORIZON 2020 — RESEARCH *(cont'd)*

Remarks

These budgetary remarks are applicable to all the budget lines in this chapter.

This appropriation will be used for Horizon 2020 — the Framework Programme for Research and Innovation, which covers the 2014-2020 period and brings together all existing Union research and innovation funding, including the framework programme for research, the innovation related activities of the competitiveness and innovation framework programme and the European Institute of Innovation and Technology (EIT). The programme shall play a central role in the implementation of the Europe 2020 flagship initiative 'Innovation Union' and other flagship initiatives, notably 'A digital agenda for Europe' 'Resource-efficient Europe' and 'An industrial policy for the globalisation era', as well as in the development and functioning of the European Research Area (ERA). Horizon 2020 shall contribute to building an economy based on knowledge and innovation across the whole Union by leveraging sufficient additional research, development and innovation funding. The appropriation will be used also for the completion of the previous research programmes (Seventh Framework Programme and preceding framework programmes).

This appropriation will be used in accordance with the Regulation (EU) No 1290/2013 of the European Parliament and of the Council of 11 December 2013 laying down the rules for the participation and dissemination in 'Horizon 2020 — the Framework Programme for Research and Innovation (2014-2020)' and repealing Regulation (EC) No 1906/2006 (OJ L 347, 20.12.2013, p. 81).

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this chapter. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Any revenue from the contributions from candidate countries and, if applicable, the western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation.

08 02 01 Excellent science

Remarks

This priority of Horizon 2020 aims to reinforce and extend excellence in the Union's science base and ensure a steady stream of world-class research to secure the Union's long-term competitiveness. It will support the best ideas, develop talent within the Union, provide researchers with access to priority research infrastructure, and make the Union an attractive location for the world's best researchers. Research actions to be funded will be determined according to the need and opportunities of science, without pre-determined thematic priorities. The research agenda will be set in close liaison with the scientific community and research will be funded on the basis of excellence.

Remarks

The fundamental activity of the European Research Council (ERC) shall be to provide attractive long-term funding to support excellent investigators and their research teams to pursue ground-breaking, high-gain/high-risk research. Particular priority shall be given to assisting excellent starting researchers to make the transition to independence by providing adequate support at the critical stage, when they are setting up or consolidating their own research team or programme. The ERC shall also give support, as necessary, to emerging new ways of working in the scientific world with the potential to create breakthrough results and facilitate exploration of the commercial and social innovation potential of the research which it funds.

Remarks

Activities under the 'Future and emerging technologies' (FET) specific objective shall support fundamental science and technology research exploring new future technologies by challenging current paradigms and venturing into unknown areas. In addition, FET activities shall address a number of promising exploratory research themes with the potential to generate a critical mass of inter-related projects that, together, make up a broad and multifaceted exploration of the themes and build a European pool of knowledge. Finally, FET activities shall support ambitious large-scale, science-driven research aiming to achieve a scientific breakthrough. Such activities will benefit from the alignment of European and national agendas.

Remarks

Research infrastructures activity will ensure the implementation and operation of the ESFRI (European Strategy Forum for Research Infrastructure) and other world-class research infrastructures, including the development of regional partner facilities, for 2020 and beyond. In addition, the integration of and access to national research infrastructures and the development, deployment and operation of e-infrastructures will be ensured. The activity will also encourage research infrastructures to act as early adopters of technology, promote research and development (R & D) partnerships with industry, facilitate industrial use of research infrastructures and stimulate the creation of innovation clusters.

08 02 02 ***Industrial leadership***

Remarks

This priority of Horizon 2020 aims to make the Union a more attractive location to invest in research and innovation, by promoting activities where businesses set the agenda as well as at accelerating the development of new technologies which will underpin future businesses and economic growth. It will provide major investment in key industrial technologies, maximise the growth potential of Union companies by providing them with adequate levels of finance and help innovative SMEs to grow into world-leading companies.

Remarks

Leadership in enabling and industrial technologies shall provide dedicated support for research, development and demonstration on nanotechnology, advanced materials, biotechnology and advanced manufacturing and processing. Emphasis will be placed on interactions and convergence across and between the different technologies. In addition, emphasis shall be on R & D, large-scale pilots and demonstration activities, test beds and living labs, prototyping and product validation in pilot lines. Activities shall be designed to boost industrial competitiveness by stimulating industry, and in particular SMEs, to make more research and innovation investment.

Remarks

The aim of this activity is to help companies and other types of organisation engaged in research and innovation (R & I) to gain easier access, via financial instruments, to loans, guarantees, counter-guarantees and hybrid, mezzanine and equity finance. Debt and equity facilities will be run in a demand-driven manner, though the priorities of particular sectors or of other Union programmes will be targeted if top-up funding is made available. The focus is on attracting private investments into R & I. The European Investment Bank (EIB) and the European Investment Fund (EIF) will play an important role, as entrusted entities, in implementing each financial instrument facility on behalf of and in partnership with the Commission. Part of this appropriation will be used to reinforce, in the form of paid-in capital, the EIF's capital base.

Remarks

To support the participation of SMEs in Horizon 2020 a dedicated market-oriented instrument has been introduced, targeting all types of innovative SMEs that wish to develop, grow and internationalise. In addition, support will be provided to research intensive SMEs in transnational research projects and to women-led start-ups. Activities enhancing the innovation capacity of SMEs and improving the framework conditions for innovation will also be supported.

In accordance with Regulation (EU) No 1291/2013, support will be provided to innovation in SMEs through the implementation of an SME instrument under a single management system and implemented in a bottom-up manner. In accordance with Annex II to that Regulation within the target of allocating a minimum of 20 % of the total combined budgets for the specific objective 'Leadership in enabling and industrial technologies' and the priority 'Societal challenges' for SMEs, a minimum of 5 % of those combined budgets will be initially allocated to the dedicated SME instrument. A minimum of 7 % of the total budgets of the specific objective 'Leadership in enabling and industrial technologies' and the priority 'Societal challenges' will be allocated to the dedicated SME instrument averaged over the duration of Horizon 2020.

08 02 03 ***Societal challenges***

Remarks

This priority of Horizon 2020 responds directly to the policy priorities and societal challenges identified in the Europe 2020 strategy. Those activities will be implemented using a challenge-based approach which brings together resources and knowledge across different fields, technologies and disciplines. The activities will cover the full cycle from research to market, with a new focus on innovation-related activities such as piloting, demonstration, test beds, support for public procurement, design, end-user driven innovation, social innovation and market take-up of innovations. The activities will support directly the corresponding sectoral policy competences at Union level and take a gender-sensitive approach while aiming for balanced participation of men and women.

Remarks

Lifelong health and well-being for all, high-quality and economically sustainable health and care systems, with health care becoming more personalised for more efficacy, and opportunities for new jobs and growth in the health sector and its related industries are the aims of this activity. To that respect activities will focus on effective health promotion and disease prevention (e.g. understanding the determinants of health, developing better preventive vaccines). Particular attention will be paid to gender- and age-related health specificities. In addition, emphasis will be placed on managing, treating and curing disease (notably via an increased personalisation of medicine), disability and reduced functionality (e.g. by transferring knowledge to clinical practice and scalable innovation actions, better use of health data, independent and assisted living). Furthermore, efforts will be made to improve decision-making in prevention and treatment provision, identify and support the dissemination of best practice in the health care sector, and support integrated care and the uptake of technological, organisational and social innovations empowering in particular older persons as well as disabled persons to remain active and independent. Finally, activities will be based on a gender-sensitive approach that recognises, amongst other things, the position of women in both the informal and the formal care sector.

Remarks

Research efforts to ensure a secure, clean and efficient energy supply will focus on reducing the Union's energy consumption and carbon footprint and on securing a low-cost, low-carbon electricity supply. These efforts will build on the objectives and priorities of the Energy Union and the Strategic Energy Technology (SET) Plan.

Activities will focus on the research, development and full-scale demonstration of innovative renewables and carbon capture and storage technologies. Activities will also focus on multidisciplinary research of energy technologies and on the joint implementation of pan-European research programmes and world-class facilities. Furthermore, tools, methods and models for robust and transparent policy support will be developed and market uptake of energy innovation will be promoted.

Under this activity emphasis will be placed on resource-efficient transport (e.g. accelerating the development and deployment of a new generation of electric and other low or zero emission aircraft, vehicles and vessels) as well as on better mobility with less congestion and more safety and security (e.g. promoting integrated door-to-door transport and logistics). The focus will also be on reinforcing the competitiveness and performance of European transport manufacturing industries and related services, by, for instance, developing the next generation of innovative transport means and preparing the ground for the following one. Activities aiming at improving the understanding of transport-related socioeconomic trends and prospects, and at providing policymakers with evidence-based data and analyses will also be supported.

