COMMISSION IMPLEMENTING REGULATION (EU) 2019/1162

of 1 July 2019

amending Annexes I and II to Regulation (EU) No 206/2010 as regards the models of veterinary certificates BOV-X, OVI-X, OVI-Y and RUM and the lists of third countries, territories or parts thereof from which the introduction into the Union of certain ungulates and of fresh meat is authorised

(Text with EEA relevance)

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Council Directive 2002/99/EC of 16 December 2002 laying down the animal health rules governing the production, processing, distribution and introduction of products of animal origin for human consumption ⁽¹⁾, and in particular Article 8(1) and (4), Article 9(2)(b) and (4)(b) thereof,

Having regard to Council Directive 2004/68/EC of 26 April 2004 laying down animal health rules for the importation into and transit through the Community of certain live ungulate animals, amending Directives 90/426/EEC and 92/65/EEC and repealing Directive 72/462/EEC ⁽²⁾, and in particular Article 6(1), Article 7(e) and Article 13(1)(e) thereof,

Whereas:

- (1) Commission Regulation (EU) No 206/2010 ⁽³⁾ lays down, inter alia, the veterinary certification requirements for the introduction into the Union of certain consignments of live animals, including consignments of ungulates. Part 1 of Annex I to that Regulation establishes a list of third countries, territories or parts thereof from which such consignments may be imported into the Union, as well as the specific conditions for introduction of such consignments from certain third countries.
- (2) Part 2 of Annex I to Regulation (EU) No 206/2010 sets out the models of veterinary certificates for domestic bovine animals (including *Bubalus* and *Bison* species and their cross-breeds) intended for breeding and/or production after importation (BOV-X), for domestic ovine and caprine animals (*Ovis aries* and *Capra hircus*) intended for breeding and/or production after importation (OVI-X), for domestic ovine and caprine animals (*Ovis aries* and *Capra hircus*) intended for immediate slaughter after importation (OVI-Y) and for animals of the order *Artiodactyla* (excluding bovine animals (including *Bubalus* and *Bison* species and their cross-breeds), *Ovis aries*, *Capra hircus*, *Suidae* and *Tayassuidae*), and of the families *Rhinocerotidae* and *Elephantidae* (RUM). Those certificates include guarantees for epizootic haemorrhagic disease which is a viral disease of ruminants, non-contagious and transmitted by certain species of *Culicoides* midges.
- (3) Canada (CA-0) is listed in Part 1 of Annex I to Regulation (EU) No 206/2010 as authorised to import into the Union consignments of certain ungulates in accordance with the models of veterinary certificates POR-X, BOV-X, OVI-X, OVI-Y and RUM.

⁽¹⁾ OJ L 18, 23.1.2003, p. 11.

⁽²⁾ OJ L 139, 30.4.2004, p. 321.

⁽³⁾ Commission Regulation (EU) No 206/2010 of 12 March 2010 laying down lists of third countries, territories or parts thereof authorised for the introduction into the European Union of certain animals and fresh meat and the veterinary certification requirements (OJ L 73, 20.3.2010, p. 1).

