of 20 April 2021

amending Decision 2011/163/EU on the approval of plans submitted by third countries in accordance with Article 29 of Council Directive 96/23/EC*(notified under document C(2021) 2587)***(Text with EEA relevance)**

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Council Directive 96/23/EC of 29 April 1996 on measures to monitor certain substances and residues thereof in live animals and animal products and repealing Directives 85/358/EEC and 86/469/EEC and Decisions 89/187/EEC and 91/664/EEC ⁽¹⁾, and in particular the fourth subparagraph of Article 29(1) and Article 29(2) thereof,

Whereas:

- (1) Article 29 (1) of Directive 96/23/EC requires that third countries from which Member States are authorised to import animals and animal products covered by that Directive submit residue monitoring plans providing required guarantees ('the plans'). The plans should cover at least the groups of residues and substances listed in Annex I to that Directive.
- (2) Commission Decision 2011/163/EU ⁽²⁾ approves the plans submitted by certain third countries concerning specified animals and animal products listed in the Annex to that Decision ('the list').
- (3) Albania has submitted to the Commission a plan for aquaculture. That plan provides sufficient guarantees and should be approved. Since that plan does not cover crustaceans, a specification excluding crustaceans from the approval for aquaculture should be added to the list.
- (4) Bosnia and Herzegovina has submitted to the Commission a plan for aquaculture, which does not cover crustaceans. Therefore, a specification excluding crustaceans from the approval for aquaculture should be added to the list.
- (5) The Falkland Islands have submitted to the Commission a plan for aquaculture, which does not cover crustaceans and a plan for small ruminants, which only covers ovine animals. Therefore, a specification excluding crustaceans from the approval for aquaculture and limiting the approval to ovine animals for small ruminants should be added to the list.
- (6) The Faroes have submitted to the Commission a plan for aquaculture, which does not cover crustaceans. Therefore, a specification excluding crustaceans from the approval for aquaculture should be added to the list.

⁽²⁾ Commission Decision 2011/163/EU of 16 March 2011 on the approval of plans submitted by third countries in accordance with Article 29 of Council Directive 96/23/EC (OJ L 70, 17.3.2011, p. 40).

- (7) Guatemala has submitted to the Commission a plan for aquaculture, which does not cover finfish. Therefore, a specification excluding finfish from the approval for aquaculture should be added to the list.
- (8) Iran has submitted to the Commission a plan for aquaculture, which does not cover finfish. Therefore, a specification excluding finfish from the approval for aquaculture should be added to the list.
- (9) Kyrgyzstan is currently included in the approval list for honey. That third country has submitted to the Commission a plan for honey that does not provide sufficient guarantees. Therefore, the entry for Kyrgyzstan regarding honey should be deleted from the list.
- (10) Moldova has submitted to the Commission a plan for aquaculture, which does not cover crustaceans, and a plan for milk. The milk plan provides sufficient guarantees and should be approved. Therefore, a specification excluding crustaceans from the approval for aquaculture should be added to the list, and an entry for Moldova for milk should be included in the list.
- (11) Montenegro has submitted to the Commission a plan for aquaculture, which does not cover crustaceans, and a plan for small ruminants, which only covers ovine animals. Therefore, a specification excluding crustaceans from the approval for aquaculture and limiting the approval to ovine animals for small ruminants should be added to the list.
- (12) Morocco has submitted to the Commission a plan for aquaculture, which does not cover crustaceans. Therefore, a specification excluding crustaceans from the approval for aquaculture should be added to the list.
- (13) Mozambique has submitted to the Commission a plan for aquaculture, which does not cover finfish. Therefore, a specification excluding finfish from the approval for aquaculture should be added to the list.
- (14) Namibia has submitted to the Commission a plan for wild game and for small ruminants, which only covers ovine animals. That plan provides sufficient guarantees and should be approved. An entry for Namibia for wild game and ovine animals should be included in the list. However, a specification limiting the approval to ovine animals for small ruminants should be added to the list.
- (15) Nicaragua has submitted to the Commission a plan for aquaculture, which does not cover finfish. Therefore, a specification excluding finfish from the approval for aquaculture should be added to the list.

- (21) Togo has submitted to the Commission a plan for honey. That plan provides sufficient guarantees and should be approved. An entry for Togo for honey should therefore be included in the list.

An entry for Colombia regarding eggs with the appropriate footnote should therefore be added to the list.