Remarks

The main focus of this activity is to achieve a resource-efficient and climate change resilient economy and a sustainable supply of raw materials in order to meet the needs of a growing global population within the sustainable limits of the planet's natural resources. To that respect emphasis will be placed on fighting and adapting to climate change, on sustainably managing natural resources and ecosystems and on enabling the transition towards a green economy through eco-innovation. Comprehensive and sustained global environmental observation and information systems will also be developed.

Remarks

The aim of this activity is to contribute to making European societies more inclusive, innovative and reflective, by promoting smart, sustainable and inclusive growth. Actions will support coordinated policymaking through the development of evidence, tools, forward-looking activities and pilots to increase transnational efficiency and economic impact of research and innovation policies and achieve a well-functioning European Research Area and Innovation Union. Actions will also aim at closing the innovation divide, ensuring societal engagement in research and innovation and fostering gender balance in research teams, promoting coherent and effective cooperation with third countries and developing an understanding of Europe's intellectual basis: its history and the many European and non-European influences, as an inspiration for our lives today.

Remarks

The aim of those activities is to fully exploit the potential of Europe's talent pool and to ensure that the benefits of an innovation-led economy are both maximised and widely distributed across the Union in accordance with the principle of excellence. By nurturing and connecting pools of excellence, the activities proposed will contribute to strengthening the European Research Area.

The activities will focus on teaming of excellent research institutions and low-performing RDI regions aiming at the creation of new (or significant upgrade of existing) centres of excellence in low performing RDI Member States and regions, twinning of research institutions, establishing 'ERA Chairs', a Policy Support Facility to improve the design, implementation, and evaluation of national/regional research and innovation policies, supporting access to international networks for excellent researchers and innovators who lack sufficient involvement in European and international networks and strengthening the administrative and operational capacity of transnational networks of national contact points, including through training.

The Clean Sky 2 Joint Undertaking, a joint undertaking (JU) between the Commission and the European aeronautical industry, will build up on the results of its predecessor, Clean Sky. Clean Sky 2 JU's objective is to improve the environmental impact of European aeronautical technologies through advanced research and full-scale demonstration in green technology for air transport, thus contributing to the future international competitiveness of the aeronautical sector. The technical activity is developed through different technical areas and aims at building full scale demonstrators in all flying segments.

Remarks

The Fuel Cells and Hydrogen 2 (FCH 2) Joint Undertaking (JU), a public private partnership between the Commission, the industry and the Research Grouping, will build up on the results of its predecessor, set up under the Seventh Framework Programme. FCH 2 JU's objective is to tackle a series of obstacles to the commercialisation of fuel cells and hydrogen technologies by reducing the cost of FCH systems, increasing their efficiency and demonstrating their feasibility, thus paving the way for a strong, sustainable and globally competitive fuel cells and hydrogen sector in the Union. This appropriation is intended to cover the operational costs of the FCH 2 JU.

FCH 2 JU shall contribute to the implementation of Horizon 2020 and, in particular, of the specific objectives 'Making the transition to a reliable, affordable, publicly accepted, sustainable and competitive energy system' and 'Achieving a European transport system that is resource-efficient, environmentally friendly, safe and seamless' of the priority 'Societal challenges'.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

In the context of the unfinished agenda of the Millennium Development Goals (MDG), stepping up maternal immunisation for pregnant women and their babies, to protect them from diseases that cause substantial morbidity and mortality, such as malaria, HIV, tuberculosis, influenza and tetanus, represents a unique opportunity to effectively advance women's and children's health (MDGs 4 and 5) in a cost-effective and equitable fashion. Vaccines are among the most effective preventive tools available to date for reducing infectious diseases and their complications and sequelae. Most diseases that can be prevented with vaccines in pregnancy have the greatest and most serious impact on mothers and infants in low-income countries.

CHAPTER 08 02 — HORIZON 2020 — RESEARCH *(cont'd)*

08 02 77 *(cont'd)*

08 02 77 05 *(cont'd)*

Maternal immunisation is a promising approach in which pregnant women are vaccinated in order to protect newborns who are too young to be vaccinated themselves. Neonatal mortality includes an estimated 600 000 infection-related deaths per year, a proportion of which may be addressed through maternal immunisation. In addition, maternal immunisation may address a proportion of the estimated 965 000 deaths from pre-term birth and prevent a proportion of the 10-50 % of stillbirths estimated to be caused by infectious disease.

In contrast, the evidence currently available from the areas concerned on the burden of diseases that can be prevented through maternal immunisation and on the safety and efficacy of vaccines in pregnant women is incomplete and poor. The generation of good data and robust evidence on the burden of vaccine-preventable diseases in pregnancy and infancy in low-income countries is vital and is a prerequisite for the future definition of a road map for maternal immunisation policies in those areas.

Goal: to determine the burden of vaccine-preventable diseases in pregnant women and their infants in low-income countries and assess the impact of co-morbidities such as HIV, tuberculosis and Chagas disease on this burden.

Objectives: capitalising on recent evidence, the pilot project will quantify the burden of vaccine-preventable diseases (with a primary focus on Guillain-Barré Syndrome, respiratory syncytial virus, pertussis, influenza, tetanus and rubella) in pregnant women and their infants and to study how this burden in pregnant women is modified by co-morbidities such as infection by HIV, tuberculosis or joint HIV-tuberculosis infection in representative sites in sub-Saharan Africa, Latin America and the Caribbean.

The pilot project may also help to foster evaluation of licensed vaccines and vaccines under development for pregnant women in low-income countries, where these vaccines are most needed (i.e. it can help build a maternal influenza immunisation platform including antenatal care in developing countries), address obstacles to maternal immunisation, and contribute to the definition of a roadmap on maternal immunisation policies and inform priority setting in these contexts. Moreover the project is timely, given the momentum among global health stakeholders as regards the impact of immunisation and the fact that, throughout the next decade, low- and middle-income countries will be introducing new life-saving vaccines into their routine immunisation programmes. The project may trigger public-private collaboration and North-South research cooperation.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

The proposed research is completely new in so far as it synchronously combines highly resolved acoustical (medium to far field) and optical (near field) imaging (low light, high frequencies) through a blending and calibration mechanism to translate the information from the near field into the far field and vice versa. This is to quantify fish abundance, biomass, and diversity in key areas as well as other MSFD indicators (through a further set of (environmental) instrumentation). Instead of snapshots (as generated like in regular surveys) 'videos' will be produced, where the assessment method will be following international (ICES) standards. The complete system is anticipated to work autonomously, continuously and non-invasively in an event based mode to save energy.

As a research platform an opto-acoustic lander hardware (underwater fish observatory, UFO) will be provided by the research institute at no cost for the project, for optimising the pattern recognition algorithms and related research.

The indicated amount covers inter alia the costs for biometrical measurements of fish, modelling of fish age-, length-, biomass-, volume-to-photo/video relationships, quantification of the reef effect through tagging experiments, calibration (integration) of biological results with those from acoustics and optics, optimisation of survey design from a biological perspective, migration and single fish separation (medium to far field fish tracing), event based control of the full instrumentation, distance estimation (near field stereo-metrics), fish separation (near field fish tracing) and calibration (integration) of optical results with those from acoustics and biology.

Remarks

An important question that has emerged in recent years concerns clitoral reconstruction after female genital mutilation (FGM). Clitoral reconstruction is a relatively new surgical technique and in spite of the interest in the surgery, evidence is lacking as to its safety and effectiveness. Short- and long-term complications rates and long-term outcomes, including sexual function, body self-image and gender, social and aesthetic identity have been repeatedly indicated as future research gaps. More specifically, it is unclear which women could benefit from this surgical intervention and who might be better off with alternative care such as psycho-sexual therapy.

The project will answer the question below. Firstly, the existing (non-official) guidelines, protocols and good practices in the Union will be individualised and analysed. Secondly, complications rate, postoperative sexual desire, sexual function, vulvar pain, body self-image and gender identity will be studied through the use of a validated and standardised tool in women who have undergone the surgery, or will in the course of the project, and women who have not. Finally, recommendations for best practices for a care pathway will be developed for clitoral reconstruction in the Union.

CHAPTER 08 03 — EURATOM PROGRAMME — INDIRECT ACTIONS *(cont'd)*

Remarks

The Euratom research and training programme (2014-2018) ('Euratom Programme') complements Horizon 2020 in the field of nuclear research and training. Its general objective is to pursue nuclear research and training activities with an emphasis on continually improving nuclear safety and radiation protection, notably to contribute to the long-term decarbonisation of the energy system in a safe, efficient and secure way. By supporting this research, the Euratom Programme shall reinforce outcomes under the three priorities of Horizon 2020: excellent science, industrial leadership, and societal challenges.

The indirect actions of the Euratom Programme are focused on two areas: nuclear fission, safety and radiation protection, and fusion research and development programme.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation.