- (4) Canada has requested to be recognised as being seasonally free of epizootic haemorrhagic disease. To that aim, Canada provided information in 2016 demonstrating that the weather conditions in Canada between 1 November and 15 May do not allow the circulation of *Culicoides* species, which are the transmission vectors for both bluetongue virus and epizootic haemorrhagic disease virus.
- (5) The information provided by Canada was considered by the Commission to be in accordance with the standards of the World Organisation for Animal Health (OIE) for demonstration of seasonal freedom of bluetongue and equally to the Union requirements ⁽⁴⁾ that apply to movements of susceptible animals within the Union. Canada was therefore granted recognition of the bluetongue seasonally free status with a bluetongue free period between 1 November and 15 May by Commission Implementing Regulation (EU) 2017/384 ⁽⁵⁾.
- (6) The standards of the World Organisation for Animal Health (OIE) for demonstration of seasonal freedom of epizootic haemorrhagic disease are equivalent to those for bluetongue. Canada should be therefore granted recognition of epizootic haemorrhagic disease free status for an equivalent period between 1 November and 15 May.
- (7) The list and specific conditions set out in Part 1 of Annex I to Regulation (EU) No 206/2010 should therefore be amended in relation to the introduction into the Union of certain ungulates which are susceptible to epizootic haemorrhagic disease, from a country or territory with epizootic haemorrhagic disease seasonally free status and furthermore the recognition of such free status for Canada with a epizootic haemorrhagic disease free period between 1 November and 15 May.
- (8) The models of veterinary certificates BOV-X, OVI-X, OVI-Y and RUM set out in Part 2 of that Annex should be also amended in order to introduce the relevant animal health attestations for animals which originate from a epizootic haemorrhagic disease seasonally free country or territory.
- (9) Regulation (EU) No 206/2010 lays down as well the specific conditions for the introduction into the Union of consignments of fresh meat of certain ungulates. Annex II to that Regulation establishes a list of third countries, territories and parts thereof from which such consignments may be imported into the Union, as well as the model of veterinary certificates corresponding to the consignments concerned and the specific conditions required to import from certain third countries.
- (10) Currently, only one of the territories of Argentina listed in Part 1 of Annex II of Regulation (EU) No 206/2010, AR-2, is authorised to export fresh bone-in meat from bovine and ovine animals as well as from farmed and wild game ruminants to the Union. The competent authorities of Argentina requested the Commission to authorise another part of its territory known as 'Patagonia Norte A', for introduction into the Union of fresh bone-in meat of certain ungulates. This region, which consists of parts of the provinces of Neuquén, Río Negro and Buenos Aires that were previously in AR-1, was recognised as free from foot and mouth disease (FMD) without vaccination by the OIE in 2013 ⁽⁶⁾.
- (11) The Commission services carried out an audit in March 2018 to evaluate whether the surveillance and regionalisation measures for foot and mouth disease in the 'Patagonia Norte A' zone provide adequate guarantees for the introduction into the Union fresh bovine, ovine, farmed and wild ruminant meat not subject to deboning and maturation. The outcome of the audit was favourable.
- (12) Part 1 of Annex II to Regulation (EU) No 206/2010 should therefore be amended accordingly in order to update the regionalisation of Argentina and to authorise a new part of the territory of Argentina to introduce fresh bone-in meat of certain ungulates into the Union.
- (13) Furthermore, imports of fresh meat of wild ungulates into the Union in accordance with the model of veterinary certificate RUW, are authorised from the three FMD-free listed territories of Argentina, whether vaccination is practised or not. Where vaccination is practised, the supplementary guarantees regarding maturation, pH measurement and deboning of fresh meat are applicable. However, a footnote was included in the list of Part 1 of Annex II to Regulation (EU) No 206/2010 to exclude from that authorisation certain departments of the Province of Corrientes, where FMD outbreaks were reported in 2006. The competent authorities of Argentina

⁽⁴⁾ Commission Regulation (EC) No 1266/2007 of 26 October 2007 on implementing rules for Council Directive 2000/75/EC as regards the control, monitoring, surveillance and restrictions on movements of certain animals of susceptible species in relation to bluetongue (OJ L 283, 27.10.2007, p. 37).

⁽⁵⁾ Commission Implementing Regulation (EU) 2017/384 of 2 March 2017 amending Annexes I and II to Regulation (EU) No 206/2010 as regards the models of veterinary certificates BOV-X, OVI-X, OVI-Y and RUM and the lists of third countries, territories or parts thereof from which the introduction into the Union of certain ungulates and of fresh meat is authorised (OJ L 59, 7.3.2017, p. 3).

⁽⁶⁾ http://www.oie.int/fileadmin/Home/eng/Animal_Health_in_the_World/map/A_Argentina.jpg

have submitted a request to the Commission to delete such footnote in order to reflect the current animal health situation in those departments. The Commission considers that the current animal health situation in those departments justifies the deletion of that footnote. Part 1 of Annex II to Regulation (EU) No 206/2010 should therefore be amended accordingly to delete the footnote concerned.

- (14) Following United Nations (UN) facilitation, Athens and Skopje reached a bilateral agreement ('Prespa agreement') in June 2018, to change the UN provisional reference for the former Yugoslav Republic of Macedonia. This agreement has now been ratified by both countries and the Republic of North Macedonia has formally notified the EU about its entry into force.
- (15) Annexes I and II to Regulation (EU) No 206/2010 should therefore be amended accordingly.
- (16) The measures provided for in this Regulation are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,

HAS ADOPTED THIS REGULATION:

Article 1

Annexes I and II to Regulation (EU) No 206/2010 are amended in accordance with the Annex to this Regulation.

Article 2

This Regulation shall enter into force on the twentieth day following that of its publication in the *Official Journal of the European Union*.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 1 July 2019.