08 03 01 Operational expenditure for the Euratom Programme

Remarks

The scope of the Euratom Programme for indirect actions includes nuclear fission safety and radiation protection as well as the fusion research and development which aim to ensure the success of the ITER project while enabling Europe to reap its benefits. It will reinforce outcomes under the three priorities of Horizon 2020: excellent science, industrial leadership and societal challenges.

Remarks

The Euratom activity in the field of fusion will support common research activities undertaken by the fusion stakeholders involved in the implementation of the tasks derived from the fusion roadmap. In addition, it will support joint activities to develop and qualify materials for a demonstration power plant as well as to address reactor operation issues and develop and demonstrate all relevant technologies for a fusion demonstration power plant. The activity will also implement or support knowledge management and technology transfer from the research co-funded by this programme to industry, exploiting all innovative aspects of the research. Furthermore, the activity will support the construction, refurbishment, use and continued availability of key research infrastructures under the Euratom Programme.

Remarks

The Euratom activity in the field of nuclear fission will provide support to joint research activities concerning the safe operation of reactor systems in use or which may be used in the future in the Union. It will also contribute to the development of solutions for the management of ultimate nuclear waste. In addition, the activity will support joint and/or coordinated research activities, placing emphasis on the risks from low doses from industrial, medical or environmental exposure. Furthermore, Euratom fission will promote joint training and mobility activities between research centres and industry as well as between different Member and Associated States while it will provide support for maintaining multidisciplinary nuclear competences.

CHAPTER 08 03 — EURATOM PROGRAMME — INDIRECT ACTIONS *(cont'd)*

08 03 51 *(cont'd)*

The programme covers two thematic areas:

Fusion research, which includes activities that range from basic research to technology development, construction of major projects and training and education activities. It offers the prospect of an almost limitless supply of clean energy, with ITER being the crucial next step in the progress towards this ultimate goal. The realisation of the ITER project therefore lies at the heart of the present Union strategy. It must be accompanied by a strong and focused European research and development programme on fusion to prepare for the exploitation of ITER and to develop the technologies and knowledge base that will be needed during ITER operation and beyond.

Fission research, which aims to establish a sound scientific and technical basis in order to accelerate practical developments for the safer management of long-lived radioactive waste, to promote safer, more resource-efficient and cost-effective nuclear energy and to ensure a robust and socially acceptable system of protection of man and the environment against the effects of radiation.

Remarks

The Research Fund for Coal and Steel funds every year innovative projects to enhance the safety, efficiency and competitive edge of the Union coal and steel industries. It was created in 2002 to build on the successes of the European Coal and Steel Community. The distribution of the budgets between coal (27,2 %) and steel (72,8 %) is defined in Council Decision 2003/76/EC of 1 February 2003 establishing the measures necessary for the implementation of the Protocol, annexed to the Treaty establishing the European Community, on the financial consequences of the expiry of the ECSC Treaty and on the Research Fund for Coal and Steel (OJ L 29, 5.2.2003, p. 22).

Remarks

This appropriation is intended to cover expenditure on studies, meetings of experts, information and publications directly linked to the achievement of the objectives of the programme or measures coming under this item, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts.

It is also intended to cover expenditure on technical and/or administrative assistance relating to the identification, preparation, management, monitoring, audit and supervision of the programme or actions.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes as entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations, according to the same ratio as between the amount authorised for expenditure on administrative management and the total appropriations entered for the programme, in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation.

Any revenue from the contributions from the countries of the European neighbourhood area in accordance with the procedures defined with those countries following the framework Agreements providing for their participation in Union programmes as entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations, according to the same ratio as between the amount authorised for expenditure on administrative management and the total appropriations entered for the programme, in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation.

Any revenue from the Swiss Confederation's contribution for participation in Union programmes entered under Item 6 0 3 3 of the statement of revenue may give rise to the provision of additional appropriations, according to the same ratio as between the amount authorised for expenditure on administrative management and the total appropriations entered for the programme, in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation.

Remarks

This appropriation is intended to cover expenditure on a set of measures designed to:

— coordinate a better regulatory framework for competition, investment and growth over the entire range of issues in the e-communications field: economic analysis, impact assessment, policy development, regulatory compliance,

— carry out and review the Union's policy on electronic communication networks and services with a view to launching initiatives designed to meet the challenges in this dynamically evolving sector (convergence of electronic communications with audiovisual and content delivery),

— facilitate the implementation of the digital single market, in actions related to broadband targets through regulation, policy and public financial assistance, including coordination with cohesion policy in the areas relevant to electronic communications networks and services,

— develop policies and coordination measures which will ensure that Member States implement their national broadband plans with reference to the fixed and mobile infrastructure and their possible convergence, including coherence and economic efficiency of public interventions at Union and Member State levels,

— develop policy and legislation with a particular focus on issues related to access and authorisation of e-communications networks and services, notably interoperability, interconnection, civil works, the independence of regulators and new measures to strengthen the single market,

— facilitate the monitoring and implementation of relevant legislation in all Member States,

— provide coordination of infringement proceedings, and input to relevant State aid matters,

— develop policy and legislation with a particular focus on issues related to retail and consumer issues notably net neutrality, switching, roaming, demand and use stimulation and universal service,

— develop and implement consistent market-based regulations to be applied by national regulatory authorities and to respond to individual notifications from those authorities, notably regarding relevant markets, competition and appropriate regulatory intervention, in particular for next generation access networks,

— develop policies across the board which will ensure that Member States manage all uses of spectrum, including the different internal market realms such as e-communications, broadband internet and innovation,

09 02 01 *(cont'd)*

— promote and monitor the implementation of the regulatory framework for communication services (including the mechanism provided for in Article 7 of Directive 2002/21/EC of the European Parliament and of the Council of 7 March 2002 on a common regulatory framework for electronic communications networks and services (Framework Directive) (OJ L 108, 24.4.2002, p. 33),

— enable third countries to pursue a policy of opening up their markets to the same extent as in the Union,

— promote and monitor the implementation of the radio spectrum policy programme (Decision No 243/2012/EU of the European Parliament and of the Council of 14 March 2012 establishing a multiannual radio spectrum policy programme (OJ L 81, 21.3.2012, p. 7)),

— develop policies on copyright at Union level, in particular on the online distribution of copyright protected content in the digital single market, including the assessment of legal and economic barriers stemming from the regulatory framework at Union or Member States level or from industry practices,

— develop, implement and monitor policies in the context of the digital single market, on e-commerce in the Union, in particular those related to Directive 2000/31/EC of the European Parliament and of the Council of 8 June 2000 on certain legal aspects of information society services, in particular electronic commerce, in the Internal Market ('Directive on electronic commerce') (OJ L 178, 17.7.2000, p. 1), including the assessment of legal and economic barriers stemming from the internal market framework for electronic commerce or from related measures,

— support actions to safeguard the continued stability and security of the internet governed by a genuine multi-stakeholder model to ensure that economic and social opportunities offered by electronic communications can be fully exploited,

— continue to implement the Commission Communication of 12 February 2014 entitled 'Internet Policy and Governance — Europe's role in shaping the future of Internet Governance' (COM(2014) 072 final), as well as to follow up on concrete calls expressed by the Member States in Council Conclusions on Internet Governance of 27 November 2014 and by European Parliament in its resolution of 11 February 2015 on the renewal of the mandate of the Internet Governance Forum (2015/2526(RSP)),

— continue to ensure financial support for the Internet Governance Forum, as well as ensuring financial support for the Pan-European dialogue on Internet Governance (EuroDIG) to secure their financial stability and therefore their operational viability; this also includes financial support for different initiatives related to raising the impact of both fora,

— promote the importance of ICTs in the development of the post-2015 sustainable development goals, including through capacity and confidence-building measures in the area of electronic communications addressed at third countries.

The specific objectives of those measures are:

— the formulation of a Union policy and strategy in the field of communication services and networks (including convergence between electronic communications and audiovisual environments, aspects related to the internet, etc.),

— the development of radio spectrum policy in the Union,

CHAPTER 09 02 — DIGITAL SINGLE MARKET *(cont'd)*

09 02 01 *(cont'd)*

— the development of activities in the mobile and satellite communications sector, particularly as regards frequencies, and demand stimulation,

— an analysis of the situation and the legislation adopted in these areas, as well as State aid decisions,

— an analysis of the financial state of play and investment intensities in the sector,

— the coordination of these policies and initiatives as regards the international environment (e.g. WRC, CEPT, etc.),

— the development of activities and initiatives in relation to the digital single market,

— the development of activities and initiatives in relation to cohesion policy,

— the development and maintenance of the database in relation to the radio spectrum policy programme and other actions related to monitoring and the implementation of the programme,

— the promotion and further advancement of the Union's vision of the multi-stakeholder model of Internet governance.

Those measures consist, inter alia, in preparing analyses and progress reports, consulting stakeholders and the public, preparing communications, legislative proposals and monitoring the application of legislation, and translations of notifications and consultations under Article 7 of Directive 2002/21/EC.

This appropriation is also intended to cover, in particular, contracts for analysis and expert reports, specific studies, evaluation reports, coordination activities, grants and the part-financing of certain measures.

In addition, it is also intended to cover expenditure on meetings of experts, communication events, membership fees, information and publications directly linked to the achievement of the objectives of the policy or measures coming under this article, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts.

Remarks

This appropriation is intended to cover the Agency's staff and administrative expenditure (Titles 1 and 2) and operational expenditure relating to the work programme only (Title 3).

The Agency was set up to enhance the capability of the Union, the Member States and, as a consequence, the business community to prevent, address and respond to network and information security problems. In order to achieve this goal, the Agency will be developing a high level of expertise and stimulating broad cooperation between actors from the public and private sectors.

The Agency's aim is to provide assistance and to deliver advice to the Commission and the Member States on issues related to network and information security falling within its competencies and to assist the Commission, where called upon, in the technical preparatory work for updating and developing Union legislation in the field of network and information security.

The Agency must inform the European Parliament and the Council about transfers of appropriations between operational and administrative expenditure.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

The amounts repaid in accordance with Article 23 of Commission Delegated Regulation (EU) No 1271/2013 constitute assigned revenue (point (c) of Article 21(3) of the Financial Regulation) to be charged to Item 6 6 0 0 of the general statement of revenue.

Pursuant to Article 208 of the Financial Regulation and the corresponding Articles of the framework Financial Regulation for each of the bodies set up by the Union, the role of the European Parliament and the Council has been strengthened.

The establishment plan of the Agency is set out in the Annex 'Staff' to this section.

The Union contribution for 2017 amounts to a total of EUR 10 322 000. An amount of EUR 80 000 coming from the recovery of surplus is added to the amount of EUR 10 242 000 entered in the budget.

Remarks

This appropriation is intended to cover the Office's staff and administrative expenditure (Titles 1 and 2), and operational expenditure relating to the work programme only (Title 3).

BEREC acts as a specialised and independent expert advisory body assisting the Commission and the national regulatory authorities in the implementation of the Union regulatory framework for electronic communications in order to promote a consistent regulatory approach across the Union. BEREC is neither a Union body nor does it have legal personality.

The Office is established as a Union body with legal personality, providing BEREC with professional and administrative support in carrying out the tasks conferred on it by Regulation (EC) No 1211/2009.

The Office must inform the European Parliament and the Council about transfers of appropriations between operational and administrative expenditure.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

The amounts repaid in accordance with Article 23 of Commission Delegated Regulation (EU) No 1271/2013 constitute assigned revenue (point (c) of Article 21(3) of the Financial Regulation) to be charged to Item 6 6 0 0 of the general statement of revenue.

Pursuant to Article 208 of the Financial Regulation and the corresponding Articles of the framework Financial Regulation for each of the bodies set up by the Union, the role of the European Parliament and the Council has been strengthened.

The establishment plan of the Office is set out in the Annex 'Staff' to this section.

The Union contribution for 2017 amounts to a total of EUR 4 246 000. An amount of EUR 220 000 coming from the recovery of surplus is added to the amount of EUR 4 026 000 entered in the budget.

Remarks

The main objective of this preparatory action is to facilitate the establishment of the European Centre for Press and Media Freedom (ECPMF). It will follow on from the Charter of Fundamental Rights of the European Union and European Charter for Freedom of the Press. The ECPMF will act as a 'drop-in point' for journalistic organisations, individuals and media companies facing media freedom violations. It will also act as an alarm centre for acute cases, for instance by organising support for journalists around the world who need help. It will perform or coordinate a number of actions aimed at strengthening media freedom and pluralism that could include courses for media professionals, reports, fact-finding missions, conferences and advocacy activities.

The preparatory action benefits from the work of the High Level Group on Media Freedom and Pluralism set up by the Commission and follows the recommendations in European Parliament resolution of 21 May 2013 on the EU Charter: standard settings for media freedom across the EU and the Council conclusions of November 2013 inviting the Commission to 'continue to support projects that aim at enhancing the protection of journalists and media practitioners'.

Moreover, the Leipzig-based ECPMF will implement a specific EUR 500 000 grant scheme for cross-border investigative journalism, following on from a pilot project for European research grants for journalistic investigations with a cross-border dimension. Support for such projects will strengthen the European public sphere at a time when this intensive genre has become more difficult in a changing media landscape. The scheme will be run by the ECPMF and will support investigation involving journalists from at least two Member States. Results will be published in the Member States involved. The preparatory action will establish sustainability for that type of grant by drawing on the results of the pilot project on European research grants, encouraging cross-border investigation and sharing of information.

CHAPTER 09 02 — DIGITAL SINGLE MARKET *(cont'd)*

09 02 77 *(cont'd)*

09 02 77 05 *(cont'd)*

This preparatory action follows on from the pilot project financed in 2013 and 2014 by the European Parliament, the main purpose of which was to test and apply the media pluralism monitor (MPM) developed in 2009 at the request of the Commission by a consortium of European universities.

The MPM pilot project is currently being carried out by the Centre for Media Pluralism and Media Freedom (CMPF) at the Robert Schuman Centre for Advanced Studies/European University Institute, an academic centre established in 2011 by the Commission as part of the Union's ongoing efforts to improve the protection of media pluralism and media freedom in Europe, and to assess what action needs to be taken at European or national level to further those objectives. Under the pilot project, the CMPF is testing a streamlined version of the 2009 MPM on a representative sample of nine Member States: Belgium, Bulgaria, Denmark, Estonia, France, Greece, Hungary, Italy and the United Kingdom. Those countries were selected on the basis of objective criteria so as to ensure the highest degree of neutrality and to allow broad implementation in different circumstances.

Legal basis

Preparatory action within the meaning of Article 54(2) of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1).

Remarks

These budgetary remarks are applicable to all the budget lines in this chapter.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Remarks

These remarks are applicable to all the budget lines in this chapter.

This appropriation will be used for Horizon 2020 — the Framework Programme for Research and Innovation, which covers the 2014-2020 period, and for the completion of the previous research programmes (Seventh Framework Programme and preceding framework programmes) and previous information and communication technologies programmes (ICT PSP (2007-2013) and programmes prior to 2007).

COMMISSION

TITLE 09 — COMMUNICATIONS NETWORKS, CONTENT AND TECHNOLOGY

CHAPTER 09 04 — HORIZON 2020 *(cont'd)*

Horizon 2020 shall play a central role in the implementation of the Europe 2020 flagship initiative 'Innovation Union' and other flagship initiatives, notably 'Resource-efficient Europe', 'An industrial policy for the globalisation era', and 'Digital Agenda for Europe', as well as in the development and functioning of the European Research Area. Horizon 2020 shall contribute to building an economy based on knowledge and innovation across the whole Union by leveraging sufficient additional research, development and innovation funding.

It will be carried out in order to pursue the general objectives set out in Article 179 of the Treaty on the Functioning of the European Union, in order to contribute to the creation of a society of knowledge, based on the European Research Area, i.e. supporting transnational cooperation at all levels throughout the Union, taking the dynamism, creativity and the excellence of European research to the limits of knowledge, strengthening human resources for research and for technology in Europe, quantitatively and qualitatively, and research and innovation capacities in the whole of the Union and ensuring optimum use thereof.

In Horizon 2020, gender equality is addressed as a cross-cutting issue in order to rectify imbalances between women and men and to integrate a gender dimension in research and innovation content. Particular account will be taken of the need to step up efforts to enhance the participation at all levels, including decision making, of women in research and innovation.

Also entered against these articles and items are the costs of high-level scientific and technological meetings, conferences, workshops and seminars of European interest organised by the Commission, the funding of high-level scientific and technological analyses and evaluations carried out on behalf of the Union to investigate new areas of research suitable for Union action, inter alia, in the context of the European Research Area, and measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

This appropriation will be used in accordance with Regulation (EU) No 1290/2013 of the European Parliament and of the Council of 11 December 2013 laying down the rules for the participation and dissemination in 'Horizon 2020 — the Framework Programme for Research and Innovation (2014-2020)' and repealing Regulation (EC) No 1906/2006 (OJ L 347, 20.12.2013, p. 81).

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this chapter. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

The possibility of third countries or institutes from third countries taking part in European cooperation in the field of scientific and technical research is envisaged for some of these projects. Any financial contribution entered in Items 6 0 1 3 and 6 0 1 5 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Any revenue from States taking part in European cooperation in the field of scientific and technical research will be entered in Item 6 0 1 6 of the of the statement of revenue and may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

CHAPTER 09 04 — HORIZON 2020 *(cont'd)*

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation.

Any revenue from the contributions by outside bodies to Union activities entered in Item 6 0 3 3 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Additional appropriations will be provided under Item 09 04 50 01.