For the Commission
The President
Jean-Claude JUNCKER

ANNEX

(1) Annex I to Regulation (EU) No 206/2010 is amended as follows:

(a) Part 1 is amended as follows:

(i) the line for MK-0 is replaced by the following:

MK-The Republic of North Macedonia	MK-0	Whole country			I'
------------------------------------	------	---------------	--	--	----

(ii) the following footnote is deleted:

'(****) The former Yugoslav Republic of Macedonia: the definitive nomenclature for this country will be agreed following current negotiations at UN level';

(iii) the footnote (*****) is replaced with the following:

'Canada (*****): seasonally free period for bluetongue and epizootic haemorrhagic disease is between 1 November and 15 May, in accordance with the OIE Terrestrial Animal Health Code.';

(iv) in *Specific Conditions*, the fourth subparagraph of the specific condition 'I' is replaced with the following:

'The certificate must be stamped at the exit point of the Union by the competent veterinary authority prior to transiting one or more third countries, with the following wording "ONLY FOR TRANSIT BETWEEN DIFFERENT PARTS OF THE EUROPEAN UNION VIA THE REPUBLIC OF NORTH MACEDONIA/MONTENEGRO/SERBIA (*) (**)"';

(v) in *Specific Conditions*, the specific condition 'XIII' is replaced by the following:

"**XIII**": territory recognised as having an official bluetongue and epizootic haemorrhagic disease seasonally free status, for the purpose of exports to the Union of live animals certified according to the model of veterinary certificate BOV-X, OVI-X, OVI-Y or RUM.'

(b) Part 2 is amended as follows:

(i) the model of veterinary certificate BOV-X is replaced by the following:

II.1 Public Health Attestation

I, the undersigned official veterinarian, hereby certify, that the animals described in this certificate:

II.1.1. come from holdings which have been free from any official prohibition on health grounds, for the past 42 days in the case of brucellosis, for the past 30 days in the case of anthrax and for the past six months in the case of rabies, and, have not been in contact with animals from holdings which did not satisfy these conditions;

II.1.2. have not received:

- any stilbene or thyrostatic substances,
- estrogenic, androgenic, gestagenic or β - agonist substances for purposes other than therapeutic or zootechnical treatment (as defined in Directive 96/22/EC);

II.1.3. with regard to bovine spongiform encephalopathy (BSE):

(a) the animals are identified by a permanent identification system enabling them to be traced back to the dam and herd of origin, and they have not been exposed to the following animals:

- (i) any BSE cases,
- (ii) bovine animals which, during their first year of life, were reared with the BSE cases during their first year of life, and which investigation has shown consumed the same potentially contaminated feed during that period, or
- (iii) if the results of the investigation referred to in indent (ii) are inconclusive, bovine animals born in the same herd as, and within 12 months of the birth of, the BSE cases;

(¹) (²) either [(b) if there have been BSE indigenous cases in the country concerned, the animals were born after the date from which the ban on the feeding of ruminants with meat-and-bone meal and greaves derived from ruminants, as defined in the Terrestrial Animal Health Code of the World Organisation for Animal Health, was effectively enforced or after the date of birth of the last BSE indigenous case if born after the date of the feed ban.]

(¹) (³) or [(b) the animals were born after the date from which the ban on the feeding of ruminants with meat-and-bone meal and greaves derived from ruminants as defined in the Terrestrial Animal Health Code of the World Organisation for Animal Health, was effectively enforced or after the date of birth of the last BSE indigenous case if born after the date of the feed ban.]

(¹) (⁴) or [(b) the animals were born at least two years after the date from which the ban on the feeding of ruminants with meat-and-bone meal and greaves derived from ruminants, as defined in the Terrestrial Animal Health Code of the World Organisation for Animal Health, was effectively enforced or after the date of birth of the last BSE indigenous case if born after the date of the feed ban.]

II.2. Animal Health attestation:

I, the undersigned official veterinarian, hereby certify, that the animals described above meet the following requirements:

II.2.1. they come from the territory with code: (⁵) which, at the date of issuing this certificate:

(¹) either [(a) has been free for 24 months from foot-and-mouth disease,]

(¹) or [(a) has been considered free from foot-and-mouth disease since (dd/mm/yyyy), without having had cases/outbreaks after that date, and authorised to export these animals by Commission Implementing Regulation (EU) No ----/---, of (dd/mm/yyyy).]