Administrative appropriations of this chapter will be provided under Article 09 01 05.

09 04 01 Excellent science

Remarks

This priority of Horizon 2020 aims to reinforce and extend excellence in the Union's science base and ensure a steady stream of world-class research to secure the Union's long-term competitiveness. It will support the best ideas, develop talent within the Union, provide researchers with access to priority research infrastructure, and make the Union an attractive location for the world's best researchers. Research actions to be funded will be determined according to the need and opportunities of science, without predetermined thematic priorities. The research agenda will be set in close liaison with the scientific community and research will be funded on the basis of excellence.

Remarks

The specific objective is to foster radically new technologies by exploring novel and high-risk ideas building on scientific foundations. By providing flexible support to goal-oriented and interdisciplinary collaborative research on various scales and by adopting innovative research practices, the aim is to identify and seize opportunities of long-term benefit for citizens, the economy and society.

Activities under the 'Future and emerging technologies' specific objective shall address the entire spectrum of science-driven innovation: from bottom-up, small-scale early explorations of embryonic and fragile ideas to building new research and innovation communities around transformative emerging research areas and large and federated research initiatives built around a research agenda aiming to achieve ambitious and visionary goals.

09 04 02 ***Industrial leadership***

Remarks

This priority of Horizon 2020 aims to make the Union a more attractive location to invest in research and innovation, by promoting activities where businesses set the agenda as well as at accelerating the development of new technologies which will underpin future businesses and economic growth. It will provide major investment in key industrial technologies, maximise the growth potential of Union companies by providing them with adequate levels of finance and help innovative SMEs to grow into world-leading companies.

Remarks

The specific objective is to maintain and build global leadership in enabling technologies, which underpin competitiveness across a range of existing and emerging industries and sectors. In line with the digital single market, the specific objective of ICT research and innovation is to enable Europe to develop and exploit the opportunities brought by ICT progress for the benefits of its citizens, businesses and scientific communities.

ICT underpins innovation and competitiveness across a broad range of private and public markets and sectors, and enables scientific progress in all disciplines. Over the next decade, the transformative impact of digital technologies, ICT components, infrastructures and services will be increasingly visible in all areas of life.

Activities will strengthen the Union's scientific and technology base and insure its global leadership in ICTs, help drive and stimulate innovation through ICT use and ensure that ICT progress is rapidly transformed into benefits for Europe's citizens, businesses, industry and governments. The activities under the 'Leadership in information and communications technology' specific objective will be primarily based on research and innovation agendas defined by industry and business, together with the research community and will have a strong focus on leveraging private sector investment.

Activities cover collaboration, networking actions and national programme coordination initiatives. Also entered in this item are the costs of independent experts assisting in proposal evaluations and project reviews, the costs of events, meetings, conferences, workshops and seminars of European interest organised by the Commission, the costs of studies, analyses and evaluations, the costs of monitoring and evaluation of the specific programme and of the framework programmes and the costs of measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

09 04 03 ***Societal challenges***

Remarks

This priority of Horizon 2020 responds directly to the policy priorities and societal challenges identified in the Europe 2020 strategy. Those activities will be implemented using a challenge-based approach which brings together resources and knowledge across different fields, technologies and disciplines. The activities will cover the full cycle from research to market, with a new focus on innovation-related activities such as piloting, demonstration, test beds, support for public procurement, design, end-user driven innovation, social innovation and market take-up of innovations. The activities will support directly the corresponding sectoral policy competences at Union level.

Remarks

The vision of the eHealth action plan 2012-2020 is to utilise and develop e-health to address several of the most pressing health and health systems challenges of the first half of the twenty-first century, namely:

— to improve chronic disease and multi-morbidity (multiple concurrent disease) management and to strengthen effective prevention and health promotion practices,

— to increase the sustainability and efficiency of health systems by unlocking innovation, enhancing patient-/citizen-centric care and citizen empowerment and encouraging organisational changes,

— to foster cross-border healthcare, health security, solidarity, universality and equity,

— to improve legal and market conditions for developing e-Health products and services.

ICT-based products and services have demonstrated their capacity to help address these major challenges in the form of personalised health, telehealth and telecare solutions, service robotics for health and care, support for prolonged active and independent living and home-based care. It is also a major new growth opportunity as large new markets for ICT-based products and services emerge to address health, demographic change and well-being.

Activities will cover development and exploitation of ICT for health, well-being and 'ageing well' solutions. This will build on the emergence of underpinning technologies arising out of ICT in LEIT such as micro-nano systems, embedded systems, robotics, internet of the future and cloud technologies. It will also build on further development of security- and privacy-enhancing technologies.

The ambient assisted living research and development joint programme will also be supported to contribute to market availability and exploitation of ICT-based products and services and the ICT innovation and pilot projects will be further supported in response to the European Innovation Partnership on Active and Healthy Ageing and the eHealth 2020 action plan.

Activities will cover collaboration, networking actions and national programme coordination initiatives. Also entered in this item are the costs of independent experts assisting in proposal evaluations and project reviews, the costs of events, meetings, conferences, workshops and seminars of European interest organised by the Commission, the costs of studies, analyses and evaluations, the costs of monitoring and evaluation of the specific programme and of the framework programmes and the costs of measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

Remarks

The specific objective is to foster inclusive, innovative and reflective European societies in a context of unprecedented transformations and growing global interdependencies.

Activities will cover four main areas: ICT-enabled public sector innovation, understanding and preserving Europe's intellectual basis and cultural heritage, learning and inclusion.

ICT-enabled public sector innovation refers to the use of ICT for the creation and implementation of new processes, products, services and methods of delivery which result in significant improvements in the efficiency, effectiveness and quality of public services. The future public administrations should be digital and cross-border by default. Activities will cover fostering efficient, open and citizen-centric public services, involving the public sector as an agent for innovation and change as well as cross-border innovation measures or seamless delivery of public services.

The aim of the second challenge is 'to contribute to an understanding of Europe's intellectual basis and cultural heritage: its history and the many European and non-European influences; as an inspiration for our lives today', as well as to facilitate the access and exploitation of this cultural heritage.

The aim of the third challenge is to support the widespread adoption of ICT in schools and for training in Europe.

The fourth challenge is to get the elderly (aged 65 and above), the unemployed and low-educated persons, migrants, people in need of care, people living in remote or poorer areas, persons with disabilities, and the homeless people to fully participate in society. Activities will focus on empowering them with the necessary digital skills and providing them with access to digital technologies. Activities aiming at fostering a better consideration for inclusiveness and responsibility aspects in ICT-related innovations will also be supported.

Activities will cover collaboration, networking actions and national programme coordination initiatives. Also entered in this item are the costs of independent experts assisting in project reviews, the costs of events, meetings, conferences, workshops and seminars of European interest organised by the Commission, the costs of studies, analyses and evaluations, the costs of monitoring and evaluation of the specific programme and of the framework programmes and the costs of measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

Part of the support of the Union to the COST intergovernmental framework for transnational cooperation among researchers, engineers and scholars across Europe will also be covered from this appropriation.

Remarks

The specific objective is to foster secure societies, contributing to the protection of freedom and security of the Union and its citizens.

The integrated portfolio of activities will develop solutions to protect our society and economy against accidental or man-made disruptions of the information and communication technologies our society and economy depends on; providing solutions for end-to-end secure ICT systems, services and applications; safeguarding the human right of privacy in the digital society; providing the incentives for the industry to supply secure ICT; stimulating the uptake of secure ICT.

The aim is to ensure cyber security, trust and privacy in the digital single market, whilst at the same time improving the competitiveness of the Union's security, ICT and service industries. Another objective is to increase users' trust in their participation in the digital society and overcome citizens' concern with the disclosure of their personal information online because of security issues (e.g. internet usage for banking or purchases).

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

For decades, thousands of entrepreneurs have been drawn to Silicon Valley, a region with a unique innovation ecosystem. Many European entrepreneurs have also established their own successful companies there, generating knowledge and investing worldwide. Silicon Valley is also the birthplace of many digital start-ups and digital innovations. In the context of the Commission's Digital Single Market strategy a platform is needed to engage with Silicon Valley on the Digital Agenda, as well as to stay in touch with the Union expatriate community in Silicon Valley and build bridges between digital ecosystems in Europe and Silicon Valley. That will create synergies and raise awareness about Europe's digital agenda and its support for start-ups (e.g. the Startup Europe initiative). It will also be a channel for sharing knowledge and experience acquired in the Valley. It will also allow Europe to bring its digital agenda closer to the Union expatriate community in Silicon Valley, in the line with new reforms such as the digital single market and the Capital Markets Union. Other countries are already engaged in such activities. India regularly organises the TiECon Conference in Silicon Valley, for example, in order to build a stronger bridge between Indian experts based in Silicon Valley and their homeland. Thousands of Indian entrepreneurs and CEOs of important Indian players regularly visit TiECon. In the context of the Welcome project, the Commission supported an event on start-ups in Silicon Valley in 2015 entitled 'Startup Europe comes to Silicon Valley' (SEC2SV). The pilot project will provide for a 'Digital Europe' conference in Silicon Valley with side events and meetings connecting with Union expatriates, with a particular focus on the digital economy, digital innovation and digitisation. This will also benefit from experience gained from the 2015 initiative.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

Higher education and research are rapidly evolving. Creating new knowledge technologies means training teachers, students and researchers, as well as any individual who needs to adapt to new market demands. Many endeavours, such as citizen science, scientific discovery games and MOOCs (massive open online courses), show that — like many other sectors — education and research are rapidly evolving. In order to fully exploit the potential of this new type of learning system for the labour market, methods are needed to validate the quality of learning. Consequently, a mechanism has to be found that allows individuals to assess their competencies (creating their individual knowledge maps), the knowledge required on the labour market and the learning path that can link the two, hence providing the right content for each individual. Only by doing so can it be ensured that the right content is available to the right target group of individuals. To track the learning path, it must be possible to validate the knowledge acquired (through online certificates or badges).

Social and technological innovations of this kind can benefit all citizens regardless of their level of resources, the languages they speak, their age, their health or their cultural capital. Such an action will thus help to bridge the knowledge gap and reduce unemployment by helping unemployed young people in particular to maximise their learning and find new career opportunities.

The overall objective of this preparatory action is to demonstrate a Europe-wide ICT-based system shortening the up- and re-skilling time for European citizens, in particular the unemployed, by maximising the use of online courses and open education resources. The action will develop and deploy a technological platform integrating online services including the following modules:

— skill/competence mapping,

— tailored learning roadmaps (via educational services, including specific open educational resources),

— mechanisms for the validation of knowledge acquired.

Legal basis

Preparatory action within the meaning of Article 54(2) of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1).

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

This pilot project will prepare the European economy, the job market and educational frameworks for new digital skills by encouraging the recognition of new digital professions and by creating a common methodology that will enable Member States to be in the forefront of the new digital revolution. This will involve setting up several working groups of experts from Member States to exchange ideas and propose solutions on how the education system could prepare people for new digital skills, on defining and recognising new digital professions and on the new requirements, demands and social status associated with new digital jobs. The goal is to produce materials and proposals that will enable the Union and the Member States to prepare for this new shift in the European economy. Specific activities carried out under this pilot project will result in a consultation process among Member States and education, social services and job market stakeholders.

Legal basis

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

This pilot project will identify best European models and best practices for the use of new technologies and digital tools in education. It will improve awareness and knowledge in key target groups of the advantages of digital education and of mechanisms for developing and implementing European new-technology educational tools.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

REIsearch seeks to accelerate full use of Europe's intellectual capital to the benefit of citizens, entrepreneurs and scientists through new media tools. Growing from a successful pilot project, this preparatory action will expand the work of the platform.

The preparatory action involves expansion of an e-infrastructure platform developed around the concept of social networks which facilitates direct communication between researchers, policy makers and citizens, with the involvement of media, across the European Research Area (ERA).

Inspired by the 'societal challenges' outlined in Horizon 2020, REIsearch supports the creation of virtual clusters around key topics, creating a direct path for open dialogue between science and society.

The action promotes active interaction between science, citizens and policy makers through the involvement of European media and social networks, in order to support participation of citizens in research agenda-setting, ongoing research processes and discussions on the results and impacts of research for society, policy and further research. It supports the use of evidence-based policymaking in all Union actions, in line with the drive for better regulation. REIsearch supports science-based policymaking by affording access to scientific information across the spectrum and providing a critical mass of knowledge to inspire confidence in any users of the platform. It is a neutral platform with no bias as to national origin or disciplinary background. Discussions are linked to the scientific evidence they are based on.

09 04 77 *(cont'd)*

09 04 77 08 *(cont'd)*

Building on the successful 14-month pilot project, REIsearch will expand and grow to cover the full range of societal challenges, enabling users to engage with the issues of their choice and self-determine the clusters and direction of discussions. Alongside the platform itself, REIsearch will integrate a range of tools such as big data/social media data-mining, applications of new artificial intelligence and semantic web applications to extract information about the trends and flows of the scientific consensus and discussions.

The objectives of the preparatory action are:

— to expand and fortify the reliable, non-profit e-infrastructure (similar to social networks) launched as a beta in 2015 to promote stronger communication and dialogue across disciplines, sectors and borders,

— to analyse and assess the results of the beta launch and develop the search algorithms and data-mining mechanisms underpinning the trend-mapping capabilities,

— to further promote interoperability with existing research databases and platforms, with a single access point to research results from all countries and disciplines (interoperability) and with linkage to existing European initiatives,

— to expand the number of virtual clusters to include all the 'societal challenges' that bring together researchers, industry, citizens and policy makers to enhance collaboration on these key themes,

— to create a direct dialogue between those virtual clusters and citizens by linking in with leading European media.

The preparatory action seeks to respond to some of the needs and concerns outlined in the Digital Agenda and Horizon 2020. It also supports the underlying infrastructures of the European Research Area, which serves as a vital engine in unlocking Europe's potential for innovations that could lead to jobs and economic growth.

Current issues addressed by the action: recent ICT developments have shown how the power of social networks and e-infrastructures can help harness the potential of networks.

The problems of the existing online environment for research e-infrastructures are:

— size: the majority of existing networks are too small to go beyond a specific field and research group (according to Commission statistics the average size of an online network of researchers is around 100 users). There is a need for a large interoperable network that allows researchers and other stakeholders to find the information they are looking for across sectors and disciplines, using a familiar tool,

— reach: traditionally, networks bring together users within the same field and sector. In order to unlock Europe's innovation capacity, transdisciplinary (intersectoral and interdisciplinary) connections need to be made easier,

CHAPTER 09 04 — HORIZON 2020 *(cont'd)*

09 04 77 *(cont'd)*

09 04 77 08 *(cont'd)*

— reliability: one of the major reasons why big research networks have not been successful is that existing relations are still based on personal connections and online identities are not trusted. In order to really foster transdisciplinary connections, a system is needed in which identity verification creates a secure environment for all users,

— trust: this is a pivotal aspect for any network. Market studies suggest that a European social network/e-infrastructure would need to be developed in collaboration with stakeholders, be non-profit and have a clear intellectual property policy developed together with researchers.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

The preparatory action will seek to ensure a coherent, coordinated and sustainable approach, to secure, develop and enhance engagement of all relevant stakeholders from Eastern Europe (business, academia, research organisations and civil society) and to inform, prepare and help regional entities from this part of Europe as regards developing projects under the Commission's smart factories scheme. The action will cover those regions in Eastern Europe hard hit by deindustrialisation where no smart factories have been planned or brought into operation and those whose industrial capacity needs to be improved.

The preparatory action will also seek to identify, assess and support exploitation of the industrial potential in a selected region, and to explore its innovation potential and the scope for its expansion. It will clearly target identification of industrial competitive advantages and the potential for specialisation at regional level based on an entrepreneurship discovery process, establishing a governance structure and framework for continuous collaboration between businesses and researchers, and support for preparation of the relevant policy documents.

Remarks

Cybercrime is a growing industry. In today's extremely interconnected world, child sexual abuse material (CSAM) sadly transcends national boundaries to an extent never seen before. It is arguably one of the most heinous forms of cybercrime. In recent years the challenges of this horrific crime have grown as technology has become more advanced and the perpetrators and criminal facilitators and producers of CSAM have become more elusive. In addition, on a daily basis, hotline content analysts from the INHOPE network come across more graphic and violent content, with ever-younger victims, including pre-speech children, as the demand for new material grows.

INHOPE member hotlines offer public service value so that digital citizens can take action, by anonymously reporting suspected CSAM if they come across it when they are online. With dedicated police units overstretched globally, national hotlines are essential partners for the police in ensuring that they only receive images that are confirmed CSAM (according to the legislation in the hosting country). INHOPE hotlines have proven instrumental in the process of 'Notice-and-Takedown' across all Member States and beyond since 1999, growing the INHOPE network membership every year, while additionally serving the victim identification imperative.

Because every child has a right to a childhood free from violence and abuse and to be protected from harm, this pilot project will conduct qualitative research to identify the challenges faced by hotlines tackling child sexual abuse in Member States. This research will help create a framework of best practices that can support the development and improvement of hotlines across the Union. What may work in one Member State will not necessarily work in another: Research is therefore required to help navigate the challenges that Member States may face and determine how to work with various stakeholders such as law enforcement, ministries and industry. By means of qualitative research the most important challenges faced by national hotlines tackling child sexual abuse in Member States will be identified. The research will take the form of interviews, case studies, surveys etc. with the intention of identifying the challenges and obstacles faced by hotlines.