Notes

This certificate is meant for domestic bovine animals (including Bubalus and Bison species and their cross-breeds) intended for breeding and/or production.

After importation the animals must be conveyed without delay to the holding of destination where they shall remain for a minimum period of 30 days before further movement outside the holding, except in the case of a dispatch to a slaughterhouse.

Part I:

- Box reference I.8: Provide the code of territory as appearing in Part 1 of Annex I to Regulation (EU) No 206/2010.
- Box reference I.13: The assembly centre, if any, must fulfil the conditions for its approval, as laid down in Part 5 of Annex I to Regulation (EU) No 206/2010.
- Box reference I.15: Registration number (railway wagons or container and lorries), flight number (aircraft) or name (ship) is to be provided. In case of unloading and reloading, the consignor must inform the BIP of entry into the Union.
- Box reference I.23: For containers or boxes, the container number and the seal number (if applicable) should be included.
- Box reference I.28: Identification system: The animals must bear:
 - An individual number which permits tracing of their premises of origin. Specify the identification system (such as tag, tattoos, brand, chip, transponder).
 - An ear tag that includes the ISO code of the exporting country. The individual number must permit tracing of their premises of origin.
 - Species: Select amongst "Bos", "Bison" and "Bubalus" as appropriate.
 - Age: Date of birth (dd/mm/yyyy).
 - Sex: (M = male, F = female, C = castrated).
 - Breed: select purebred, crossbreed.

Part II:

(¹) Keep as appropriate.

(²) Only if the animals were born and continuously reared in a country or region or countries or regions classified in accordance with Decision 2007/453/EC as countries or regions posing a negligible BSE risk.

II.1 Public Health Attestation

I, the undersigned official veterinarian, hereby certify, that the animals described in this certificate:

II.1.1. come from holdings which have been free from any official prohibition on health grounds, for the last 42 days in the case of brucellosis, for the last 30 days in the case of anthrax, for the last six months in the case of rabies, and, have not been in contact with animals from holdings which did not comply with these conditions;

II.1.2. have not received:

- any stilbene or thyrostatic substances,
- estrogenic, androgenic, gestagenic or β - agonist substances for purposes other than therapeutic or zootechnical treatment (as defined in Directive 96/22/EC);

II.2. Animal Health attestation

I, the undersigned official veterinarian, hereby certify, that the animals described above meet the following requirements:

II.2.1. they come from the territory with code: (1) which, at the date of issuing this certificate:

(2) *either* [(a) has been free for 24 months from foot-and-mouth disease,]

(2) *or* [(a) has been considered free from foot-and-mouth disease since (dd/mm/yyyy), without having had cases/outbreaks after that date, and authorised to export these animals by Commission Implementing Regulation (EU) No ----/----, of (dd/mm/yyyy),]

(b) has been free for 12 months from rinderpest, Rift valley fever, peste des petits ruminants, sheep pox and goat pox and contagious caprine pleuropneumonia and for 6 months from vesicular stomatitis,

(c) where during the last 12 months, no vaccination against the diseases mentioned in points (a), (b) and epizootic haemorrhagic disease has been carried out and imports of domestic cloven-hoofed animals vaccinated against these diseases are not permitted;]

(2) *either* [(d) has been free for 24 months from bluetongue and 12 months for epizootic haemorrhagic disease;]

(2) (7) *or* [(d) has been free for 24 months from bluetongue, and the animals have reacted negatively to a serological test for the detection of antibody for bluetongue and epizootic haemorrhagic disease, carried out on two occasions on samples of blood taken at the beginning of the isolation/quarantine period and at least 28 days later, on (dd/mm/yyyy) and on (dd/mm/yyyy), the second of which must have been taken within 10 days before export;]

(2) *or* [(d) has been free for 12 months from epizootic haemorrhagic disease and has not been free for 24 months from bluetongue, and the animals have been vaccinated with an inactivated vaccine, at least 60 days before the date of dispatch to the Union, against all bluetongue serotype/s ... (insert serotype/s) which are those present in the source population as demonstrated through a surveillance programme (8) in an area with a 150 km radius around the holding(s) of origin described under box reference I.11., and the animals are still within the immunity period of time guaranteed in the specifications of the vaccine;]

(2) (10) *or* [(d) is seasonally free of bluetongue and epizootic haemorrhagic disease and the animals have been kept during the seasonally free period in the seasonally free territory since birth or for at least 60 days prior to shipment;]