Remarks

The pilot project will address the potential impacts and the need for transparency in algorithms for the benefit of citizens and democracies, and to contribute to the development of the digital single market.

The pilot project could focus on the following issues:

— raising end-user awareness of the role of algorithms in digital societies;

— assessing the spectrum of potential positive and negative impacts of algorithms and reflecting on the technical and non-technical aspects leading to discriminatory practices. The assessment could highlight likely opportunities unlocked by algorithms and look at how algorithms impact and create opportunities for innovation, SMEs, privacy, free speech and the free flow of information, and how algorithmic transparency can be balanced with, for example, protecting commercial trade secrets;

— considering, on the basis of the results of the assessment and involving appropriate stakeholders, an appropriate and proportionate policy response addressing the need for transparency, trust and awareness-raising, but also the institutional and capability implications for potential government oversight. This could include monitoring and conducting sporadic tests on algorithms to ensure that algorithms respect ethical and competitive best practices and compiling basic information that is intelligible for customers and citizens. This would provide users with a better understanding of basic types of algorithmic criteria and enable them to make informed choices.

Remarks

Supporting dynamic, growth-oriented SMEs and start-ups in familiarising themselves with digital technologies so that they integrate them into their core activities represents a crucial factor in helping companies to develop their business, enhance their innovative capacity and enter new markets, thus increasing their competitiveness. The vast majority of SMEs, especially small businesses operating in traditional sectors, face great difficulties in understanding the potential of new digital technologies — such as data analysis, e-commerce, robotics, microelectronics and mechatronics — and the benefits deriving from using them in how they operate, in their production processes and in their relations with customers and clients.

CHAPTER 09 04 — HORIZON 2020 *(cont'd)*

09 04 77 *(cont'd)*

09 04 77 12 *(cont'd)*

In this context, the main objective of the pilot project is to match growth-oriented SMEs with highly skilled digital experts in order to make up for the lack of adequate technological competences in companies, equipping them with the appropriate tools and enabling their digital transformation, as an essential instrument for internationalisation either within the internal market or in third countries.

Quite often growth-oriented SMEs and start-ups cannot use their own human resources to follow the constant evolution of new technologies, even on a part-time basis. This is why matching with a digital enabler will allow companies to discover and apply suitable digital technologies, to explore new opportunities in terms of innovation and to enhance their capacity to enter new markets, including within the Union. It will also provide an opportunity for young digital enablers — experts with specific skills coming from incubator centres or universities — to make use of their technological knowledge inside an established SME.

The project will allow young highly skilled digital experts (not simply IT managers) to work in growth-oriented SMEs established in another Member State for up to six months according to the digitalisation needs of the companies.

Key elements of the pilot project are:

— support for the matching phase (company selection, job vacancies — also involving the EURES Portal — and recruitment);

— placement of digital enablers in SMEs (EU grant covering consultancy services offered by them);

— training/coaching package for SMEs and digital enablers;

— internationalisation, innovation, mobility and entrepreneurship.

The pilot project will help SMEs undergo a digital transformation.

Remarks

This preparatory action will enhance the potential of digital hubs and accelerators across Europe by making them work together, develop common projects and construct a digital community that can increase European competitiveness in this sector. The action will therefore connect all the European digital stakeholders and hubs in order to develop an integration and cooperation plan designed to generate common projects and create European digital accelerators that can use the full potential existing across Europe. The action will target the most innovative hubs and accelerators, with high added value and multiplier effect potential. The preparatory action will therefore involve identification of the network of hubs and accelerators and of their comparative advantages, assessment of their current status and their development and cooperation potential, creation of an active and animated experts and stakeholders working group, generation of a common integration plan based on concrete projects and elaboration of policy solutions that can help reinforce ties and cooperation between the European hubs and accelerators.

This preparatory action will ensure a coherent, coordinated and sustainable approach, ensure, develop and enhance engagement of all relevant stakeholders interested in the digitalisation of European industry (business, academia, research organisations and civil society) and inform, prepare and help them develop projects designed to face the new transformations.

The action will cover those regions and sectors heavily affected by digitalisation which do not have a digitalisation programme/plan and those whose industrial capacity needs to be improved.

This preparatory action will identify, assess and support exploitation of the industrial potential of the digitalisation process and explore its innovation potential and possibilities for expansion.

It will clearly target identifying the industrial competitive advantages and the potential for digital specialisation at sector level based on entrepreneurship discovery processes, establishing a governance structure and framework for continuous collaboration between businesses and researchers, and support for preparation of the necessary policy documents.

Remarks

This pilot project will develop an interactive online map summarising the existing best practices developed for better integration of vulnerable/disadvantaged groups in the Information Society across the 28 Member States.

Best practices will include information on existing tools, practices, capacities, systems, infrastructure and standards.

This pilot project will help stakeholders understand what already exists and exploit the experience derived from existing tools at local/national and European levels.

It will allow stakeholders to avoid duplication and 'reinventing the wheel', to consolidate knowledge in order to better integrate vulnerable communities in Europe and to step up information exchange between public, private and civil society stakeholders.

The project could be developed in coordination with the Global Internet Policy Observatory (GIPO) and the European Internet Forum.

Direct outcome: interactive online map hosted by an online platform mapping existing best practices.

Global overview

Aspects of the Information Society are present in all spheres of life and have become an integral part of daily activities at work, at home and when socialising.

The Internet and ICTs are a catalyst for change; they are also a perfect tool that can empower vulnerable people to fully discover the opportunities offered by the Information Society and fully enjoy their human rights as Union citizens.

ICTs can provide an essential, enabling environment for the empowerment of all, especially people living in vulnerable circumstances, and help address the demographic changes that are taking place throughout the Union.

Target groups of vulnerable people are:

— people with disabilities and the elderly,

— marginalised young people and children,

— the unemployed persons or people with social problems,

Building on the infrastructure of a start-up hub (e.g. Business Link) in Szczecin, the project will bring together entrepreneurs and Western Pomeranian university students, researchers and teachers to establish a more start-up-friendly environment.

To change what is still an unfavourable start-up market within the Union, including in Poland, a start will be made with a pilot project to build an ecosystem meeting three basic needs of the market: sharing knowledge, new ideas and know-how in order to build a start-up scheme.

CHAPTER 09 05 — CREATIVE EUROPE *(cont'd)*

09 05 01 *(cont'd)*

Remarks

This appropriation is intended to cover the following measures relating to MEDIA Sub-programme of the Creative Europe Programme:

— facilitating the acquisition and improvement of skills and competences of audiovisual professionals and the development of networks, including the use of digital technologies to ensure adaptation to market development, testing new approaches to audience development and testing new business models,

— increasing the capacity of audiovisual operators to develop European audiovisual works with a potential to circulate in the Union and beyond and to facilitate European and international co-production, including with television broadcasters,

— encouraging business-to-business exchanges by facilitating access to markets and business tools enabling audiovisual operators to increase the visibility of their projects on Union and international markets,

— supporting theatrical distribution through transnational marketing, branding, distribution and exhibition of audiovisual works,

— promoting transnational marketing, branding and distribution of audiovisual works on all other non-theatrical platforms,

— supporting audience development as a means of stimulating interest in, and improving access to, European audiovisual works, in particular through promotion, events, film literacy and festivals,

— promoting new distribution modes in order to allow the emergence of new business models.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations, according to the same ratio as between the amount authorised for expenditure on administrative management and the total appropriations entered for the programme, in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation.

Remarks

This appropriation is intended to fund general information to citizens on operations concerning the Union, for the purpose of increasing the visibility of the work of the Union institutions, the decisions taken and the stages in the building of Europe, so as to allow citizens to make full use of their right to be informed about and involved in European policies. It concerns essentially the funding or co-funding of the production and/or dissemination of multimedia (radio, TV, internet, etc.), information products, including pan-European networks made up of local and national media delivering news on European affairs, as well as the tools necessary to develop such a policy. Part of this appropriation will be used to ensure continuity of existing actions.

This appropriation also covers support expenditure such as studies, meetings, *ex post* controls, expert technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts, evaluation and audit on current or future activities, feasibility studies, publications, and the repayment of travel and related expenses of experts.

Where appropriate, the procurement and grant procedures may include the conclusion of framework partnerships, with a view to promoting a stable financing framework for the pan-European networks funded under this appropriation.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

This preparatory action is a continuation of the preparatory action entitled 'Crowdsourcing subtitling to increase circulation of European works' under a different title.

In spite of existing MEDIA support for subtitling, many European works (TV drama, documentaries, films, etc.) are often not made available, especially in relatively small Member States which do not share an official language with another country. One of the reasons for that is their relatively low commercial potential and the necessary costs, in particular the cost of providing subtitles. In this context, the action will support any innovative solution, e.g. crowdsourcing, which has the effect of decreasing the cost of producing subtitles. It will allow wider exposure, and potentially a wider audience, for European films, especially via the online services available.

Accordingly, the preparatory action will:

— test and develop innovative subtitling solutions/processes/models for producing subtitles that are more cost-effective than those currently available on the market,

— apply this innovative process to a well-designed catalogue of European works with a clear editorial line,

— support the availability of the works on online services.

Expected results of the preparatory action are:

— helping to reduce the cost of making European films available by stimulating the development of cost-effective subtitling solutions,

— increasing the supply and raising the profile of European audiovisual works online and enriching the catalogues of video-on-demand services available in the Union,

— improving the circulation of European audiovisual works within the Union and strengthening the competitiveness of the European audiovisual industry.

CHAPTER 09 05 — CREATIVE EUROPE *(cont'd)*

09 05 77 *(cont'd)*

09 05 77 04 *(cont'd)*

The main goal of the pilot project is to transform people into critical media citizens and committed media fairness advocates who can deconstruct media communication and information media policy. It will furthermore focus on improving citizens' abilities to create media works that reflect their lived experience. Conferences, workshops and training programmes will be organised and particular attention will be paid to activities to enhance the ability to distinguish information from propaganda; improve creativity for media works production; design programmes for the integration of minorities; promote the sharing of best practices among stakeholders and countries; and deliver tools to experience direct democracy. The pilot project as a whole will be focused on all kinds of media tools (radio, internet, broadcasting, newspapers), used in all kinds of environments and targeted at all age groups. Priority will be given to low-skilled people and people at risk of social marginalisation. The pilot project will be the subject of a Commission call for proposals.

The objective of the pilot project is to carry out experimental actions to increase critical thinking about the media among citizens of all ages and to test the feasibility and usefulness of such actions. Critical thinking includes, among other skills, the ability to distinguish information from propaganda, to deconstruct media communication and news media policies and to interact with social media in a mindful way. Its final goal is to improve social, cognitive, creative and technical skills in order to stimulate civic engagement and awareness of the importance of taking action and directly participating in social and democratic life.

All types of media tools should be covered, such as radio, the internet, broadcasting, newspapers and social media.

The target group is composed of citizens of all ages, with a particular focus on minorities, low-skilled people and people at risk of being socially marginalised. Its geographic implementation should cover a wide range of Member States or, ideally, all of them.

The pilot project includes a mix of social media campaigns, the dissemination and implementation of best practices, conferences, workshops and training programmes and is designed to promote one or more specific goals in the field of media literacy.

Legal basis

Pilot project within the meaning of Article 54(2) of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1).

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

The existing pilot project under Item 09 05 77 02, 'Fostering European integration through culture by providing new subtitled versions of selected European TV programmes across all Europe', has been converted into a preparatory action under Item 09 05 77 05, 'Subtitling European cultural television content throughout Europe'.

This preparatory action is a continuation of the pilot project financed in 2014 and 2015 and of the preparatory action financed in 2016 by the European Parliament, the aim of which was to ascertain whether there is a European audience for cultural programmes by providing a range of subtitled versions of selected TV programmes throughout Europe.

The pilot project financed in 2014 is currently being taken forward by ARTE, the European arts TV channel, which has been providing 600 hours a year of TV programming in four languages (French, German, English and Spanish) since October 2015 and has added Polish to those languages since November 2016.

Legal basis

Preparatory action within the meaning of Article 54(2) of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1).

TITLE 10

DIRECT RESEARCH

Remarks

These remarks apply to all the budget lines in the 'Direct research' policy area (with the exception of Chapter 10 05).

These appropriations are intended to cover expenditure relating to:

— staff occupying posts on the authorised establishment plan of the Joint Research Centre (JRC) and external personnel implementing the research and innovation programmes,

— staff-related costs such as missions, training, medical services and recruitment,

— operation and functioning of the JRC institutes, administrative support, safety and security of the sites, IT related expenditure, non-recurrent costs and major research infrastructures,

— research and support activities including exploratory research, scientific and technical equipment, subcontracting of services, etc.,

— research and scientific support tasks relating to activities entrusted to the JRC within the framework of its participation on a competitive basis in support of the Union's policies and on behalf of outside bodies.

In accordance with Article 21 of the Financial Regulation, any revenue entered in Items 6 2 2 4 and 6 2 2 5 of the statement of revenue may give rise to the provision of additional appropriations.

Miscellaneous revenue may give rise to the provision of additional appropriations to be used in Chapters 10 02, 10 03 or 10 04 or Article 10 01 05, depending on their purpose.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation.

The possibility of third countries or organisations from third countries taking part in European cooperation in the field of scientific and technical research is envisaged for some of these projects. Any financial contribution will be entered in Item 6 0 1 3 of the statement of revenue and may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

The additional appropriations will be provided under Items 10 02 50 01 and 10 03 50 01.

This appropriation is intended to cover expenditure relating to officials and temporary staff occupying posts on the authorised establishment plan of the Joint Research Centre implementing research and innovation programmes — Horizon 2020, and in particular:

— direct action, consisting of research activities, scientific and technical support activities, and exploratory research activities undertaken in the establishments of the Joint Research Centre,

— indirect action, consisting of programmes implemented as part of the Joint Research Centre's activities conducted on a competitive basis.

Staff costs comprise the basic salary, allowances, miscellaneous indemnities and contributions based on the statutory provisions, including expenses related to the entry into service, change in the place of employment and termination of service.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

COMMISSION
TITLE 10 — DIRECT RESEARCH

CHAPTER 10 02 — HORIZON 2020 — DIRECT ACTIONS OF THE JOINT RESEARCH CENTRE (JRC) IN SUPPORT OF UNION POLICIES *(cont'd)*

Remarks

These remarks are applicable to all the budget lines in this chapter.

This appropriation will be used for Horizon 2020 — the framework programme for research and innovation which covers the 2014-2020 period.

Horizon 2020 shall play a central role in the delivery of the Europe 2020 strategy for smart, sustainable and inclusive growth ('Europe 2020 strategy') by providing a common strategic framework for the Union's funding of excellent research and innovation, thus acting as a vehicle for leveraging private and public investment, creating new job opportunities and ensuring Europe's long-term sustainability, growth, economic development, social inclusion and industrial competitiveness, as well as addressing societal challenges across the Union.

In Horizon 2020, gender equality is addressed as a cross-cutting issue in order to rectify imbalances between women and men and to integrate a gender dimension in research and innovation content. Particular account will be taken of the need to step up efforts to enhance the participation at all levels, including decision-making, of women in research and innovation.

This appropriation is intended to be used in accordance with Regulation (EU) No 1290/2013 of the European Parliament and of the Council of 11 December 2013 laying down the rules for participation and dissemination in 'Horizon 2020 — the Framework Programme for Research and Innovation (2014-2020)' and repealing Regulation (EC) No 1906/2006 (OJ L 347, 20.12.2013, p. 81).

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this chapter. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Remarks

This appropriation is intended to cover the scientific and technical support and research activities carried out by the Joint Research Centre in accordance with Part VI of the specific programme implementing Horizon 2020 'Non-nuclear direct actions of the Joint Research Centre (JRC)', in order to provide customer-driven scientific and technical support to Union policies. The JRC shall focus on:

— excellent science: the JRC will carry out research to enhance the scientific evidence base for policymaking and to examine emerging fields of science and technology, including through an exploratory research programme,

CHAPTER 10 02 — HORIZON 2020 — DIRECT ACTIONS OF THE JOINT RESEARCH CENTRE (JRC) IN SUPPORT OF UNION POLICIES *(cont'd)*

10 02 01 *(cont'd)*

— industrial leadership: the JRC will contribute to competitiveness in the Union through support to the standardisation process and standards with pre-normative research, development of reference materials and measurements, and harmonisation of methodologies in five focal areas (energy; transport; the flagship initiative 'Digital Agenda for Europe'; security and safety; consumer protection). It will carry out safety assessments of new technologies in areas such as energy and transport and health and consumer protection. It will contribute to facilitating the use, standardisation and validation of space technologies and data, in particular to tackle societal challenges,

— societal challenges: the JRC will carry out research on the following themes: health, demographic change and well-being; food security, sustainable agriculture and forestry, marine, maritime and inland water research and the bio-economy; secure, clean and efficient energy; smart, green and integrated transport; climate action, environment, resource efficiency and raw materials; Europe in a changing world — inclusive, innovative and reflective societies; secure societies — protecting freedom and security of Europe and its citizens.

This appropriation covers specific expenditure relating to research and support activities, including the purchase of scientific and technical equipment, subcontracting of scientific and technical services, access to information, acquisition of consumables, etc. This includes expenditure on scientific infrastructure directly incurred for the projects concerned.

It also covers expenditure of any type concerning research and scientific support tasks relating to activities under this article entrusted to the Joint Research Centre within the framework of its participation on a competitive basis in support of the Union policies and on behalf of outside bodies.