(2) (10) *or* [(d) is seasonally free of bluetongue and epizootic haemorrhagic disease and the animals have been kept during the seasonally free period in the seasonally free territory for at least 28 days prior to shipment, and have reacted negatively to a serological test according to the OIE Manual for detection of antibodies for bluetongue and epizootic haemorrhagic disease, carried out at least 28 days after the start of the residence period;]

COMMISSION IMPLEMENTING DECISION (EU) 2019/1166**of 28 June 2019****amending Implementing Decision (EU) 2018/1113 as regards the representative of the
authorisation holder***(notified under document C(2019) 4604)***(Only the Dutch and German texts are authentic)****(Text with EEA relevance)**

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EC) No 1829/2003 of the European Parliament and of the Council of 22 September 2003 on genetically modified food and feed ⁽¹⁾, and in particular to Article 11(3) and Article 23(3) thereof,

Whereas:

- (1) Monsanto Europe S.A./N.V., Belgium is the representative in the Union of Monsanto Company, based in the United States, pursuant to Commission Implementing Decision (EU) 2018/1113 ⁽²⁾ for authorisation for genetically modified food and feed under Regulation (EC) No 1829/2003. The co-holders of this authorisation are Monsanto Company, based in the United States, and KWS SAAT SE, based in Germany.
- (2) By letter dated 27 August 2018, the Commission was informed that the representative in the Union of Monsanto Company for this authorisation, Monsanto Europe S.A./N.V., had converted its legal form and had changed its name to Bayer Agriculture BVBA, Belgium. By letter of 4 September 2018 the Commission informed Bayer Agriculture BVBA that the authorisations concerned would need to be amended accordingly.
- (3) On 14 February 2019, KWS SAAT SE, Germany confirmed in writing its agreement with the change of the representative.
- (4) The implementation of the requested change requires the amendment of Implementing Decision (EU) 2018/1113.
- (5) The proposed amendments to the authorisation decisions are purely administrative in nature and do not entail a new assessment of the products concerned.
- (6) The measures provided for in this Decision are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed.

HAS ADOPTED THIS DECISION:

Article 1

Implementing Decision (EU) 2018/1113 is amended as follows:

- (1) the text of point (b) of Article 6(1) is replaced by the following 'Monsanto Company, United States of America, represented by Bayer Agriculture BVBA, Belgium';
- (2) the text of point (b) of Article 8 is replaced by the following 'Bayer Agriculture BVBA, Scheldelaan 460, 2040 Antwerp, Belgium';

COMMISSION IMPLEMENTING DECISION (EU) 2019/1167**of 28 June 2019****amending Implementing Decision (EU) 2017/2453 as regards the authorisation holders and the representatives***(notified under document C(2019) 4610)***(Only the Dutch and German texts are authentic)****(Text with EEA relevance)**

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EC) No 1829/2003 of the European Parliament and of the Council of 22 September 2003 on genetically modified food and feed ⁽¹⁾, and in particular Article 9(2) and Article 21(2) thereof,

Whereas:

- (1) Bayer CropScience N.V., based in Belgium, is a representative of Bayer CropScience LP, based in the United States, and an authorisation holder for the genetically modified oilseed rapes authorised by the Commission Implementing Decision (EU) 2017/2453 ⁽²⁾.
- (2) Monsanto Europe S.A., based in Belgium is a representative of Monsanto Company, based in the United States, and an authorisation holder for the genetically modified oilseed rapes authorised by that Implementing Decision.
- (3) By letter dated 1 August 2018, Bayer CropScience N.V., based in Belgium and Bayer CropScience LP, based in the United States, requested that the Commission transfers their rights and obligations pertaining to all their authorisations and pending applications for genetically modified products, to BASF Agricultural Solutions Seed US LLC, based in the United States. By letter dated 19 October 2018, BASF Agricultural Solutions Seed US LLC confirmed its agreement with this transfer and authorised BASF SE, based in Germany, to act as its representative in the Union.
- (4) By letter dated 27 August 2018, Monsanto Europe N.V., based in Belgium, informed the Commission that Monsanto Europe S.A./N.V. Belgium converted its legal form and changed its name to 'Bayer Agriculture BVBA', based in Belgium.
- (5) Implementing Decision (EU) 2017/2453 should therefore be amended accordingly.
- (6) The proposed amendments to the authorisation decision are purely administrative in nature and do not entail a new assessment of the products concerned.
